43 DISTRIBUTION LIBRARIES SERVING THE NATION

THESE SALES- MEN FOR "HIRE"

Any one of these "sales makers" will be valuable additions to your sales staff. Take a look at their qualifications:

- 1) After initial investment, they require no salaries, expense accounts, sick leaves or vacations.
- 2) They make every sales point you want made . . . the way you want it made (every time, too!).
- 3) They never tire . . . as persuasive on last call of day as first in A.M.

No, we haven't found a sales robot to replace the salesman. But, we have designed a line of sales "assistants" that will help your present sales force put their sales curve into orbit. Why not look into these Viewlex "sales makers" for your staff now. Contact your local Viewlex franchised A-V dealer or use coupon

SALESTALK

Slide and filmstrip projector, 4 speed record player, 9" x 12" screen . . . all in a smart attache case.

\$10950

TABLETALK

35mm filmstrip viewer, 4 speed record player, rear projection 7" x 9" screen all in luggage type case

\$11450

40 Broadway, Holbrook, Long Island, New York

- () Please send complete information on Viewlex "sales makers."
- () Please have Viewlex A-V Consultant contact me to demonstrate which Viewlex "sales maker" best meets my requirements.

7th Industrial A-V Show Opens October 8th

A-V Workshop, Film Festival Key Events on New York Program

THE PRIVATELY-SPONSORED 3rd International Film Festival will be held in New York City October 8 to 10th, according to its sponsor, Herbert Rosen. Held in conjunction with his 7th Annual Industrial Film and Audio-Visual Exhibition at the Barbizon Plaza Hotel, the event will include awards for industrial films and television commercials, both on film and videotape.

"Television public service films, a new category this year, join commercials and industrial films among the entry divisions," notes Mr. Rosen. A panel of 15 judges appraises these entries, with the winners to be announced at a presentation luncheon on October 10th. Entry fees are charged by the sponsor.

Talk on "Passports for Ideas"

During the lecture program, Wilbert H. Pearson, Chief, International Communications Media Staff, U.S. Information Agency, will head the list of guest speakers. He will talk on "Passport for Ideas: How the Government Helps Films to Go Abroad." An October 8th panel discussion on "8mm Users Speak Out" will be moderated by Everett Hall, President of Cine Magnetics, Inc. of New York.

Bernard Barnett, Marketing Manager of Manhattan Color Laboratories, will conduct an "A-V Workshop Seminar" at which John J. Harm, manager of the New York Photographic Division, Curtis Publishing Company, will describe a new panoramic filmstrip technique employed by The Ladies Home Journal. Arnold J. Jones, A-V specialist for the Michigan Blue Cross-Blue Shield Plan, Detroit, will show "How to Prepare an Effective Slide Presentation." Ed Gaskell, senior advertising assistant, The Equitable Life As-

John J. Harm, Manager, New York Photo Division, Curtis Publishing Co.

urance Society, will explain "Economical Movie Production Technique Using Photography and Camera Movement."

\$10 Fee for A-V Workshop

A registration fee of \$10 is charged for attendance at this four-hour A-V Workshop Seminar; admittance to other talks is free. Trophies will be presented at the noon luncheon on Thursday, October 10th. Guest tickets for the luncheon and details on other events, entries, etc. can be obtained from the sponsor, Industrial Exhibitions, Inc., 17 East 45th Street, New York 17.

Pell Heads Klaeger Subsidiary, Commercial Film Distributors

☆ Robert H. Klaeger & Associates, Inc., New York, has formed Commercial Film Distributors, Inc., a subsidiary company specializing in print procurement and distribution. The company, which will have its sales and administrative offices at 35 West 45th Street, New York, is under the management of Robert B. Pell, vice-president and general manager.

"TARGET YOU!"

The first motion picture for use by Plant Security Officers—the how and why of security, directed to all personnel—is now available.

Ronald Reagan tells with complete conviction the hazards of espionage, with the "TARGET YOU!"

Historic documentary footage adds impact.

17 minutes, in 16mm sound and color, "TARGET YOU!" was produced for The Martin Marietta Company by F. K. Rockett Productions. By special arrangement with the sponsor, prints are now offered for general use, and are available from the producer at \$135.00 each, plus shipping charge.

AUDIO-VISUALS ABROAD & AT HOME

*Business Screen's European Editor to
Address Engineering Society in October*

In his talk at the forthcoming Society of Motion Picture & Television Engineers' Convention (in Boston, October 13-18th) our European Editor, Peter Rigg, opens with this interesting comment:

"Any new State which plans a mass education program to explain to illiterate rural populations what their government is trying to do must use motion pictures. This has been recognized by nearly all the emergent countries of Africa, Asia and South America as essential to their economic and social development and as the most effective way of fighting extremism, racial intolerance and harmful political campaigns.

"The task of the motion picture equipment designer is to anticipate the requirements of new users of this equipment. Let us try to erect a few signposts of enquiry into this international field . . ."

N.A.M. Audio-Visual Service Produces Personalized Slide Series for Managers

Divisional managers of the National Association of Manufacturers are regularly called upon to give talks to business executive groups on such subjects as the NAM at work, economic education, or other similar topics. To aid these speakers in presenting their talks most effectively, series of slide programs have been prepared by Janet R. Wilkins, NAM Producer of Audio-Visual Materials, which generally conforms to proposed outlines of speeches usually given by the managers.

However, to personalize these talks, Miss Wilkins regularly offers quick service on additional slides — titles, charts, or other available materials — which the Division Managers may wish to use. Thus, instead of an entirely "canned" presentation, each talk is personalized by the speaker according to the way he expresses himself best, and the visual part of the presentation is unique in seeming to be prepared exclusively for each audience.

Thus far this year, 200 individual versions of the talk, *NAM at Work in 1963*, have been made for use by staff members.

ARRIFLEX at work — ONE OF A SERIES *

OFFSET PERISCOPE FINDER FOR ARRIFLEX CAMERA PROVED INVALUABLE COMPOSING SCENES WHERE UPSIDE DOWN CAR IS RIGHT SIDE UP AND THE SCENE ITSELF IS UPSIDE DOWN

ARRIFLEX® covers every angle in upside-down film!

The adaptable Arriflex is no stranger to unusual assignments... and photographing an automobile being driven into a service station **upside down** was one of them! This strange procedure was required for "Look at It This Way," an industrial film produced by Video Films, Detroit, for The Walker Marketing Corporation of Racine, Wisconsin. Employing a variety of "magical" effects, the presentation called for a trained magician in the lead role. Aimed at increasing muffler sales to mechanically-minded audiences, the picture was developed through honest ingenuity — rather than relying on obvious optical effects and other trick shots. Director Paul Lohman relied heavily on Arriflex's famed versatility in the production of this unusual film.

The specially-built car was often inverted, riding on three concealed wheels in the roof. When the script called for the car to be right side up and the scene itself reversed, the Arriflex mirror reflex viewfinder proved invaluable in framing the scene. Its light weight and compact design permitted fastening the camera to a hi-hat and pan-head mounted at right angles to the tripod head, for 180° revolution on the lens axis. And all through a prolonged schedule confronted by taxing situations, Arriflex completed this unusually complex film without a hitch! Topsy-turvy or right side up — hand held, rigidly clamped or rotating in all directions — Arriflex made "magic" with its usual stellar performance — In studio or on location, it will do the same for you!

From the microscope to the missile range... from spot locations to sound stages... Arriflex professional motion picture cameras are the dominant choice of filmmakers in science, industry, and entertainment. They're lightweight, rugged, tremendously versatile — uniquely suited to a range of applications virtually without limits. Here are some of the features that give Arriflex cameras their remarkable capabilities:

- MIRROR-SHUTTER REFLEX VIEWFINDER • REGISTRATION-PIN FILM MOVEMENT • 21°-DIVERGENCE 3-LENS TURRET • CONTOUR HAND GRIP • FRAMES-PER-SECOND TACHOMETER • COMPLETE ACCESSORY SYSTEM... lenses, standard and special-purpose electric drives, power supplies, time-lapse equipment, film magazines, sound blimps, tripods.

WRITE FOR NEW CATALOG.

*YOU ARE INVITED to send us a description of your special use of Arriflex equipment.

Exclusive Reports by Business Screen Staff Correspondents

☆ The 15 films representing Belgium reflect the international character of the country which is now the headquarters of the Common Market. Training films for Italian workers in Belgium, international atomic energy cooperation, international motorways are among the titles submitted. No categories were noted in our correspondent's report:

"Au Royaume de la laine"

(The Kingdom of Wool)

The City of Verviers

Information Office

—Produced by Nemea Films—

• A survey of the economic, social and industrial possibilities of the Verviers district of Belgium.

"Bokwanga, terre des diamants"

(Bakwanga, Land of Diamonds)

Beceka "Sibeka" Finance Corporation

—Produced by Films Ebeko—

• Prospecting and mining diamonds in Bakwanga in the Congo Republic in Africa. A picture of the economic and social development of the area.

"Basse-Sambre"

—Produced by S.A. Belgavideo—

• The activities of the Basse-Sambre plant of S. A. Belgavideo.

"Documents Audia-Visuels-Ergonomie No. 2- Textile-Travail aux bobines"

(Audio-Visual Report No. 2 Textiles — Working with Bobbins)

• Part of a series of films designed for use in technical and industrial training schools.

"Euratom"

—Produced by S. A. Belgavideo—

• A report on the Common Market Atomic Energy Authority.

"7e Expo europeen de la machine-outil"

(7th European Machine Tool Exhibition)

—Produced by S. A. Belgique-Cine—

• A report of the exhibition, which shows the latest developments in the machine tool industry.

"Fours rotatifs"

(Rotary Furnaces)

Esperance-Longdoz

—Produced by Marcel Thonnon—

• A historical survey of the development of furnace technology up to the latest types which have a capacity of 5,000 tons a day.

"Het Palet van de Glazenier"

(The Glazier's Palette)

—Produced by Karel Demesmaeker—

• A study of the development of

stained glass window art from the Middle Ages to the present day. Examples from the Koekelberg church in Brussels and the Museum of Fine Arts in Antwerp are shown.

"Le Chemin de la Mine"

(The Mine 'Road')

—Produced by S. A. Educafims—

• A training film for the Italian workers who are being absorbed into the Belgian and Luxembourg coal mines. It deals with the safety precautions needed underground.

"Ouvrons l'oeil"

("We'll Open Our Eyes")

—Produced by

Belgian Productivity Council—

• A technical training film for the weaving industry.

"Poudreries Reunies de Belgique"

S. A. Poudrerie

—Produced by Continental Television & Film Agency Ltd.—

• Chemicals and metals — explosives for peaceful purposes and munitions for war.

"Uit Staal, Aluminium en Glas"

(Steel, Aluminum and Glass)

—Produced by

S. A. Entreprises et Travaux

• The practical and theoretical lessons learned by a building industry trainee.

"Une route nommee desir"

(A Street Named Desire)

Belgian Ministry of Public Works,

Mines and Roads

—Produced by S. A. Belgique-Cine—

• A survey of Europe's network of national and international motorways and their economic benefits.

"Val Saint Lambert"

—Produced by Jos. Paquay—

• The industries developed by the monks at Val Saint Lambert Abbey.

"La mecanisation integrale de la culture betteraviere"

(The Mechanization of Beet Cultivation)

—Produced by

Belgian Beet Research Institute—

• All aspects of modernization of sugar beet production are covered.

BRITAIN

☆ Four specific industrial films lead Britain's entry list of 15 titles for Madrid. Petroleum sponsors were notably represented in this list, with motor and electrical companies also present with excellent films. Members of the British Industrial Film Association selected these official entries: (Continued on next page)

Madrid's famed Calle Y Puerta de Alcala invites Festival visitors.

THE FILM PRODUCTION SKILLS of seven countries of Western Europe are represented in the 92 motion pictures which comprise the official entries of these lands to the Fourth International Industrial Film Festival being held in Madrid, Spain from October 14th through the 19th.

In this exclusive BUSINESS SCREEN summation of the European entry lists, rounding out our previous report on the 15 official United States' entries selected by a special National Association of Manufacturers' film committee, there is significant detail about the international and domestic concerns of these seven countries, i.e. their common interest in the peaceful uses of atomic energy, new industrial processes and techniques and major construction work.

CATEGORY A: Films about economic and social questions of general interest, intended for showing primarily to the general public.

CATEGORY B: Films about specific industrial products, materials or projects, intended for showing primarily to the general public.

CATEGORY C: Films aimed less at information than do the films in categories A & B, but which have the purpose of contributing to the prestige of the industry concerned or of a firm, for public showing.

CATEGORY D: Films on industrial techniques (Management methods, measures for increasing productivity, efficiency and output, rationalisation, automation, application of modern techniques, etc.) intended for specialist audiences.

CATEGORY E: Films on marketing and sales techniques, commercial practice, for specialist groups.

CATEGORY F: Films on industrial application of scientific principles and research, intended primarily for specialist audiences, including schools, rather than for general showing like Categories A, B and C.

CATEGORY G: Films on management and manpower training (for example, vocational guidance and training, training within the firm) and on manpower promotion and human relations within the firm, intended for industrial audience, rather than the general public.

CATEGORY H: Films on accident prevention, occupational diseases, health, re-education and measures of security, for industrial use.

CATEGORY A

"The Pitcairn People"

British Petroleum Company Ltd

—World Wide Pictures Ltd—

- Account of the life of the descendants of the 'Bounty' mutineers on the most remote of all outposts served by British Petroleum. Color, 27 mins.

"The Sure Thing"

British Insurance Association

—The Larkins Studio Ltd—

- A cartoon film to explain to the public the economic and financial principles which underline insurance practice and to illustrate some of the terms used in insurance. Color, 15 mins.

CATEGORY B

"The Big Mill"

Films of Scotland Committee

—Templar Film Studios—

- An account of the production of sheet steel in Colvilles's new mills at Ravenscraig and Gartcosh. Color, 30 minutes.

"The Calculated Risk"

British Petroleum Company Ltd

—World Wide Pictures Ltd—

- A description of the search for oil in the underwater oilfields in the Arabian Gulf, involving a risk of over 25,000,000 pounds. Color, 28 mins.

"The Pioneers"

Burmah Oil Company Ltd

—Rayant Pictures Ltd—

- The work and communal life of the men of many nations engaged on the construction of the North East India oil pipeline. Color, 29 mins.

"Vive La Difference"

Ford Motor Company Ltd

—R. H. R. Productions Ltd—

- A combination of fantasy and dream images depicting the market research and subsequent public reaction to a new motor car. Color, 15 mins.

CATEGORY C

"African Awakening"

Unilever Ltd

—World Wide Pictures Ltd—

- The film shows something of the important developments taking place in the independent West African nations of Nigeria, Ghana and Sierra Leone. It gives an insight into these new and vigorous communities and an understanding of the importance of their hopes for the future. Color, 36 mins.

Below: scene from "The Calculated Risk," one of Britain's entries.

"Signorina! It's Important"

Mobil Oil Company Ltd

—Technical and Scientific Films Ltd—

- An English, French and German family are seen going about their daily lives. Unaware of the fact, they all plan to spend their holidays at the same Italian resort. Through their journey the many applications of petro-chemical products are demonstrated. Color, 20 mins.

"The Home-Made Car"

British Petroleum Company Ltd

—James Hill Productions Ltd—

- This film without words shows the re-building of an old "bull-nosed" Morris car from its discovery in a junk yard to its completion. The enthusiastic young car-restorer is helped by a friendly BP garage owner, and his trials and triumph are amusingly dealt with, thus contributing to the public relations message of the company. Color, 29 mins.

"Thirty Million Letters"

British Railways Board

—British Transport Films—

- The film shows the liaison between British Railways and the General Post Office. Every night in Britain 30,000,000 letters go through the post. This film shows many aspects of the process with emphasis on the travelling Post Offices that run north from Euston. It also considers many facets of a Postman's life, whether he be an islander on the Outer Hebrides or a Londoner on his daily round. Color, 30 mins.

CATEGORY D

"Rightward Welding Techniques"

British Oxygen Company Ltd

- Intended primarily for supplementing practical instruction in advanced gas welding techniques. It also has a wider appeal and is of value to engineers, designers and others concerned with the promotion and control of gas welding in general engineering. Color, 20 mins.

CATEGORY F

"Analysis by Mass"

Associated Electrical Industries Ltd

- A film describing the structure of atoms of elements and the combination of atoms to form molecules. The principles of the mass spectrometer are explained and applications of the machine are shown. Intended for showing primarily to schools and universities and to scientists and technologists in fields where the mass spectrometer is used for research and analysis; also to the growing number of laymen interested in popular science. Color, 27 mins.

"Chromatography"

Imperial Chemical Industries Ltd

- The subject of this film was chosen by an advisory panel of science teachers as one which would be of particular interest to chemistry students in the 16-18 age group. It follows the pattern of a series of I.C.I. school films which relate laboratory techniques to wider application in other fields like industry and medicine. Color, 18 mins.

"The Electroneers"

Mullard Ltd

—R. H. R. Productions Ltd—

- Shows the highly technical story of an electronic tube from design through to the manufacturing stage. Intended for executives and engineers and potential customers in the electronic valve field. Color, 25 mins.

CATEGORY H

"Fifty to One"

Federation of Civil Engineering Contractors

—Drayton Film Productions Ltd—

- The present accident rate in British civil engineering indicates that each employee will have two accidents in his working life and that one in every fifty will be killed. This film is intended to impress on every workman that carelessness can be fatal. Color, 14 mins.

FRANCE

- ☆ For the sixth year, French industrial sponsors, producers and film technicians met in historic Rouen on the banks of the river Seine to choose the best of that country's films out of a total entry list of 55 subjects. Here are the 15 titles to be shown at Madrid:

CATEGORY A

"Le Champ du Possible"

(The Field of Possibility)

Ministry of Posts and

Telecommunications

- Societe Nouvelle Pathe Cinema—
- The most complicated and unusual pieces of information can be transmitted and distributed through telecommunications.

"Route sans Sillage"

(Journey Without Trace)

Societe du Pipe-Line Sud European

—Produced by Robert Courtot—

Cinetest—

- Oil from the East no longer makes its way through Europe by sea — but by underground pipe-line.

CATEGORY B

"Coulee 521" (Tapping 521)

Aluminium Français

—Produced by Les Films de

Centaure—

- Manufacture, uses and future prospects for aluminum.

"Etude Conditionnement Verre"

(A Study of Glass)

Cie de Saint-Gobain

- Produced by Cie de Saint-Gobain—
- A college student seeks information about glass food containers.

"Recerches"

(Research)

Automobiles M. Berliet

—Produced by Cie Lyonnaise de Cinema—

- A description of the aims, methods and importance of research in the automotive industry, seen at the Testing and Research Center at Venissieux.

"Rendex-vous d'Asnieres"

(Meeting at Asnieres)

Agence Thibaud

—Pierre Long-Son et Lumiere—

- An animated film with live action inserts showing the manufacture of Astra.

CATEGORY C

"Le Cinquieme Jour"

(The Fifth Day)

Sud-Aviation

—Produced by Objectifs—

- The uses of the Alouette II Helicopter.

"Le Mur Paysage"

(The Scenic Wall)

Les Glaces de Boussois

—Produced by Robert Courtot—

Cinetest—

- The beauty and qualities of glass in architecture.

CATEGORY D

"Fusees Sondes"

(Rocket Probes)

Sud-Aviation

—Produced by Objectifs—

- The use of rocket probes for space research into the ionosphere.

"Huile de Coupe et Productivity"

(Cutting Oils and Productivity)

Mobil Oil Francaise

—Produced by Je Vois Tout—

- Improvements in cutting oils increases productivity and reduces the cost of machine finishing of metals.

"Introduction a la Poste Moderne"

(An Introduction into the

Modern Postal System)

Sompost

—Produced by Regie Francaise de

Cinema—

- Research into mechanization of the postal services improves collection, sorting and distribution.

CATEGORY F

"Dynamique Experimentale"

(Experimental Dynamics)

—Central Film Department of

S.N.C.F.—

- A study of the behavior of railroad vehicles and improvements in their rail-holding qualities.

"Projections Electrostatiques"

(Electrostatic Projection)

S.A.M.E.S.

- Produced by Films Jean Mineur—
- The uses of electrostatic generators in industry for projection painting.

CATEGORY G

"C'est Cela que vous Attendez"

(That's What You Were Waiting For)

Chambre Syndicale

des Banques Populaires

- Les Analyses Cinematographiques—
- A film to improve the attitude of bank clerks toward the public.

CATEGORY H

"Plainte Contre Indifference"

(Plea Against Indifference)

French Association of Paralytics

—Produced by Gaumont-Actualites—

- The problem of education and rehabilitating of physically-handicapped.

GERMANY

International oil shares first place with German steel in the films which will represent this country at Madrid. The German associates of British Petroleum and Esso offer three films, matched by a similar number from DEMAG, Krupp and Mannesmann. The theme of Germany's entry list is strongly international, emphasizing the significance of that country's technological experience in world industry.

CATEGORY A

"Elektronen verteilen Briefe"

German Postal Services

—Produced by Ufa Werbefilm—

• To meet the increase of mail and combat staff shortages, the German Federal Postal authorities have introduced mechanical sorting and electronic sensing of the new post index numbers.

"Blick aus der Zukunft"

(Looking Back from the Future)

B. P. Benzin u Petroleum AG

—Produced by Atelier H. Koch—

• A 21st century robot, using a time-machine, looks back on 20th century developments in petrochemistry.

"Energie aus Wasserkraft"

(Energy from Waterpower)

A.E.G.

—Produced by Dido-Film—

• The story of the significance of water power is traced from its beginnings to water power stations. Sequences from Finland where 2/3 of the hydro-electric energy comes from AEG generators are included.

CATEGORY B

"Remanit"

Deutsche Edelstahlwerke AG

—Produced by Ewald-Film GmbH—

• A film to impress the public with the properties and uses of stainless steel in modern life. Significant sequences explain the rusting process and alloys required to make steel resistant to rust.

"Grünes Licht für Bagger 275"

(Green Light for Dredger 275)

Rheinische Braunkohlenwerke AG

Krupp Maschinenfabrik

—Produced by Porta-Film—

• A large bucket-wheel-dredger, which extracts 75,000 tons of open-cast coal daily, moves on its own caterpillar tracks, crossing railway lines, roads and rivers.

CATEGORY C

"Mannesmannwerke in Ausland"

(Mannesmann Works Abroad)

Mannesmann Steel

—Produced by Mannesmann Film Unit—

• The idea of world economic unity is expressed through scenes of Mannesmann manufacturing capacity wherever the need is great. We visit Turkey, Canada and Belo Horizonte, Brazil.

"Tag für Tag"

(Day After Day)

Esso AG

—Produced by Rudolf Kipp Film—

• A kaleidoscope of the various products obtained from oil, showing how products of the petroleum industry play a part in every aspect of modern life.

"Ein Werk von Hundert Jahren"

(The Hundred Year Plant)

Farbenfabriken Bayer AG

—Produced by Ges. für Bildende

Filme—

• The story of Bayer's chemical plant —established 100 years.

CATEGORY D

"Auf gehobener Ebene"

DEMAG

—Produced by Dido-Film—

CATEGORY F

"Olphabet A"

(Oilphabet A)

Esso AG

—Produced by Roto-Film—

• The first of a series of educational films. Through animation the story of how petroleum came into existence is told and how it is prospected and extracted.

"Präzision und Forschung"

(Precision and Research)

Carl Zeiss

—Produced by Roto-Film—

• Shows the contribution of the optical industry to space and medical research is clearly shown.

"Zyklotron"

(Cyclotron)

AEG

—Produced by Dido-Film—

• Against the background of the nuclear research center at Karlsruhe, the film attempts to build up a visual conception of the electrical acceleration of charged particles in a high-frequency induced magnetic field. It is hoped the film will be a bridge between school physics and the specialist nuclear sciences.

CATEGORY G

"Die große Chance"

(The Big Chance)

German Federal Government Press

and Information Office

—Produced by Dido-Film—

• An account of the sharing of German industrial know-how among the emergent States of Africa and Asia — German instructors at an Indian industrial training school; equipment in a Sudan research establishment; participation in Africa's new industrial enterprise.

"Ein Arbeitstag"

(A Working Day)

Badische-Anilin & Soda-Fabrik AG

(BASF)

—Produced by BASF Film Unit—

• A working day in the BASF plant at Ludwigshafen, seen through the eyes of a boy on his first day's work and by an old-timer on his last day.

"Stahl - im Gesenk geschmiedet"

German Drop-Forgers' Association

—Produced by

Filmgesellschaft Nar & Polly—

EUROPE'S BEST INDUSTRIAL FILMS OF THE YEAR

• A training film in the technique of drop forging and the uses of materials made by this method.

• A survey of the SNIA Viscose Company and its associates in Italy and abroad.

ITALY

Italian steelmakers, construction companies and atomic energy sources figure largely in this country's entry of 15 films. Italian industry holds firm to its policy of using films to demonstrate the nation's achievements in industrial development — this year particularly in Southern Italy, a priority target for economic and social development. Here are the Madrid entries:

CATEGORY A

"Filme-Relazione 1961"

(The 1961 Film Report)

Italsider Company

—Produced by Stefi Film—

• A report of activities during 1961 showing the human endeavor and economic facts which lie behind the company's balance sheet figures.

"Calabria"

Casa per il Mezzogiorno

(Fund for the South)

—Produced by Centro Cinematografico INCOM—

• An account of the part played by "The Fund for the South" in bringing about the economic and social rebirth of Southern Italy.

CATEGORY B

"Latina; dall'Uranio

all'Energia Elettrica"

(From Uranium to Electrical Energy)

SIMEA — Agip V Nucleare

—Produced by Istituto Luce—

• The construction of the Latina thermonuclear power station, from excavations to completion.

"Po: Forza 50,000"

(The River Po: 50,000 units of Power)

Ente Nazionale Energia Elettrica

—Produced by "22 Dicembre"—

• The building of the Isola Serafini power plant on the river Po to harness the river and produce electricity for this area.

"Dez Project"

Impresit-Girola-Lodigiani

—Produced by Carlo Audisio—

• The building of the Dez dam in Iran by a group of Italian firms.

"Acciaio tra gli Ulivi"

(Steel Amidst the Olives)

Italsider Company

—Produced by Giovanni Paolucci—

• The building of the first plant of the steel manufacturing center under construction in Southern Italy by Italsider is depicted.

CATEGORY C

"La SNIA in Italia e nel Mondo"

(SNIA in Italy and All

Over the World)

—Produced by Centro

Cinematografico INCOM—

"Il Planet Acciaio"

(The Steel Planet)

The Italsider Company

—Produced by Ondatelema—

• Four of the Italsider's steel works.

CATEGORY D

"Stampante Velace MZ"

(MZ High-Speed Printing Machine)

Olivetti

—Produced by Olivetti—

• Portrays the new Olivetti high-speed printer for office use.

"Un Nuovo Porto per l'Europa"

(A New Port for Europe)

Atlas Copco Italiana/Piero Cidonio

—Produced by Unieuropa Film—

• Two years ago, work on the oil-port under construction at Genoa was at a standstill through unexpected technical difficulties. By using a revolutionary excavation technique, work was resumed and is now ahead of schedule.

CATEGORY E

"Cingoli per l'Industria"

(Tractors for Industry)

FIAT

—Produced by Cinesiat—

• A Fiat tractor service engineer explains the research and testing which go into the manufacture of a Fiat tractor.

CATEGORY F

"Molecole Isotattiche"

(Isotactical Molecules)

Montecatini

—Produced by Montecatini—

• Through the discovery of a method to obtain isotactical molecules through the polymerisation of propylene by Professor Natta of Milan Technical University, new synthetic fibres can be produced.

CATEGORY G

"la Compizione Linotipica"

(Linotype Composing)

Editrice Internazionale

—Produced by Scuole

Grafiche Salesiane—

• A teaching film on the linotype process in printing.

CATEGORY H

"Ritorno al Sole"

(Return to Sunlight)

National Insurance Against

Accidents at Work (NAIL)

—Produced by Istituto Luce—

• Shows the work at the industrial rehabilitation center at Florence.

"Progetto 11 SIC"

(Project 11/SIC)

National Atomic Energy Committee

(CNEN)

—Produced by CNEN—

• A safety technique to be used in the movement of radio-active elements is shown and explained.

(CONTINUED ON PAGE 32)

NETHERLANDS

→ A selection committee representing Netherlands' Employers' Federations, industrial film sponsors and producers meeting with representatives of the Netherlands' Ministry of Education and the Technical Film Centre of the Hague, selected these 11 films:

CATEGORY A

"Holland's Safety Valve"

Ministry of Public Works
—Produced by Multifilm—

- The story of the closing of the "Haringvliet" segment of the Delta land reclamation project in Holland.

CATEGORY B

"It's the Tone That Makes The Music"

Philips of Eindhoven
—Produced by Uniefilm—

- Explains what sound waves are; how they are transformed into phonograph records.

"The World of Paper"

Van Gelder Zonen N.V.
—Produced by Uniefilm—

- Paper manufacture in the Netherlands is depicted.

"Rubber"

Vredestein Ltd

—Produced by Carillon Films—

- Manufacture and use of rubber and rubber products.

"Suite in Brick"

Netherlands Brick Industry Ass'n.

—Produced by Uniefilm—

- Portrays the manufacture and use of bricks, without commentary.

CATEGORY C

"Skywide"

Philips of Eindhoven

—Produced by Carillon Films—

- Aerial view of Benelux countries, showing the extent of the Philips organization plants.

"Building"

Netherlands Bldg. Trade Federation

—Produced by Polygoon-Profiliti—

- Shows the building industry through the artist's eyes; without commentary.

CATEGORY D

"Building with Steel"

Netherlands Bldg. Research Center

—Produced by Polygoon-Profiliti—

- Portrays the advantages and potential of steel in building construction.

CATEGORY F

"The TV Picture Tube"

Philips of Eindhoven

—Produced by Publi-Studio—
in Co-operation with SOFIDI—

- A scientific explanation of the workings of the TV picture tube.

CATEGORY G

"The Suggestion Box"

Netherlands Royal Blast Furnaces and Steel Works

—Produced by Polygoon-Profiliti—

- Shows how a plant suggestion scheme works.

"Heating Leaves Nobody Cold"

Netherlands Central Heating
Trade Association

—Produced by Telesynch—

- A guidance and recruiting film.

SWEDEN

☆ Sweden's six entries to Madrid range from nuclear power development to films depicting the stresses of modern life. The selections were made on behalf of the Swedish Employers' Confederation and the Federation of Swedish Industries by the Swedish Council of Personnel Administration, of which B.S. correspondent Sven Hallonsten is Director of the Audio-Visual Division.

(No Categories Defined)

"Atoms in Everyday Life"

The Swedish State Power Board

—Produced by Svenska
AB Nordisk Tonefilm—

- The story of Sweden's first atomic power station, a gas-tight welded steel container built into a cavern just outside Stockholm. The plant will supply electricity to 30,000 inhabitants of a nearby suburb.

"Swedish Steel"

Fagersta Bruks AB

—Produced by Svenska
AB Nordisk Tonefilm—

- An historical account of ore mining and steel manufacture in Sweden, with detailed information on how different types and qualities of steel are now being produced.

"M for Men, Machines, Masses"

The Swedish State Power Board

—Produced by Svenska
AB Nordisk Tonefilm—

- Visuals and sound effects create the atmosphere of moving masses and machines as they shifted 350 million cubic feet of sand, gravel and stone to build one of Europe's largest new dams, one mile long and 110 yards high, north of the Arctic Circle.

"Ferrum"

Luossavaara Kirunavaara

—Produced by Svenska
AB Nordisk Tonefilm—

- Mining operations are set to music and visuals as, without words, the film shows all that is involved in iron mining, in north of Sweden.

"Maximum"

Folksam Insurance Company

—Produced by Svenska
AB Nordisk Tonefilm—

- A doctor discusses productivity problems with an industrialist who suffers from a pain in the back, diagnosed as due to an antique chair in which he sits. The theme is linked to the need for the right methods and tools for increased productivity.

"Stress"

Atvidabergs Industrier AB

- Stress in humans is reaction to demands which cannot be met. The film deals with the responsibilities of department heads in dealing with stress and in recognizing signs of it among their staff people.

At Denver: University Chancellor Alter proposed toast to pioneer auto maker.

Hold Coast-to-Coast Premieres of "The World of Henry Ford"

8,000 Civic Leaders at Showings of Centennial Year Picture

NATIONWIDE PREMIERES attended by over 8,000 civic leaders and nearly a quarter of a million school-age youngsters ushered in the Centennial motion picture, *The World of Henry Ford*, produced for the Ford Motor Company by MPO Productions.

The 35-minute color film was premiered from coast-to-coast during the weeks leading up to Centennial of the birth of Henry Ford, July 30th. Other premieres abroad are being planned as soon as French, German, Spanish and Portuguese versions of the new picture are complete. The film is also being submitted in Italian, Danish, Swedish, Flemish and Norwegian.

Among preview highlights was a presentation to the press covering the Cannes, France, Film

Festival. In America, community premieres arranged by each of the Ford Motor Company's 57 Community Relations Committees, were attended by local state and city officials, educators, industrialists, church leaders and representatives of news media.

At Sandusky, Ohio, Governor James Rhodes took the occasion to praise the company for its role in creating employment and supporting cultural endeavors. In Denver, the chancellor of the University of Denver, Dr. Chester M. Alter, viewed the film with other civic leaders and then proposed a toast to the man whose birth 100 years ago was destined to change the world.

In Santa Ana, California, an editorial in *THE REGISTER* commented: "Congratulations are due

Cincinnati Mayor Walton H. Bachrach (left front) arrived in style for local premiere, accompanied by C. J. Soderquist, William Eighere, E. J. Hollenbeck.

A scene from the film portrays Mr. Ford at the wheel of his racing car.

the Ford Motor Company . . . we hope others will see that America can again become a land of opportunity if there is opportunity to use one's own facilities for his own benefit, to serve his fellows."

Earlier, more than 225,000 junior and senior high school students in Wayne, Michigan shared prints of the Centennial film and of the story laid so close to their environment.

The 35-minute picture now joins the extensive Ford film library and will be available on a free-loan basis for group showings. Prints are loaned to school, church, farm and youth groups, as well as fraternal and civic organizations. They may be obtained from Ford libraries in New York City, Oakland, California, and Dearborn,

Michigan. They will also be available soon through the company's overseas locations. As a result of the premier showings, heavy demand for prints is reported by Robert O. Dunn, manager of Ford's Motion Picture Department.

Introduction of the film was termed "the most successful ever handled by Ford's Community Relations Committees" by Frank T. Judge, Jr., the company's community relations manager.

The World of Henry Ford was produced for Ford by MPO Productions, Inc. of New York City. Joseph M. March wrote the script and supervised production. It was directed by Lew Jacobs and edited by Reva Schlesinger. An original music score was composed by Sol Kaplan. Narration is by Ron Cochran.

Story of the Film: "The World of Henry Ford"

SPONSOR: Ford Motor Company.

TITLE: *The World of Henry Ford*, 35 minutes; produced by MPO Productions.

☆ "This is the story of a man and his world, and how he changed it for all men. His contribution to progress transformed the nation

in which he lived, and made it possible for men everywhere to achieve a better way of life."

With this introduction, the film opens on scenes of the Battle of Gettysburg, in 1863, the year Henry Ford was born. In England, Victoria was Queen, ruling a vast

In his later years, Henry Ford showed how he had fixed watches as a boy, demonstrating early mechanical ability. (From "The World of Henry Ford")

Henry Ford and Francis Jehl were fascinated viewers as Thomas A. Edison reconstructed his first light bulb during "Light's Golden Jubilee" held at Greenfield Village. Below: the introduction of the Ford V-8 in 1932, showing the famed moving assembly line in later phase. Scenes are from the Ford Centennial motion picture now released for general public use.

Spokesman for Science & Technology

Reid H. Ray, President, Society of Motion Picture & Television Engineers

THE PRESIDENT of the Society of Motion Picture and Television Engineers showed his serious affinity for the picture medium 'way back in 1910. The very young Reid Ray enthralled his Lincoln, Nebraska playmates by showing hand-colored stereopticon slides of the Russo-Japanese war on a 25-watt toy projector. By high-school age, he had purchased discarded 35mm theater equipment and was charging two cents a head for admittance to the Ray family's basement theater, complete with proscenium arch and a motorized curtain made from his mother's velvet drapes.

A near-disastrous film fire (ah, nitrate!) put an end to that venture but not before the young enthusiast had begun etching animated titles on clear film base, learning the pitfalls of animation. But his career was to get a fresh start, while still in high school, when the family moved to Rock Island, Illinois, when Reid's father, Joseph G. Ray, accepted an appointment with an insurance firm. That post included supervision of a budding film program, including the work of a St. Paul, Minnesota cameraman named Charles Bell.

The eager young teen-ager discovered a new world and Reid Ray has often said that he is indebted for his decision to follow the motion picture profession to "Charlie" Bell, a 40-year veteran in the field when he retired in 1952. Entering the University of Iowa in 1919, Reid continued his film career by designing advertising for two Iowa City theaters. Then came a big "break!"

During his sophomore year at Iowa, famed football coach Howard Jones contacted the University's Photographic Department, requesting motion pictures of the coming season's games. A friend of the University's chief photographer (who knew of his film background), Reid was contacted, began a three-year "extra" career at the (Cont'd P. 50)

He Speaks for the Industrial A-V Man

William J. Connelly, President, Industrial Audio-Visual Association

PRESIDENT OF THE INDUSTRIAL AUDIO-VISUAL ASSOCIATION this year is William J. Connelly, Assistant Manager of Advertising of Union Carbide's Plastics Division. IAVA is a professional association of men employed by business and industrial organizations to improve industry communications with customers, employees, share-owners, and the general public through better production, distribution and use of audio-visual devices and methods.

It is a completely volunteer organization, with no paid staff, and its range of activities is thus contained within itself as a highly useful service organization for each of the approximately one hundred members. Quite a few IAVA members are also members of the Association of National Advertisers Business Films Committee, which functions on a different level.

Bill Connelly has been a foremost practitioner of audio-visual methods in industry for many years. He has recently completed a two-year tenure as President of the National Visual Presentation Association, and is currently Chairman of the Subcommittee on Advertiser Practices in the Production and Distribution of Business Films of ANA.

Mr. Connelly's business career started in Cleveland in the 1930's, where he first went to work on the lowest rung of the ladder in a steel mill. It seemed a long way up for him then in the steel business, so he spent many evenings in the public library looking for an industry with the most prospects for growth and a future for a young man starting out. He decided that plastics looked like the best bet, so he left the steel mill and got a job as a laborer, at first, with the National Carbon Company, a division of Union Carbide Corporation, and he has been with the corporation ever since.

Six months after being hired, he was transferred to the corporation's plastics plant at Bound Brook, New Jersey. Within a year he became a production foreman. As (Biographical sketch cont'd on page 58)

Builder of the Future in Film Production

SIRVING AS PRESIDENT OF THE FILM PRODUCERS ASSOCIATION OF New York this year is Peter J. Mooney, Vice-President of Audio Productions, Inc. The FPA is composed of 59 of the leading New York production firms and service organizations who have banded together to preserve standards of quality, service, good practice, ethics and the development of the industry. Thirty of the members are producers, while 29 associate members are labs and other service organizations.

Early in his career, after graduation from La Salle Academy and Pace Institute, he worked for Western Electric Company, which then owned Audio Productions and was operating the Paramount Studios in Long Island City. Pete was given the opportunity to assist in establishing cost accounting and budget control systems on the features, industrials and shorts which were being produced at the studios. He has been with Audio ever since, becoming an officer of the corporation.

Pete served a term as one of the FPA's first presidents ten years ago; he has been active in the affairs of the organization since it was founded in 1949. As he explains it, the main job of the FPA is to work with all groups and organizations to further the aims of the industry and to keep it on an even keel.

For instance, the Association is now conducting discussions with the Federal Government on standards of procurement; it has, in cooperation with various departments of New York City, modernized the municipal rules and procedures governing the motion picture industry in this area.* The FPA constantly negotiates with labor unions and has achieved stable conditions that should bring (Continued on Page 59)

*This proposal has been formalized and will be submitted to the city council for approval during the fall term of 1963.

Peter J. Mooney, President, Film Producers Association of New York

Standard-Bearer for the Film Processors

SAUL JEFFEE, PRESIDENT AND CHAIRMAN OF THE BOARD of Movielab, Inc., is President of the Association of Cinema Laboratories for 1963. ACL comprises almost all of the leading professional film laboratories in the country. Among its purposes are to establish continually higher print standards for the industry as a whole and to encourage the use of standardized nomenclature in film processing terminology.

Mr. Jeffee, who is called Jeff by his friends, has been a film buff for as long as he can remember. In school, in Newark, New Jersey, he was the boy who ran the projector in the auditorium, and who dreamed of becoming a big-time cameraman. After he moved to New York, he got his first job as a reel boy in the old Stanley Theatre on 41st Street and Seventh Avenue.

Young Saul wanted very much to be a cameraman and had worked in this direction and studied the motion picture craft all through school. But the cinematographer's union had a long waiting list at the time—in fact, it took a long time before applications were even considered. So, while biding his time, he decided to get a job in a laboratory to acquire a good working knowledge of that end of the business.

He did this, starting at Consolidated Film Laboratories, going on to Expert Film Laboratories and others and by this time had discovered this part of the motion picture business was as fascinating as being a cameraman.

One of the stumbling blocks to advancement in the motion picture field, particularly in its Hollywood aspects, was that it wasn't so much what you knew—as *who* you knew. Not being remotely related to any of the big movie moguls, Saul Jeffee knew he'd better get to know an awful lot about the many facets of the motion picture business if he hoped to succeed. He joined Fox Film Company and worked in the purchasing department and for a time, in (Continued on Page 58)

Global Sponsors' Guide to the Film Medium

Royal Dutch Shell Group Issues a Comprehensive Film Utilization Manual
for Public Relations Officers of 500 Companies Operating in 100 Lands

THERE ARE 500 Royal Dutch/Shell Group companies operating in about 100 countries around the world, engaged in all phases of the oil and chemical business. Their global use of the film medium for both public and internal communications' purposes easily ranks Royal Dutch/Shell as one of the world's foremost sponsors.

Shell credit insignia have appeared on some of the finest educational films currently showing. The hallmark of professional quality which distinguishes this product has earned wide acceptance in schools, commendation from educators and the enthusiastic reception merited by genuinely interesting and always useful, informative film fare. Evidence of the serious interest these companies hold for such a potent medium was given last month in the issuance of a very comprehensive Film Manual to all Public Relations Officers of the 500 companies around the world.

Exclusive Release to Business Screen

Though the new manual is confidential and copies are *not* available outside the Shell Group, BUSINESS SCREEN has been given exclusive access to its contents for editorial summation in these pages. The global viewpoint is well worth special reader attention, for there are many astute observations to apply to any business/industrial film operation, especially to those with overseas interests. The brief segment which follows is from one section: "Promotion — Six Points to Remember."

Point 1: Film Presentation

GOOD STANDARDS: People are used to *good* presentation when they go to the movies and they expect a good standard of presentation when they see films in conference rooms and community centers. Always check the room beforehand to see if conditions for showing can be improved.

* * *

PANELS & EXHIBITS: Give the room some kind of company identification by using emblems or simple panels displaying scenes from the films to be presented.

* * *

PERSONAL TOUCH: A film program should be introduced by a senior member of the staff; every opportunity should be taken to point out the link between film's subject and the company. For the show to have maximum impact, the audience should take something to read away with them, i.e. a leaflet, etc.

* * *

HOSPITALITY: Lavish hospitality can create a bad impression. When people attend a film show at a time when they might feel hungry, it is wise and courteous to provide light refreshments. After the showing, it is useful to encourage viewers to meet company staff and to talk by offering modest refreshments.

* * *

STAFF SHOWS: Good presentation and *showmanship* is important for shows organized for staff. There is a tendency to consider that less trouble can be taken for staff shows, but

this is a mistake. Consciously or unconsciously, the staff promotes company films among their friends.

2: Technical & General Press Shows

INVITE THE PRESS: When a film is of general interest and not too technical, invite the daily and weekly newspapers and the magazines. If the films are technical or of interest to a limited audience, invite the technical press only. The popular press has no interest in a technical film but a *good* film may provide the opportunity to invite a journalist to meet company people. In some cases the press can be invited to join the audience at the premiere but it is usually better to have a separate press show before the premiere; if it is held after, it may well antagonize newspapermen.

The press appreciates good promotional literature and photographs, but have an assistant to answer photo inquiries, otherwise people take away more than they need. Newspapermen are busy people—invite them to see the film just before lunch so that afterwards a light lunch or snacks can be served. When technical press people are present, make sure there is a specialist present to answer questions.

Whenever possible, invite the producer and director of the film to supply the papers with exclusive stories connected with making of the film. Special press shows can be organized for the educational press and school authorities.

3. Premieres: Launching the Film

☆ A premiere should be arranged whenever possible. This affords the president and his colleagues an excellent opportunity to invite people with whom they may wish to talk informally. A premiere is also a chance to invite a national or local personality to say a few words to the guests.

Films with special appeal to schools and universities might have special premieres for educators, headmasters, principals, teachers and other professional leaders. Lecturers like to take away information about the film as they will want to check if it fits into their

☆
Left: the handsome reception foyer of the 325-seat theater in Shell Centre in London. The central "theme" of its design is the 33 by 16-foot mural by artist Osbert Lancaster, depicting the history of motor transport in London. The foyer area is equipped for the serving of refreshments to either cinema or lecture audiences.
☆

curricula. Remember that a film should not be premiered until all copies are available in the film library.

LINK WITH EVENTS: A premiere or press show can sometimes be tied with an exhibition or other special event. It is for the PRO to look at the calendar to decide the most appropriate date for the release of the film.

LINK WITH RADIO & TV: Premieres may be tied with radio broadcasts or TV programs. It is possible to show an extract from the film and have it introduced by the personality who introduced it at the premiere. Even on radio, it is possible to choose a sequence from the sound track which has good music and effects, which can have some meaning even if there is no picture.

4. Programming for Program Balance
☆ Every time several films are shown together, program *balance* has to be considered. However good the films may be, an audience cannot sit through a long program of technical films. The point to bear in mind is the *impact* which it is hoped to make on the audience. In creating the impact, the *order in which the films are shown* plays a big part. Keep the highlight of the program toward the end. Do not let the program run on for more than 90 minutes at most.

Should Non-Company Films Be Shown?
The reason for having a film show should be borne in mind and a "theme" worked out into which the films should be woven—to present the message. Company identification should not be lost. If non-company films are shown they should not over-shadow company productions.

In some cases there may be a good reason to stress a theme which redounds to the credit of the company — such as safety on the roads or good internal relations. For such occasions it is possible to borrow films like *Six Candles* (sponsored by the British Association) or *More Than Words* (a Henry Strauss film on the all-important question of communication and human relations).

Films can also be borrowed from foreign embassies to include subjects describing the history, geography or people of a particular country. This may provide the opportunity to include a subject indirectly connected with the company's products.

FEATURE FILMS: The use of features provides many complications. If it is a good one, it may over-shadow the company film. If it is not good, it may make a bad impression so that even the good quality of the sponsored film is tarnished.

But in areas where features can only be seen by the service of a mobile film truck, there is justification for running them, provided there is a company man present to insure that the company films are given their true value.

5. Promoting the Film: Catalogs, Etc.
☆ The Shell International Catalog of Public Relations' Films is issued every two years.

The Shell Centre Theater in London: within the largest air-conditioned building in Europe on the South Bank of the Thames near Waterloo Bridge, Shell Centre houses the 5,000 people who comprise the central office organization of Royal Dutch Shell Group companies in London. It also has this new 325-seat theater for both cinema and lecture use, with a fully-equipped stage and orchestra facilities. Below the 34-foot proscenium arch is a 32 x 16-foot screen with maskings for all ratios from CinemaScope to normal, 16mm and 35mm. The projection booth is equipped with two matched Philips pulsed-light Xenon 35mm projectors and twin 16mm Philips projectors with Xenon lamp houses. Films may be played in four languages through perforated film sound reproducers in synch with the show copy track. The audience selects the appropriate language by means of individual transistorized receivers. The decor, designed by Cecil Beaton, was inspired by the greys, whites of Greek Island buildings; colour being concentrated in multi-hued seating and in the lighting effects.

There is also a Sales Promotion Advertising Film Catalog. From these Shell operating companies select their own lists of films and distribute their own catalogs. Separate leaflets are issued from time to time to include information about one or two films.

If films are grouped into "audience categories" specialist borrowers can be sent direct mailing shots so as to have access more quickly than by thumbing through catalogs.

ADVERTISING: Certain films can be publicized by advertising in the technical and trade press — such publicity is rewarding in countries

where there are many subscribers to educational journals, film journals and technical papers. This means spending money and may create a big increase in the number of requests for the film. Make sure there are enough (film) copies to meet the demand.

STAFF SHOWS: Several departments may have a particular interest in a new film. Special shows may be organized for them.

PROMOTION LITERATURE: Shell International Petroleum in London provides the basic material from which to make up promotional literature. (CONTINUED ON THE FOLLOWING PAGE 62)

When Management Must Clarify Job Changes

Assigned a Key Role of Explaining a Major New Management System to the Field,
a Motion Picture Delivered Facts in Warmly Human Terms for Metropolitan Life

A MAJOR CHANGE has been instituted this year in the way Metropolitan Life Insurance Company field managers go about their jobs. After two years of study and development work by the company and the management consulting firm of McKinsey & Company, Metropolitan Life recently introduced to its field organization a new system of management that considerably changes the responsibilities and accountabilities of both district and agency managers.

Naturally, a reorganization of job responsibilities of this order generated a lot of scuttlebutt throughout the company. As 1963 began, the average district manager's exposure to and understanding of the new management system was very spotty; although he had gathered bits and pieces from the grapevine, he did not, in an integrated sense, know what it was all about.

Explained at Company's Convention

With the new system about to be inaugurated this year, the company used the occasion of a companywide convention of its 950 district managers (held March 11-13) to explain the new system with vivid clarity, showing each man the advantages this program holds for strengthening market effectiveness.

A key part of the program at the convention was determined to be a motion picture which would set the stage for detailed discussions of the new system. In this initial planning phase, the film was to be the initial exposure of the new management system to most of the men, and it was to carry them logically from the abstracts of *why* the changes were made to the specifics of *how* the new jobs would work.

Entire Project Had 90-Day Time Limit

With less than three months to prepare the entire project, it was essential that all parties concerned stay within a tight time budget to insure completion in time for the convention. Wilding, Inc. was selected to produce the film,

based on a nine-page content analysis prepared by McKinsey & Company.

The film was to be "businesslike, but with touches of human interest—substantive enough to be of interest to the Board of Directors, yet told in a manner which would hold the attention of a district manager's wife." As the film project began to unfold, the time schedule worked out something like this:

Four Steps: from Outline to Screen

Step 1: McKinsey's rough "script outline" was prepared and submitted to the Metropolitan Life Convention Committee.

Step 2: With Wilding, Inc. retained for production, a scriptwriter for the studio was briefed by McKinsey and Metropolitan Life people on the new management system.

Step 3: Within ten days or so (after briefing), the complete script was ready for submission to the Convention Committee. During the following three days, it was reviewed, revisions made and the film was put into production at Wilding's Chicago studios.

Step 4: Within 60 days, the sound motion picture was completed and submitted for approval. Final prints were delivered to the Convention Committee by March 11; in time for the opening session.

Film Prepares Viewers for Discussion

The completed 30-minute film, *A Look to Our Future*, went "on screen" with an introductory statement about the purpose of the new management system, delivered by Senior Vice-President Alexander Hutchinson. Mr. Hutchinson pointed out the company's policy of modernization and adaptation to meet evolutionary changes in the business environment. Introducing the motion picture, he noted that its purpose was to open the entire subject for discussion after presenting, factually, the principal characteristics of the plan.

The film presents its material in dramatic "story" form. A district manager, returning to the U. S. after a period in one of the Com-

pany's overseas offices, reacts to the new system he has learned about as all district managers may feel as they face the new challenges of the job.

Basically, the film shows, the new management system provides that each man in the "chain of command" of the company's field force will have *direct* responsibility and accountability for his operations, methods and results. District managers have become directors of managers, rather than working with individual agents. Agency managers actually become *managers* of their agents rather than technical specialists in selling, as they have been for the most part in the past.

Mr. Hutchinson, who had overall responsibility for the convention and the motion picture's role in the program, says that *A Look to Our Future* was unusually well-received. While skillfully preparing the way for the intensive seminars that followed, it provided an excellent change of pace in the convention.

Backing Up an Ad Campaign

Tidewater Oil Shows Station Managers
Profit Picture in "Paris Sweepstakes"

SPONSOR: Tidewater Oil Company.

TITLE: *Paris Sweepstakes*, 30 min, color, produced by Sid Davis Productions for Grey Advertising Agency on behalf of Tidewater.

☆ How do you promote a major consumer advertising campaign, directed to prospects for service stations and, at the same time, stimulate station managers to take an active role in the campaign?

Touring' High Spots of "City of Light"

Tidewater's advertising executives and marketing people, assisted by their advertising agency (Grey) and producer Sid Davis, brought the whole panoply of the current "Paris Sweepstakes" campaign into this 30-minute motion picture. It carries both winners and their station counterparts to the "city of light" (and fun) via the screen, is liberally "loaded" with footage of Paris scenes.

Aimed for showings to Tidewater's Flying A dealers and distributors, the picture is aimed to acquaint them with the color advertising being carried in national and regional media on this "Paris Sweepstakes" theme; its key objective is to train the station personnel involved so that the advertising will be fully effective at the consumer level. It's a good use of the film medium, for the campaign really comes to life on the screen.

Advertising Brings in the Prospects

A handsome American couple hears the "Paris Sweepstakes" commercials on radio, reads the print advertising and decides to give the promotion a whirl. Maybe *they* will win one of those free jet trips to Paris given away each week! In the picture, the Flying A dealer knows the details and they learn that if they win a trip, so does he. In dream sequences which introduce the sights and sounds of Paris, with some eye-filling sequences of night-life, both the lucky consumers and the dealer are pictured enjoying the Paris jaunt.

At left: through a dramatic "story line," *"A Look to Our Future"* introduces new management system through the experience of one of company's district managers as he faces new challenges of his job.

Ideas for Carpet Salesmen

Real Facts About Herculon Fiber Help Woo Tough, Demanding Customers

SPONSOR: Hercules Powder Company.
TITLE: *It's Monday Morning*, 15 min., color, produced by Matt Farrell Productions.

This is a good-natured look at a carpet store on any typical Monday morning. George Wattsdale, an enterprising salesman, meets five tough, demanding customers and chalks up some profitable sales by knowing how to explain the salient features of Herculon, a new wonder fiber to be found in many leading brands of carpet.

Herculon, of course, is Hercules Powder Company's polypropylene fiber, now being used in such products as rugs, carpets, sweaters and other clothing. The film is planned to be used by carpet manufacturers for showing to salesmen in department stores and other carpet merchandising establishments.

In the film, George turns to the audience at each propitious moment in his sales pitch and lets us know: "Message coming up. This is the part to remember if you want to make a sale."

Messages are that colors in carpets made of Herculon can't fade or wear out — color is inside the fiber — locked in for keeps; Herculon carpets offer more luxurious depth with no pilling, fuzzing or shedding; they are static-free, most cleanable, and are only offered by well-known, legitimate manufacturers.

The film was designed to be humorous — there are sight gags galore and the cast wears funny masks, but also something that salesmen would remember — at least remember the key points that can help them to more profitable sales. Thus far, 40 prints are in constant use across the country. Carpet manufacturers have reported excellent success.

Below: how customer, salesman look to each other.

Live action and animation help make computers . . . as simple as baby's first learning to count!

Basic Film Series on Computer Techniques

Six Films on "Digital Computer" Simplify Complex Facts to Aid in Recruiting

One of the larger businesses in the country — the United States Navy — is, not surprisingly, a major user of computers. In the computation of payrolls, record-keeping, automatic systems of supply, fire control and navigation, computers play an increasingly important role. There are computers for specific weapons aboard Polaris submarines, carriers and other large ships of our fleet. On land, computers are rapidly being integrated with many areas of Naval activities.

Trained operators are an important consideration in the use of computers, and the Navy needs a regular supply of programmers, operators and maintenance men. To encourage Naval men and women to become interested in computers, a new series of films giving a basic overall view of computer techniques has recently been completed for the Navy by Audio Productions, Inc.

Simple Facts on Complex Concepts

Called *Digital Computer Techniques*, the series is intended to introduce some very complicated concepts in simplified form so that beginners may develop an understanding of how computers were developed, the historical background of this form of computation, and the actual techniques of operation.

Titles of the six films in the series give a good idea of their content: (1) *Introduction* — 16 min., (2) *Binary Numbers* — 12½ min., (3) *Logic Elements* — 15 min., (4) *Computer Units* — 24½ min., (5) *Logic Element Circuits* — 17½ min., and (6) *Programming* — 16½ minutes.

Technical Animation Is Most Effective

The films are handsomely mounted and in color, using a great deal of highly effective

technical animation. All types and makes of computers are seen: Burroughs, National Cash Register, Remington Rand, RCA and IBM being some of them. The last-named company, IBM, took a very active part in furnishing location facilities for many of the scenes.

The *Introduction* film goes right back to the first known systems of computation, starting with counting on the fingers, then up through the abacus, calculating "bones", mechanical adding machines, logarithmic slide rules, and on to the analog computer, predecessor to the sophisticated electronic digital computers of today.

Series Is Available to Public Buyer

The series is available for sale to the public (through Norwood Films, Washington, D.C.) It has been acclaimed as a most useful introduction to computers for many business men whose work throws them into association with computers but who have had no easy way to assimilate the concepts involved.

This is accomplished particularly by the first two films, which are designed to take the average person from scratch and teach a good understanding of basic computer principles.

They Merit Credit for Useful Series

For Audio Productions, Alexander Gansell was producer-director, with Ed Wagner responsible for animation design. The script, a remarkable job of filtering between very complicated information and a readily understandable end result, is by Richard Chindblom. For the Navy, C. Wesley Gardner functioned as project supervisor.

☆ Case histories of useful new pictures continue on following pages 40, 41 and 42.

You Are the Security Target!

Plants May Acquire Hard-Hitting Martin Marietta Picture
Produced by Rockett for Use by Plant Security Officers

SPONSOR: Martin Marietta Company.

TITLE: *Target You!*, 17 min., color, produced by F. K. Rockett Productions.

"You can help this man bury America. How? Drop your guard, just once. He'll do the rest!" "The man" is Nikita Khrushchev, seen in three blown-up news photos. The challenging voice is that of Ronald Reagan, standing in front of the pictures.

"Who, me?" The answering, surprised voice comes from a mild machine tool operator, shown in a swift cut.

"Yes, you. That little metal part you're working on — the Russians want to know all about it. It does not mean anything by itself? Don't worry — they'll fit all the pieces together."

They're Experts in This Line

The point is clear: No matter how small or insignificant the job may seem, if it has any element of useful information, the Soviet espionage network will seek to find out all about it. Carelessness, complacency, Americans who want to gain "status" from the importance of what they're doing, or who just love to talk, and may do so in the presence of a more than casually-interested listener — a David Greenglass, for instance, who had only to keep his ears open at Los Alamos to shorten frighteningly the lead-time our country had on atomic secrets — these are very real hazards to the Free World, to

the nation, to the individual himself.

"By their deeds ye shall know them . . ." Historic documentary footage of Soviet executions, purges, planned starvation, conquests in Poland and elsewhere makes the hazard plain. The narrator notes that it's all been out in the open for 45 years, the plan for destruction of capitalism, free enterprise, of the United States as the last hold-out — contemptuously in the open, with the Soviets understanding that American citizens would think it "incredible" and would refuse to believe it, as they've been doing.

It's Vital to Stay on Guard

Self-discipline, in and out of the plant, regardless of position, is vital, it is pointed out. "The end-product of security is lead-time, and it's not worth taking even a million-to-one chance of revealing anything to the enemy whose 'nets' operate in every corner of the globe and in almost every walk of life. Methods, situations, and the people may change, but the objectives don't — and their target is you!"

The sponsor's concern for security created this film with its tremendous impact. It was intended only for use within the company, but word of it spread as a tremendous tool for the security officer in any plant. Other defense contractors saw it and wanted to buy prints; high-level military personnel saw it, and were enthusiastic. (CONTINUED ON PAGE 55)

Pictured on "Target You" set are (l to r): Stanton Webb, producer; sponsor representative Ned Stephenson (Martin Marietta, Denver); star and narrator Ronald Reagan; John J. Hennessey, F. K. Rockett Productions; and Joseph Denove, director. Pictures in background are keyed to film's opening sequence.

Castle in the Loire Valley is mirrored in placid pond which surrounds it.

Enticing Tourists to By-Ways of France

Beauty of French Countryside Captured in New Picture
Lensed by Coleman from Viewpoint of American Tourist

SPONSOR: French Government Tourist Office.

TITLE: *France, With a French Accent*, 27½ min., color, produced by Coleman Productions, Inc.

☆ France had a problem. Tourists? They had millions. Millions of tourists thronging the cafes and bistros of Paris, millions of tourists to fill the plush hotels of the Riviera, millions of tourists to bask in the warm sun of the French Mediterranean beaches.

But the rest of France, the France away from the glittering society of Paris and the Riviera — the France with the vast vineyards, ancient castles, and traditional work of the French people which has been carried on over the centuries — was, by and large, ignored by visitors from abroad.

They All Want to See Paris

The French Government Tourist Bureau in Paris had long employed French production companies to film travelogs about France, the travelogs which were drawing the tourists to Paris or the Riviera with such frustrating regularity. So the Bureau decided to try a different approach: how about employing an American company to make a tourist film for Americans? The French-made films showed France from a French point of view, but how about an American tourist point of view?

Rene Barde and Myron Clement of the New York Office of the French Government Tourist Bureau got in touch with a veteran producer of travel films, Harry Coleman Productions, Inc. Coleman had had much valuable ex-

perience in making films abroad and should be able to combine the professional approach of the seasoned film-maker with a relative naivete concerning the French interior.

Coleman, supervising the job personally, decided to keep the film as simple and as close to the land and its people as possible.

Focus on Castles, Villages

To preserve the quality of wonderment at the beauty of the French countryside, with castles, villages, formal and informal gardens, all of which were virtually unknown to the standard tourist trade, the Coleman crew worked with only the barest shooting script.

The resulting film is a combination of polished travelog — with smooth continuity and adept editing, — and home-made tourist movie, with all the sights and sounds that a tourist, new to the country, would find memorable.

Rather than concentrate on the usual sights of the Eiffel Tower and the Notre Dame Cathedral, the

Below: fishing boats at Marseille

film shows these only peripherally and concentrates on such sights as Chamonix, the village where skiing was born; Mont-Sainte-Michel, where the tide rises faster than a horse can run; and Lyons, whose Roman Coliseum was built for the pleasure of the Roman legions twenty centuries ago. Also shown are the people of the French countryside, most of whom did not know that their picture was being taken.

Sound Complements the Visuals

To augment the visual feeling of the country, sound was employed to complement what was shown. A wild track was obtained a good part of the time with a Perfectone tape recorder, and many of the scenes in the picture have background sound and music which was actually recorded on the spot.

To complete the sound track and preserve the feeling of Frenchness of the film, Coleman combed the library of the French Broadcasting Company, and, in cooperation with Joe Petrosek of the Tourist Bureau, obtained original French records to be cut into the sound track. This, again, was a

rather different practice than the normal use of American stock music. Furthermore, the very poetic narration was written by Mrs. Noelle Gillmor to be spoken with a French accent.

The film was edited with the thought in mind of stressing the rural rather than the urban aspects of French life, and this effect was heightened by the "off the cuff" nature of the shooting itself. Scenes of Paris and Nice were included, of course, but these formed the bare framework of the picture. The vast majority of footage was shot through the eyes of one who toured the countryside and kept off the well-trod paths of the big cities.

Received Abroad With Applause

The finished film was sent immediately to Paris, to the head office of the French Government Tourist Bureau, and was received with applause. It has now been released through the New York Office of the Tourist Bureau and the desired results of encouraging travelers to take a vacation by leisurely touring the French interior are already being noted by tourism officials.

Showing Retailers "Man You Can Lean On"

Field Women With Repeater Projectors. Consumer Shows Help Klopman to Get Across Facts About Quality Product

SPONSOR: Klopman Mills.

TITLE: *A Man You Can Lean On*, 15 min., color, produced by Elektra Studios, Inc.

☆ Buyers of clothing containing the so-called miracle fibers are sometimes content to consider that the presence of these fibers in the cloth is by itself a guarantee of quality. This, of course, is not so.

Not only do fabrics contain varying amounts of synthetics, but there are vast differences in the way the blends are woven, dyed and finished. In the popular Dacron and cotton blends, for instance, there are some combinations on the market with a proportion of Dacron as low as four per cent; in others, weaving or dying faults that are imperceptible without close inspection can become headaches for the manufacturer in the cutting process.

There Are Product Differences

To combat these problems, the largest manufacturer of 65%-35% Dacron and cotton cloth in the world — Klopman Mills, a division of Burlington Industries — has been carrying on an extensive advertising and public relations

campaign to show that there are great differences in Dacron and cotton textiles, and that Klopman (in a memorable series of ads) is the man the manufacturer can lean on.

About a year ago, backing up its ads and its educational material, Klopman arranged for a group of large department store and chain store clothing buyers to visit the company's mills in Virginia, North Carolina and Georgia.

Inspection Assures the Quality

The reaction of these men to what they saw — the fantastic concentration on absolute quality, the great numbers of inspectors — and inspectors of inspectors — watching over every square inch of fabric, was such that Klopman immediately wanted to take every buyer and every store salesman in the country on a trip through the mills. While this was not feasible, it was possible to do it with a motion picture, and in fact, perhaps do it even a little better than with a personal visit.

The film not only tours the mills, as any visitor might, but it provides background material and

esthetic qualities that even an on-site inspection would find hard to match.

The picture opens in an advertising photography studio, showing how the well-known "Lean on Klopman" ads are done. It goes on to show, in really dazzling photography, what happens in the mills. Klopman is a "vertical" mill — it spins, and weaves, and dyes and finishes.

The camera follows along these processes, and beyond, to models wearing high-style garments in typical fashion photography settings. The point made is that while Klopman fabric might cost a little more, its complete surety of perfection actually amounts to savings for the manufacturer and extra satisfaction for the wearer.

Equip Women With Moviematics

To bring this message to the market, William Klopman, Jr., head of the company, Harold De Bona, advertising manager, and Edward Garvey, Marketing Manager, supplied each of the company's 44 local representatives with Kalart "Moviematic" repeater projectors loaded with 16mm sound prints of the film.

These representatives, all women, are expected to reach all the 4,500 top buyers and store train-

ing directors across the country, plus about 7 to 8,000 retail sales people.

In addition, Modern Talking Picture Service has been testing 50 prints of the film in resort areas; plans are being made to arrange for television distribution; and group showings are now going on to adult civic and women's organizations and home economics classes in schools.

Klopman is currently considering the possibility of moving a 35mm version of the film into theaters.

Buyers Are Specifying Klopman

Reaction to the film has been generally good. Some of the big city stores thought the film could have had more purely educational aspects — that it might have said "this machine does this job for this reason." But these were minor comments — one thing the film did do — the job it was intended to do — was to get across the image of Klopman quality.

It is hard to pin down actual results, for the ad campaign has been working in the same area for many months, but the film goes hand-in-glove with the ads, and buyers are more and more specifying Klopman, not just any Dacron-and-cotton.

Warner-Chilcote Laboratories used giant replica of Technicolor's "Instant" Projector to remind doctors at American Medical Association convention in Atlantic City of their 8mm film program . . .

Klopman film delivers facts where ad campaign leaves off . . .

It's "Holiday" time for the happy Dahlin family . . .

American Oil's "New Look" in Travel Films

New Film Captures Washington Scene With Beauty, Dignity

SPONSOR: American Oil Company.
TITLE: *Happy Holidays Along the Potomac*, 27½ min., color, produced by Parthenon Pictures.

What's more logical than promoting auto travel when you're in the oil and gas business? Audiences for a *really fascinating* travel picture run into the millions, via both group shows or on public service telecasts.

American Oil's public relations staffers are well aware of the potential. An earlier film, *Happy Holidays . . . in the Land of Lincoln*, has been widely shown, via Modern Talking Picture Service exchanges, and they had the right "formula," they were sure, when Parthenon Pictures turned up with a good family story and excellent camera work on scenic spots around Illinois in that film.

Avoiding Trite Treatment

But doing Washington was something else again. The nation's capitol has been a frequent film subject. Again, Parthenon came up with the right answers, told in *Happy Holidays . . . Along the Potomac*. A film treatment which embraces dignity and honesty, straightforward simplicity in content is aided by *natural* camera handling rather than arty angles.

Most Washington tourists are "family trade" seeking to "improve the children" and to help them

"understand our country better." That's the kind of *Happy Holiday* the engaging Dahlin family has on their visit to Washington. Utterly non-commercial, with only a credit mention for American, it tours Bureau of Printing and Engraving, the FBI's Crime Lab and the Library of Congress as well as the halls of Congress and the White House. The camera is "at home" in the National Gallery, Folger Library, and the Smithsonian.

Dahlins See the Sights

The Dahlins pay homage at the Jefferson and Lincoln Memorials, gaze in awe at the Washington Monument. And they travel the Potomac enroute to Arlington and Mount Vernon. An "overview" of Washington closes an always interesting, all-too-brief family vacation trip.

Parthenon's "Cap" Palmer is the producer-writer of this excellent subject; aided by breathtaking lenswork of associate Guy Adenis and the skillful editing of John E.R. MacDougall, music by David Bowen.

Let's Have More of Them

The Dahlins will be back, we hope, in other American Oil travelogues. They'll be welcomed by eager audiences. The *Holiday* films are distributed by Modern Talking Picture Service exchanges, nationwide. □

Inspiring views of Capitol buildings are featured in the picture.

Norge dealers are pictured at unveiling of company's 1964 appliance lines.

Live Show Scores a Sales "Hit" for Norge

Florida Premiere, Staged by Wilding, Wins 98% of Quota

1964 NORGE APPLIANCES, including the company's electric and gas ranges and home laundry equipment, were "world premiered" on July 15-19 at a highly-successful "live show" presented to members of the field force, distributors and their key people and principal dealers. The presentation was made at the Diplomat Hotel, Hollywood-by-the-Sea, Florida.

The Florida show, staged by Wilding, Inc. and utilizing Vista-strip slidefilms, an original music score and excellent graphic materials, brought Norge 98.8% of their anticipated sales quota. The success of the Florida presentation brought the decision to hold a modified version of the show for dealers and their key sales people in Chicago, Dallas, New York and Los Angeles.

Following a welcoming address by the company's Jack Wolfe, Norge president Robert O. Fickes addressed guests on the theme: "Norge Is On the Move." His talk was followed by the presentation of 1964 electric and gas ranges,

made by Art Schnipper, Jr., and highlighted by a skit, musical number and the product "reveal."

The presentation of 1964 Norge home laundry equipment emphasized a new 14-pound capacity washer. One demonstration showed members of the show cast pulling 10 double bed sheets from the new washer. Merchandising materials for dealer showroom use were also featured.

The company's 1964 advertising and merchandising program was presented by Harry McDavitt. Jack Wolfe's sum-up "A Rewarding Story" was followed by Dan Dougherty's concluding presentation: "Now, Let's Go Big! Let's Go Norge!"

Completely packaged so that elements of the show may be used by Norge distributors among their regional dealers, the Wilding program was written by Tom Clark and Hal Secor; Lloyd Norlin created the music (there were three original numbers, plus an overture and the finale); Jack Keyes handled all graphic media. □

These integrated meeting tools helped Norge score resounding sales success.

IFPA JOURNAL

INDUSTRY FILM PRODUCERS ASSOCIATION, INC.

Bob Quittner Awarded \$1,500 Grant by the Directors Guild

Winner of one of the two \$1,500 grants awarded annually by the Directors Guild of America is Robert M. Quittner, IFPA member and a graduate student in the Motion Picture Division of UCLA's Department of Theater Arts.

Quittner is producing and directing a film on the problem of high school drop-outs to fulfill requirements for his Master's degree at UCLA. Formerly a newspaper writer-photographer, he hopes to combine his past experience, a Bachelor's degree in sociology and current training in film production to specialize in documentaries with sociological emphasis.

He will team occasionally with his wife, Dana, a trained researcher. Quittner has been employed as a teaching assistant in UCLA's Motion Picture Division during the past year. The family home is in West Los Angeles.

Ken Maurer Prepared for Film Career in Schools, Industry

Because of his interest in films for education, IFPA's new Chapters Vice-President Ken Maurer took a position with the Los Angeles City School System a while back.

Before that, Ken free-lanced for three years, producing TV commercials for a local furniture chain, Biblical stories for a Sun-

day television program and publicity films for youth camps. These years of field experience followed his formal schooling in Motion Picture Production and Education at UCLA, where he received his BA and at Los Angeles State College where he completed work on his Masters' degree.

But Ken Maurer gravitated back to the film world when he joined the Ramo-Wooldridge Corporation during the early development

of our major missile systems. He continued at STL (Space Technology Laboratories) when it became an R-W subsidiary. As STL's assistant to the head of the Film Acquisition Department, he helped to develop acquisition, control and evaluation procedures for all films generated by major contractors working in the Air Force missile program.

Now Senior Film Specialist

Now he's back in production as senior film specialist responsible for the Titan Weapon System, making films for Air Force Command program offices, engineering evaluation, orientation programs, etc. at the Aerospace Corporation.

Chapters around the U. S. can expect an active year under his enthusiastic leadership.

From the IFPA President's Viewpoint

A GREAT DEAL has been said to the membership of the Industry Film Producers Association in the last six years about our reasons for being. Most of what has been said has been necessarily idealistic. For we need to talk idealistically to each other about achievement, progress, growth, and the like.

But we also need to be realistic about certain other aspects of a professional society. To me, the most important justification for the existence of any organization is regular and active participation by members. So, briefly, let me be realistic on that one subject.

It is undeniably true that in most professional or social organizations a minority of the members devote the majority of the time and energy needed to make the organization work. And it is also true that the same minority attends meetings regularly, takes advantage of voting privileges, gives freely of its talent, knowledge and experience.

These are the people who bring life to an association and benefits to themselves.

And yet the cry is heard — usually from those in the majority — "What does IFPA do for me?" It is also the final mutter of those few each year who give up their membership.

I have this to say in answer to that cry. Nothing — absolutely nothing — can be received without someone giving. An organization is people. So the cry can be interpreted as, "What do all the other people in IFPA do for me?"

Jack R. Goetz
IFPA President, 1963-64

It stands to reason that when members don't participate in some way, give of themselves, the purpose for organization is defeated. Ideas and information must flow two ways, encouraged by the osmosis of personal contact.

So, don't sit on your membership card and wait for IFPA to flood you with benefits. If you have something to offer other industry film producers — talk about it — write about it. Going to a meeting or serving on a committee means exactly what it says. You meet and communicate with other members. It's there that you will get response — opinion — reaction.

If you're located too far from a chapter meeting place, write to members or submit articles to the journal. You'll find it rewarding — and you'll certainly make new friends in the business. So, *do something for IFPA*. Then, and only then, can IFPA do something for you.

Chapters' VP Ken Maurer

Editorial V. P. Ed Hayes

Meet Ed Hayes: Editorial VP and Your Journal's Editor

☆ The man-in-charge of these JOURNAL pages, your Editorial Vice-President Edward L. Hayes, has combined years of service in the Navy with specialization in filmed communication and industrial requirements.

Presently an Executive Producer for Walter V. Hardy, Chief, Motion Pictures at Autonetics, Ed was formerly Supervisor of Photography at the Ryan Aeronautical Company in San Diego.

A Commander in the Navy's Ready Reserve he recently completed an important special assignment on active duty, heading the camera party at sea which photographed President Kennedy's visit aboard the USS Oriskany.

Such assignments aren't new to Ed Hayes. As a Navy Photographic Officer, his assignments have taken him to far places — from the wilds of Mongolia and Tibet to sea duty off Korea with Fast Carrier Task Force 77.

Ed and Mrs. Hayes, and their two children, Ed III and Dolores, make their home in Fullerton, California.

PEOPLE & PLACES

☆ Gene Burson, many years Head of Motion Pictures with Hughes Aircraft Company, has recently associated with Hollywood Animators as Producer.

☆ Pat Patterson, immediate past Editorial V. P. for IFPA and present President of the University Film Producers Association, is now with the Cinema Department of the University of Southern California, after ten years as Head

THE INDUSTRY FILM JOURNAL

Lockheed Study Films Record Behavior of Marine Mammals

☆ As part of the Anti-Submarine Warfare and Ocean Systems research effort at the Lockheed-California Company, the firm's in-plant motion picture department is documenting behavioral studies of dolphins and sea lions.

The studies are being conducted both at the plant's own training tanks at Burbank and at Marineland of the Pacific's Palos Verdes facilities. By using synchronous sound and long running cameras, Lockheed is capturing auditory and visual communication techniques used by the animals under

imposed and natural conditions.

While most of the current footage being shot on dolphins is being used to determine possible lexical meanings in their strange whistling noises, a comprehensive 16mm film story on the subject is planned for the near future.

Lockheed also is producing an in-plant picture on the Pacific Gray Whale, based on company studies in Baja California migration grounds. Here again, acoustical research for Anti-Submarine Warfare dictates the audio-visual need.

Below: writer-director Doug Muir prompts porpoise for cameraman George Rodriguez on Lockheed-California project.

of the Department of Visual Communications at the University of California at Los Angeles.

☆ Ed Hunter, former Chief of Motion Pictures with North American Aviation's Space and Information Division, is in Washington D. C., as a Writer-Director-Producer with the U.S.I.A.

☆ Norm Dyrenfurth is back home in Santa Monica, after heading up the successful Mt. Everest Expedition which we all followed with so much interest and admiration.

☆ I.F.P.A. now has an official Recording Secretary in the person of Elaine M. Dolnick who, in the past, has done such a fine job for us on an unofficial basis. Corre-

spondence addressed to Elaine at our official address will be routed to the person best qualified to serve your needs.

NOTE: Your National Board believes that the membership would be interested in a sustained column of this nature. If you have items of a "People and Places" nature, please drop us a postal card.

Keeping Up With Chapters Depends on Your Reports

☆ That's right! We're looking for those news-notes on regional chapter activities this fall. These JOURNAL pages keep every section of the country informed on all IFPA activities. Send them in, Delaware, New England, California, and your JOURNAL editor will appreciate it!

"You've Got a Secret" Points Up Problem of Plant Security

☆ Industrial plants involved in military work constantly face the problem of classified material and the need for complete security of vital data. With a cartoon-character type of approach as its basic format, a new 13-minute sound slidefilm titled *You've Got a Secret* was produced by the Ford Instrument Company, a division of Sperry Rand Corporation, to deal with this critical problem among its own employees.

Intended solely for showing to employees at Ford Instrument (but useful to other security-minded companies), *You've Got a Secret* dramatizes a "Secret's" role from the time of his arrival at the plant through the phases of production and control. It outlines the how's, when's, where's and why's of classified material protection.

Available in both automatic and manual versions, the color slidefilm serves for indoctrination of new employees and as refresher training of present workers. John Hart, Employee Relations Manager at Ford Instrument Company, 31-10 Thomson Avenue, Long Island 1, N. Y., has noted that copies of *You've Got a Secret* are being made available to other concerns at cost of \$25.00 for the record and strip.

* * *

Color Sensitometry Principles Available in Revised Edition

☆ A new, revised edition of *Principles of Color Sensitometry* has just been published by the Society of Motion Picture and Television Engineers.

First published by the Society in 1950, this fundamental work has been brought up to date as part of a program headed by SMPTE Engineering Vice-President Deane R. White, Du Pont Photo Products Department.

The new edition devotes chapters to sensitometric exposures; processing of sensitometric tests; quantitative evaluation of image density; densitometer design principles; transformations between integral and analytical densities; applications of color sensitometry and interpretation of sensitometric results; and statistical aspects of color sensitometry.

Principles of Color Sensitometry is 102 pages, cloth-bound. Copies are available at \$4 from SMPTE, 9 East 41st St., New York 17.

Don't forget to report changes of address to BUSINESS SCREEN!

what Kodak has done for people who fear movie projectors

This may be the first movie projector you've ever liked.

It is thoroughly tame. Now you can put on your show without becoming awkward or embarrassed.

Simon-simple, it sets up anywhere. You don't have to assemble anything. Threading the film is as easy as following a red line.

One lever and one push button do everything else. Throw the lever forward, you have a picture. Bright and clear, so easy to look at.

Push the button, you have sound. Instantly! No warm-up. No waiting.

This projector gives you complete obedience. You'll never have to improvise or beg pardon for it.

When your presentation is over, pull back on the lever. Everything shuts off. That's all there is to it.

This machine may have the *first* sound system *you never have to fix*.

Until now, a projector's sound sys-

tem has not been without shortcomings. Tubes could burn out. Exciter lamps could burn out. Background noise could interfere, distract audiences into inattentiveness.

No more of this kind of thing.

This new Kodak projector has a remarkable new sound system.

Transistors *end* tube burn-outs forever. Our exciter lamp is rated to last for the life of the projector, (we haven't even allowed access to it for replacement). And a space-age gadget we call a solar cell ends various distracting background noises and is also rated for the life of the projector.

Beautiful sound. Clean, commanding, steady sound. It never interrupts itself or embarrasses you.

This new projector—like all Kodak projectors—pampers film. Kissing it with only 2½ ounces of pressure. The lightest touch of all. No rub, no drag, no scrape, no film breakage, or

sprocket hole tearing. Films last longer in a projector like this.

This projector even operates so quietly it never calls attention to itself.

Its name is the KODAK PAGEANT 16mm Sound Projector, Model AV-126-TR.

If you'd like to see one work, or read illustrated literature about it, write your name and address here:

Then send it back to us at the address below.

Check this box ☐ and we'll have a Kodak dealer call you to arrange for a convenient demonstration. No obligation, of course.

The Challenge of 'Real Time' Communication

by Robert S. Scott

Assistant Director, Government Relations, Aerospace Corporation

THE CHALLENGE of real-time communication is one of the most vital aspects of the overall challenge facing our military and government planners today — the total challenge of the space age, complicated by our "exploding technology." Whether we realize it or not, whether we like it or not, our world, our way of life, our previously considered "modern" civilization, is being rapidly and drastically changed — probably, permanently changed. Our basic concepts of time and space are being seriously disturbed — even revolutionized.

"Around the World in 80 Days" was science fiction not so many years ago. Now it's around the world 22 times in a day and a half. What next? All this has got to be changing our basic concepts of time and space. This is the age of breakthroughs. Real-time communication will be a vital part of it. We might as well get used to the idea.

The Meaning of 'Real Time'

What do we mean by real time? *Instant* communication — (like instant coffee) — or — *knowing everything, now!* If knowledge truly is power — and we're involved in a global power struggle — it gets vitally important to know everything you need to know — *now*.

How is this possible? It isn't yet. We haven't yet reduced Earth to the size of a crystal ball. But we are trying and professional communicators, especially audio-visual communicators, can help and have helped an immeasurable amount.

If you were in an orbiting command post, a space station, and had the entire planet under complete surveillance — and had instrumentation that would simultaneously display what was going on every place that you couldn't directly observe — and you could zoom in to any detail or movement that you wanted to study — and then you could communicate to other space-borne forces to assist or to prevent any action on Earth — you'd be in the driver's seat, wouldn't you?

Facts for Effective Decisions

People all over Earth would be hoping that you were a "good guy" or at least *on their side*. That's the kind of opportunity that real time global communication could give you. You could make instant and effective decisions based on real time information. Now, you don't have to get into orbit to appreciate the value of the communi-

cation principle. The more you try to accomplish in less time, the more you must improve the information, communication and the decision-making system.

That's what the Defense Department and the Air Force have been working toward in developing a closed circuit television and video tape capability as essential steps to the realization of their real-time secure, audio-visual communication network.

First Milestone Now Reached

Early this year, after nearly two years of planning, design and development work, a closed circuit TV system at the Air Force Space Systems Division in Inglewood, California, became operational. After establishing some needed policies and regulations, building supporting facilities and acquiring and training the technical crew members, the first official production milestone was accomplished on the 20th of April.

The Commander of the Space Systems Division briefed the Commander of the Air Force Systems Command in Washington, D. C. — *on television*. Two copies of a color video tape were simultaneously recorded at SSD — one was flown to Hq., AFSC, and was viewed there at a commanders' management conference.

The audience included General Bernard Schriever and his top staff members. Simultaneously, Major General Benjamin Funk and his staff in California were reviewing the other copy of the tape. After the secret tapes were presented, questions were asked and answered over the inter-headquarters secure telephone.

This first proof-test of the CCTV management communication system was highly successful. The television crew has been working steadily on high priority briefings ever since.

A Step in the Right Direction

You may ask, "What's so unusual about coast-to-coast color TV or video-taped programs?" Nothing — in the *entertainment* world. But as a direct means of governmental management communication it becomes a step in the right direction toward the real-time communication goal.

It isn't a real-time network yet, it's only a step in that direction. It's an important step, because you crawl before you walk and you walk before you run. You might say that while you are crawling and walking you are developing the "technology", that is, acquiring the skills, the know-how, the experience that will permit you to

Television cameras scan an Air Force briefing session being videotaped for closed-circuit use at Space Systems Division Headquarters, Inglewood, Col.

run later on. That's what the Air Force is doing with closed circuit TV and video taped recordings. They're learning to crawl and to walk so they can run at full speed toward their real-time goal later on.

Vital to National Security

Why all of this interest in "instant information" to insure accelerated decision-making? Because it's vital to our individual and collective security. One of our senior Senators, the Honorable Hubert H. Humphrey, was vitally concerned about this problem when he said, "The efficiency of America's 12 billion dollar research and development effort is seriously suffering from a near breakdown in communication."

Our governmental agencies have placed an increasing emphasis upon overcoming this R&D communication crisis. We all realize how important research and development is to our continued security. Many of us have made many films on the subject. We also believe that effective communication is essential to efficient R&D management. We've supported many of our in-plant film programs in the aerospace industry with that honest argument.

The New Problems of R & D

The very nature of research and development creates its own problem of communication and human understanding. It's dealing with the new, the mysterious, the scientific, the pioneering, the technical, the unknown, with subjects so new that no understandable language has yet been created to describe or to communicate them. So there is bound to be an R&D communication problem. So everything should be done to solve that problem, as an integral part of the research and development management activity.

It has been estimated that one half of our total annual defense budget is spent on words. Could it be possible? Well, if there is any truth to it, then effective and efficient communication motivates the vital heart beat of our struggle for survival, not just for the United States of America, or the free world, but for our present human civilization. Obviously, if we are to have even half a chance to win the international war of technology, we'd better do everything possible to win the war of words as well.

This dynamic audio-visual medium of ours — whether it's film or video tape is irrelevant — is a powerful communication medium. It is a mighty motivating force in

human thinking, human feeling — in causing human action. And inhuman action, too. The enemies of truth know this. They can change the pictures to suit their own words. We all know how to do that. Show a *real* picture to "prove" *false* words. Use a little music or a well selected, distorted close-up to give the audience an emotional shove into a dark illusion, a little further into ignorance, a little farther from reality.

But you can also use our marvelous moving medium to create understanding, to illuminate the mind, to clarify a difficult subject, to create a real picture, to project a true image.

So if we are to win the war of words we must continually research and develop better systems and techniques for expressing and communicating management purposes to the higher, decision-making audiences.

Synthesis of Art & Science

CCTV is an advanced communication system, representing the synthesis of many communication arts and sciences. It is believed to be the most evolved of all management communication or informational systems to date. It has yet to be adapted to uniquely space age purposes. We are encouraged to experiment, to research, to develop new techniques to create optimum understanding in minimum time with maximum impact on our communication effectiveness. The result will be the clearest possible reception of our SSD image by monitors at higher echelons — hopefully resulting in more favorable decisions reached more quickly.

Our system is completely compatible with the larger system, planned ultimately to provide USAF, AFSC and other military and government agencies, including the White House, with a real-time and secure television network. This goal, when achieved, will be a complete television broadcast system, integrated by micro-wave and coaxial cable links, and combining both live and video tape transmission and reception capabilities.

Plan for Complete Network

AFSC's plans call for a communication system connecting the headquarters with its divisions, major test centers and principal contractors. This capability would permit immediate, two-way communications of technical and other vital management information, securely, audibly and visually. It would then be possible to give a

wall to wall to wall to wall

RADIANT PROJECTION SCREENS

Make Every Classroom a Projection Room for Maximum Utilization of All Projection Equipment!

Every classroom *can* become a projection room — at surprisingly low cost! — by simply hanging a highly reflective, quality Radiant Screen from the wall or ceiling. From classroom wall to classroom wall, you will find no problem in selecting Radiant Screens in the sizes, styles and with reflective surfaces to suit all seating arrangements and room lighting conditions.

Brilliant glass beaded surfaces or controlled-reflection lenticular screens that show pictures even where effective room darkening is a problem give you a range of choice for every projection requirement.

Wall to wall Radiant Screens are an economical

and efficient way to obtain maximum use from your movie, slide, filmstrip, overhead and opaque projectors. Roll down the screen . . . plug in the projector . . . turn on the switch! The show is on!

Whether you are interested in wall to wall Radiant Screen installations or require only a few wall or portable tripod screens to fill special requirements, rely on your Radiant Audio-Visual Specialist. He can guide you in equipping a single classroom, a single school or an entire school system. And all within your budget requirements.

briefing any time without having to send anyone anywhere, except to our TV center. This goal is not immediately accessible, due to state-of-the-art as well as cost considerations.

The technology may progress more rapidly than our ability to apply it. Recent tests have demonstrated capability for digitizing a secure video signal, for encoding, transmission and decoding of a black and white picture. Two video key generator-decoders have recently been installed in the White House. This will undoubtedly provide the necessary impetus to accelerate other tie-in capabilities. The high cost of renting cross-country transmission lines from commercial sources may soon be eliminated through implementation of the planned Air Force Logistics Net under Air Force Communications Command cognizance, or through the military use of a Telstar-type satellite system. It is believed at AFSC that technical limitations to a secure real-time system will be eliminated within the next calendar year.

New Skills and Techniques

Closed circuit TV combined with a video-tape recording capability will permit us to develop new presentation skills and techniques, to apply our presentation support capabilities, creative as well as technical, to a more dynamic contribution and to develop a trained cadre of television briefers.

With our initial capability we can: produce color video tapes of key briefings; forward recorded video-taped presentations, via pouch or courier, to Hq AFSC for playback on secure distribution outlets; play back tape recordings received from other commands or contractor sources. We can receive live commercial TV broadcasts, in color or black and white, and record or play them back as required; and we can initiate and maintain a library of video taped presentations, or have them transferred to film.

The Space Systems Division was the first division in the Air Force Systems Command to become operational with its color CCTV and video-tape capability. Hq AFSC's color TV system is presently operational. A color monitor has been placed in the Commander's office. Additional monitors have been made available in all key management offices. Standard orientation and current status briefings can be viewed on a secure

Challenge of 'Real Time' Communication:

system within the headquarters building.

AFSC's system and our own are compatible with the present Hq USAF system in the Pentagon where several viewing rooms of varying capacities will permit simultaneous briefings of up to 500 viewers within a centralized briefing area. It is planned to have the Pentagon audiences come to the centralized TV area.

Other Air Force Installations

When and if this plan works out it could save a lot of time and energy. Other AFSC divisions and centers are in various stages of operation, acquisition and planning of their TV capabilities. For example, AFMTC at Patrick AFB is already operational with a compatible color system. AMD is presently operational on a black and

white basis only. However we can play back AMD's video tapes.

Today's audiences are movie and TV oriented. The TV education-information trend offers an audience communication line of least resistance.

Why color? AFSC has published a little brochure on the subject. Among other things it documents the claim that color is three and one-half times more effective as a teaching-retention medium than black and white. Color is true to life. But for those who don't like it — we can use our system for black and white.

Television tape is extremely flexible. Briefings can be quickly and easily modified or up-dated — or downgraded as to security classification. Video tapes can be stored or erased and the tapes re-

used — over and over again. A video taped message or briefing can be economically aimed at small select group, a one-time target, or a single addressee — like a TV-TWX. A TV-TWX can be returned to the originator immediately and erased, unless otherwise specified. An inexpensive black and white film recording with sound can be made for permanent retention prior to video tape erasures. Color film recordings are now available with acceptable quality. Accumulated entertainment and educational TV experience can be re-directed and adapted to meet unique needs. As an example, at Lowry Air Force Base, as many as 1200 students are being taught simultaneously by closed-circuit TV.

Versatile Medium for Briefing

Live briefings can be rehearsed on TV to make a live briefing better, or to permit command review at a different time, or to "can" a briefing, or a portion of one, if the whole briefing team cannot be present. On TV you can rehearse yourself on camera and have instant play-back on a monitor. You can view yourself as others do, and if you don't like your "private preview," you can re-record it. This gives you an objective, second look for accuracy of technical information.

Video taped presentations can be integrated into live briefings — for change of pace, for contrast or for convenience. The really sensitive technical portions that you want to get just right can be on tape. Within a technical briefing, certain portions may remain standard or relatively static — concept, configuration, test results, organization or budget information. Those portions can be taped. More fluid or changeable information can be presented live.

Kinescoping to Keep Record

Prior to final erasure of a video taped briefing, a kinescope can be made for later accuracy checks — or for reissue of the same briefing. A permanent film record for about \$150 is good insurance. It is now feasible to build a briefing library in the Washington area, either on tape or film transfer, for a quick response capability.

The question now arises: What are the implications of the development of this new type of audio-visual system on the industry film maker.

First of all I implied that TV can become a complementary, an additional communication medium.

ut we can make it a competitive one — if we choose. If we choose to see TV as a threat to our personal security, as a "johnny-come-lately" who's trying to get in good with the boss, or take our place, or our budget — if we choose to make the boss choose between film or TV, he might just choose TV. After all, he has a set in his living room — even his kids know how to turn it on.

There are many compelling advantages to production of industry-type communications on closed circuit video tape, once you get past the initial equipment costs. With the White House and the Pentagon and other top government agencies going to TV communications, your companies will have to be considering this subject seriously. Many of them are now.

Autonetics' Pioneering Role

One of the outstanding industrial pioneers in this field has been Autonetics. If you knew that you could get 500 V.I.P. viewers to see our briefing in the Pentagon, all at one time, and that TV tape would give you several more days to firm up the configuration design before you had to present it, film might lose.

But, if you're smart and you realize that the only difference is the substitution of an electronic signal for a chemical emulsion, then you now it's still a motion picture — very flexible motion picture with "instant rushes," in-house dubbing, concurrent editing, more confident amateur actors and performances.

Production on industrial TV will never take the place of a really well made motion picture, but it may be able to do our "quick and dirty" work quicker and cleaner. After all, it's still audio-visual pictures and you need it as an additional instrument of your industrial profession. CCTV needs all the skilled audio-visual creativity you can bring to it. It can be a great new contribution that you can make to solving your own management's communication problems.

If you, the creative audio-visual potential of industry, don't take on this service opportunity, it'll be done by someone else, with more technical, but possibly less creative, abilities. The picture will be gorgeous with just the right number of lines, resolution and color balance — but it won't move and won't communicate. We can help to meet the challenge of "Real Time" by accepting this additional challenge of industrial television. ☐

HIGH ON ENTHUSIASM but slightly lower in total attendance than in previous record years, the 23rd National Audio-Visual Convention which concluded in Chicago's Sherman House on July 24th brought together some 2,000 dealers, distributors, manufacturers' representatives and film users.

Although somewhat severely restricted in attendance to dealer members of the National Audio-Visual Association and officially-recognized members of concurrently meeting user groups, the NAVA Convention and Trade Show was reported to have scored notable sales gains. This year, there were fewer television equipment exhibits, some teaching machine innovations but a large number of new projection tools and materials for education, business and religious use.

Abrams Is New President

The newly-elected president of the National Audio-Visual Association is Robert P. Abrams, an official of the Philadelphia a-v firm, Williams, Brown & Earle. He succeeded Harold A. Fischer, Or-

Outgoing president Harold Fischer (right) receives plaque from the NAVA president-elect Robert P. Abrams.

lando, Florida, now Chairman of the Board of the Association.

First vice-president-elect is Harold Newman, Kalamazoo, Michigan; second vice-president is Eloise Keefe, Dallas, Texas, Secretary of NAVA is Joseph Meidt, of Toledo, Ohio and treasurer is Max Rarig of Seattle, Washington.

Other Directors & Officers

Two directors-at-large were named to fill vacancies. They are Paul Cox, Hollywood, California and Howard Holt, Birmingham, Alabama. Permanent executive vice president of NAVA is Don White. James Hulfish of NAVA's headquarters' staff, Fairfax, Virginia, was in charge of the extensive convention arrangements.

Other regional directors named at the Convention were C. M. Meserve, Manchester, New Hampshire, representing the Northeast-

Pictured at opening business session (l to r) are: executive vice-president Don White; president Robert P. Abrams; and keynote speaker George Murphy.

"Focus on Change" Dominant as Dealers Attend National Audio-Visual Convention

ern Region; Jack L. McCracken, Asheville, North Carolina, for the Southeastern Region; P. Ray Swank, St. Louis, heading the Plains Region; and John C. Ellingson, Spokane, Washington, for the Western Region.

Meeting concurrently during the convention period were members of the National Visual Presentation Association; the Industrial Audio-Visual Association; and the Council of Medical Sciences. Illinois Audio-Visual Education Association members also hosted a special forum for school people, arranged by Don Smith.

Restrict Consumer Attendance

Membership in these groups was required for consumer admission to the large Trade Show area, otherwise restricted to official dealer members, exhibitors and fortunate recipients of guest passes purchased by exhibiting companies.

Featured speaker at the opening general session was former stage and screen star George Murphy, now an official of the Technicolor Corporation. Speaking to the Convention's theme: "Focus on

Change," Mr. Murphy cited the vast changes which have taken place in American education through the introduction of audio-visual tools and techniques.

Speaks to Industry Council

One of the relevant Convention programs was the meeting of the Association's Industry and Business Council, formerly headed by president-elect Abrams. Guest speaker at this Sunday afternoon program was Lincoln Walz, training executive with the Scott Paper Company who discussed industry's audio-visual needs.

Ralph Pea, Director of Special Services for the U.S. Post Office, Washington, D. C. was present at a meeting of the NAVA Film Council where he answered questions and discussed problems relevant to the shipping of films. The Film Council session was presided over by Nelson C. White, Baltimore, Maryland dealer.

Shows Cross-Media Approach

Education's key role in NAVA business was ably represented by the General Session presentation "Utilizing Audio-Visual Media in

Below: the 1963-64 Board of Directors (front row, l to r) chairman Harold A. Fischer; president Abrams; 1st v.p. Harold Newman. Back row (l to r): treasurer Max Rarig; 2nd v.p. Eloise Keefe; and secretary Joseph Meidt.

a Teaching Unit," presented by Allan R. Fiers, audio-visual consultant to the Minneapolis, Minn. Public Schools. Fiers conducted an actual classroom demonstration of the cross-media approach to instruction, utilizing a wide variety of a-v media.

But the keynote address of the Convention went to NAVA officer Don White. Citing the extensive 1963 Trade Show, he said:

"The 1963 A-V Exhibit here offers living proofs that our teachers of today are the best-equipped in the world and far better equip-

Lincoln Walz (l), training executive at Scott Paper, with Bob Abrams at Industry-Business Council meeting.

ped than they have ever been before. The greater use of audio-visual aids has brought two advantages to the teacher.

"First the quality of instruction is vastly increased. And, secondly, these new instructional tools relieve the teacher of some of the responsibility for more routine types of instruction, freeing him to devote more attention to the personal needs of individual students."

Britton Heads NAVA Institute

The Convention program in Chicago followed the conclusion of another NAVA Institute, train-

ing ground for dealers, held annually on the University of Indiana campus, Bloomington. Jack Britton, Buffalo, New York has been named chairman of the 1964 NAVA Institute. Robert Maybrier, Warsaw, Indiana, is the vice-chairman-elect and the Institute's secretary is Martin Mendro of Chicago. NAVA Trade Show Exhibitors also named their 1964 Committee, headed by Seymour Jacob of the Radiant Manufacturing Corporation, Morton Grove, Illinois.

MEET REID H. RAY: (CONTINUED FROM PAGE 34)

University. He filmed and edited more than 28 football game training films, plus many track and field events.

During those years (1920-22) the only other major school using films for football instruction was Yale University, where Howard Jones' brother, Tad, was a pioneer in using film media for athletic instruction. The summer months were devoted to photography and direction of documentaries for his father's insurance company, leading to a post-graduation offer from "Charlie" Bell to join the St. Paul firm of Mills and Bell Motion Pictures, Inc.

Covered Events for Newsreels

Those were the "rack and tank" days of film laboratory operation, so Reid learned the business the hard way. But he also found an opportunity to apply his campus football experience through the company's contract with Pathe News and Paramount News for all local newsreel material, including the University of Minnesota home games. For more than 12 years Reid Ray photographed, edited, titled and later, when sound came, wrote the narration for these local

news releases. This required fast work. In the case of the game films, prints had to be out of the lab by early evening following the afternoon game.

The years rolled on and experience, one of his tremendous personal assets, mounted. An opportunity to acquire a controlling interest in the company changed the name of this pioneer studio to Ray-Bell Films, Inc. As business increased, Reid turned to direction, transferring to creative activity. In 1935, a new studio and laboratory was designed and built. The company was ready when national defense requirements preempted its skills and resources at the outbreak of World War II. Reid Ray was to personally produce and direct 108 training films for the Navy and the United States Office of Education, plus some 33 sound slidefilms.

A Servant of His Industry

He has never shirked industry responsibilities. Becoming a member of SMPTE in the 30's, he served as Sustaining Membership Committee Chairman, Treasurer, Convention Vice-President, Executive Vice-President; is now its extremely active President. He has been a frequent contributor of technical papers to the Society's JOURNAL.

And well he might be, for Mr. Ray introduced and assisted in perfecting the commercial adaptation of many color processes, beginning with the bipack Cinecolor-Multicolor process; later, Technicolor's Moneypack, followed by Ansco's Reversal and negative-positive material, along with the early duplicating of 16mm Kodachrome. His leadership in the laboratory field was recognized in his election as a President of the Association of Cinema Laboratories. He has served on the ACL's Board

TELIC, INC. ■ FILM CENTER ■ 630 NINTH AVENUE, NEW YORK 36, N.Y.

ELWOOD SIEGEL, President & Executive Director
EDWARD F. BOUGHTON, Vice President & Executive Producer

JU 2-3480

of Directors for a number of years.

But, film man that he is, Reid Ray takes greatest pleasure in his numerous location trips. He has lensed films in Japan, the Philippines, Africa, England, Canada and in 36 of the 50 states. Some of Hollywood's foremost talents received their first film experience under his guidance: Ralph Meeker, Judson Pratt and Leon Ames, among them. Danny Kaye, Ingrid Bergman, Joan Fontaine, William Bendix, and Robert Montgomery are a few of the many stars who have appeared in his films.

Generals Curtis LeMay and Edwin Rawlings have also appeared before his cameras and Reid Ray will long remember the series of films he conceived and created for Sister Kenny. These were translated into French, German, Spanish, Russian and Greek versions to aid polio victims around the world.

The studio walls at Reid H. Ray Film Industries' headquarters in St. Paul are well-laden with film awards and trophies, including one for his "Contribution to Naval Photography" from the U. S. Naval Photographic Center. And he can point to solid evidence of client success which have brought the studio repeated assignments from leading industrial clients, ranging from Deere and Company, RCA, Avco, Northwest Orient Airlines, through associations and government.

But when he drives around burgeoning St. Paul, the sight of a neighboring industrial giant's plants and Research Center will always remind Reid Ray that few of us are blessed with "second sight!" For in the 1920's, as a young executive of Ray-Bell Films, he supplied old, discarded film stock to a couple of young men who kept coming back for more and more material.

Finally, Reid asked them what use they had for all that waste film.

"Oh," said one, "we're experimenting with some adhesive solutions . . . coating the film on one side to see if it will make a sticky tape."

Who knows, if Reid had sent along a few hundred dollars with that waste film, how far he might have gone with that all-time success story now known as Scotch Brand Tape made by the Minnesota Mining & Manufacturing Company.

But then the film industry might have lost one of its best-loved and most able leaders. 

15 minutes to copy it on a board?

Or 90 seconds to make it a permanent slide?

Why take the time to do it by hand (every time you need it) when you can make slides right from the original so easily? A Polaroid Land Camera and Polaroid Land transparency film are all you need.

Just aim the camera at your source material and click the shutter. Pull a

tab, count and peel a transparency from the back of the camera. Mount in a snap-together frame and you're ready to flash a big sharp transparency on the screen. Elapsed time: about 90 seconds. You only have to do it once and there's no chalk dust either.

There are two Polaroid Land trans-

parency films. This one, especially suited for line work, develops in 10 seconds. The other, for continuous tone slides, develops in 90 seconds. Both films work in the same camera and same mounts. For more information, write Polaroid Corporation, Technical Sales Dept., Cambridge 39, Mass.

SEALED POWER CORP. ENJOYS THE BIG DIFFERENCE IN PROJECTION

with a
DA-LITE
ELECTROL® SCREEN

Contributing to the success of the Research and Engineering Center of Sealed Power Corp. (Muskegon, Mich.) is the use of audio-visual equipment in the presentation of engineering data to customers and during inter-departmental meetings. Everything from micro-photographs of individual parts to data on complete machine tools is projected on a Da-Lite Jr. Electrol® electrically operated screen.

Recessed in the conference room ceiling, the screen is completely out of view when not in use. When it's needed—an average of three times a week—it automatically lowers into position at the flick of a switch. Closing is automatic, too. Pictures shown on the Electrol have exceptional clarity and brilliance because of Da-Lite's unique White Magic® Chemi-Cote® beaded surface.

There's a Da-Lite electrically operated screen to suit the needs of your business—with the BIG DIFFERENCE in QUALITY that has never been equalled. All Electrol screens are U.L. approved and designed for recessing or mounting on wall or ceiling. Write for specifications and name of your Da-Lite franchised audio-visual dealer.

Perfection In Projection Since 1909

THE WORLD OF FORD: CONTINUED FROM PAGE 33)

empire. It was the age of Darwin, Pasteur, Alfred Lord Tennyson, Jules Verne, and Johann Strauss. We see the slow transportation of the period, the growth of steam power, and the age of construction and expansion that followed the Civil War.

This was the world in which Henry Ford grew up, fascinated with the mechanics of watches and team engines, and dissatisfied with the drudgery and isolation of life on the farm.

Ford Company Born in '03

Working for the Edison Illuminating Company in Detroit, he became interested in early experiments with gasoline engines. This led to construction of his first automobile in 1896, and the organization of Ford Motor Company in 1903. Henry Ford was 40 years old, and he was just getting started.

The film then moves through life in America when the automobile was the plaything of the rich. Henry Ford was dissatisfied with the cost of his products, and solved this problem with the first moving assembly line. This was a magic formula that could be adapted to every field of mass production to lower the price of consumer goods.

Assembled Artifacts of Past

The film traces the modern world of the automobile through two world wars, touches on the \$5 day and expansion of the Ford enterprise throughout the world, and pauses to show how Henry Ford assembled the artifacts of man's past life and work in Greenfield Village and the Henry Ford Museum.

It closes with the statement: "Our progress is given continuity by men like Henry Ford — men who see the shortcomings and needs of their time, and venture forth with courage and enterprise to change their world and make it better for all men."

THE TARGET IS YOU: (CONTINUED FROM PAGE 40)

As a result, the sponsor has arranged for sale of prints through the producer at a very modest \$135 each, plus shipping charges, and the net result should be much-tightened security because people really understand what it is and why it's needed.

Script for the film was written by Ned Stephenson, supervisor of the motion picture division of Martin Marietta in Denver and by Joe Denove, who also directed. Stan Webb was producer for F. K. Rockett Productions.

BUSINESS SCREEN EXECUTIVE

B. W. B. Gaughan

Cincinnati Division of Wilding is Headed by B. W. Gaughan

In charge of the Cincinnati office of Wilding Inc. is B. W. (Bill) Gaughan, recently appointed a vice-president by H. William Hanmer, president of the national business communications company.

A Wilding account executive since 1959, Gaughan spent many years in the appliance industry working in sales management, training and promotion. Under his direction, the Cincinnati office will now operate as a separate Wilding division, serving clients in Indiana, Ohio and Kentucky. The Gaughan family home is in Cincinnati.

Robert Cassell

Wilding Appoints Bob Cassell V.P. for Creative Production

Now supervising all phases of slidefilm and graphic production for accounts of Wilding, Inc. in the Detroit area is Robert Cassell, recently named vice-president of Scope, Inc., acquired by Wilding in 1961. He has also operated his own art studio in Detroit.

The former vice-president for creative production, A. J. Henderson, now heads up the recently-developed Wilding Creative Planning Board, servicing all Wilding accounts on a national basis.

Photo-Repro Division Offers Technical Services in West

The Photo and Repro Division of General Aniline and Film Corporation has established a newly-created Technical Services office in Los Angeles to provide technical services more immediately to its customers in the Pacific states.

Simultaneously, Robert M. Verburg, General Manager of the Division and Vice President of the Corporation, announced the appointment of Dr. Francis H. Gerhardt, formerly Associate Director of Research and Development, as the Manager of Technical Services, in Los Angeles.

Dr. Gerhardt joined the corporation in 1943 as a research chemist and has held positions in photographic research for the company since he joined the firm.

Forms Vital Research Films

A new medical motion picture company, Vital Research Films, has been formed in Houston, Texas by Raymond O'Leary. Formerly with the Texas Industrial Film Company, O'Leary has been involved in the production of more than 250 medical films, including prize-winning subjects for the Texas Medical Center.

* * *

Heads Agency TV Production

Warren C. Rossell is now manager of TV-radio production for Ketchum, MacLeod & Grove, Inc., advertising agency, in Pittsburgh, Pa. In his new post, Rossell is responsible for supervision and coordination of the agency's New York and Pittsburgh production supervisors.

Everett Hart Heads European Production for Filmex, Inc.

Robert Bergmann, president of Filmex, Inc., has appointed Everett Hart to be head of European production for Filmex, with headquarters in Paris. Mr. Hart is now scouting locations and crews in France, Italy, Germany, Spain and the Netherlands.

Mr. Bergmann said that an increasing demand for European

Everett Hart

footage in American commercial has created a need for competent American commercial producers in Europe. Prior to joining Filmex, Mr. Hart had been a senior producer at B. B. D. O. for ten years.

* * *

Faillace, Henkin Join Forces as H-F Productions, New York

Tony Faillace, president of Faillace Film Productions, Inc., and Howard Henkin, president of Henkin Productions, Inc., have consolidated their respective commercial and industrial film production operations.

The new company will be called H-F Productions, Inc., and its production and sales offices will be located at 1270 Avenue of the Americas, New York.

* * *

SVE Names E. M. Lestikow as the Director of Marketing

E. M. (Les) Lestikow is now director of marketing for the Society of Visual Education, Inc. He succeeds James Edwards in that post and will have full responsibility for SVE's advertising and sales promotion.

Lestikow is the former advertising manager of the Weber Costello Company and has had extensive experience with such companies as Mills Industries and Montgomery Ward & Co. A graduate of Bradley University, he has taken post graduate work in advertising and marketing at Northwestern.

of psychological warfare in the U.S. Army, Mr. Muszynski joined the staff of the Leo Burnett agency in Chicago as Broadcast Commercial Manager.

Wallace Kraft Promoted to Account V.P. for Wilding

Wallace W. Kraft has been promoted to vice-president, account group supervisor, by Wilding Inc. Based in Detroit, Kraft's duties will include supervision of all

Wallace W. Kraft

training and promotional materials produced for the Lincoln-Mercury Division of Ford.

Prior to joining Wilding as an account executive in 1958, Kraft was sales manager for the Appliance Division, Westinghouse Corporation. His family residence is in West Bloomfield, Michigan.

Robert Crawford to Direct SVE Commercial Production

The new director of commercial productions for the Society for Visual Education, Inc., Chicago, is Robert H. Crawford, Jr. Crawford will supervise and coordinate the sales, technical production and merchandising activities of SVE's Industrial Division.

Formerly associated with The Jam Handy Organization, Film Associates of Michigan, J. I. Case and Cook Laboratories, Crawford attended Michigan State University and Providence College. His interest in audio-visuals began when he was a 20th Air Force photographer in World War II.

Fraser Productions' Office Manager is Mrs. Mary Hansen

Fraser Productions, San Francisco, has announced the appointment of Mary Sebastian Hanson as office manager. Before joining the studio, Mrs. Hansen was associated with Dean Witter & Co. in their research and analytical department. She is a native of San Simeon, California and attended the University of California and Mexico City College.

1845 BROADWAY (at 60th St.) NEW YORK 23 • Plaza 7-6977 • Cable: Cameramart

IAVA'S PRESIDENT:

(CONTINUED FROM PAGE 34)
a good foreman with a gift for understanding his men's problems on the job and in their relations with management, he was tapped to become an Industrial Relations Supervisor concerned with employee relations.

In this job, which involved talking to many groups of employees on almost a daily basis, Mr. Connelly first got to know and use audio-visual tools and methods. He recognized the importance of visuals for the clarification of the information he had to communicate, and by his own first attempts at providing home-made visuals with blackboards, "flannel boards," and charts, stumbled on to the embryonic audio-visual equipment of the time, particularly on the remote control slide and overhead projectors, which he found to be ideal as adjuncts to the public speaker's stock in trade.

Begins Career in Advertising

From industrial relations, he was transferred to the Advertising Department of Union Carbide's Plastics Division's New York headquarters as Manager of Consumer Relations. For several years, in addition to gaining a solid foundation in industrial advertising theory and practice, he gave on the average of 50 talks a year on plastics, communications and effective presentation.

Over the years he has supervised the scripting and production of several dozen motion pictures and sound slide films, from a simple ten-minute technical film on plastics processing to a 38-minute color motion picture made in Hollywood, called *Flight to the Future*.

In 1957, he was made Manager, Market Programs, in the Advertising Department, and in 1959, was promoted to his present job as Assistant Manager of Advertising of Union Carbide's Plastics Division.

Writer on Audio-Visual Use

He has written numerous articles on presentation techniques, as well as several books on audio-visual techniques. His most recent book, "The Why, What and When of Audio-Visuals," which he wrote in 1962 as part of his committee work in the Association of National Advertisers, is on the reference shelves of a great many of the major advertisers in industry today.

His particular interest in the audio-visual field has always been the technique and effective use of

Word Portraits of Industry Leaders

audio-visual equipment. He believes that there should be a very close association between a visual presentation and the man who is giving it — the tools should fit the job, or not be used at all.

Active in Community Affairs

Away from his office on the 44th floor of the Union Carbide Building in New York, Bill Connelly's hobbies and avocations are trout fishing, stamp collecting and public service. As a civic-minded resident of Middlesex, New Jersey, he was, at various times, Recreation Commissioner, Sanitation Commissioner, Director of Civilian Defense, Police Commissioner, and President of the Town Council. After 17 years of commuting from Middlesex to New York, he decided, four years ago, to get a little closer to his work by moving to a

river-view apartment just on the other side of the Brooklyn Bridge. He is married and has one son.

Philately has been one of his keenest interests since boyhood. He belongs to a number of stamp collectors' associations, and is a past president of two of them. His specialty is stamps of the former French African Colonies, on which he is considered somewhat of an authority. In fact, earlier in his association with this hobby, he taught himself to read French in order to delve deeper into French philatelic lore.

Mr. Connelly believes that since World War II, audio-visuals have crystallized into an important part of the communications requirements of modern business. Equipment and effectiveness of utilization have become much more sophisticated and more useful. □

LAB'S SAUL JEFFEE

(CONTINUED FROM PAGE 35)
Nat Fleischer's famous "Out of the Inkwell" films, and he finally did become a cameraman, shooting titles and trailers for the Semle Cinema Service Trailer Company.

In 1930, opportunity knocked and a three room establishment opened its doors as Movielab Film Laboratories, with Saul Jeffee as president. The company has advanced ever since and is now considered one of the leading laboratories in the East.

The Night the Pump Failed

Mr. Jeffee remembers some rough times and some good time on the way up—and some humorous ones, too. In the 1600 Broadway Building, the laboratory was located directly over the famous NTG night club and couldn't obtain permission to run a sewer line through the premises because of the elaborate decorations of the night club. As a result, the lab was required to use a sump pump to draw off the waste fluids overhead. This worked pretty well until one night the sump pump conked out and the ceiling suddenly gave way to drip developer all over the beautiful showgirls below. "Since then, we've learned to have double pumps for any emergency," Saul Jeffee says.

He remembers when 16mm sound first appeared. The Victor Animatograph Company, which was one of the first companies to originate 16mm sound projectors had a service which made 16mm sound tracks from 35mm originals. To encourage 16mm sound films, which he realized would be an important advancement for the industrial and educational film industries, Mr. Jeffee pioneered a service for re-recording the sound track which he offered his customers free of charge and recouped his duplicating costs with a surcharge on each 16mm print.

Developed TV Film Printer

When television first became imminent, Mr. Jeffee developed an "octette" printing machine which produced eight 16mm prints simultaneously from a 35mm negative thereby saving wear and tear on the original optical negative. This proved to be a boon in processing TV commercials and is still considered one of the more important advances in the laboratory field.

In 1949, Movielab was faced with a problem of moving from its location at the 1600 Broadway Building, which had been sold, as there were few places in town

IF YOU OWN A BERTHIOT

ZOOM LENS, YOU WILL NEED THIS

F&B TAKES THE WIGGLE OUT OF ZOOMS

WITH THE BEELAND ELECTRIC ZOOM CONTROL

Here is a rugged yet light weight control that assures you of smooth zoom action from start to finish of each shot. Mounts directly on the lens barrel, no camera attachments are required. Interchangeable mounting clamps allow the same control to be used for the 17mm to 70mm, and 17mm to 85mm lenses for 16mm cameras, and the 38mm to 150mm lens for 35mm cameras.

\$185.00

Regular

\$275

Super- Quiet

The cameraman can control the picture size by eye or can pre-set the zoom range by quick-set limit stops on the quadrant. A silicon loaded slip clutch and mechanical limit stops provide precise control of the zoom range. The control box is equipped with instant contact push-buttons for easy finger-tip operation of zoom-in or zoom-out. The box mounts on a tripod handle, or directly on the camera for hand-held operation. It also may be held and operated by an assistant. Speed range is rheostat controlled and adjustable from approximately 2½ seconds to 10 seconds of zoom time. A special feature is the very efficient motor which operates for hundreds of moves on one set of 5 type "C" flashlight batteries. Two models are available: Regular, where noise is not a problem. Super-quiet, where whisper-quiet operation is needed for sound recording.

- Smooth, quiet zoom action
- Easy finger-tip operation
- Precise zoom range control
- Zoom speeds from 2½ to 10 seconds
- Interchangeable—for 16mm and 35mm cameras.
- Mounts directly on lens barrel
- Uses type "C" flash light batteries

necessity of training men in the
w skills as automation elimi-
nates old jobs. Visual films will
do this swiftly and efficiently, he
dicts.

As part of his activities in the
dustry, Mr. Jeffee is working to
odify current insurance rates,
hich he considers to be complete-
unrealistic and outmoded by 20
ars. Like many other American
dustries, the ACL is concerned
ith the increasing propensity of
e government to engage in pri-
vate enterprise — it believes there
e entirely too many government-

operated laboratories not neces-
sary for defense purposes.

PRODUCER LEADER:

(CONTINUED FROM PAGE 35)
about peaceful and efficient work-
ing relations for many years to
come. The FPA is now cooperat-
ing with the Association of Na-
tional Advertisers and with the
American Association of Advertis-
ing Agencies on continuing studies
to improve the quality of utiliza-
tion and effectiveness of television
commercials and business films.

At the same time, the FPA co-
operates at every opportunity with
producer associations in other
areas; it feels that American in-
dustry could work better with a
national producer association, or
group of organized associations.
And because these efforts, wholly
supported by its members, have
become so extensive and far-reach-
ing, benefiting all users of films
for both TV and Industry, Pete
strongly believes that those pro-
ducers operating outside the asso-
ciation and yet profiting by the
work of the FPA should be en-
couraged to join in this industry
effort.

Pete Mooney sees the FPA as
an organization of good motion
picture producers with high stand-
ards, constantly improving the sta-
tus of the film industry and creat-
ing a climate that will encourage
high quality creative young men
to come into the field as a life
work. In fact, he hopes it will be
possible some time in the future
to establish a scholarship in the

THE DIET that Frank Willard went on one sunny day last August really worked. Now, instead of walking heavily about set and location, he sleekly masterminds a skeleton crew working on some of the world's finest productions from a comfortable couch of culm. Feet firmly on the ground, he writes, directs and produces some of the finest films that ever came out of camera and pen. "Win with Slim!" our clients say. They've never lost yet.

But Frank does look bad, doesn't he?

If you want it best, fast, and pretty reasonable, contact

Above: J. P. Carson (l) accepts Eclair camera from pres. J. Mathot.

Eclair Corp. of America to Sell Noiseless 16mm Camera

The new Eclair 16mm camera will soon be available in the U.S. through the recent formation of the Eclair Corporation of America. J. Mathot, president of the French-based company, Eclair International Diffusion, has announced their appointment as sole U. S. distributors.

Said to be the first noiseless and portable 16mm motion picture camera, the new Eclair was designed specifically for use with the new zoom lenses. It has reflex viewing, registration pin movement, variable shutter, quick-change magazine and fully rotating eye piece.

Principals of the distributing firm are J. P. Carson and Harold Dreyfus. Carson has been active as a cameraman, director and producer for the past 15 years; Dreyfus is the head of his own marketing and advertising consulting firm in Los Angeles.

First delivery of cameras is expected in September. The company will also handle other Eclair equipment including the 16 and 35mm Camerette and Eclair high-speed and special purpose motion picture cameras until now only sold to the European market. ☐

Atchison is Sales Engineer for S. O. S. on West Coast

Robert B. Atchison has joined the staff of S. O. S. Photo-Cine-Optics, as sales engineer for the firm's West Coast office in Hollywood.

Mr. Atchison began his career in the Photographic Branch of the U. S. Navy, taking a job after his discharge with the Technical Division of Ansco, in customer service. He has also been affiliated with Technicolor as film technician and later, as assistant to the manager of customer service. He was a film technician with MGM. ☐

executive appointments

Nat Myers Directs Marketing of Fairchild's A-V Equipment

R. G. Hennessey, general manager of the Industrial Products Division of Fairchild Camera and Instrument Corporation, has announced the appointment of Nat C. Myers, Jr. as Director of Marketing, Communications Products and Services. It is a new post in that company.

A former vice-president of Tele-Prompter Corporation, Myers will assume total responsibility for the marketing programs supporting Fairchild's Cinephonic Mark IV automatic film projection systems, the Fairchild Cockpit Voice Recorder and crash data recorder systems for commercial aircraft as well as other audio-visual communications equipment of the company.

Fairchild's Nat Myers

A graduate of Cornell University, Mr. Myers is active in military and professional a-v groups. He is a resident of Scarsdale, New York.

Technicolor "700 Instant" an Automatic Display Projector

☆ Completely automatic, push-button operation of 8mm silent films is provided by the new "Technicolor 700" Instant projector. When the button is pushed, an illuminated display area shuts off and the motion picture is flashed on a built-in rear-projection screen. When the film showing is completed, the unit shuts off automatically and the display light goes on again.

The light consists of an illuminated arrow pointing at the "start" button. On the prototype model (see illustration) an area is provided for advertising or announcement text, rear-lighted. The projector is 26 inches wide, 7¾-inches high and 11½ inches deep. Its low silhouette is designed to fit on retailers' shelves, on counters, etc. Manufacturer's list price is \$169.50, via audio-visual dealers.

Buhl Introduces Koolite 90-C, Lightweight Overhead Projector

☆ A new lightweight, budget-priced overhead projector (selling under \$200) has been introduced by Buhl Optical Company. The new Koolite Model 90-C features a fully-corrected and coated three-element anastigmat lens; rack and

The new lightweight Buhl "Koolite" 90-C portable overhead projector. pinion focusing; tilting head mirror for image elevation. Image size is 10" x 10" yet weight is only 21 pounds.

Rigid superstructure reduces vibration to minimum; a unique suspended mounting system fixes all internal components to top of projector permitting easy access to all working parts. This makes possible quick conversion of Koolite

a-v equipment trade fair

Display theater for repetitive film showings: Technicolor "700" Instant

90-C from conventional base to custom-built installation in desks, on projection stands, etc. Illumination is via 500-watt DFW projection lamp, blower-cooled.

Two Seconds to Showtime With Radiant's "AutoMaster" Screen

With one simple movement, requiring only two seconds, the new Radiant "AutoMaster" projection screen is ready for operation! The new screen eliminates six out of seven steps previously required for setup; it opens horizontally like an accordion.

"Simplicity is the keynote of the 'AutoMaster'," says Radiant president Adolph Wertheimer. "Even an inexperienced person can have the screen operative in 2-3 seconds. Hold the screen case by the handles and pull open like an accordion. The tripod legs spring open when the full size of the screen surface is exposed."

A new Radiant research development, silica-textured "Micro-Flect" surface combines the wide-angle viewing features of matte-white with brilliance of glass-beaded surfaces. The "AutoMaster" is available in sizes 40 x 40-inches (\$44.95) and 48 x 48-inches (\$54.95).

Diagrams below illustrate "two-second operation" of Radiant's AutoMaster"

1. Hold handles from front of case.

2. Pull apart like an accordion.

3. Tripod legs spring open.

Arri-16 equipped for strobe-flash rates. Probe output is on the order of 30 mv and requires a DC amplifier with flat response down to about 4 cps and capable of 40 db voltage gain.

The installation is said to be ex-

Strobe-Flash Installation for Your 16mm Arriflex Camera

☆ Strobe-flash synchronization of all Arriflex-16 cameras is made possible by a new installation based on a reluctance probe which produces a micro-pulse in synchronism with the camera shutter.

The Arriflex Corporation of America announces availability of the installation. With suitable amplification, the pulse will provide firing voltage for all electronic flash equipment at all framing

cellent for all high-intensity, high-frequency strobe systems; is particularly well-suited for "pulse-burst" flash operation, in which each synchronizing pulse from the camera triggers a series of precisely-spaced strobe light pulses.

DuKane "Auditorium" Shows Filmstrips With 1,000 Watts

☆ A versatile yet powerful 1,000-watt "Auditorium" filmstrip projector which handles either 35mm

DuKane's "Auditorium" Projector

single-frame strips or 2 x 2 slides is the new DuKane Model 576-85. Filmstrips are advanced by push-button remote Sound Unit, the filmstrip can be advanced automatically.

"Redi-wind" automatic rewind eliminates hand winding; exclusive "Synchrowink" film advance changes pictures in 1/20 of a second. Focus is assured by locking vise-action of glass aperture plates. Coated optics are used throughout for maximum light passage. 1,000-watt lamp is standard equipment, with combination fan and turbine cooling. The Model 576-85 case measures 9" x 14" x 15½"; weight is 27 lbs.

Continuous 8mm Film Cabinet Offered by Urban Industries

☆ A new portable, cabinet-type 8mm silent continuous projector is offered by Urban Industries, Inc. of Louisville, Kentucky. Utilizing a Bell & Howell projector mechanism, its film magazine has 16-minute capacity of 8mm silent black & white or color film. Weight of the Model 250 cabinet is only 18 lbs. Size is 9" x 14" x 24" with a self-control 14" x 24" rear-screen.

Operation of the Model 250 is automatic, working by gravity-feed of the magazine. 150-watt lamp is standard. The unit is available with a magnetic tape audio announcer for sound messages.

Film Executives PROFESSIONALIZE YOUR FILM ROOM and Save Money

Harwald's precision automatic film inspection equipment is the accepted world standard for modern film libraries—I.V. stations—or wherever motion picture film is handled. Inspect-O-Film automatically finds breaks, torn sprocket holes, scotch tape "splices", any cause of film failure. Even those defects that are virtually impossible to find by hand. Also provides for film cleaning, conditioning, timing and editing. Seven models available. See catalog for complete listing.

SPLICE-O-FILM

For the easiest, strongest splices ever—in just 9 seconds! Accurate to 1/10,000 of an inch. Complete with electric heat and automatic scraper. Used by professionals everywhere. Money back guarantee. \$175.00.

The Value of Today's Film Festivals

FILM FESTIVALS: Shell films have won over 80 awards in 27 film festivals from Cannes, France to Vancouver, Canada; from Cork, Ireland to Montevideo, Uruguay; from Edinburgh, Scotland to Capetown, South Africa. These have great prestige value, but the increased number of festivals throughout the world has tended to discredit this form of activity.

However, nowadays some festivals specialize in scientific and technical films which are the industrial sponsor's immediate interest.

Attendance by company staff gives an opportunity to meet other film sponsors and users who may offer guidance and share experiences. It is possible to see a wide variety of films which would be difficult to view otherwise.

The final assessment of the advantage of attendance can only be made after examining the list of people who attend each particular festival. Participation often brings good press publicity. In 1962 Shell Condor entered two films in the Festival at Cartagena, Spain. Twelve newspapers carried headlines mentioning the company's name.

6. Progress Reports: the Need for Records

No promotion can be made successfully without some kind of records or returns being made. Otherwise there can be no assessment of results. Only a simple system of recording need be used: (a) type of audience; (b) audience reaction; and (c) the number of people attending (this is the least important information).

Statistics in themselves may be misleading—the total number of people who see a film is not in itself of vital importance. The whole basis of distribution throughout the world should be to try to reach specific audiences for whom the films are intended.

It is more important for company staff to carry out informal personal surveys of audience reaction. It requires practice to obtain an opinion which is not given for the sake of flattery or politeness, but after a time it is possible to assess the impact which a film makes on its audiences. One way is to get to know the officials of user organizations personally and thus obtain accurate impressions of their reactions to films.

Films "Progress Reports" for Exhibitors

John Campbell Films of Greenwich, Conn., is offering a new service for Fair exhibitors—progress films of construction activities or other events connected with individual exhibits at the Fair. This service will be offered on a regular basis for the next eight months.

Campbell photographic crews will be available for participants in the plan to do three types of coverage: interior, exterior and aerial views of exhibit construction. Costs will be kept low because clients, in effect, will be sharing the costs of each shooting day.

John Campbell Films is also the official producer of progress films for the New York World's Fair Corporation. The third film in this series — *World's Fair Report With Lowell Thomas* is scheduled for release this fall.

* * *

West Virginia's Radio Astronomy Sky

Exhibit Features Audio-Visual Technique

The State of West Virginia has been awarded a \$65,000 grant from the National Science Foundation for a Radio Astronomy Sky exhibit at the Fair.

The exhibit, which later will be installed permanently in Charleston, West Virginia, will incorporate a planetarium dome, dioramas, animation, motion pictures, sound, displays and other audio-visual techniques.

* * *

Sign Ray Bradbury to Write Script for Cinerama Picture in the U. S. Pavilion

Developments in plans for the United States Exhibit include the signing of Ray Bradbury to write the 15-minute Cinerama film, *Tomorrow Morning*, scheduled for showing in the top floor of the U.S. Pavilion.

* * *

Sudan and Morocco to Include Theaters

Two more African nations have indicated they plan to feature small theatres in their exhibits. The 14,000 square foot pavilion of the Republic of Sudan will have a theatre on the first floor of the exhibit. The Moroccan pavilion will also feature a theatre.

* * *

Saul Bass Shooting Kodak's Fair Film

The Kodak pavilion will be one of the first major installations to be completed at the N. Y. Fair. The building job is expected to be completed by November 1st.

In Hollywood, Saul Bass & Associates are underway on the 15-minute color motion picture which Kodak will show to an estimated 35,000 people day each in the main theater at the base of the 80-foot high "picture tower."

The cameras are driven by a 26-horsepower, 28-volt motor with a variable speed control. This control enables the cameras to run in steps of 8, 12, 16, 24 and 48 frames per second. The cameras are mounted on a pedestal with a 26-inch center which results in a complete camera unit being 44

Producer Harry Coleman (at left) checks Cinerama camera with William D. Liitschwager of Cinerama's Special Projects Department.

inches high with an overall diameter across the magazines of 52 inches. The total unit weighs over 500 pounds.

The cameras are mounted vertically and photograph into a turret of 45-degree angle mirrors. Special optics were designed to accomplish the 360-degree horizontal coverage and the 27 degree vertical coverage.

Coleman Productions, Inc. won the assignment to do the New York State production because of the company's familiarity and experience in travel films. The principal cinematographer engaged for the production, said to be one of the few able to handle a brace of six cameras at once, is Chuck Austin, formerly employed by the Mitchell Company, and one of the men instrumental in the design of the Mark II.

Tests having been successfully completed, the camera system is now being employed in photographing New York State in all seasons for an exhibit which promises to be one of the most popular attractions of the Fair.

... WHEN BRUNSWICK WANTED TO BOWL OVER CUSTOMERS? The management of Brunswick's Bowling Division was enthusiastic about their new line of bowling equipment, and wanted everyone to know it. Particularly their sales force, their stockholders and potential customers. They called us in to help spread the good word. Among the various aspects of the subsequent promotion we worked on was a film called "The Golden Years." We'd like you to see it, if you'd care to (a call to us will arrange it), because it's typical of one kind of work we do. And typical of what we can do for you. Just tell us what idea you want to get across and to whom—sales force, dealers, customers, stockholders or the general public. Then leave the rest to us. **THE JAM HANDY ORGANIZATION**

THE CASE FOR SPONSORED FILMS:

Ralph Charbeneau, Director of Advertising and Public Relations,
Packaging Equipment Division, Ex-Cell-O Corporation

"Naturally, we're pleased!"

"Of course we're pleased with the awards our films have won in so many festivals and competitions. More important to us, though, is the way our film program is accomplishing the job of reaching and influencing millions of people.

"We manufacture the cartons and packaging equipment in which milk and milk products are delivered to the consumer. Our films are aimed at supporting the public service programs of our customers in the dairy industry, as well as enhancing our own corporate personality.

"Our awards—an 'Oscar' from the Academy of Motion Picture Arts and Sciences and a 'Silver Anvil' from the Public Relations Society of America, among others—are convincing evidence of the quality of our films and of the skill of the producers we've employed to interpret our point of view. The size and character of our audiences and the enthusiastic support the program gets from our customers is even more convincing evidence that our film program is a wise investment."

Modern has been distributing films for Ex-Cell-O since 1954. Films have been added and withdrawn from time to time. Here are the cumulative audience totals for films currently circulated through Modern's facilities. Clear-cut examples, we believe, of what can be accomplished with good films and effective distribution.

... age cannot stale nor custom wither...

It's great to be different — and yet, to be different just to be different is pretentious.

The variety in our films comes from the subject — an airline and a public utility are not the same. We try to add another difference — the punch that makes a film really good.

Have you seen "New York" — one of a series for American Airlines?

SELL BENEFITS TO DEVELOP MORE SALES FROM CALLS

Most salesmen logically focus their sales talks on needs. Yet people continue to buy what they want.

Here's a color filmstrip that shows how to cater to wants by selling benefits, answering the prospect's question: "What will it do for me?"

The importance of building presentations around "benefits" while stressing product or service facts is effectively demonstrated in

"Selling the End Result First"

It shows tested ways of presenting sales facts that motivate prospects to buy. One of a series of six color sound filmstrips:

"SELLING IS MENTAL"

These provide dramatic material for 18 sales-training meetings, valuable alike in training and re-training.

Entry Lists Close November 1 for Annual "Freedoms" Awards

Nomination forms for the film categories of the 15th annual National Awards Program of the Freedoms Foundation, Valley Forge, Pa. are now available to individuals, companies and organizations.

Entries are open for 16mm motion pictures relating to one or more principles of the Credo of the American Way of Life.

Films which create and support a better understanding of the fundamental American traditions in their application to the everyday lives of citizens are pertinent to the Awards Program. All nominations must be received by Freedoms Foundation, at Valley Forge, no later than November 1, 1963. Note the address in requesting entry forms.

Motion Picture Engineers to Gather in Boston Oct. 13-17

When the 94th Society of Motion Picture & Television Engineers Technical Conference (and Equipment Exhibit) opens on October 13 at the Somerset Hotel in Boston, the European editor of **BUSINESS SCREEN** will be one of the invited guest speakers.

Robinson Peter Rigg is flying over from our London office to speak on "Location and Newsreel Motion Picture Equipment" for overseas use. His talk is one of the highlights of the session on "Motion Pictures for Television and Education" being held on Thursday evening, October 17th. This year's SMPTE meeting opens with three sessions on "Photography in Medicine" on Monday, October 14.

Another event of special interest to factual film sponsors and producers will be the Tuesday afternoon (October 15) program on "8mm and Small-Format Film" which again brings up the unresolved question of "Magnetic and/or Optical Sound for 8mm Films" as one of the key topics.

San Francisco Film Festival Program Opens on October 30

Coming up on October 30 (through November 12) is the Seventh Annual San Francisco International Film Festival. While this event is primarily devoted to 35mm feature, sports and newsreel films and to "Film as Art" in the 16mm category, an important

new segment has been added in recent years to include "Film as Communication."

Factual motion pictures produced with a specific purpose and for a defined audience are judged separately in Industrial, Governmental and Institutional groups.

Metro-Kalvar to Market Its Film to Industry, Television

Metro-Kalvar, Inc., owned jointly by the Kalvar Corporation and Metro-Goldwyn-Mayer International, is moving toward marketing of Kalvar's heat-developed photographic film in the motion picture and television industries. Named a vice-president of the company at a recent board meeting was Noel R. Bacon, former commanding officer of the Naval Photographic Center, Washington, D. C.

Charles Pati, vice-president of MGM International and Harold C. Harsh, operations vice-president of the Kalvar Corporation, were also elected directors on the Metro-Kalvar board.

TWA "Teams" Pilots & Films to Tell U. S. Business Its Story

TWA pilots are being teamed with a still and motion picture presentation created by The Jam Handy Organization as they take this airline's history, schedule reliability, passenger service and safety procedures story to business organizations throughout the nation.

The presentation "This Is Your Captain Speaking" began its tour on September 15. J. E. Frankum, TWA vice-president-transportation is the host.

FPA, Agencies Join Talks on Actors' Pay for Commercials

The Screen Actor's Guild has served an official contract termination notice, effective November 15, on its existing Television Commercials Contract. Preliminary talks with representatives of the Film Producers Association of New York and the Advertising Agencies' Joint Negotiating Committee began Tuesday, September 24 in Manhattan. Formal negotiations are expected to begin there on or about October 14.

The collective bargaining contract covers actors, singers, announcers and stuntmen in filmed and taped TV commercials. Join-

and MPO camera crews go all out to get the picture. For an MPO film, "A Task to Share," for the Agency for International Development, MPO photographed scenes in Washington, D. C., Syracuse, N.Y., Riverside, California, and from 500 feet above Glen Canyon Dam in Arizona. MPO production crews have worked in every state of the union, in nearly every country in the world.

Getting the picture is only one aspect of MPO's in-

depth film service. MPO's unique ability to interpret the client's message and creatively translate it into the film medium has consistently brought more awards to MPO than any other film producer.

Through the years, more and more accounts have found that it costs no more to trust their film projects to a creative, quality producer: MPO. To learn more about MPO's creative staff and new studio facilities, or to arrange a screening of recent MPO productions, call or write Judd Pollock in New York.

SEALED POWER CORP. ENJOYS THE BIG DIFFERENCE IN PROJECTION

with a **DA-LITE** **ELECTROL® SCREEN**

Contributing to the success of the Research and Engineering Center of Sealed Power Corp. (Muskegon, Mich.) is the use of audio-visual equipment in the presentation of engineering data to customers and during inter-departmental meetings. Everything from micro-photographs of individual parts to data on complete machine tools is projected on a Da-Lite Jr. Electrol® electrically operated screen.

Recessed in the conference room ceiling, the screen is completely out of view when not in use. When it's needed—an average of three times a week—it automatically lowers into position at the flick of a switch. Closing is automatic, too. Pictures shown on the Electrol have exceptional clarity and brilliance because of Da-Lite's unique White Magic® Chemi-Cote® beaded surface.

There's a Da-Lite electrically operated screen to suit the needs of your business—with the BIG DIFFERENCE in QUALITY that has never been equalled. All Electrol

screens are U.L. approved and designed for recessing or mounting on wall or ceiling. Write for specifications and name of your Da-Lite franchised audio-visual dealer.

Perfection In Projection Since 1909

"The First 35 Years" of an Industry Veteran

QUITE A LONG TIME AGO an advertisement appeared in the Classified Section of THE NEW YORK TIMES. It read:

WANTED: Young man with literary background for commercial film adaptations. Write Box 46.

A free-lance writer who had worked for a morning newspaper, a newspaper syndicate, weekly and monthly magazines, and as copy writer for an advertising agency, answered the ad and got the job. The company was Visugraphic Pictures, Inc., in New York City. That was early in 1928.

Because of his background in newspaper work he was soon assigned to write and produce *The World At Your Doorstep* for the CLEVELAND PLAIN DEALER and *One Day for the PHILADELPHIA BULLETIN*. Then later, again because of his background (pilot in the Air Service in World War I), he was assigned to produce *The Autogiro* for the Pitcairn Aircraft Company and *Coast to Coast in 48 Hours* for Transcontinental Air Transport (now TWA). This latter picture has become a genuine laugh-provoking classic in the airline industry today.

There's Moral Here for Script Writers

During this same period, the United Press celebrated its 25th Anniversary. A motion picture was part of the party. Planned for theatrical distribution, an opening sequence pictorially defined the word "news" as "man bites dog." When the camera was set to shoot the scene no one would bite a dog, any dog, for any price. Let this be a lesson to writers. The author of the script was obliged to bring his own pet to the studio and commit the deed himself. This time he had no background for the chore but the job was done in one "take."

At about that time, the young man was able to write home and report with some pride that the rolling stone had stopped rolling. He had found a job which enabled him to work in one field and, yet, keep rolling from one business to another.

His father was not impressed. Being an obstetrician, the father expressed his opinion of producers of business films in these words. "Son," he wrote, "All you fellows do is photograph other peoples' babies."

Became President of Audio in 1936

Thus began the 35 years to date in the industrial motion picture industry for a particularly happy member of our fraternity. He has been president of Audio Productions, Inc., of New York since 1936, three years after he joined the young company in 1933.

For those who may not remember the Spring of 1933 in our particular field, it was a time of depression for the country at large, and a time of deep peril and disastrous consequences for many makers of sponsored motion pictures. A good many, if not all, sponsors were slashing payrolls and budgets, and one of the first things to be slashed was always a proposed or scheduled motion picture, which, in the face of bread lines and unem-

... guess who wrote this poignant scene?

ployment, seemed to be a fanciful gesture during those hard times.

But the Spring of 1933 was also a very good time to assemble and build an organization of experienced and capable talents. Most of them were out of work anyway and, certainly, were readily available.

No one was more readily available than was this future member of the yet-to-be-created Audio Productions. Visugraphic Pictures had not exactly gone out of business. It simply had no business; and it merely ceased paying salaries, laboratory bills and the rent. There was no longer a warm place to go each morning — no studio in which to spend an idle day.

A wit once said, "Doing nothing is the most tiresome job in the world, because you can't quit and rest." Makers of industrial films were very tired in those days. Some were even hungry.

But then a rumor spread among those who were "on the beach." The Western Electric Company, through its subsidiary, Electrical Research Products, Inc., was forming Audio Productions, Inc. The reason: Because of the collapse of certain companies which had been Western Electric (sound recording) licensees, there was now a real need in the East for a sound motion picture company which was truly sound as well as fully staffed.

Building a Team for the Years Ahead

One of the first in line for a job was Audio's future president. And it follows naturally, then, that very soon thereafter when any one of the bosses in the parent company said — "We need a director." "We need a writer." "We need a cameraman." "We need an animator." "We need a film editor" — the subject of this sketch always knew a good and readily employable director, writer, cameraman, animator and film editor.

He also knew or believed that these friends with skills and talents of high order would create a team which could bring in business and repeat business and, thereby, insure permanency of employment. Time, patience and adequate financing were needed. These were supplied by Western Electric. Some good "samples" resulted.

Early pictures by this new organization were "*Rhapsody in Steel*" for the Ford Motor Company, *Progress on Parade* for General Motors, *Wonder World of Chemistry* for Du Pont, *The Long Road* for the Ethyl Corporation and *New Frontiers* for Westinghouse. These "samples," each a public relations film with wide

(CONTINUED ON THE FOLLOWING PAGE)

**TRI ART FOR COLOR
DU ART FOR BLACK AND WHITE**

OVER 40 YEARS IN THE BUSINESS! Tri Art or Du Art offers you fast, dependable service, the highest quality film processing, the most complete facilities. And a knowledge based on more than 40 years of experience.

IN NEW YORK: 245 WEST 55TH STREET, NEW YORK 19, N.Y., PLAZA 7-4580
IN CANADA: ASSOCIATED SCREEN INDUSTRIES, LTD., 2000 NORTHCLIFF AVENUE, MONTREAL, CANADA

and effective distribution, set the forward-looking and progressive trend for Audio's product over the years.

All was not to be easy, however. Pearl Harbor was Sunday, December 7, 1941. Audio's Pearl Harbor was Monday, December 8, 1941. On that date, for policy reasons, it was decided to liquidate and disband this somewhat extraneous subsidiary — unless, that is, unless the employees of Audio could find an "angel." This sizeable accomplishment, with the help of Western Electric, was brought about by you-know-who. Later on the "angel" enabled the employees to purchase the company.

Since then, Audio has been wholly-owned by its employees. At this writing, thirty-five of the staff members are substantial stockholders, including all of the key employees. The number increases each year. The aim, in the words of Audio's president, is to have a growing and enthusiastic orchestra, not a one-man band.

Also at that time, another policy — job security — was established by Audio's first employee. He, himself, had received many harrowing and unexpected dismissals in his previous business connections. So he had promised himself that if ever he had the authority he would try his best, with the help of his

similarly-minded associates, to prevent any sudden and drastic staff reductions. This may be the reason why Audio has seemed very conservative over the years — very cautious about expanding too rapidly.

From the outset, however, the teamwork idea, set up in 1933, and now headed by eight Producer-Directors, has insured steady employment and repeat business. It has made Audio, in the words of its employees, "a good place to work." Also, because of this "team idea," you will almost never hear the perpendicular pronoun used by an employee.

Audio's Credo for Production Credits

Audio is a "we" organization. The main emphasis has always been on group credits, as against putting the spotlight on any one individual (this article being an exception). Audio believes that the client should get the publicity, the picture should get the praise, if deserved; and, if any one person is to be cited for a successful production, then many others should be named and credited also.

Some of the company's currently successful pictures include *New York, New York* for American Airlines, *Telstar* for AT&T, *Lucite* for Du Pont, *Where Mileage Begins* for General Motors, *Danger — Air!* for the Ethyl Corporation and many others, plus a con-

siderable annual volume of TV commercials for practically every one of the finest advertising agencies in the East.

Hundreds of Subjects for Dept. of Defense

In addition, Audio has been engaged for 22 years in the continuing production of highly classified films, now totaling many hundreds of subjects, for the U.S. Department of Defense.

Through all these years, the subject of this piece has been most happily concerned in helping to establish his company's well-earned "image" of integrity, reliability and quality. He has been devoted to this one organization. While he has had the top executive responsibility, he has also had the greatest pleasure and satisfaction in his association with fellow workers who, he will tell you, have an abundance of ability and liveability. At Audio, the latter is considered of equal importance.

And now, for the record, the following identification may be found in the 1963 Motion Picture Almanac:

Speidell, Frank K.: President of Audio Productions, Inc., New York. b. Louisville, Ky., in 1898. e. Columbia University. Previously writing, newspapers, magazines and advertising agency work. In motion picture industry since 1928. Joined Audio Productions 1933.

- For Studios & TV
- Cutting and Viewing

MAKES EDITING EASY!

- Continuous movement (non-intermittent) safer for negative or positive viewing.
- Synchronous and variable speed, instant stop, forward and reverse foot pedals and press button.
- Film paths instantly declutchable by switch selection.
- Projected picture 8"x6" or larger by removing screen.
- Separate magnetic and combined optical and magnetic heads.
- Built-in synchronizer footage counter and running time counter.
- Removable flange plate with title wind roller.
- Instant sound track selector.
- Manual inching control.
- Fast rewind controls.

AUTOMATIC BUTT SPLICER

Cuts, Splices, Applies
Magic Mylar Automatically!

Now, with no fuss, mess or waste, it is possible to splice, repair, butt-splice, or strengthen splices on all types of film—positive, negative, magnetic — even duPont Cronar or other bases.

The cutting arm, shown in operating position, is used by pressing the chrome button for cutting both sides of the film simultaneously.

The film, has been registered on pins in the horizontal channel. The cutting blade is easily replaced.

The splicing tape is registered on precision pins and held in place until automatically applied to the film by swinging the arm over and pressing the chrome button, cutting the adhesive and applying it — in perfect register to the film.

Model 35 for 35mm, Model 16 for 16mm—\$295

Pratt Directs Audio-Visuals for Royal Crown Cola Company

☆ The Royal Crown Cola Company has appointed Calvin L. Pratt as its director of audio-visual communications, according to W. E. Uzzell, vice-president and director of marketing of the Columbus, Georgia firm.

Pratt is responsible for audio-visuals for promotion, training, company meetings and related

Calvin L. Pratt

uses. He joined Royal Crown in 1955 and has assisted in the production of audio-visual media as well as assignments in publicity, public relations, merchandising and sales promotion.

The new Royal Crown a-v director is a graduate of the Georgia Tech School of Photography. He entered the Navy Air Corps in 1943 as an aerial photographer and was assigned to a film training unit. Previous business experience includes a display and merchandising sales executive post in the Southern Division of Lane Rexall Drug Stores.

Wyssmont Company Film Tells Features of Continuous Dryer

Technical product information for industrial users is the mission of *Turbo-Dryer*, a 15-minute sound, color film offered on free loan by the Wyssmont Company, Fort Lee, N. J.

The product is an automatic continuous tray dryer in which the product is transferred from tray to tray to obtain greater capacity and higher-quality. It is used for powders, crystals, pellets, pastes, gels or slurries — especially for materials which are heat sensitive, fragile, dusty, solvent-wet, oxygen-sensitive, obnoxious or flammable.

Color sequences highlight the use of the Turbo-Dryer in its adaptation to solvent recovery

sublimation and cooling applications. A clear picture of the involved lab testing required in quoting major process equipment such as this is presented. Major installations of the dryers are included.

Print loans may be arranged on company or organization letterhead from the Film Department, Wyssmont Co., Inc., 1470 Bergen Blvd., Fort Lee, N. J.

Training for "The Road to the Olympics"

WHAT MAKES a runner great? Regular training is the answer, according to a new 30-minute National College Athletic Association color film, *The Road to the Olympics*.

This Bill Ganz' production shows how trackmen at the University of Oregon, under famed coach Bill Bowerman, develop the skills and the will to win which have brought them so many national collegiate titles. The Institute of Visual Communications produced under Mr. Ganz' supervision.

Track Stars Show Technique

Written by Bowerman himself, the film features such stars as Dyrol Burleson, Archie San Romani, Jr. and Victor Reeve as they go through actual training procedures. At Oregon, trackmen start their day with weight lifting, which is a good body-building substitute for actual manual labor, and good exercise for the upper body.

Runners practice on the treadmill, which gives a good insight into their form. They are seen against a graph in the background, which shows whether they bounce up and down too much, lean too far forward, or use their arms improperly. Dyrol Burleson runs so smoothly he could almost carry a glass of water on top of his head.

Details Assure Perfect Start

Meanwhile, sprinters do calisthenics and jogging before spending long sessions in the starting

Track star Harry Jerome (at left) shows placing of starting blocks.

Projectionists' Committee to Report Technical Developments

☆ A new engineering committee, headed by Don Kloepfel, projection supervisor for General Film Laboratories, will provide information on new developments in motion picture projection. It was announced in Hollywood last month by George Faherty, president of Studio Projectionists' Local 165, an IATSE vice-president.

blocks. Champions Henry Jerome and Dave Blunt are shown as they adjust the blocks to their own style. A man who wants a perfect start must pay close attention to the mechanical details which should always be precisely the same.

For a change of the monotony of the track, Oregon runners get out on the golf course and run cross-country twice a week. This is good for leg development, balance and flexibility of the feet.

NCAA Series Is Sponsored

This NCAA film is one of a series of pictures which are made

Delaware's Dave Nelson (l) stars in another of NCAA's film series.

with the cooperation of Brunswick Sports, makers of MacGregor sports equipment, and of the Edward Dalton Company, makers of Nutrament, a liquid food for athletes. It was made in cooperation with The United States Track and Field Federation and produced by William J. Ganz.

POSITION WANTED

YOUNG MOTION PICTURE MAKER desires position with firm or organization developing film program. Experienced in all phases of production. Currently employed at major Hollywood studio. Write for resume: Bickford Webber, 1973½ Hillcrest Road, Hollywood, California, 90028.

Screen Writer Gordon Miller Stricken During Polo Match

Gordon H. Miller, who recently rejoined The Jam Handy Organization after 16 years with Wilding, Inc., was fatally stricken with a heart attack on August 29th while participating in a polo match near Cleveland, Ohio.

An enthusiastic player for many years, the 53-year old Miller was participating for the first time in a match in which his son, Howard, 23, was a teammate. The late vice-president of JHO was a graduate of Michigan State and a past president of the Players in Detroit as well as a member of the Fine Arts Society. His professional specialties were script writing for industrial shows and motion pictures.

The Miller home was in Rochester, Michigan. He leaves his wife, Mary Louise, his son and three sisters.

ANOTHER FIRST FROM CFI, the lab that pioneered A & B printing of 35mm Color Positive.

TRIPLE THREAD

It's new. Our unique machine that prints all three at one time: A & B color negative rolls plus sound track. All run through together. All handled just once. Result: laps and fades of variable length without costly dupe negatives... prime quality throughout... faster service for our customers. You can't find it elsewhere. Only CFI has it.

Our special thanks to Bell and Howell for the lamphouse-reader-fade system used on this printer.

Shake his hand.

Open the box.

Plug it in.

Let'er roll.

This revolutionary projector sells your product anywhere. In sound and color. In broad daylight. Sets up in 10 seconds—and repeats automatically.

Technically, the Fairchild 400 is an 8mm rear-screen sound movie projector. It works more like a TV set, except you don't have to fuss with the focus.

The Fairchild weighs less than a portable typewriter and takes up less than 2 sq. ft.—wide open.

It shows up to 20 minutes' worth of color sound film. Requires no warm-up. Takes just 10 seconds to set up, plug in and turn on. *On is when it counts.*

You can demonstrate snow removal in July, a turboprop on a desktop or review a year's research in a minute. Take your customer on a field trip, a test run, or a tour of the plant. Right where he signs the

orders. When the commercial's over, the Fairchild's ready to repeat, automatically, up to 3000 times per print.

As we said, the Fairchild is an 8mm machine—the most reliable and modern ever made—but any 16mm or 35mm film can be quickly and easily reduced to 8, sound and all.

Thousands of Fairchild 400s have already gone into use. They're helping sales-

men multiply sales of automobiles, building materials, shoes, computers, bowling alleys, advertising pages and brassieres. They're converting par salesmen into crackerjacks. Demonstrating product advantages everywhere. Concisely. Dramatically.

If you have a product the Fairchild might help, call or write. We'll rush one over and plug it in.

Philips of Eindhoven in the Big Picture

Bird's Eye View of An Industry and Its Role in World Affairs

THE ADVERTISING DIRECTORS of Philips of Eindhoven, one of Europe's largest electronics and electrical products firms, set up the assignment: "we want a bird's eye view of Philips' activities to show how they are integrated into the social and economic life of Belgium, Luxembourg and the Netherlands."

With this directive, Gerard Raucamp, president of Carillon Films (The Hague), began the production of *Skywide Philips*, the most ambitious aerial film ever to be sponsored by European industry. 87 air-to-ground shooting days, covering 12,000 miles, with "touch-downs" from their Alouette helicopter at 60 locations plus 1,000 telephone conversations, 5,000 gallons of fuel, and 33,000 feet of film were tallied for just 27 minutes of showing time!

Camera Crew Saw Some Action

The flying camera-crew had many adventures. They were buzzed by naval aircraft when they nosed down over the heads of the Netherlands' Royal Family; they raced against time to record the

closing of a dyke. Radio contact was made with a police car at top speed; they also persuaded Dutch and Belgian Customs Officers to stage a "frontier" incident; turned out a lifeboat and caused all the lights of Philips' Eindhoven plant and the Schiphol airport to be simultaneously switched on to synchronize with the action.

The film, which started out to be an aerial tour of Philips factories, has become a cross-section of life in those three busy, bustling countries called Benelux — whose economic fusion has been one of the inspirations of the European common market. In the words of Gerard Raucamp, "this documentary film has added something new in style to the lexicon of industrial films."

Wider View From the Air

"By leaving the ground, the producer was given the chance to show that even the largest industry is not an individual affair but a virtual community which is inseparably linked to the world in which we live and in which it serves as an essential part."

Sied Numann (l) director of Phillips General Advertising division and Jan Daudey, manager of the company's film department (r), discuss film scenes with producer Gerald Raucamp (ctr.) of Carillon films.

International Industrial Film Festival Opens on October 14

On the eve of the Fourth International Industrial Film Festival, opening in Madrid, Spain on October 14, 117 entries from nine European countries and the United States were set for judgment. Some additional films from Spain, etc. were also expected to show.

These pages have now reported details on the 117 entries to date (including 10 titles from Austria and Switzerland provided on this page). We await the decision of Festival jurors with interest, noting with regret that our own National Association of Manufacturers has sent no delegates.

But BUSINESS SCREEN will be represented by several correspondents in Spain and we are promised detailed reports. European editor Peter Rigg is enroute to the U. S. where he will address members of the Society of Motion Picture & Television Engineers and the Industrial Audio-Visual Association.

AUSTRIA'S MADRID ENTRIES

Plastics, metals, tools and automated processes were the subjects of five films selected by Austria as its official entries to the International Festival at Madrid. Titles are:

CATEGORY B

"Mit unbekannten Ziel" (Destination Unknown)

Economic Promotion Institute of Federal Chamber of Commerce

- Plastic materials are seen as products of human invention, created by chemists who can control their qualities and specifications. The extent to which plastic materials have penetrated our everyday life is shown.

"Heraklith"

Osterreichisch Amerikanisch Magnesit A.G.

- The production and uses of Heraklith, a new building material.

CATEGORY C

"Pressluftwerkzeuge" (Pneumatic Tools)

Gebruder Bohler & Co., A.G.

- The many ways in which pneumatic tools are used in industry. The film includes some magnificent scenes of the Austrian countryside as it covers the building sites high in the Alps and in the Danube valley.

"100 Jahre Schoeller Bleckmann"

(The Schoeller Bleckmann Centenary) Schoeller Bleckmann Stahlwerke A. G.

- The story of one of Austria's most famous steel plants and its influence on the nation's economic life.

CATEGORY D

"Keine Angst vor Automatisierung"

(Don't Be Afraid of Automation!)

Economic Production Institute of Federal

Chamber of Commerce

- The possibilities and opportunities of automated processes in plants of all sizes are explained in this film.

FILMS OF SWITZERLAND

Swiss entries for the Madrid Festival include these titles on tobacco, photography, textiles, pharmacy and a safety picture, all commercially-produced in that country. Titles are:

"Manoques Valutes"

Burrus & Cie

—Produced by Telepress Film—

- The story of tobacco, its importance to man's happiness through the ages and a glimpse of its manufacture. Film of visual and audio impressions. Electronic music accompaniment.

"Images Vivantes"

(Living Pictures)

Paillard S. A.

—Produced by Telepress Film—

- A demonstration of the many uses to which narrow gauge film can be put and a visit to the Paillard plant set in picturesque snow covered mountains.

"Meine automatische Einziehmaschine"

Zellweger AG

—Produced by Montana-Film AG—

- Reductions in the price of textile products are made possible by improved production methods and the introduction of automatic machinery.

"Sous le signe d'Esculape"

(Under the Sign of Aesculapus)

Pro Films, AG

- A review of the development of pharmacy as a profession showing the comparisons between a pharmacist today and 100 years ago.

"Huter unserer Sicherheit"

(Guardians of our Safety)

Condor Films AG

- The film deals with an institution founded to fight against accidents due to electric apparatus, by testing equipment and requiring all which does not meet the required standard to be returned to the manufacturer for rectification or withdrawal from the market.

35 YEARS OF OUTSTANDING
FILM PRODUCTION SERVICE

Borden and Busse Return in a New Dartnell Sales Film

Long favorite "role players" for salesmen and their managers, the familiar figures of Richard C. Borden and Alvin C. Busse return to the screen in a new 30-minute sound motion picture titled *How to Make an Effective Sales Presentation*. The film is the latest addition to the library of the Dartnell Corporation, of Chicago, an international source of sales training and management media.

This latest Dartnell offering gets to the heart of this significant question:

What is the *critical moment* in a sales call? Is it the time when the salesman should ask for the order? Does it come when the prospect

Richard Borden (l) and Alvin Busse (r) are pictured with chart showing four key reactions of prospects as presented in their new Dartnell film.

objects to price? Or is the sale at its critical stage when the decision is apparently being postponed?

The film provides the *answer*. It also shows four key steps which a salesman must take to make his speech click and his presentation *stay presented*. How to plan a "ho hum" crasher is explained. The film shows what happens when the salesman fails to build his benefit-bridge soon enough.

Busse is pictured using closing techniques in a series of calls involving a group decision and Borden utilizes the complete "four-step formula" in a speech to sell a political audience. The pair demonstrate in a hilarious scene what happens when a salesman doesn't group his benefits into an orderly sequence.

This film tool for sales meetings, sales conventions and sales training programs is available for purchase (up to December 31, 1963) on a Charter Subscription basis. *How to Make an Effective Sales Presentation* may also be rented (\$1 per person, minimum \$40) for each showing. Address The Dartnell Corporation, 4660 Ravenswood Avenue, Chicago 60640 for an order form and a

what's new in pictures

"Decision for Mercy" to Aid Chicago's Welfare Fund Drive

For the fourth consecutive year, Chicago's annual city-wide Community Fund Drive motion picture has been produced by Fred A. Niles Communications Centers, Inc. The 1963 film, *Decision for Mercy*, will spearhead the fall Crusade of Mercy campaign.

Decision presents a new approach to employee-giving motivation. With a majority of Crusade of Mercy showings made in large plants, offices, etc., this year's film theme is that of an employee-solicitor who seeks help in his assignment from an old friend. The excuses for not giving are presented and skillfully answered in a most human and understandable fashion.

Another unusual aspect of this year's Crusade film is the dual purpose it serves. In past years, two pictures were produced: one for solicitor training and another for direct showing to givers. This serves the combined purposes.

The 14-minute black & white film features two character actors

A scene in "Decision for Mercy"

for its leading roles. They are Tom Erhart of the local Second City theater cast and Dick Schaal of Playwrights' Theater.

Extensive showings are being arranged by Crusade of Mercy officials. Operators and equipment are provided when not available.

* * *

Slidefilm Helps Instruct Men Who Deliver the Phone Books

☆ The Reuben H. Donnelly Company is a co-sponsor, with the New York Telephone Company, of another of its instructional sound slidefilms which aid *both* firms at a critical point: the effective, efficient delivery of telephone directories to myriads of subscribers.

How to Deliver Telephone Books, a 16-minute color slidefilm, was produced by Rossmore Productions. There are some interesting facets behind the continuing use of audio-visuals in this area:

Telephone books are delivered by independent contractors who undertake to place a copy in the hands of every subscriber on their routes. They have been remarkably effective, considering that many of them do it as a side-line and are not experienced at the job.

One reason these contractors are effective is because of a training period in which the exact specifications of the job are spelled out — they are shown how to make the delivery, what to do if the subscriber has moved away or is not at home, and even how to get paid when the job is done.

The film points out that contractors have an important job to do, especially since it often happens that they are the only contact between the company and its customers. Although a great majority

The Sight and Sound of the News

They're talking about: the "blue ribbon" list of judges who are
looking at entries to the Third International Film Festival,
being held in conjunction with the Industrial Film and Audio-
Visual Exhibition (October 8-10) at the Barbizon Plaza Hotel
in New York. We still don't have the complete list but the
names to date look impressive, though only one or two are film-
oriented. Results in these pages next month!

☆ The irritating frequency of television commercials is being
hit hard by the FCC Chairman and by LeRoy Collins, president
of the National Association of Broadcasters. The former Florida
governor is asking local stations for greater improvement in the
form and content of commercial announcements, realistic limita-
tions on program interruptions and more effective means for
assuring in advance the truth of advertising claims.

☆ There's excitement out in Hollywood about those plans which
evangelist Billy Graham is making to build his own motion pic-
ture studio. Films play a tremendous part in the Graham pro-
gram and the talk underscores the importance which his group
assigns to 16mm.

☆ The long-heralded Panacolor film printing process, which
turns out color motion picture release prints on black-and-white
positive film stock, made its 35mm debut in September when
the Sidney Pink feature (for Warner Bros.) titled *The Castilian*
showed the process to theater-goers nationwide. News of a new
motion picture (cartridge-type) projector (being made in
Europe) was also disclosed by board chairman Harry Harris of
Panacolor, Inc. No word about 16mm printing developments but
they're imminent, according to insiders. . .

☆ Winners of 1963 National Safety Film Awards will receive
their bronze plaques on October 28th in Chicago. Presentation
ceremony will be a highlight of the National Safety Congress
and takes place at 7:30 p.m. in the Grand Ballroom of the Con-
rad Hilton Hotel. We rate this awards program No. 1 in the
nation for the quality of judging and the top-level handling of
these hard-won honors in an extremely vital field of education.

☆ Kudos to Eastman Kodak for that "Youth Achievement"
Award presented on September 18th at the 7th Annual Youth
Market Clinic in New York City. This international company
sponsors America's Junior Miss and the All-American Football
Team, the Kodak Scholastic Photo Awards, gives photographic
support to the Boy Scouts of America and 4-H Clubs.

In addition, Kodak has a program of financial aid to higher
education, offers student tours of its plants, school services and
program materials for teachers. An example: the Kodak infor-
mational film, *Camera and Careers*, which was produced in
cooperation with the American Personnel and Guidance Asso-
ciation. It has been viewed by more than 100,000 students in
Los Angeles alone; by tens of thousands of other young people
throughout the U. S., plus other showings abroad.

This is the easiest way to
make slides and copies in 10 seconds.

This is why. The Polaroid Copymaker has everything you need for copying: two fluorescent lights for uniform illumination; close up lenses for pictures down to 1:1 magnification; and a built-in electric timer for exposure and development timing. The easel is marked off into eight field sizes to show exactly what will appear in the picture for various camera settings. Teamed with a Polaroid Model 160 Land Camera, the Polaroid Copymaker allows you to make on-the-spot close-ups of anything that will fit into an 11" x 14" space—charts, maps, books, small objects.

You'll make prints or line copy slides in just 10 seconds, continu-

ous tone slides in two minutes. With no trouble. Just load and shoot the transparency film the same way as standard film. Push a button, pull a tab, wait a moment, remove your transparency. After a quick hardening, put it in a snap-together frame and it's ready for projection.

Whether you want slides or prints, you'll see your results immediately. No waiting. No expensive darkroom. And the Polaroid Copymaker is so simple, practically anyone can learn to operate it in no time. If your school, office, laboratory or drafting room needs quick, quality copies, why not get them the easiest way? With the

The SCREENING Room

THE LATEST in employee communications films from BNA Incorporated stars Wally Cox in a light-hearted, but effective, explanation of the American free enterprise system, appropriately titled *The Marvelous Mousetrap*. In this 25-minute color picture, Wally becomes a better worker on the mousetrap assembly line when he learns how important he is to his company's profits and how important profits are to his own security.

The television star skillfully portrays three key roles in the story. For further background see these columns next month and, meanwhile, write BNA Incorporated, 1231 24th Street, N. W., Washington, D. C. 20037 for print purchase, preview and rental terms.

Employee's Impact on Attitude of Public Explained in Depth in "I Just Work Here"

Why does each individual employee have so much impact on the public's attitude toward an organization? Answering this question is a 17½-minute sound film, *I Just Work Here*, just completed by Roundtable Productions.

This latest in Roundtable's growing library of useful human relations films explores a number of everyday experiences to show how employees can make their own jobs more rewarding, while doing a better job for their companies. The story is well told.

For preview terms write the producer at 275 S. Beverly Drive, Beverly Hills, Calif.

Mr. Oeveste Granducci
c/o General Delivery
St. Thomas, U. S. Virgin Islands

Dear Mr. Granducci:

Despite what seemed to be almost a comedy of obstacles during the last couple of months, the prints of our movie, "Credit Where Credit Is Due", are now going forward. Yours should arrive shortly.

The three groups that have seen the movie are uniformly pleased as is the movie committee and myself personally. We believe we were very fortunate in our choice of the script writer and are particularly happy over the fine working relations that developed between you and the committee and most particularly between you, Giff Hoag, Ben Sunbury, and Bill Snyder.

The committee is recommending to the Banks that we do not let the momentum of our entry into the movie business slow down and that the Banks seriously consider additional productions.

Again many thanks to you for your work.

Sincerely yours,

President

For results, get the script first!

238 "Chris" Awards at Columbus Festival

Film Council and Chamber of Commerce
Co-Sponsor 11th Annual Award Program

UNIQUE AND DEDICATED are words that best describe the annual Columbus, Ohio Film Festival and its devoted adherents in this Athenian city of Midwest America. Countless hours of previewing and final judgment by community leaders, local businessmen, educators and professional men and women preceded the 11th annual Chris Awards Banquet held on Friday evening, September 27th, at the Christopher Inn.

Highest honor of these Columbus awards programs are the "Chris" statuettes, a reproduction in miniature of the 20-foot bronze statue of Christopher Columbus which graces the entrance to City Hall. A total of 17 "Chris" statuettes were bestowed on 15 business and educational motion pictures and two filmstrips selected by Columbus jurors as the best of several hundred entries.

Robert Yung Addresses Awards Banquet

Another 221 Chris Certificate Awards, made possible by the Columbus Area Chamber of Commerce, a co-sponsor of the Festival, went to 193 motion pictures and 28 other filmstrips cited for this honor. Principal sponsor of the event is The Film Council of Greater Columbus, headed by president Daniel F. Prugh. Principal speaker at the Awards Banquet was Robert Yung, vice-president of Elektra Studios of New York City. Mr. Yung has recently returned from a location assignment in Japan where he directed and co-produced a NASA film with Astronaut John Glenn, Jr.

Winners of the Chris Statuette in the "Business and Industry" film category were: *The Cattle Carters*, sponsored by British Petroleum (North America) Limited, and *The State of Enchantment*, sponsored by the State of North Carolina. "Information and Education" motion picture statuettes were shared by *Hailstones* and *Halibut Bones*, a Sterling Educational Films' production and *Mahanni*, a National Film Board of Canada film.

In the category "Travel, U. S. and Foreign" Chris statuettes went to *Amazon Family*, pro-

"The Warning Bell" won a Chris statuette for producer Wilding, Inc. and its sponsor, the Nationwide Insurance Company, at the Columbus Festival.

duced by Julien Bryan for the International Film Foundation; *France — With a French Accent*, produced by Coleman Productions for the French Government Tourist Office; *Mexican Boy*, *Story of Pablo*, produced by William Deneen; and *Unique Petite Belgique*, produced by Robert Davis Productions.

Statuettes to Safety and Health Films

Winners of Chris statuettes in the important field of "Safety, Health and Mental Health" films were: *Children of the Silent Night*, produced by Campbell Films; *Pulse of Life*, a Pyramid Film production; *Steel Jungle*, produced by WBNS-TV (Columbus) and *The Warning Bell*, produced by Wilding, Inc. for Nationwide Insurance, in cooperation with the National Safety Council. *The Warning Bell* will also receive the top plaque award of the National Committee on Films for Safety as the best general safety motion picture of the year. This award will be made at the forthcoming National Safety Congress convening in Chicago in mid-October.

"Special Fields" honors went to a biographical film, *George Bernard Shaw*, produced by Wolper Productions, Inc. and the other Chris statuette in this category went to *The John Glenn Story*, produced by Warner Bros. and the Department of the Navy for the National Aeronautics and Space Administration.

Moody's "City of the Bees" a Winner

The Moody Science Film program was the sole other recipient of a Chris statuette when *City of the Bees* was selected by Columbus jurors as the best "Religious" film entered. (CONTINUED ON THE FOLLOWING PAGE 66)

If You Lost Your Freedom . . .

George Toker, *Government Bureau*

IF YOU LOST your freedom . . . what difference would it make whether it was to Communism, Socialism, Fascism, or welfare-statism? The end results would be the same. We would become the dependent slaves of an all-watchful, all-powerful, bureaucratic government . . . the eyes of "big brother" upon us.

WHO CARES about freedom? I do . . . We do . . . BUT — Of course, the age-old question: "What can I do . . . we do? What can one company do?" Some say get out and vote. But vote for what? History teaches that a once-free people have often voted themselves into slavery. Remember Hitler's Germany?

TO REMAIN FREE, our nation must understand the principles of our freedom as embraced in the free enterprise system and limited constitutional government, and why these principles have made us the freest, most prosperous nation on earth.

TELLING THIS STORY begins right where you are — in the attitudes of the people of your company, your service club and other community groups, in the churches and schools in your area . . . and you *can* influence those attitudes, audiovisually.

AS A CONTRIBUTION toward telling this vital American story, Walter Knott, of Knott's Berry Farm and Ghost Town, California, commissioned the well-known Hollywood firm of Sonafilm Corporation to produce three 20-minute color sound film strips comprising a panoramic sweep of essential Americana.

WINNERS of the highest Freedoms Foundation film awards, they are "THE TRUE REVOLUTION," "AMERICA'S SECRET," and "OUR AMERICAN HERITAGE." Because of their individual impact, they should be seen in that order, and preferably in three separate screenings. They are controversial only

to those who would like America's freedom destroyed.

FOR A MODEST \$59.50 you can purchase the complete set of three film strips and records (or tape tracks) and make them available to the schools and audiences of your community. Money will be fully refunded to any purchaser not completely satisfied with them.

TO REPLANT the seeds of understanding, nurture pride in our country, and help to insure the survival of freedom in our time, order a set today . . . or write for further descriptive information. Make check payable to (and address correspondence to) Freedom Center.

38 Films Explain Communism: Myth v.s. Reality

Southern California's Research Institute on Communist Strategy and Propaganda Is Host as Leading Authorities on Many Aspects of Ideology Present Views for Televised Series

by Rodger Swearingen, Institute Director

FOR YEARS, two of the most powerful media available anywhere — television and motion pictures — have been allowed to idle while many teachers, the youth of the nation, business organizations, and the public at large remain uninformed and confused about the aims and nature of Communism.

The television treatment of Communism for educational and informational purposes has tended to fall into one of two types: First, educational TV, too often characterized by the single lecturer, lecturing into a single camera from a prepared manuscript.

This approach while, at best, offering virtues of authority and conciseness, has two obvious shortcomings: (a) One half hour of straight lecture on television, however stimulating the lecturer or the subject matter, inevitably taxes beyond the attention span all but the most interested or avid viewer; and (b) equally serious is the fact that such programs, which have characteristically appeared on educational TV stations, usually have a relatively small audience rating.

Entertainment Skims Facts

The other type of program on Communism is more familiar to the average viewer and may be characterized as the Hollywood extravaganza. This approach has the virtue of skillful writing, professional production and interesting presentation. Its shortcoming has often been that the flashy presentation has had little relationship to historical fact or to the nature of the real issue at stake.

The question which has to be answered is this: Is it possible to combine the best aspects of both approaches, that is, can the authenticity, objectivity and perspective of the traditional educational TV program be wedded to the production techniques, facilities, talents and visual quality of the commercial television program?

The Origin of This Series

To explore the possibility of combining academic and governmental resources with those of the TV industry to produce a substantial documentary, educational series on Communism — about a year ago the Director of the Research Institute on Communist Strategy and Propaganda, University of Southern California, approached CBS-KNXT in Hollywood with an idea.

This idea was to combine the resources of recognized academic

institutions, responsible government specialists on Communism and experienced foreign correspondents with the best available documentary film, television facilities, techniques and talent.

Combined Production Effort

The result was a decision to go ahead with production of a 38-week TV and 16mm film series, *Communism: Myth vs Reality*, to be joint production responsibility of the University of Southern California and KNXT.

To handle the documentary film aspects and much of the writing of the basic scripts, the Institute added to its staff last year a specialist with a combination background and experience abroad in International Relations and TV-film work. With the co-operation of its senior specialists on Communist affairs and with that of the guest authorities, the Institute has, we think, been able to attain both subject matter authenticity and technical quality.

Objective View of Subject

The series treats the broad subject of World Communism objectively in its many aspects, starting with the ideological and historical origins of Marxism-Leninism-Maoism; encompassing the Soviet and Chinese Communist systems and practice, and then going on to Sino-Soviet foreign policy, strategy and tactics in the free world.

Each program has a similar format. Roughly the first half of the

program is devoted to examination of the particular topic through the medium of documentary film with appropriate background narration. This is followed by a question and answer segment during which the program host and a guest authority analyze the topic in greater detail.

Documentary film, both motion picture and still, has been acquired from 22 sources, including locations within the Communist orbit, important newsreel coverages of the past 50 years, captured Nazi and Japanese footage of World War II, and U.S. Government and private film collections. Hundreds of thousands of film feet have been culled to select the choice 150,000 feet of 16mm film from which the series, to date, has been created.

Experts Analyze Each Aspect

It has been the intent of the Institute to bring before the TV camera the top academic, governmental and news media authorities each analyzing an aspect of Communism in depth.

Major universities in the United States, U.S. Government Departments, the Council on Foreign Relations, the RAND Corporation, newspapers with foreign correspondents, and several foreign institutions all contributed one or more guest specialists to the series. In this sense, the series represents a consensus of expert analyses and opinion on Communist theory and practice.

A review of the 38 programs by

Dr. Swearingen introduces a program against background scene of Kremlin.

Dr. Leon Herman (right) specialist on Soviet economic development, The Library of Congress, with host of series, Dr. Rodger Swearingen.

topic, specialist and institution is perhaps the best way to convey the comprehensive nature and approach of this series. The summary of titles which accompanies this article may also help to answer the many requests we have had to furnish more detailed information on the project.

The West Lacks Experience

The value of a visualized presentation, illustrated with the most informative motion picture footage, is of extreme importance with the topic of Communism. Communism is being experienced by about one billion living human beings. However, in the West and particularly the United States, Communism is a subject largely of preconceived notions limited, in many cases, to the personal experience of individuals far distant from the actual existence of Communism. As a consequence, there is a natural tendency to relate communism, in an abstract sense, with personal experience.

To aid in overcoming this limitation, film presents an image, stimulates thought, and in a polite, observable way, urges the viewer to draw his own conclusions from that which he sees without accepting solely the opinion of others.

A skillful, well researched, presentation on film makes possible the unfolding of the topic of communism in the relationship of its theory, doctrine, history, growth, goals — and practice. This painstaking approach to the topic enhances the audience ability to

COMMUNISM: MYTH V.S. REALITY

cope with some of the more complex, and interrelated, phenomena of communism. Too often there is a tendency for the uninformed to be drawn to isolated examples of flamboyant, controversial, and emotionally exciting aspects of the topic.

Lack Experience, Background

The scattered reaction within the West to the topic of Communism is largely occasioned by these two problems of lack of experience and lack of authoritative background knowledge.

A highly detailed film presentation that can tackle, in a visual way, these problems upgrades an audience awareness so rapidly and in a broad manner, as to then enable a really fruitful analysis of the topic. Organizations, government agencies, school systems, public service groups and companies that deal with the public, the government, and with interna-

Alexander Dallin, director of Columbia Univ. Russian Institute, (right) with Dr. Swearingen and (center) producer James Cook.

tional markets have frequently been aware of the need for a rapid, compelling educational tool to enhance the level of sophistication of their members.

Fact v. s. "Visual Appeal"

The visual can be vivid, especially when focused on such a pro-

vocative topic as Communism. However, the Institute has also insisted on another important factor that takes precedence over use of dramatic and striking film. There is a natural tendency among film makers to let their preference be swayed by pictures and footage that inspires a response more visceral than analytically factual.

Therefore, the Institute has placed the priority of "fact" over "visual appeal" as the criterion upon which the series has been created. Footage was sought to substantiate fact, and the tendency to succumb to solely dramatic footage was minimized.

Since much footage about the Communist orbit is rare and difficult to obtain, there is very little leeway in finding that which achieves visual and technical perfection. But, when the Institute located footage which substantiated an important fact, regardless of photographic quality, this film was used.

This reliance on documentary,

newsreel, and candid material rather than carefully created dramatic material has been of extreme value in maintaining the level of authenticity. The audience is presented with a feeling of immediacy, reality, and candid insight.

A Corps of Serious Students

Besides the documentary footage portions of each film, the technique of presenting the topic of Communism by motion picture has opened up another, and equally important facet of the problem. There is a small but respected corps of highly skilled professionals who have devoted their occupational lives to a serious study of Communism.

Significantly, they are not to be found among the extremists, nor are they individuals who have pursued the topic for purposes of personal notoriety. These professionals — professors, researchers, government specialists and foreign correspondents — are well known among their colleagues, frequently have important influence on national and international policy, and are well read in the scientific and scholarly community.

Present Views to the Layman

However, the layman seldom has the opportunity to assess the observations and opinions of these experts unless he is a close follower of research about Communism. By "freezing them on film" their comments can then be made available to the public at the convenience of the audience's time schedule.

The technique of question and answer presentation has been employed in drawing out the observations of the guest authorities. Questions of controversy, which often capture the attention of the public, serve as the vehicle for exploring the topic and likewise minimize the debilitating effect of a monotone presentation.

Shown by Five CBS Stations

The series started on Channel 2 CBS-KNXT, Hollywood, during the fall of last year. In April of this year 20 of the 39 programs began running on the other four major CBS owned stations: in New York, Chicago, Philadelphia and St. Louis. Armed Services TV scheduled the series to start July 1 on 32 stations abroad.

The series has already earned three awards. The Ohio State Institute for Education by Radio-Television judged 74 entries from networks and commercial stations and awarded a commendation equivalent to between a fourth

William C. Sullivan (Assistant Director, F.B.I.)

FOR AMERICAN BUSINESSMEN TODAY, Western Europe offers prospects not unlike the New World once held for their mercantile ancestors. The Common Market, the Trade Expansion Act, and Europe's spiralling standard of living have done much to set the winds for profitable American ventures overseas.

Yet, the United States continues to export only about half as much of its gross national product as European countries . . . in spite of intense domestic competition, and all-out government encouragement.

An unfavorable balance of payments, shrinking gold reserves, lagging growth of industrial productivity are among the well-known results. Now, a new picture . . . titled *We'll Talk About It in the Morning* . . . comes forcefully to grips with some less well-recognized causes.

Produced for Pan American Airways by Henry Strauss & Co., of New York, *We'll Talk About It in the Morning* deals with traditional American attitudes that are in direct conflict with our equally traditional philosophy of aggressive, enterprising business practice.

Introduced by Secretary of Commerce

It does so with an effectiveness that induced Commerce Secretary Luther Hodges to appear in the film's opening sequence . . . to endorse its message as one "that will capture the imagination" of American businessmen, and move them to get into world trade. The Commerce Department sponsored nation-wide showings as part of World Trade Week; and the film was presented before key legislative and executive leaders at a private Washington screening.

Industry sponsored films are a fairly common vehicle for public information. But this picture has much that's unique in concept . . . approach . . . and technique.

From their first discussion of the project, Strauss and Pan Am set a specific objective . . . stimulating businessmen to take active, concrete steps toward overseas marketing. They realized that most businessmen were aware of basic facts about such developments as the Common Market. What was needed was a new viewpoint on those facts that would counteract fears of the unknown.

Frank Appraisal of Negative Factors

Research showed there were many negative factors to be dealt with. A significant number of businessmen for whom overseas marketing might have offered real and attractive potential held back because of concern over competition from low foreign wage scales . . . fear that any operation they built might collapse with the fall of a government . . . or unwillingness to tackle what they saw as ultra-complex problems of foreign promotion, distribution, manufacturing, licensing, and credit.

Other than purely logical forces also were revealed as playing a part. As one of the film's main characters puts it:

"Go over there!! How can you go over there? You don't speak the language! You don't read it. You don't even know anybody over there. There's no guide-book that tells you how to look at an industry."

This expression of simple human anxiety capsules the unusual approach of *We'll Talk About*

Two American businessmen on their voyage of exploration to uncover markets abroad.

Pan Am Explores New World Trade Horizons

"We'll Talk About It In the Morning" Deals With the Economic Potential of Marketing Abroad While It Delves Into the Human Side of the Problem

It in the Morning. Like most effective motivational films, this is a story unfolding problems in terms of people.

Two Partners in Search of Markets

The basic plot is quickly told. Two partners who have built a successful manufacturing enterprise by healthy aggressive drive, arrive at a crossroad common to many such businesses. Do you take up arms against a spreading sea of competition by consolidating present markets . . . or by looking for new ones? If the latter, where . . . and how?

A scouting expedition to New England reveals that foreign firms have already established a surprising beach-head virtually in their own backyard; and this leads the partners (one of them much against his better judgement) to a voyage of exploration, like two Marco Polos in reverse.

We follow them to Milan; and as they visit banks, street markets, an ultra-modern shopping center, an American consular office, an Italian manufacturing plant, we also follow the broadening road of their understanding and outlook.

We watch them move, half afraid of their own daring, from the idea that overseas marketing might possibly provide a "hedge" against the future, to the point where they are ready to try it as aggressively and with the same long-range hopes, as they would domestic expansion.

What emerges is no "preachy" or unrealistic conclusion . . . but a somber presentation of

possibilities that indicate several worthwhile avenues for personal investigation.

Much of the credit for this must be given to the film techniques utilized in this Pan-Am film. The Strauss organization was convinced that the only way to help overcome fear of the unfamiliar was to show (not merely state or argue) how close it actually is to much with which American businessmen are familiar.

Film Actual Conditions on Location

Accordingly, the film's live sequences were photographed on location in Milan . . . providing the opportunity to visualize actual conditions overseas with realism no one could seriously question.

To give added "true-to-lifeness" much of the story was shot in streets and byways; restaurants and stores; from moving cars and a sightseeing tower . . . with the obviously authentic sight and sound and "feel" of the city that only such a technique could provide.

The contrast between reality and the businessman's "preconceptions" is made to stand out even more sharply by a sequence, early in the film, employing art-work vignettes that illustrate the reluctant partner's mental concepts of Italy as a far-too-alien place.

The impact of this unusual motion picture can be judged by the extraordinarily large number of showings requested by business groups and others interested in the subject. It is also being effectively used within Pan American to provide members of the company's air cargo sales staff with background information. ☐

Right: Secretary of Commerce Luther Hodges pictured with director Robert Wilnot (left) and producer Henry Strauss (right) at a private screening in Washington where Pan Am's picture was presented to key legislators and members of the executive branch of the government.

The New Look in Mobile Homes

Art Baker Introduces a Retired Couple to a Colorful
"Design for Modern Living" That's a Pleasure to See

SPONSOR: Trailer Coach Association.

TITLE: *Design for Modern Living*, 27½ min., color, produced by F. K. Rockett Productions; distributed by Modern Talking Picture Service.

When one of every nine new housing starts today is a mobile home, when more than four million Americans are finding a new pursuit of happiness in traveling about the country in comfort and style, yet quickly making themselves at home in a real home and finding themselves in a community which gives them a feeling of belonging, there must, indeed, be something to this new *Design for Modern Living* based on mobile homes.

Art Baker's "Notebook", a radio favorite for many years, provides the framework for exploring this new way of life as, on film, he turns the pages of his notebook to discover some of the things which are touched with the whole range of human emotion.

Discover a New Way of Life

Within the "Notebook" context, a pleasant retired couple, John and Margaret Innis (played by Hardie Albright and Claire Carleton) get their first real close-up of mobile home living. In the process they undoubtedly take many of the audience for a first view too.

The situation is typical: Family grown, house too big, free time. With a travel trailer, they set out to see the country, fish, have fun, relax. It's fine for a while, but it has its drawbacks: it's not home, there's no opportunity to make any lasting friends, there's no sense of belonging anywhere.

Spotting what at first looks like

a country club, Margaret discovers a mobile home park, one of 10,000 built as planned communities throughout the land. Here the friendliness of the people in this setting far removed from any look of "camping out" gets them an inside view. Tony Fallon (played by Tom Moroney) takes them in tow

Art Baker's popular "Notebook..." framework helps audience discover this new way of mobile living.

for a tour of the park, and into his mobile home where his wife, Betty (Mona Knox), plays the gracious hostess in showing off a movable residence larger than many a four-room apartment, purchased already furnished with a striking interior plan.

A Revelation in Economics

The fact that such a dwelling—and many of them are expandable—costs half as much and upkeep a quarter that of fixed housing of comparable size is a revelation to the Innises. And Tony notes that not by any means are all the residents retirees; many with a good many years of employment still

"On location" at a Palm Springs Mobile Home Park with Art Baker.

ahead have deliberately chosen this sort of housing.

The comfort, thinks Margaret, is wonderful, but there ought to be something more in life, and there is. Host Tony provides the clincher by showing them the recreation area, a handsome structure providing activities of all kinds, so that residents may be gregarious or have privacy as they choose. The Innises succumb to the charm and delight of this new way of life, as doubtless many in the audience would like to do, and buy their own mobile home.

A Tuneful Production Number

Baker skillfully bridges the whole flow of action which includes a colorful production number with song-

Camera action as Tony Fallon welcomes Innises to mobile home.

stress and orchestra at the recreation center. A neat small touch which couples reality and make-believe, lending a good note of sincerity to the film, is an opening and close filmed in "the TV studio" with technicians cueing the narrator in.

Initial use of the film is to be on television, for which it is cleared, in the public service area, with showings to other non-theatrical audiences to follow.

Stanton Webb was producer; John J. Hennessy, the executive producer for F. K. Rockett Productions, and Joseph P. Denove directed. Script was written by Arnold Leo and Stanley Silverman. Music was created by Ed Norton.

IBM Data Control for "a better way"

Western Region's "One-Shot" Film Becomes a Field Tool
When Five "Case Histories" are Presented at Premiere

SPONSOR: International Business Machines Corporation, Western Region.

TITLE: *a better way*, 29 min., color, produced by Hollywood Animators.

☆ In a West Coast shipbuilding yard the long-used, laborious handmade mockup for a new vessel is replaced by IBM Numerical Control, with tapes directing the cutting of steel for much greater speed and far more accuracy, while IBM computers plan for cable and pipe installation . . . *a better way*.

Common to most small businesses, an even flow of working capital poses a problem for a firm near California's Half Moon Bay, where 1200 different styles of decorative candles are produced. IBM Inventory Control gives a major assist to stock turnover, and has the effect of stretching dollars so that each one does the work of two . . . *a better way*.

In a Los Angeles supermarket, IBM Telecredit provides automated check-cashing protection;

fast feedback of price and other information aids materially in competitive marketing; and in a service station chain, phone-line data transmission provides badly-needed controls on all stages of operation *"a better way."*

In a Texas hospital, where anaesthesiologists and other doctors seek answers to how to adapt man for better possibilities of survival during surgery, IBM Electronic Patient-Monitoring yields a physiological profile to predict re-

Electronic memory drum catches a check forger in *"a better way."*

Pictured on one of nine sets in which actual coach interiors are shown are (l to r) producer Stan Webb, director Joe Denove, narrator Baker.

actions, and this on-line medical tool becomes . . . a better way.

Intended for Single Showing

The five situations depicting "people with ideas and imagination, finding ways to make life more useful, finding a better way," were chosen for a film intended only for a single showing on March 19.

The objective was to inspire some 1200 members of the 100% Club, IBM Western Region personnel eligible to attend the annual conference on market development by having met or exceeded quotas in the previous year. The reception in the packed convention hall at San Francisco's Fairmont Hotel was literally tumultuous. More than one person attending said it was "like a Saturday afternoon kid's matinee."

56 Prints Already in Use

A. L. Williams, IBM president, promptly asked the men if they'd like to have the film as a sales tool, and the answer was a same-day order for 26 prints. Thirty more have been ordered since then, primarily for Western Region use.

Design automation is helping to speed shipbuilding, reducing costs, including showings at service clubs and for similar audiences. The head of IBM World Trade also requested a print with Spanish track, which was used in April at a conference of IBM personnel in South America. Expectation is that a better way will be listed in IBM's next film catalog for national distribution, and that versions in other languages will be prepared.

In its fine technical qualities, the picture uses tight closeups and dramatic lighting. Derived from the producer's 3-D stop-motion work, back- and cross-lighting with gels over the sources create a dramatic effect without distorting the truth of the scenes.

Initiated by Sheldon Eglash

Sheldon P. Eglash, then promotion and advertising manager for IBM's Western Region, headquartered in Los Angeles, initiated the (CONTINUED ON PAGE 48)

THE NATION'S DOCTORS entered the political arena throughout the country in 1962, helping to defeat programs for socialized medicine, including Federal medical care for the aged. They're back in the ring this year, more militant and better organized through the American Medical Political Action Committee (AMPAC), which aims to improve doctors' political "savvy" as they prepare for the 1964 campaigns.

The American Medical Association, representing some 200,000 U. S. physicians, supports AMPAC through contributions permitted this organization for political education. But it is the individual AMPAC member in the profession itself to which this growing organization looks for active participation and dues support.

Keystone of Local Meetings

Assuring that participation on the local and regional level and fortifying its members with understanding-in-depth about their roles in political life, AMPAC turned to a broad-based sight/sound educational program as the keystone of its nationwide membership meetings earlier this year. A three-hour film presentation, well-spaced with personal talks and "breathers" was unveiled when AMPAC's "Barnstormer Course in Political Education" hit the screen some months ago.

Aiding the campaign are a series of eight "Political Education" pamphlets but the "heart" of the program was the audio-visualized "short course" designed for local presentation by a single discussion leader and aimed at strengthening the city and county-by-county AMPAC groups building up across the country.

Course Produced by Parthenon

The "Barnstormer" course was produced by Parthenon Pictures of Hollywood. "Built-in" as a 28-minute segment of the course is a very popular and appropriate film, *Where Were You?* contributed by the Ford Motor Company. 50 prints were loaned to AMPAC for use in this non-partisan political education course.

The Ford film is an early seg-

Victory at the polls is shared by the now-informed "Dr. Gordon" in this scene from "How to Stand Up and Be Counted-On" in Barnstormer course.

The Doctor Studies Politics

Nationwide Groups Applaud Filmed "Barnstormer" Course of Their American Medical Political Action Committee

ment of the "Barnstormer" program and at its close, another film introduces George Gordon, M. D. who has been watching the picture at a civic club meeting. Dr. Gordon's life and hard times in the political field serve as a continuing theme for subsequent films.

The Ineffective "Dr. Gordon"

The second film on the program, a 25-minute subject, shows Dr. Gordon as he tries his hand at politics without knowing exactly how he should go about it. In *How to Stand Up and Not Be Counted* he winds up this brief, unhappy interlude by being very ineffective.

Discussion leader and coffee "breaks" are interspersed between such films until another brief segment of seven minutes presents "The basic structure of the political party" in color film. The mistakes made by Dr. Gordon are recounted in another short film sequence,

followed by a film on the structure of the medical political action movement.

How to Set Up a Committee

A high point in the program is the film introduction of Dr. Edward Annis, president of the American Medical Association, 1963-1964, who explains how to set up a local candidate committee. The final motion picture, 12 minutes in length, returns to Dr. Gordon in *How to Stand Up and Be Counted — On*. Now the good doctor has learned his lesson! Both he and his wife go into politics knowledgeably and they get results.

America's physicians have friends on both sides of the aisles in Congress. Their campaign will serve to awaken a very large segment of "influential" citizens to active participation in every phase of government. Results from the field show extremely large and vocal audiences are using the filmed program. They indicate that the political awakening of the doctors is being widely accomplished.

Techniques Worthy of Note

Behind the production scenes, the Parthenon-produced films contain special techniques worthy of note. The "voice" is "contemporary" (CONTINUED ON PAGE 48)

In these pictures: glimpses of the "ambient limbo" backgrounds used to help doctors identify with scenes are visible as (left and above) "Dr. Gordon" turns trials into triumph.

HENRY STRAUSS & CO., INC.
31 WEST 53RD STREET • NEW YORK 19, N. Y.

N.Y. World's Fair Report

World-Wide Audience Will See Third
in Series of Official Fair Pictures

THE THIRD IN A SERIES of official progress reports on the Fair has just been released. *World's Fair Report with Lowell Thomas* is slated for world-wide distribution in three versions. Two of them, a 28-minute and a 14-minute film, will be distributed by Association Films, Inc. to non-theatrical and television audiences. A nine-minute 35mm version is under preparation for global theatrical showings. It is expected that the audience for the new film will exceed the 14,000,000 persons who are estimated to have viewed the 2nd World's Fair Report. This, and other Fair Progress Report films, are produced by John Campbell Films, Inc.

Lowell Thomas takes the viewer on a trip through the Fair at this stage in its construction. He points out the Hong Kong pavilion, one of 45 foreign exhibits which will be built in the International Area. The new William Shea Stadium adjacent to the Fair will house 55,000 baseball fans for games of the New York Mets. The All-Star Game is also scheduled for this stadium in 1964.

Pierre Salinger, White House Press Secretary, is seen opening the Fair Press Building. He predicts that it will be a World Press Center in 1964-65.

Other features of the big exposition include the amphitheatre in the center of the Lake amusement area, the new arterial approach system, and fanciful and colorful exhibit buildings going up in the Transportation, Sports, Religion, Industrial, Federal and States, International and Lake Amusement areas.

Lowell Thomas interviews Robert Moses, president of the Fair, and scores of models and renderings of finished exhibits are shown. Visitors are seen arriving in New York from abroad by ship and plane, including a typical "Fair Family" that is seen enjoying New York and buying tickets to the Fair.

Some notable shots of the Fair construction site in the film were made from a helicopter. After three years of experimentation, producer John Campbell has worked out a new system of helicopter photography which gives exceptional smooth and visually impressive results. Vibration engineers have designed a special foam rubber seat for the cameraman. The camera, itself, is a modified Bell & Howell 200 attached to a gyro stabilizer. It is possible to reload this camera with 50 foot rolls of film in four seconds.

World's Fair Report with Lowell Thomas is a lively preview of one of the great events of our time. Credits: photography by Michael Livesey, John Sandstone, Ray Long and Julian Townsend; written by John Campbell; directed by Jack Tobin; titles by Visualscope, Inc.; music by E. Robert Velazco; produced by John Campbell Films, Inc.

Bell Lab technicians check Telstar satellite.

The Building of Telstar

A True Record of Scientific Progress
Filmed During Satellite Construction

THE BUILDING OF TELSTAR over a year's time by dedicated engineers and technicians of Bell Telephone Laboratories is the subject of *Inside the Telstar Satellite . . . Reliability in the Making*, a new film just released by the Bell System. The 17-minute color picture was prepared by the Bell Labs' Motion Picture Report Group with MPO Productions, Inc.

The film shows how each piece of the finished satellite was fully "pedigreed" — tested and retested hundreds of times before and after assembly. The designers could reach back to many electronic achievements of the Labs in the past — the transistor, solar cells to provide power, foam encapsulation techniques — but they asked for other scientific breakthroughs in the construction of the satellite and, as the film shows, they got them.

What made the project especially difficult to put on film is that this is the *actual* record of the building of the satellite. Delicate operations taking place are actual scenes, not simulations, shot without hindrance to builders.

The Bell System will show *Inside the Telstar* to engineers of operating companies and of the more than 800 suppliers who provided parts of Telstar. Another use for the film will be in recruitment — attracting top quality young men to careers in the Bell System companies.

The film was a great challenge for the production team: Bell Labs' J. W. Lueddeke, supervisor of the film group; John P. Rimo and Webster J. Van de Mark, who wrote and coordinated the project; and MPO's producer-director Andrew L. Gold; associate producer, Howard Title; and editor Garry Hayes.

At all times, the desire was to come up with more than "just a straight report." Lighting had to be carefully controlled to avoid damage to delicate solar cells; as the satellite was assembled under surgically-clean conditions, the motion picture equipment and cable were constantly treated with alcohol baths and vacuum cleaners. Time, during the assembling of Telstar, was unbelievably valuable. Hours and hours of careful pre-planning and production teamwork went into this rare visual record.

Seminar Program Concepts: Structure and Presentation

by Ted Mills

Creative Director of Mills-Widener, Inc.

A RECENT IN-DEPTH ATTITUDE STUDY with 25 leaders of American industry who had attended the Bell System Business Communications Seminar, revealed that the Seminar was achieving its objectives. It was successfully conveying to top corporate executives the importance to them of sound communications planning and implementation in business today.

The one-day seminar program was created and directed specifically to its "target audience" of presidents, executive vice-presidents, comptrollers, and other top-management executives.

The influence of this direction is evident in several ways. It is reflected in the overall

Symbol of the Business Communications Seminar, seen through main entrance door.

structure of the seven-hour program, as well as the manner in which programming is presented.

First, the "communications story" is told purely in the top manager's frame of reference. It regards communications as he might see it, not as a technical or operating manager might look at it.

Second, because high echelons of management have little *a priori* interest in communications, the Seminar is structured to create such interest.

Third, because industry leaders tend to resist, if not to resent "selling" presentations, the program is factual, objective and informative.

Fourth, the qualitative level of all programmatic ingredients — writing, photography, graphics and other presentation elements — is unusually high, to be consonant with the status of the executive audience in the business community.

Fifth, unusual emphasis was placed on accuracy of research. Hundreds of pages of research, and hundreds of hours of collaboration with both Bell System technical experts and leaders in industry in information sys-

Films projected on screen wall aid quicker comprehension of five basic subjects studied.

THE BELL SYSTEM BUSINESS COMMUNICATIONS SEMINAR

To Show Business the Importance of Sound Communications Planning, Implementation, the Bell System Presents a Seven-Hour Program in This Pace-Setting Chicago Facility

tems, business and corporate planning, computerization and other relevant business areas, went into the program.

As can be seen in the program structure which follows, each and all of these five directional influences are reflected both in the overall structure and in each program element itself.

THE PROGRAM STRUCTURE

The one-day Business Communications Seminar runs approximately seven hours, beginning at 9:30 in the morning, and usually ending shortly after 5:00 P.M. Its actual running time depends on the amount of discus-

sion generated among Seminar conferees during the day.

The day's program consists of nine key elements of subject matter, which range in length from ten minutes to over an hour each. Two of the nine are planned, guided discussion periods, one including all 25 conferees, the other broken up into six small groups. The remaining seven elements are wholly programmed.

The Seminar day opens with an 18-minute color, animated wide-screen film, *The Information Explosion*, which broadly explores the sudden explosion of knowledge since World War II, as it affects all society. Its tone is urgent, even alarmed at the staggering statistics

Following film, Seminar conferees discuss subject in relationship to their own problems.

Seminar manager Mike Garneau (left) and supervisor Dick Trulock. They are assisted by faculty of Bell System communications authorities.

(CONTINUED FROM THE PRECEDING PAGE)
of "man facing an era when there is more to know than he can ever learn."

The computer is introduced as "part villain, part hero" in man's growing struggle to find ways to extract the "golden needles of meaning" from the "data haystack," in time to be meaningful.

The film suggests no solutions, no way out. Its effect is to create uneasiness and a sense of jeopardy to the manager for whom "the 60-second minute will not budge."

Exploring the "Information Explosion"

Now a Seminar Leader — an experienced Bell System communications authority — presents in the theatre itself a fascinating third-dimensional lighted, animated model of a corporation, exploring what the information explosion of the last few years has meant to business. He discusses the mushrooming young science of Information Systems, using the model to illustrate its workings.

This second programmed element, some 15 minutes long, explains the importance of systems planning and shows how such planning, which necessarily includes communications, can discipline information-handling into a key profit function in modern business.

Before he has finished, seven men at a conference table appear on the screen-wall behind him. He introduces them as a panel of nationally-known information experts in an unrehearsed symposium on Information Systems. Edward Bursk, Editor of the *HARVARD BUSINESS REVIEW*, moderates the panel which includes Robert M. Trueblood of Touche, Bailey, Ross; Willis Winn, Dean of Wharton Business School, University of Pennsylvania; Henry M. Boettinger, Assistant Controller, A T & T; Richard Neuschel, a Director of McKinsey & Co.; John Magee, Vice President, Arthur D. Little & Co.; and V. M. Wolontis, Director of Military Communications of Bell Telephone Laboratories.

Significance of the Computer's Impact

With highly-varying opinions, the panel discusses the significance of the computer's impact on the administrative functions of management, and the top manager's relationship to systems and communications planning. The 33-minute *Symposium*, in black-and-white, is a film made from a television recording.

As the *Symposium* ends, conferees form small groups in the lounge where, over coffee, they discuss in a group dynamics session answers to carefully-planned questions posed

THE CONCEPT BEHIND SEMINAR PROGRAMMING

by each Seminar Leader. These questions elicit each manager's own experiences and opinions about the information revolution as it has affected his own business.

Such discussion inevitably proves extraordinarily popular, controversial and voluble. After half-an-hour, the conferees return to the theater where each sub-group chairman reports conclusions of his group. Further full-audience discussion of information-system problems and solutions continues for another half-hour, carefully guided by the Seminar Leader.

It is almost noon. The vividly-colored opening film, the demonstration-lecture on Information Systems, the *Symposium*, and almost an hour of guided discussion have all focussed only on the larger Information System pic-

Special rotating chairs can be moved in any direction to facilitate discussion by conferees.

ture. By now, the manager in the audience feels the alarming velocity, significance, and importance of the technological revolution taking place in information handling in business today.

Communications' Role in "Revolution"

Before lunch, the lights dim as we hear the words "Information is a change of condition . . ." and a three-projector film, *Communications: The Vital Link*, spreads over the entire 34-foot screen-wall to present for the first time the communications part of the "revolution." The larger predicate has been set; the audience is ready to explore this "vital link" of any information system.

In increasingly technical terms, but always comprehensible to the least technical member of the audience, the film explores the nature of information, voice and machine languages, band-width, multiple usage and the nationwide communications network. As *The Vital Link* ends the audience has now seen the crucial importance of communications.

There is, of course, free unguided discussion among conferees at lunch. After lunch, the Seminar now inspects in detail communication's crucial role in information handling. In this fourth fully-programmed element, two Seminar leaders working together introduce the *Seven Criteria* by which communications needs are determined: function, distribution, volume, urgency, message language, accuracy and cost. They illustrate how such needs, properly diagnosed, specify the various serv-

Transmission devices appear through electrical-ly-operated concealed doors under screen wall.

ices and transmission devices available in modern business communications.

Transmission Devices Emerge from Wall

A dimensional display-board, hidden transmission devices which appear one by one out of the wall and documentary case histories of modern communications in action, are all intermixed for variety and optimum impact. Yet they are presented still in the top-manager's frame of reference, and always in relation to the larger "information system" canvas in terms of business use.

The manager sees days cut to hours in order-entry procedures, with the resulting reduction in inventory costs measured in impressive percentages. He sees the simple installation of a data communications device make buying so easy for a customer that purchases by that customer multiplied many times over in a single year.

Film on "Universal Electronics" Corporation

For over an hour after lunch, the theater has been a communications clinic. But now the theater darkens and on the center of the screen-wall appears the story of the *Universal Electronics Corporation*. This 40-minute drama in black-and-white, wide-screen, tells the fictional story of the human and professional motives and conflicts of officers in a major corporation, as they struggle with a need for better information systems and the inevitability of computerization.

The two principal characters of this sixth programmed element are the president of the corporation and a young systems planner to whom he entrusts an almost impossible task. The latter almost fails, but realizes in time that fully effective systems analysis requires inclusion of business machine and communications experts as part of the study team if the right solutions are to be found.

So totally do high-level officers in the audience identify with the fictional president and his problems that the guided discussion of the film is extremely lively. The half-hour allotted to it seems inevitably too short. But the Seminar is approaching its end. The Seminar leader briefly summarizes the day's events.

"Information Is a Change of Condition"

Then the seventh programmed element, the "Finale" film, spans the screen-wall in color, beginning with the same phrase as *The Vital*

Seminar participants relax in lounge area outside of theater. Projection screen is concealed in the wall at right for viewing by guests.

Informal discussion provides opportunity to explore areas of particular interest. Teletypewriter behind window provides the latest news.

Link: "Information is a change of condition." But the change of condition the Finale explores is the rushing change, expansion and growth taking place in every area of business except one: the rate of profit. The film documentarily re-studies the role of communications in speeding up information-flow "to make legroom for profit." It does so in terms of not only today's but tomorrow's communications, ending with the warning that "such is the velocity of change that tomorrow is already here." And the Seminar is over.

It has been suggested that the format of the one-day Seminar resembles a double-ended funnel. The *Information Explosion* opening is almost universal in scope and portents. The "funnel" narrows down to equate the effect of the explosion on business and the brand-new science of Information Systems with its

explosive growth. The focus finally narrows further to the specific role of communications inside the larger frame of information-handling reference.

Funnels to a Larger, Corporate Scope

It stays in this "neck" throughout its detailed inspection of the data transmission services and equipment it provides to information-systems planners. With the dramatic *Universal Electronics* film, it begins to move outward at the lower "mouth of the funnel" to a larger, corporate scope. And in the finale, with its investigation of change in all business, it widens out still farther, back to the dimensions of the beginning.

Twelve different information-display tech-

niques are utilized in the seven programmed elements described above. These include techniques ranging from three-screen film animation in color, through "live" demonstration with actual, working communications devices, to one-screen black-and-white projection of a television recording. To achieve constant change-of-pace, no program element utilizes the same presentation technique as that which precedes or follows it.

A glance at the structure further reveals that no two program forms are alike during the day. Some subject matter is presented in filmed documentary form, some through filmed drama, some through "live" demonstration by Seminar leaders, some through "live" slide talks, others through taped sound slidefilms.

Yet, intentionally, no one of the seven pro-

Floor plan of the Seminar Center will help readers to locate facilities pictured here.

SEMINAR PROGRAM:

grammed elements is self-sufficient. Key thematic concepts of importance to the Seminar's "total experience" are carefully woven in and out of *several* elements. As in play-construction, the Seminar is conceived as an integrated whole.

The important Seminar theme of communications planning, for example, appears four separate times prior to its emergence as the basic theme of the dramatic *Universal Electronics* film and is recapitulated in the finale.

The Seminar's nine major program elements, 300-pages of script, its 1100-odd slides, its five major films, its dimensional models and display boards, are all presented essentially as one integrated, single program and not as an assemblage of unrelated parts.

Also valuable to the "total experience" is the Seminar's use of those information-display devices which sting home especially important ideas, moments, and facts, for optimum retention.

Carefully preplanned lighting-changes, controlled use of music and color, a sudden jump from a single projected image on center screen-wall to a 34-foot wide image, the appearance of concealed demonstration devices coming out of the wall, and similar showman-like techniques *inside* various films, contribute to impact when and where needed or required. It is important to note *that only when program and facility are evolved together*, as in Chicago, can such "experience control" be achieved.

Structural Balance for Target Audience

Perhaps the most noteworthy of all the structural characteristics of the seven-hour program is the fact that not until just before lunch is any significant reference made to communications, except as part of a larger whole.

In the Business Communications Seminar, whose evident objective is to tell the communications story, it may seem curious that almost the first 40 percent of the program deals with subjects other than communications.

But it has been so structured for reasons which relate both to the frame of reference of the corporate officers in the audience and the subject matter itself. A brief glance at the essence of the subject matter helps explain why.

Essentially, the entire program day concerns itself with the explosive radical changes taking place in the theory and technology of information-handling in business today, a great many of which have taken place in communications.

Gain Interest and Concern of the Viewer

Yet, since communications is *only a part of the larger information-handling process*, it is important first to gain the interest and concern of the executive for the urgency of the total "information revolution" as it relates to him and his decisions that are essential to corporate survival in the electronic age. For then the communications story derives from the imperatives of the large phenomenon, and is exciting and important in its crucial relationship to that total story. It gains its power from the whole.

Fifteen motorized observation and projection ports are controlled from the master console.

Design & Engineering of the Seminar Center

Physical Planning and Construction of the Communications Center Was Entrusted to a Talented Group of Specialists Whose Joint Effort Created Unique Facility

Technical Background by Barbara Skeeter

MANY DIVERSE TALENTS were combined during the creation and production of the Bell System Business Communications Seminar in Chicago, to achieve the objective set forth by Bell.

The audience: top executives of major corporations. The function: to serve the increasing importance of communications in the operation and management of business.

An Example Worthy of Careful Study

The accomplishments of this select group have become a milestone in the field of small audience communications, and worthy of careful study. Simultaneous accomplishments by Bell System's own staff and their effective use of the Center's broad capability are another story, and, one that will be most valuable to those whose primary concern is the utilization of modern group communications media.

The Bell System Center, on the 39th floor of the new United of America Building at One East Wacker Drive, in Chicago, is truly the product of joint effort.

Widener and his associates defined the basic plan, and guided Becker & Becker Associates, Inc., the designers; Reevesound Company, Inc., motion picture and sound system specialists; and Sol Weinrich & Associates, designers and manufacturers of special machinery in a fully-coordinated effort. The Center opened in the spring of 1963 and has been in regular operation since that time.

Through ingenious utilization of motion picture technology, communications programming, and design, the Center aims to show the busi-

ness executives how modern communications can help them contribute more effectively to corporate planning, growth, and, profit.

Newly-Developed A-V Techniques Used

Through the Center's continuing seminar program, both broad and specific implications of the communications challenge in relation to the information explosion are inspected and solutions now being applied are studied. Newly developed techniques in audio-visual presentations are used to illustrate rapidly changing concepts in business communication.

Designed to give management executives a capsuled examination of new developments in business communication and data transmission systems, the program goes a step further, looking toward a clearer understanding of the interaction of man, communications and the machine.

Designed to Reach Well-Defined Goal

Physical planning and construction of the Bell System Center is as unique as the idea concept which gave it birth. It is the first facility of its kind in the country to be conceived, designed, and, engineered to suit such a precisely defined single purpose, i.e., to condense and present factually, forcefully, and, attractively, the vastly complex problems of business communication, information handling, and, their possible solutions.

The creator-producer team, architects, industrial designers, and, motion picture engineering specialists, worked closely from initial planning to completion to be certain that

View of the seating arrangement and projection ports (open for action) in the Seminar theater.

Projection room has 35mm professional projection.

each facet of the Center and its program integrated effectively with the overall plan.

System an Example of Best in Technology

The Center's motion picture system designed by the technical staff of Reevesound Company, is a fine example of the effective utilization of motion picture technology for the display and presentation of business information.

The system provides motion picture, sound, and control capability of high professional quality and maximum reliability, giving to the informational purposes of the Center, the best features that can be derived from today's entertainment motion picture technology.

A somewhat complex Reevesound system serves the theatre with its 34-foot screen-wall of white acoustical plaster that is unframed and slightly curved.

Screen Wall Receives Three 11' x 6' Images

The screen-wall receives three 11' x 6' motion picture images, spaced six inches apart, projected from three 35mm Norelco Model FP20S shutterless projectors, electrically interlocked to provide frame-for-frame operation.

Norelco Pulse-Lite lamps used on the three projectors permit great flexibility in system de-

sign and operation. The light sources are water cooled, short-arc mercury tubes pulsed 72 times per second by a synchronizing signal from the film advance mechanism of the projector.

Light output with color correcting filters is able to produce 23 foot candles incident bright-

ness at the screen. Color, brightness and light distribution are sufficiently uniform to meet the firm requirements of multi-image presentation, and the 72 flashes each second exceed the flicker response characteristic of the eye so that image forming light appears visually continuous.

The mercury tubes are water cooled, making it unnecessary to vent the lamps to the outdoors, and they are mounted in pairs within the lamphouse water jacket with automatic, virtually instantaneous, changeover in the event of burnout, so that long film programs can be scheduled routinely. This "continuous running" capability permits the use of 6,000-foot reels and enables the programming staff to count on a full hour's operation of all three machines.

Four Random-Access Slide Projectors

Three 8' 10" x 6' picture images are shown from four 2" by 2" slide projectors, the center picture coming from either of a pair of slide projectors having double dissolve capability. The machines used are TelePrompter random access models, each with 100-slide capacity, giving 200-slide capacity for the center pair.

In a cove facing the unframed presentation

Complex Reevesound master control console is operated by Al Robel, shown checking cues.

Complex Controls on Master Console

Left: controls for motion picture projectors, stereo tape decks and random-access slide projectors. At right: a battery of controls for image brightness, theater lighting and operation of the drawers which house moveable transmission devices for use in Bell Seminar programs at the center.

DESIGN AND CONSTRUCTION OF THE FACILITY

screen, three sets of dimmable cold cathode lamps provide not only room illumination to establish feeling and mood but are used also to "wash" the screen. These blue, yellow and pink lights provide a soft white light when mixed together.

Lights Over Each of 26 Audience Chairs

Down lights, also located above, illuminate each of 26 audience chairs. Just forward of the viewers, between the screen and the audience seating area, seven pairs of accent lights provide individual illumination for a series of seven clever display drawers concealed in the wood paneling of the forward walls beneath the screen.

These unusual drawers contain actual working equipment described in the seminar presentations. The equipment illustrates points made during the seminar's program. Of the seven such drawers in the main lecture room, six are for products and the seventh carries the speaker's lectern.

Seek Maximum of Intelligible Speech

Lewis S. Goodfriend & Associates, consulting engineers in acoustics, functioning as an extension of Reevesound's technical department, determined the listening character of the Center theatre and provided its acoustic design.

The objective of the design, which was to provide a high level of speech intelligibility, was achieved in several ways but mainly through the use of sound distributing and sound diffusing materials on appropriate surfaces. Extensive use was made, for instance, of the reflective surface of plaster and wood.

Above: use of special visual aids simplifies study. Below: one of four 100-slide capacity random-access slide projectors which provides 8' 10" x 6' picture images on the theater screen wall.

The sound absorbing qualities of carpet and the avoidance of echo producing shapes in construction, provided additional sound control.

An open-weave fabric used to cover chairs in the auditorium allows seating to absorb sound, thereby increasing the degree of sound control in the room. Since there is no noticeable variation in sound absorption whether the

Section of Reevesound-designed master console at Center shows controls for motion picture and slide projector, stereo tape deck.

chairs are occupied or not, the room may be set up for operation when empty with the assurance that the desired acoustical quality will be maintained when it is filled.

The full cooperation that Goodfriend and Reevesound received from architects and designers working on the Center has been cited as one of the prime factors in the creation of such an exceptionally proficient acoustical system.

Sound Installation for the Theater

Sound in the main lecture room is provided by four loudspeakers: three Altec 605A speakers, situated at center, right and left, beneath the formal presentation screen; and one 755C Altec at the rear. Two Altec 686 mikes sus-

pended above can be used for sound reinforcement or program recording.

An unusual master console, designed by Reevesound engineers, provides audio, projection and lighting control throughout the Center's main lecture auditorium and in an adjoining informal presentation room.

Bearing in one section an array of 50 separate audio control switches, the console provides for the following:

1. Volume control of motion picture optical sound track from each of the three 35mm Nor-elco motion picture projectors. Master control for starting and stopping each machine drive motor independently, or to interlock, start and stop all three or any two together.

2. Slide selection and on-off control of four TelePrompter random access slide projectors, including forward or reverse pulsing of projectors, each independently, or any two, three, or four together; activating automatic dissolve between two center units permitting them to act as one projector of 200-slide capacity; and random access slide selection control for each of the four machines independently.

3. Channel select control of 3-channel theater sound.

4. Level and channel select control of two Viking Model 95 stereo tape decks which provide commentary for slide presentations as well as background music.

These machines also may be switched for stereo recording from the auditorium. The Viking Model 95, as modified, also provides for automatic cueing from the master console position.

Additionally, the operator at the master console controls: (1) theater lighting dimmers:

Above: Viking Model 95 stereo tape deck was modified to provide automatic cueing from a master control position. Below: a close-up of the stereo tape deck's control panel.

(2) six pairs of spots used as equipment lighting dimmers to illuminate the product drawers; (3) a podium dimmer with six selector switches; (4) special activator controls for remote opening and closing of product drawers, position control of the seminar's leader's lectern and, open and close controls for all projection ports; (5) control for the lounge re-cap random access projector and sound.

The console includes bridging and outlets for all controls to permit later remoting of any equipment for manual remote operation or for control by automated program units.

Lecturer Has Auxiliary Control Panel

Auxiliary controls at the speaker's lectern operate a seminar leader's reading lamp and lectern sound reinforcement microphone; random access slide projectors; an additional lectern "out" and "in" control; indicator light controls to the master control console; and a two-way intercom telephone to the master control console.

Only one man is needed to operate the master console which consists of two six-foot racks placed side by side, a desk with a 27-inch work top and 45-degree wedge plus a 21" x 15" desk cabinet.

In addition to the unusual design of the equipment in the main lecture room, there are several other unique features apparent.

Ports Conceal Projectors and Displays

Fifteen motorized observation and projection ports are concealed in the room decor, including: (1) an observation port for the program controller; (2) six projection and observation ports for 35mm equipment; (3) eight projection ports for random access slide and other projectors.

Motorized devices to open and close these ports, the product drawers and an informal presentation screen covering in the lounge were designed by Sol Weinrich & Associates. Reevesound Company designed and engineered the control system for the Center.

Rear Projection Screen in the Lounge

Adjacent to the main lecture room is a lounge which is used for informal presentations and discussions. The room features a framed Translux "Luxchrome 50" 6' x 4' rear projection screen with two Altec 601A speakers situated above it. The screen, concealed in the wall decor when not in use, has motorized open and close devices that are controlled from two locations. Slides are shown in the area with a TelePrompTer 100-slide random access projector.

Every engineering decision Reevesound made in developing the projection and acoustic systems was coordinated with Widener's planning group. Specifically, the motion picture and slide presentations, created by Ted Mills, were designed to produce certain emotional and intellectual reactions.

Provides Integrated "Total Experience"

The coordination of these impact objectives set forth by the producers and the Reevesound specifications and engineering resulted in an integrated "total experience" for the audience that makes the seminar program unique in industry.

As significant as the Bell System communi-

Reevesound drive modification provided frame-for-frame interlock for 35mm.

Closeup of drive modification used on all three of 35mm Norelco FP20S projectors.

cations story itself is in business, just as outstanding is the Seminar program. In itself, it is a major advance by a major corporation in telling its own communications story to the business community. The coordinated planning

and implementation by the many diverse talents assembled has produced an unique presentation and facility that can well provide a goal for other companies who have important stories to tell.

Projection, Sound, Control and Acoustics Were Szabo's Responsibility

REEVESOUND COMPANY's participation in the creation of the Bell System's Communications Seminar Center was under the direction of William Szabo, the

Meet Bill Szabo, planner and supervisor of Reevesound installations at Center —

firm's vice-president for contract operations and construction.

After providing original design plans, Mr. Szabo supervised Reevesound's technical staff in the creation of the Center's complex motion picture projection, sound, control and acoustical systems.

Working closely with Chicago Local 110 of the Moving Picture Machine Operator's Union, the registered professional engineer personally guided the installation and initial operation of the Reevesound systems at the Center. Jim Starbuck, a member of Local 110, was in charge of equipment installation, while Al Robel, also of Local 110, assumed supervision of equipment operations following the installation.

The Chicago projectionists, who currently operate the Reevesound systems at the Center, were trained by William Nafash of the staff of New York City's Radio City Music Hall. Mr. Nafash, a well-known motion picture engineer, participated in the project as a special Reevesound consultant for the Center.

Disney's "How to Sleep" cartoon was "built in" the Sealy film program.

Whimsy Helps SELL for Sealy

Millions of Viewers Reached During Six Successful Years of Distribution Make "Sleep" Picture a Good Investment

AT SEALY, we're convinced that to get people to sleep on properly-designed bedding, you've first got to wake them up to the benefits.

We believe we found an entertaining way to do this through our film, *Sleep — It's Wonderful*, now in its sixth year of distribution. In that time, more than 1½-million people have seen this 19-minute color film in 29,000 showings within schools, clubs, and churches, via Modern Talking Picture Service.

Putting Audience to Sleep?

A film about sleep and sleep equipment could easily be ponderous and uninteresting, guaranteed to put the audience to sleep at just the wrong time, from our point of view. To eliminate this hazard, we wanted to employ a "light" touch and successfully negotiated with Walt Disney Productions to incorporate in the film their hilarious cartoon titled *How to Sleep*, starring "Goofy."

The use of the Disney cartoon, a "first" for a business-sponsored film, gave us just the right combination of whimsy and authenticity to help us tell our story in a palatable, entertaining manner.

Tribulations of a Weary Man

Sleep — It's Wonderful depicts the plight of a weary television announcer whose sleeplessness results from a too-soft mattress, and who believes the solution lies in a rock-hard mattress — an idea strongly disputed by his wife.

With the "live action" stage thus

set, the Disney cartoon segment is inserted to trace in humorous fashion the development of sleep equipment since caveman days, and to spoof the efforts of scientists to aid and abet sleep through a wild variety of methods, up to and including the use of a mallet on the insomniac cartoon hero, "Goofy."

The "live action" portion then resumes to explode some widely-held myths about sleep, and to explain the findings of scientific studies on how to relax physically and mentally before going to bed. The disadvantages of both too-hard and too-soft mattresses are visually contrasted with bedding which provides both proper support and comfort for the most refreshing rest. We show the viewer how to choose a mattress, too, by taking the haggard announcer and his wife on a shopping trip which ends with the purchase of a new mattress, resolving their argument and bringing him to work bright-eyed and refreshed.

Approach is Non-Commercial

We feel that in this one film we've been able to subtly sell both the "sizzle and the steak" of properly-designed bedding to our audiences. To enhance the acceptance of *Sleep — It's Wonderful* by a non-commercial approach, Sealy is mentioned only in opening and closing title credits. The only visual identification of our product is the company name on the border of the mattress used to demonstrate how modern bedding should support the body of the sleeper.

Production, with radio-TV star

by Gerald C. Shappell
Advertising Manager, Sealy, Inc.

Peter Donald as narrator, was completed late in 1956, and the film first was utilized by Sealy plants as a "pepper-upper" for dealer sales meetings. It still is used for this purpose as new dealers take on the Sealy line.

Popular in Schools, Clubs

Since its national debut in 1957, the film has been especially popular with high school home economics and health and hygiene classes, as well as reaching women's groups, clubs, and church organizations, through Modern exchanges. Many of our plants work with various groups to introduce the film to their membership, to answer questions following showings, and to provide explanatory literature about bedding.

Audience comments, such as "very colorful and effective," "delightful, yet instructive," and "entertaining and informative," certainly are most gratifying to us, and represent confirmation of the

benefits of combining film fantasy with fact to hold an audience.

Factors Make Good Investment

The film's long life and comparatively modest production costs have made *Sleep — It's Wonderful* a good investment. We're dealing with some basic principles of sleep and sleep equipment, so the story never really will become dated in the usual sense. The only limitation is the physical life of the prints themselves.

Adding to the film's success story is a 13½ minute television version, also distributed by Modern, which also incorporates a "light touch" cartoon segment. Modern has delivered more than 850 telecasts of this subject to an estimated audience of more than 25 million since 1957.

Aid to Industry Education

Sleep — It's Wonderful, probably the only film of its kind sponsored by an individual bedding manufacturer, has supplemented the consumer education efforts of the National Association of Bedding Manufacturers.

Alta-Dena's Picture of Health

A 15-Minute Sound Slidefilm, Shown to Adults at "Milk Parties," Has Helped West Coast Dairy to Widen Market

TITLE: *The Picture of Health.*

SPONSOR: Alta-Dena Dairy, 15 min. color sound filmstrip, produced by Sonafilm Productions.

The several Stueve Brothers who own and operate 15-year-old Alta-Dena Dairy, headquartered near Los Angeles in the City of Industry, there was some reluctance to put money into audio-visual material. It wasn't as though they had a giant business, or lacked promotion, or weren't growing.

After all, they always took exhibit space at medical and dental conventions in the area; they had occasional plant tours; door-to-door salesmen averaged two to three new customers each eight-hour day; and there were indications that word-of-mouth advertising was going for them.

Resistance to the Product

Still, it was conceded, there was resistance to certified raw milk. A continuing prejudice held that this was the "old" sort of milk people had to put up with before the marvel of pasteurization made it safe.

And though they produce pasteurized and homogenized milk and other dairy products as well, the Stueve Brothers have one of

These winsome youngsters enjoy their share of the dairy host's healthful and certified raw milk.

only two certified raw milk dairies west of the Mississippi; they have good reason for pride in the product, its production under conditions of maximum cleanliness with supervision by a Medical Milk Commission, and their delivery to the customer of a completely pure, entirely safe beverage offering more healthful qualities than "ordinary" milk.

Sonafilm Creates a "Package"

Finally the decision was "go," and Harold and Ed Stueve, working with the account supervisor for Sonafilm Productions, came up with a package which combined a 15-minute color and sound filmstrip, new literature, a "milk par-

ty" plan, and other public relations ingredients.

The party concept isn't new, of course. Starting in the early thirties, or perhaps even before that, it has been used to sell cookware, introduce cosmetics, and demonstrate foods and other items. So far as anyone knows, however, it hadn't been used before for dairy items. Arranged by six trained representatives, the parties are held in homes, in churches and other community centers. Usually there are 20 to 30 in the audience — sometimes just housewives, sometimes mixed. Invariably the response is enthusiastic.

Brief Talk Follows Showing

Several ice-breaker games are played, and after the third one the film is presented. This is followed by a short lecture, a demonstration, and an open session where people can ask questions not readily answerable in door-to-door solicitation. No high-pressure is used, and the windup of Alta-Dena Dairy refreshments lets everyone leave with a good taste.

As befits its title, *The Picture of Health* opens with illustrations of the picture-as-communication idea, and a good deal of striking scenic material is used to make its points. Subject content covers children's need for certain foods for growth and proper nutrition. Milk is pointed up as the best of seven basic food substances, with maximum value in the certified raw product.

Total sanitary conditions in the dairy, the care of doctors in production of the product, the process of "cow to cooler to bottle to you, untouched by hand," the regular health checks for each cow, each employee, and the milk itself, all are shown in clear and appealing

A typical California community audience watches showing of Alta-Dena's sound slidefilm during one of the company's neighborhood "milk parties."

ways. A handsome portrait ends the film on the note that good health makes good sense.

The slidefilm was released in the fall of 1962 for showings at medical and dental conventions and at the starting-point of plant tours. The milk party program began in January of this year.

A Factor in Company Growth

While no one claims the milk parties and the film's six prints, in use for only a short period, deserve all the credit for company growth, the impact is clear. An average of 8 out of 10 families represented at each milk party orders at least a trial of the dairy's certified raw milk, and most stay with it. Sale of other products is up. Two new dairies have been acquired.

The marketing area has spread across the Los Angeles basin, except for the San Fernando Valley which hasn't yet been touched, into Riverside and San Bernardino Counties. Cash and carry sales through health stores has increased significantly. And several super-market giants, which previously wouldn't consider raw milk now are looking at it voluntarily and with at least some favor.

Los Angeles City and County Boards of Education, after seeing the original, have asked for a version to use in schools. Though there is no Alta-Dena commercial in the present filmstrip — omission made it suitable for service club and other presentations — a new script will gear it even more suitable to educational needs.

Phil Stuart supervised and directed for Sonafilm Productions. Script was written by John Green. Earl Scott had the photographic assignment. Narration was by Marvin Miller.

Film shows Federal Open Market Committee at meeting in Washington where vital monetary policies of nation are reviewed every three weeks.

"Fed" Has Money on the Move

People and Functions of Federal Reserve System Banks Are Brought to Screen in Highly-Instructive New Film

THE MAJOR FUNCTIONS of the Federal Reserve Banks are explained in a 27-minute color film, *Money on the Move*, recently completed by the Craven Film Corporation for the Federal Reserve System. A highlight of the picture is a rare sequence on the Federal Open Market Committee pictured at a meeting in Washington where vital monetary policy for the nation is reviewed every three weeks.

Setting the scene with the skyline of Manhattan and the story of the island's purchase for \$24 worth of trinkets from the Algonquin Indian Nation — in contrast to the billions of dollars and the complex banking activity which would be required for such a transaction today, — the film launches into close-ups of the ways in which the "Fed" affects the daily lives of all of us.

Emphasis Is On the People

The human side of this vast banking system is emphasized in every district as Federal Reserve personnel perform their own jobs throughout all 12 banks. Professional actors have only minor roles in the large cast. This inside tour of the nation's central banking system begins at the Cleveland "Fed" where the camera catches a college economics class participating in discussions on the history and structure of the System under the direction of the Bank's economist.

The Boston Federal Reserve Bank was chosen to relate the story of how the nation's cash is

issued, inspected and destroyed when worn out. Viewers will get a sense of incredulity as thousands of dollars of cancelled currency go up in flames. The Dallas and San Francisco districts were visited to show the System's check clearing through which 16 million personal checks are processed each day.

Center of Telegraph Network

At another stop, the Richmond "Fed" is pictured as headquarters of the nationwide telegraphic network which is used for confidential communication and quick transfer of huge sums of money by the Federal Reserve District and Branch Banks, and the Board of Governors in Washington.

Other services performed by Federal Reserve Banks as fiscal agents for the U. S. Government are shown in scenes at the Philadelphia Reserve and at a commercial bank in Allentown, Pa. More than a million government checks each day, totaling more than a hundred billion dollars annually, are handled by Federal Reserve Banks.

Mechanized Tools of Banking

Data computers and other mechanized skills of modern banking are very much in evidence as the cameras move behind the imposing walls of the 12 banks and several of the 24 branches, recording the complex activities of the "Fed" as it keeps the nation's supply of cash and credit in balance, helping to harmonize the conflicting interests of a free

Scene in production of AEG's prize-winning nuclear power film, "Kahl."

AEG: Power in the 8th Decade

Allgemeine Elektrizitäts-Gesellschaft, Leading Builder of Electrical Products, Knows Value of Film Medium

IN THE EIGHTH DECADE of its history. The Allgemeine Elektrizitäts-Gesellschaft has progressed in audio-visual communication from the technological and documentary silent films which this West German leader in the electrical manufacturing industry first began using in the mid-twenties to the international award-winning sound and color motion pictures of 1963.

Today, motion pictures enjoy widespread acceptance in the industrial sector of public relations in West Germany. Their contribution has been carefully developed by key industries and leading companies. Historic antecedents are well-established among such well-known companies as Krupp and Siemens, both of whom have long made good use of the cine-camera as a diligent interpreter of engineering processes and products.

45 Films in Catalog of 20's

Few engineers need convincing that illustration imparts the information they seek better than the printed word. An early appreciation of this vital interest factor has lead AEG from its modest

45-film catalog of the mid-twenties to the more sophisticated technical and scientific films of today.

These earlier black and white silent films were, however, just as exciting and nearly as informative to an earlier engineering generation as are today's colorful animated sequences, lucid sound tracks and live-action scenes on processes of nuclear fission and self-locking electronic gates.

Early Look at Automation

One of our early films, *Automatic Power Stations*, explained the generating of electric current, showed how the prime movers' steam supply is self-controlled by changes in demand for electricity; diagrams made clear the "automatic" firing of boilers, in preference to manual control which was expensive in terms of fuel reliability. Germany's leading engineering journal, V. D. I.—NACHRICHTEN, cited this film as "in the forefront of its age."

The making and laying of underground power cables; the processes of manufacturing (by moving belt) of vacuum cleaners; and a visualization of AEG research work (including high-voltage lab-

— by Dr. Hans Schaller, head of audio-visual activities for the huge industrial complex of AEG.

oratories) were among other early AEG film subjects. The latter utilized slow-motion techniques to explain processes which could only be seen at 80,000 frames per second.

The use of films as "lecture aids" became popular at AEG well over 30 years ago. These step-by-step, informative films have since advanced to their present role as accepted teaching aids in all types of schools, facilitating understanding of many special subjects. Such AEG films are distributed, as in the U.S., on a free-loan basis and we find this pays off.

Workers View "After Hours"

Today's AEG and the films of other sources (i.e. marketing or production themes) are attracting "after hours" audiences among our people. Both staff and production line workers are eager to learn more, to orient their jobs within the full scope of the economy in our time.

The crucial point in the creation of any technological film subject is at the converging point of two streams of know-how. A large company such as ours, producing a multitude of engineering apparatus and appliances, has its public relations and films specialist who meets and has to collaborate with an ever-changing team of sales and production engineers. In this brief period of partnership, each team may have a different concept for presenting the theme or subject involved.

Arbiter of Clarity and Quality

Given a complex theme, where the film's mission is to convey technical information rather than to promote a certain product, the film man's guiding hand should have a comparatively "light touch." In this "give and take," the Press and Film Department must always remain the arbiter of clarity and quality of presentation. Conversely, when the accent is on public promotion and product sales, the technical adviser must be guided by the film man.

The early era of AEG technical and product "documentaries" which began so auspiciously was chilled by the period of war, followed by a prolonged seller's market. By 1954, however, a new effort was underway. The writer recalls taping a sound track in an effort to integrate disjointed film sequences showing applications of electricity for a farm show.

To make up for the lack of ap-

plause which greeted this effort on its first showing at AEG headquarters, we received plenty of good advice and unflagging encouragement in later months. The Documentary Film Section of the AEG Press Department was set in motion.

Cinemas Show News Reports

An early step forward came with the production of news films for public cinema theater presentation, showing facets of our engineering progress and new plant developments. The best of these releases were assembled into composite progress reports for special, private showings. Such films proved their value in helping build the company's public image. These 10 to 12-minute AEG "report-ages" were narrated in the principal world languages for showing by our agencies abroad.

By coincidence, a farm subject which followed that earlier crude tape-sound effort became our first "self-contained" color documentary. *Die vom Mertenhof* was premiered in Kassel late in 1955.

This 20-minute color film shows the organization of work in and around the farm house, implemented by modern appliances. We found a waiting audience nearly everywhere; many power companies requested their own prints to promote appliance sales in rural Germany. The company organized an AEG Film Distribution Service to serve growing audiences, handling some 2,000 prints which move to commercial and institutional distributors and to our own home and foreign agencies.

New Emphasis on Engineering

A wave of heavy engineering subjects followed this rebirth of AEG film activity. Mining operations were covered in a film picturing a giant opencut excavator (*Gigant der Technik*) and in a film on pit shaft haulage, *Foerdermaschine fuer Bergwerk Walsum*.

Another 20-minute film publicized a seaworthy oil drilling platform powered by electricity. *Adma Enterprise* was produced in collaboration with the BP oil company, a colorful report on a marine venture which led our film publicity people to the combined animation and live action "travelog" sequences of *Wappen von Hamburg*, showing the newly-commissioned diesel-electric ship built for ocean travel. AEG built the propulsion machinery and a multitude of electro-technical labor-saving and ca-

INDUSTRY FILM PRODUCERS ASSOCIATION, INC.

The Script Writer's Responsibility in Military Public Information Films

By Walter Wise

THERE IS A RATHER interesting question that the motion picture industry has been trying to answer for years. "Since it can be assumed that everybody starts out to make a good picture, how come there are so many bad ones?"

Almost thirty years ago Samuel Goldwyn offered his opinion when he stated, "There is nothing wrong with pictures that good stories won't solve."

To even a casual observer, that statement is just as basic a truth as it was in the nineteen thirties. It applies equally to theatrical, TV and industrial films. To my knowledge a good film has never been made from a bad script. A writer's responsibility cannot be lightly written off.

Does It Achieve the Purpose?

In the specialized field of military public relations films, (or, for that matter, public relations films of any kind), there is only one criterion for that elusive friend of ours, the "good film" — does it achieve the purpose for which it is intended? Entertainment values, professional photography and creative editing all help make a picture "show well." But the responsibility for achieving the film's basic purpose rests on what is down on paper.

The first responsibility of a writer, therefore, logically becomes a clear-cut understanding of what his client wants the picture to accomplish in his behalf, of what the client wants the audience to feel after they have seen the film on the screen. Only after a firm determination of the film's objective has been achieved can a writer proceed with the next usual step, research in depth.

Report Films Are Different

In developing military public relations films, there is always a relative of the family looking over the writer's shoulder, the familiar "Report Film." If we compare the actually more familiar Report Film

with a PR film, some interesting differences as to writer responsibility become immediately evident.

In a Report Film the writer has both relatively limited responsibilities and problems. Technical sources for research and approval are usually available locally. Continuity is usually "built-in," being based on chronological events over

Screen writer Walter Wise shared the experience of many years in this IFPA Conference paper.

3 months, 6 months or 12-month periods. Report Films sometimes become routine operations. If they are a little duller or more formulaized than they have to be, if the narrative has a little more stilted technical terminology than necessary, the overall loss in effectiveness is not critical. The target audience is technically oriented and limited. The life of the film is limited.

Long Life, Larger Audiences

In its military public relations cousin, however, the audience is large and not technically inclined. The life of the film is long. The mission is not only to report, but to explain. The contents of a Report Film are required to explain what, when and where. It is required of a PR film, however, to add one more ingredient. "WHY." Case in point . . .

If we make a film about reliability, stressing the need for reliability, it can be superfluous. Who is in

favor of or preaches "unreliability"? The problem, the "why," is not based on lack of desire or lack of interest. It is rooted in human nature. A very close parallel can be found in safe driving campaigns. Traffic fatalities are not kept at race suicide levels because of a hit and run lobby. The "why" is not in failure to understand, but rather in overall public refusal to identify.

Determining the correct and applicable "why" is inherent in writer responsibility.

Research Effort Is Essential

Research in depth is also an integral part of writer responsibility. In a PR film research goes beyond purely technical requirements to include the philosophy of the sponsoring company, the military and the Department of Defense.

There must be a complete understanding of attitudes and policies, not only of the sponsor but also of the Department of Defense. Congressional attitudes and the attitude of the public cannot be regarded lightly in fulfilling the basic responsibility. Compared to a Report Film, research for a PR film goes far deeper even though the subject matter is handled in a manner much less technical.

Two Tools Are Ideas & Words

Once his basic facts are set in concrete the writer can push ahead using his two basic tools — ideas and words. We all know that words do not take the place of ideas. But the right words properly used are necessary for clear and concise communication of ideas.

The importance of "words properly used" is highlighted by the experience of two young Episcopal ministers. Both of them smoked cigarettes, but they were not at all sure that it was the correct thing for them to do. To satisfy themselves on the matter they decided to write to their bishop and accept his opinion. They both wrote on the same day and two days later they got their replies. The one who opened his letter first was obviously disappointed.

"The bishop said I shouldn't smoke," the first young minister told the other.

"That's strange," his friend said, "the bishop told me I can smoke. What did you write?"

"I merely asked if I could smoke while I was praying and the bishop said no," the first replied.

"Oh," said the other. "You see, I asked if I could pray while I was smoking, and he said yes!"

It becomes the writer's respon- (CONTINUED ON PAGE 48)

The Script Writer's Responsibility: Wise

(CONTINUED FROM PAGE 47) sibility to use words that will make target audiences say "yes."

In the specific area of military public relations films I do not personally believe that fiction in the form of a dramatic story should be used. This story form always makes me look for a certain line in microscopic type, "This is a dramatization." A PR assignment does not add to a writer's chores or responsibility the obligation to propagandize.

Revision May Be Necessary

A writer's responsibility starts with the script but, as I see it, it does not end when the shooting script is approved. Even though the script is completed, before the film itself is completed much creative work remains to be done — direction, photography, editing, musical background.

Though it may seem strange for someone who is a writer to say it, a script is not a Bible. An approved script is not Scripture. It is a railing, not a crutch; it is a direction, not a confining rut in the road. It seems only reasonable that a writer's responsibility should include adjusting and revising the script to take best advantage of all the creative work contributed during actual production.

Great Talent or Good Picture?

During an assignment abroad I was asked why, in spite of top talent, their public relations films just did not seem to be successful. Answering a question like that honestly can make you just about as popular as a parent at a teenage party. But life is made up of taking chances. So I explained that it seemed as if everybody was out to prove how good they were, rather than prove how good a film they could make.

The writer wrote to prove how good a writer he is. The director had to assert his skill. The cameraman wanted no doubt in anyone's mind about his knowledge of effect angles, forced perspective and zoom lenses. The editor did not intend to have his techniques of shock cuts and montages overshadowed. The musical director made certain that his music would be heard.

The Key Word is "Integrity"

Everybody was a success but the picture died. Cause of death was described as lack of cohesive-

ness. Cohesion is part of the producer's responsibility. It is also part of the writer's.

It has been part of my personal credo that a writer should be paid more for the words he does not write than the words he puts down on paper. Brevity is not only the soul of wit, it is also the soul of all communication. The heart of communication, however, is integrity.

Integrity must be more to a writer than a responsibility. Lack of integrity can be sensed even by an audience of 10-year olds. Audiences are never really fooled. They may be persuaded. They may even be forced into a way of thought. But they are never really fooled. If an audience feels the integrity of the script, and an audience can feel it, the largest percentage of the problems of achieving a good film have been overcome.

He Should Analyze His Work

Part of a writer's integrity involves analyzing his own work. Other people may criticize or praise a particular script effort. But nobody except the writer really knows if it is the best he can do. Only the writer knows if he has said "yes" too often or not often enough. Did he accept the first idea to pop into his head or did he reach beyond the obvious or the complicated or the typical formula to come up with a fresh approach. Only the writer knows.

Ideas and words are a writer's tools. He has many responsibilities. Of these integrity is the most important.

COMMUNISM SERIES:

(CONTINUED FROM PAGE 30)

and a seventh place. The National Association for Better Radio and Television, consistently a proponent to the FCC of better public affairs programming, is honoring the series. The California Federation of Women's Clubs made their first award in two years for the category in which *Communism: Myth vs Reality* was judged.

Both Neilson and ARB ratings for Southern California indicated that 65,000 to 75,000 homes (100,000 to 140,000 viewers) watched each episode despite a Sunday afternoon scheduling that competed with sports events.

The vast amount of detailed

James Cook (left) producer of the USC series, directs narration.

factual material in the films and the provocative challenges inherent in the topic of Communism, combines to stimulate an informed articulate audience. Many organizations may wish to provide this opportunity to their employees and their business community to become better informed on this threat to our way of life through acquisition of the series, now available on 16mm film.

IBM'S "BETTER WAY"

(CONTINUED FROM PAGE 33)

film and provided the script. His reward from IBM was a three-week vacation and a promotion to the post of manager of data processing in the Long Beach District.

Ezra Stone, who had been retained by IBM to stage-manage the San Francisco conference, was assigned as director of the film. Glenn Grossman of Pacific Productions did the photography and editing. Narration, in crisp, purposeful manner, was done by Gary Merrill.

Only the Telecredit scenes involved lip-synchronization, but effective documentary work creates the feeling that much more of the footage involved live sound. Music came from the Capitol Hi-Q Library.

One insert was used, with miniature figures recreating an historical scene for the medical sequence. Forty-one calendar days were used in doing the complete film.

Hollywood Animators, the producing firm, was started seven years ago in "half a garage" by William F. and Jean Selleck, still its owners. Their initial purpose was to supply "economy animation" for local and regional TV advertisers. After going on to develop stop-motion paper sculpture work to a high degree, the Sellecks moved into live action.

Doctors in Politics:

(CONTINUED FROM PAGE 33)

ized Pete Smith," where *one voice* works in "psuedo-synch" to carry the voices and thoughts of *all* the characters. Music is not background scoring, in the conventional sense, but a musical "commentary."

Another technique, which Parthenon calls "Ambient Limbo," is a *principal* production asset. The visual "mounting" of scenes is impressionistic, with only the foreground and characters played with realism. Instead of contributing "fantasy" the effect is *sharp* and *contemporary*. Basic reason for this treatment was to help *thousands* of doctors to identify with the *one* doctor's office, *his* home.

Effective Use of Humor

Humor is used sparingly. It was essential to show the "mistakes" of the inept Dr. Gordon, to get the "criticism" accepted by doctors at large. All in all, the "Barnstormer" course could well be studied as an example of a highly effective "short course" which might serve other vital public information fields.

MONEY ON THE MOVE:

(CONTINUED FROM PAGE 45)

economy while maintaining the nation's economic health.

Of special interest to bankers and economic and financial people are the seldom-photographed scenes in the Washington Board Room and in the Securities Exchange Room at New York.

The work of collecting widely-diversified information, while keeping in touch with local economic developments through community business leaders (as the "Fed" does in every district) is illustrated through sequences shot in the Atlanta and Chicago banks, pointing up how these statistics are then used in money and credit decisions which affect us all.

Transfer of Funds by Wire

Traveling several hundred miles down the Mississippi, Craven units then lensed the highlights of a commercial business transaction which involved the quick transfer of funds by wire between the "Fed" banks of St. Louis and Kansas City as these institutions help businessmen close an important sale.

Money on the Move is being distributed on a free-loan basis by the 12 Federal Reserve Banks and their Branches to schools, colleges, professional groups, community and business organizations and television stations.

this movie projector will probably never have a sound breakdown

There are no tubes.

There's no photocell.

There are, instead, transistors and a silicon solar cell, printed circuitry and silicon rectifiers—all of which last such a long, long time they cease to be of concern.

You can forget about other problems, too.

No hazard if you forget to carry spare exciter lamps. The one we've put into this machine is rated at so much higher power than the power fed into it that it should last the life of the projector.

You don't have to remember how to attach parts when you set up this projector. Its reel arms are permanently attached. You unfold them.

Thread this KODAK PAGEANT Projector once, and you'll never forget how to thread it again. It's as easy as following a red line.

Misplace your extension cord? Forget it. You get a long-reaching 12-foot electric cord with this one, permanently attached so it can't disappear.

You won't ever be able to forget how easily this projector starts and

stops. One button for sound. One big lever for everything else. No switches for anything. No fumbling embarrassment.

No need for special speaker placement for audibility. This powerful sound system can reproduce all the sound it is possible to record on film. And it can project that sound at full amplifier power without overloading its big, 11" x 6" baffled speaker. Place the speaker near the projector, or move it up behind the screen; or plug auditorium public address system speakers directly into this machine. In any case, everyone will hear, and the sound will be crisp, clear and true.

You don't have to remember anything you're *not* supposed to do with this Kodak projector, either. It has no tricky operating instructions. No booby traps. You can throw the master control from full speed forward to full speed in reverse. Nothing will break. No film damage. Go ahead and rewind in a hurry. You won't break anything. Kids can play with the "go" lever, and they can

punch the button and twist the dials all day. No harm done. And the biggest reels of film won't fall off even if you tilt this projector.

We have no warnings, no special do's and don'ts, no special operating advice, no projectionist secrets to share. Nothing for you to remember about this projector except its good performance. And that, you'll find, is hard to forget. If you'd like to see and hear it work, or read illustrated literature about it, write your name and address here:

.....
.....
.....

Then send it back to us at the address below.

Check this box ☐ and we'll have a Kodak dealer call you to arrange for a convenient demonstration. No obligation, of course.

SUBSTANTIAL ADVERTISING and sales promotional values are possible through the increased use of U. S. business films when foreign-language versions can be made. These values are in addition to the original functions of the pictures. This article discusses current recommendations on making translations.

Thoughtless waste of a valuable film asset may occur after background sound effects and music are mixed with the voice track of a motion picture if the original separate effects are then discarded. This is often the practice of business-films producers. Foreign-language versions are immediately handicapped, and much of the value to the sponsoring organization for international markets is thrown away. This loss is totally unnecessary.

Government Agencies Can Help

Efforts of the U.S. government to stimulate exports can often be furthered by the free projection abroad of sponsored films. If the product advertising is restrained, our diplomatic, commercial and other federal representatives overseas are normally delighted to have prints to show.

The O.E.C.D.* welcomes prints for screening and possible listing for distribution among its 20 member countries. Commercial distributing agencies both at home and abroad can often arrange to book documentaries in the theaters of many countries. Even films in English are sometimes acceptable.

Showings by TV Stations Abroad

Many foreign television stations are hungry for suitable sponsored films. Free films will often be telecast on free time if the subject matter is informative and inoffensive, provided the advertising is restrained. (Suggestions are available upon request for "Criteria for Sponsored Films" from the Association of National Advertisers, Inc., 155 East 44th St., New York 17, N.Y.)

Perhaps it is only upon receipt of a print overseas that a decision can be made there to seek acceptance by a local TV studio for eventual broadcast. Length of film is important. The TV station may accept a film which runs 27 minutes and will refuse one running 32 minutes.

Language may also be important. If the English language is not acceptable, a decision must be made whether or not the prepara-

FILMS' USEFUL ROLE IN EXPANDING FOREIGN TRADE

Adapt Business Films for Selling Abroad Through Advance Planning. Eye to Quality

by Robert M. Gordon, Sr.

tion of a foreign-language version is justifiable. This is largely a matter of cost.

Advertising agencies and audio-visual experts are agreed that movies and TV are often the cheapest communication media on a cost-per-person basis. In practice, reasonable expenses incurred in making other-language editions will probably be justified if the final pictures are broadcast on TV.

Dubbing An Important Asset

As pointed out in the March issue of BUSINESS SCREEN (Cf. "Translate Your Film To Win Friends Abroad".) dubbing is however needed if the film is to influence the "man in the street". Films using voice-over are relatively easy to reproduce in a foreign language. Here we are speaking of "off-screen" voices; no lip-synchronization is involved.

Business executives experienced in international marketing are aware of the existence of American movies with dubbed-in foreign voices. It sounds very simple to do. They may be surprised at the high cost, but they will hit the ceiling if told dubbing is impossible with their company's pictures because the separate records of music and effects were thrown away after mixing with voice.

Consider Overseas Use Early

Frequently it happens that the sponsor has no intention of showing his picture abroad. This is usually the case before the picture

is made. If it turns out to be a good picture, he will almost certainly receive foreign requests for it; and a year or more after its initial release he will decide he wants to do a translation.

It's a little embarrassing to say, "Sorry," when this can be so easily avoided. The only requirement is to keep and store the unmixed music and effects tracks for, say, two years. The cost is infinitesimal; the rewards can be munificent.

Lip-synchronization is desirable whenever a translation is to be made of the voice of a person shown talking on the screen. This is difficult to accomplish, but it is being done with considerable success for theaters and television abroad. The rather high cost is justified by the large audience reached.

Keep Music, Effects Separate

The technique often requires professional actors to speak the parts, and the matching of foreign words to lip movements on the screen is now something of an art. Companies have been organized to do just this specialized job. Many rehearsals and some editorial cutting may be needed. Desirable in every case will be the background music and effects unmixed with any voice.

An interesting description of the dubbing process in Mexico City and some amusing sidelights appeared in the Latin-American edition of TIME (Feb. 8, 1963). The

Recording foreign narration as screen reflects original images. In "homemade" versions avoid misinterpretation of important phases in the picture.

About the Author: Robert M. Gordon, Sr., is in the export sales department, Eastman Kodak Company. Joining the company in 1927, he served abroad as a manager and technical advisor in the Philippines, Peru, China and Hong Kong. Rejoining the export department in Rochester in 1955, he was named editor of the Kodak Export Newsletter for overseas dealers, salesmen in 1958.

article. "They Went Thataway, Amigo," pointed out that most Spanish translations of TV westerns and other popular American TV shows are now being made in that city where both the talent and the tools have been developed.

Obtain the International Rights

A little thought about the sound before a picture is produced may also greatly facilitate its use abroad later. This means immediately obtaining international rights to the music, voices and actors' appearances. It is almost impossible to go back later to tie up these loose ends.

Sometimes world rights are prohibitively expensive and must be ruled out. But let's not leave them out through our oversight.

The question of rights for TV and theaters must be checked before any approach is made to a local TV station. A knowledge of, and operation within the scope of, signed TV rights is essential respecting each picture.

Costs Depend on Length, Etc.

Cost of a non-English edition of a business film will probably vary from \$100 to \$1,000 more. The length of a picture (its running time) and the amount of narrative and dialogue will be important factors. This article is not intended to imply that the original background sound tracks are essential. They are not necessary, and "homemade" translation with local voice and local music may (CONTINUED ON PAGE 52)

USING FILMS FOR OVERSEAS SALES

(CONTINUED FROM PAGE 50)
be recorded at low cost in many cases. The quality cannot, however, be expected to be suitable for broadcast.

Leave Job to the Professional

The actual preparation of non-English versions should be left to professionals if TV broadcast is contemplated. Experience has shown that an acceptable standard of quality for public performance can rarely be achieved by those not regularly engaged in such work. Higher quality is expected in anything made for mass media. "Homemade" versions may be entirely satisfactory for many purposes, but not for TV, large conventions, etc.

In most countries only optical sound projectors are commonly available. Magnetic tracks therefore have limited usefulness. If it is desired to make lip-sync photographic prints, experience indicates that a voice track magnetically recorded abroad on 16mm magnetic film can however be mixed and a final print made in this country if desired. A photographic sound release print is deemed essential for telecast purposes, not only because of standards of quality, but also because few TV studios have magnetic projectors.

Three Forms for Voice Tracks

Professional help in making a lip-sync non-English voice track to be mixed and printed in this country will usually be found necessary to produce good results. The voice track may preferably be sent here in one or the other of the following forms:

FIRST CHOICE: 16mm single-perforated magnetic film coated full

Synchronous motor attached to projector (at lower left above) will help maintain constant recording speed.

width and synchronously recorded using a 200-mil (5.08mm) recording on one edge. If the 200-mil recording is not available, 100-mil (2.54mm) can be used.

SECOND CHOICE: 16mm direct positive variable-area photographic track of playback density.

Here's Outline of Procedure

1. Translate the English script. Sentence by sentence, it must not exceed the English in running time.

2. Record professionally, matching foreign words to lip movements as closely as possible. Cue marks must be indicated on both an un-assembled picture film and the voice track.

3. Send the voice track and the picture film to the U.S. marked properly for editorial synchronous reference (i.e., for side-by-side editing or synchronizer equipment). A letter of transmittal is essential.

4. At the same time, send a copy of Releases signed by all persons whose voices are heard. If a similar Release is available for any local music, send that also. Re-

leases should legally permit reproduction and performance in any other country. Theatrical performance (where an admission fee is involved) may however be excluded.

Translate for Best Results!

The infinitely greater impact of seeing a film in one's own language makes translation increasingly desirable for every film which may possibly ever represent the U.S. abroad. A "Golden Eagle"

Locally-filmed sequences, added to overseas version, can help to provide "feed back" and add interest.

Transferring sound in sync. Interlocking of two projectors avoids unevenness, adds smoothness to track.

winner** capable of multiple translations becomes indeed an important ambassador abroad for his country and his sponsor.

In the opinion of this writer the U.S. business films industry can serve its national and its sponsor's best interests by simply preserving separately for two years the background effects and music tracks for all its future productions. The follow-up will come naturally.

**Annual prize-winners selected by the Committee for Non-Theatrical Events (CINE) for screening at one or more foreign film festivals

PICTURE PARADE

Bob Preston Narrates Federal Services Joint Crusade Film

☆ Robert Preston has recorded the narration of the 1963-64 Federal Services Joint Crusade film, *The Strongest Bridge in the World*. Under the chairmanship of Secretary of the Treasury C. Douglas Dillon, the Federal Services Joint Crusade seeks contributions from approximately five million federal employees located in the domestic U. S.

All funds are used to promote health, welfare and freedom-building programs in foreign lands, through CARE, The American Korean Foundation, Radio Free Europe and Project Hope. Preston, who donated his time and talent, joins such previous FSJC film narrators as Bob Hope, Arthur Godfrey and Chet Huntley in aiding this program.

The Strongest Bridge . . . was produced in the New York studios of Fred A. Niles Communications Centers, Inc. and directed by Charles Ticho. The 16mm black & white, 13½-minute film relates the work of the four agencies in the FSJC campaign. Secretary Dillon also appears in the film, endorsing the program and reading President Kennedy's appeal for funds.

* * *

Film of "New York Standard" Sponsored by Uni-Serv Corp.

THE NEW YORK STANDARD, interim newspaper that filled part of the void when New Yorkers were left newsless during last winter's blackout, is the subject of *The 77 Days*, a 23-minute documentary film. Originated, financed and published by Uni-Serv, the story dramatizes the birth, struggles, triumphs and finally the death of a unique feat in journalism. Vernon Delston was the producer.

Delston's camera crews picked up the principal elements of the on-the-spot scenes as they occurred. The urgency of getting out a paper whose life span was measured in moments is captured in this documentary; authenticity and drama, present at all times, created the "you are there" quality.

The cast, consisting primarily of the STANDARD staff, will never be nominated for an academy award; however, in the field of journalism it reads like "Who's Who". Top newspaper men from most of the striking New York dailies worked side by side in getting out the paper. It was team

effort whereby a DAILY NEWS reporter and a NEW YORK TIMES editor became STANDARD colleagues.

Uni-Serv Corporation is a credit card organization widely known in New York City as Uni-Card. The film will be shown to television and non-theatrical audiences.

"Sports Thrills of 1962" Are Reviewed in New Miller Film

Capsule accounts of five of 1962's most stirring sports events are provided in a new 16mm film, *Sports Thrills of 1962*, just added to the Miller Brewing Company's 185-film library.

The Milwaukee brewer's film leads off with the 68th renewal of the famed Penn Relays, with a slow-motion segment showing how the new and controversial fiberglass pole reacts to the weight of the vaulter during competition.

The wizardry of professional basketball is next seen as the Boston Celtics meet the Philadelphia Warriors in the 1962 championship playoff. The 88th running of the Kentucky Derby and Decidedly's victory at Churchill Downs is followed by scenes of the Milwaukee Jaycee Open golf tournament in which a top-flight field of professional women golfers participated.

Topping off the action in *Sports Thrills* is the National Football League's pro championship game between the New York Giants and the defending NFL champs, the Green Bay Packers. Miller sports films can be obtained on free loan from the company's Film Section, Public Relations Dept., 4000 West State, Milwaukee 1, Wisconsin.

Sign Vision for Dental Picture

The American Dental Association has chosen Vision Associates to make an educational, public information motion picture on the subject of fluoridation.

The film is designed for distribution through television and through non-theatrical channels and will be a straightforward documentary presentation of the facts on fluoridation and will avoid an argumentative position on the subject widely-publicized.

FILM INDUSTRY GROWTH CREATED NEED FOR STORAGE

Bekins' Business Is "Moving" Pictures

The Man Behind Big Film Service Center is Nicholas Muskey

WHAT ROLE has a world-wide moving and storage company in film business? When it's Bekins — plenty, though probably not in the way an outsider might expect.

Bekins, often referred to as "the Cadillac" of the moving and storage industry, has housed negatives and prints in quarters in Hollywood since the early twenties in rental rooms and nitrate vaults, but it was on a pretty passive basis: there they were, and if you had film and wanted to store it, OK.

Business swelled after World War II with the advent of television, and then one day a frustrated film-storage client asked a company records storage executive, "Why don't you store film for us so we can get it?"

Film Service Center is Born

That was the turning point from which Bekins Film Service Center emerged. An alert management recognized this as a real need, though they were aware that customers weren't all standing in line waiting for it. The concept proposed was one of storage with an important "plus" which would take considerable planning, careful organization, and some uncommon management skills.

They found their man in Nicholas C. Muskey. Film background? From the age of five he literally was brought up in a projection room. Breadth of experience? He'd worked in radio, photography and related communications fields. Organizing ability? He had an excellent record as a Marine Corps officer and organizer, and he still holds a Reserve appointment. And where was Muskey? He'd gotten tired of the sameness and lack of challenge in what he'd been doing previously, and for four years he'd been prospecting and mining in Death Valley.

Surveyed the Whole Field

Agreeing to look the situation over, Muskey took two weeks to appraise the field. He talked to old friends in the industry, went from front to back of the studios, explored the laboratories. Though he'd anticipated it, this experience confirmed the fact that in all its years Hollywood never had been blessed with a center providing all the inter-related film services of storing, cleaning, repairing, ship-

ping, cataloging and otherwise handling film for the benefit of its owners.

In October 1958 he and Bekins executives reached a quick agreement on the value of the project. It was understood that Muskey was the operating head, with full responsibility and authority, and so long as he was confident that it was necessary and justified, he could have whatever he needed.

Ninth Floor an Ideal Site

His first need was the ninth floor of the storage building at 1025 North Highland in Hollywood. Studying the whole of the sturdy concrete building, he'd discovered that through some natural phenomenon this particular floor was much like a cave in having a natural, constant, even, year-round temperature and humidity. The floor just above, and the one beneath, were also desirably close to the optimum and will be added as needed.

Muskey designed a new type of film storage rack, built on the old "Erector set" principle and providing maximum flexibility of use in a thoroughly efficient use of space. He worked out a pricing schedule far lower than anyone's expectations yet still showing the company a satisfactory profit, and including provisions for customer property insurance which meant real savings to them. He designed the necessary forms. He called on

Thousands of film cans, many containing priceless originals, are housed under ideal storage conditions at Bekins' Hollywood-based film service center.

Nicholas C. Muskey heads up the Bekins' Film Service Center.

prospective clients. Whatever needed doing, Muskey did, because he was the whole "division".

In December 1958 he got his first account. Within less than five years the number has grown to more than 300, and a good-sized staff now services business film producers, business firms, educational institutions and associations and advertising agencies based in the east and midwest as well as in Hollywood and the west.

Serves Film, Television Clients

Major entertainment film studios, an impressive list of independent producers, television commercial producers, the three major radio-television networks and some of the recording studios are among clients here, storing tapes and masters as well as such associated materials as scripts, cels and

title cards, properties and other valuable items.

Bekins Film Service Center is a depository for film material related to Federal court cases, for the State of California, and for prized material which U. C. L. A. won't trust to its own cinema department vaults. Many individually-owned film collections are here, including everything filmed by and about Ozzie and Harriet Nelson, and probably more footage of Woodrow Wilson and his period than can be found anywhere else.

15 Nitrate Vaults Are Full
To the nine nitrate film vaults in use when Muskey joined Bekins, six more have been added, and all are filled. They hold the history of Hollywood, a "who's who" of the industry. Material which will go into the still-building Hollywood Film Museum is here, its safe-keeping a company contribution to the project. Muskey himself is a member of the Film Museum Associates and is on the public relations cabinet.

Certified storage service remains the foundation of the Center, of course, and a single can is as welcome as a million feet of film, tape or recording. Whatever the owner's intent, all material is given "live storage" treatment as a matter of policy. With a system of careful coding, not only the Center's personnel but the customer, from his records, knows at any time the exact location of the material. Bank vault security is provided for original color negatives and other material requiring maximum protection and the most desirable storage conditions humanly possible to provide.

Certify Inspection of Films
In a complete service package with no "hidden charges", certified film inspection is available. No machines are used, and operators grade film visually to the highest industry standards. Wet cleaning of both sides of the film is supplied using a special formulation which also preserves, lubricates and toughens the film, reducing scratches, eliminating static, dust and dirt, and lengthening its life generally.

The service extends to checking out answer prints, print ordering, inspection, maintenance and replacement of damaged footage, breaking down of commercials, packaging.

Quick access is an important service element. Film stored at the Bekins Center is as close as the

Bekins Moves Film:

(CONTINUED FROM PAGE 55)

owner's telephone, and immediately accessible. A call from any authorized person speeds it on its way in minutes via uniformed messenger using radio-controlled cars, to local delivery or dispatch point for anywhere. Need to know whether a certain scene is in place? The same service will check it and report back right away.

Traffic service has become a large element in the program. Like storage and related activities, in which Bekins figuratively becomes an "arm" of the client, shipping is done for him as though by his own department — though with even a little more care, if possible, than his own employees might give. Booking orders are all confirmed, schedules are met, and followups prevent late return. Even weather conditions are anticipated to insure meeting screening dates. Only postage or shipping charges are added to the all-inclusive service price.

Out-of-state storage is provided at a branch in Phoenix, controlled from the Hollywood headquarters, with overnight service available to virtually any point.

Plans are now developing for opening similar Bekins Film Service Centers in the New York and Chicago areas, and further extensions of service are under consideration.

The whole Bekins story won't be told for a long time. Nick Muskey is a man of vision, backed by executives with equal vision, and he's writing new chapters constantly. ☐

Kodak Increases Prices of Professional Color Negatives

☆ Price of professional color motion picture negative film was increased by approximately 12 percent effective July 15, the Eastman Kodak Company has announced. Price increase will affect Eastman Color Negative, Eastman Color Internegative and Eastman Color Intermediate Films, products primarily used by professional motion picture producers.

The price increase is the first applied to Eastman color negative professional motion picture films since introduction 13 years ago. ☐

* * *

Carousel Productions Formed

☆ Carousel Productions has been formed at 17 E. 48th Street, New York. Executive producer and head of the firm is George Roberts, a former producer-director with Graphic Varieties and Gotham Recording Corporation. ☐

along production lines

Larger Quarters, New Lab for Eastman's Midwest Film Sales

☆ New, larger facilities on the 24th floor of Chicago's Prudential Building now house the Midwest Division of Eastman Kodak Company's motion picture products sales department.

Headed by Midwest manager Ken Mason, the Division unit now occupies 3,000 square feet. Included are a business office, chemistry laboratory, conference facilities and display areas. The lab will aid film processors in quality control, testing and inspection procedures. Professional motion picture films accounted for about 8 percent of Kodak's U. S. sales of \$1.056 million in 1962. ☐

Cameron Film Productions Add Staff in New Seattle Studio

☆ Cameron Film Productions, formerly Forde Motion Picture Productions, is now established in new offices at 314 Fairview Avenue North, Seattle, Washington.

In addition to the new firm name, Producer Richard W. Cameron has added staff and facilities to meet the growing demand in the Pacific Northwest for business films and television commercials.

New sound mixing and dubbing equipment, interlock projection, and client viewing room make Cameron Films a completely independent film production facility.

Recently completed were two historical films for the Seattle

World's Fair Commission, three films for the Boeing Company, and a medical film for the Washington State Department of Labor and Industries.

Two other Cameron productions have been recent award winners. The film *Thursday's Child* received the Gold Medal Award of the Seattle Art Director's Society. A television commercial for Northwest

Producer Cameron (l) accepts trophy for Ford spot from Seattle Academy president Robert Carlevitz.

Ford Dealers (J. Walter Thompson Agency) was chosen the best television commercial produced in Seattle; the selection was made by the Seattle Chapter, Academy of Television Arts and Sciences.

"We have changed more than our name," Cameron said. "With our enlarged facilities and staff we can give our clients the special attention so necessary to the production of motion pictures of the highest quality." ☐

* * *

Association Films to Handle Sears Roebuck's Film Library

☆ Sears, Roebuck and Company's extensive film library is now being distributed by Association Films, Inc. Subject matter includes colorful films on batting, duck hunting and tarpon fishing with Ted Williams, pictures on lawn care and power tools, and the latest in the series, *Come Camping in Alaska*.

The latter, 33 min., color, is a camera tour of our 49th state with Sir Edmund Hillary (the conqueror of Mt. Everest), his wife and three children. There are breathtaking views of Mt. McKinley National Park, crystal clear lakes and unposed, unrehearsed shots of animals in their natural habitat.

Sir Edmund proves to be the perfect companion on a camping trip - knowledgeable, handy with camp-out equipment, and a man with a true love of the great outdoors, which he imparts to his family, and the motion picture audience. ☐

THE WHITE GLOVE TREATMENT

You and your film always receive "The White Glove Treatment" at the Geo. W. Colburn Laboratory.

You'll find this type of personal care and handling in each and every service performed at Colburns.

Architectural sketch of new studio facilities for Canyon Films in Arizona.

New Sound Stage, Scene Dock for Canyon Films of Arizona as Western-Based Film Producer Completes New Facilities

Noteworthy progress in physical plant for specialized film production is being made by Canyon Films of Arizona, Phoenix, Arizona, with the construction of a new 60 by 90-foot sound stage and a 40-foot square scene dock. The studio will retain its two present facilities as insert stages and is building a new parking lot to accommodate 30 cars. When expansion work is completed, total area of this Southwestern plant will be 12,500 square feet.

"Our new sound stage," says Canyon president Raymond Boley, "actually opens up a new era of production for us. We can film interior scenes involving large trucks; there is ample capacity for several sets, increasing our efficiency and speeding up production. We think we're extremely fortunate to achieve this kind of expansion in our present downtown Phoenix location."

Canyon Films is a closely-held corporation whose owners, in addition to Boley, are David H. Burch, vice-president and Robert J. Allen, secretary-treasurer.

"We're particularly proud of our new sound system," Allen says. "It is being custom-built and completely DC-interlocked, with construction and installation by Magnasync, making available up to five dubbing channels. The

sound stage will have 1,600 amps available for lighting and will be completely air-conditioned."

Phil Murphy Forms Company to Prepare Film Promotion

An experienced film promotion man has set up his own shop and announced that he will specialize in the preparation of collateral materials such as discussion guides, audience handout pieces and posters.

He is Philip Murphy, who before the move was promotion manager for Modern Talking Picture Service. He was with that film distribution concern for 10 years. He is doing business now as Philip Murphy Associates at 663 Fifth Avenue, New York 22, N. Y.

"As BUSINESS SCREEN said in its second issue this year, collateral materials 'are all too often neglected by film sponsors,'" Murphy says. "They can add an extra dimension to a film at little cost. They can gain closer attention to the film — make it the center of a real program — and leave the viewers with a lasting reminder of the sponsor and his message. The advance announcement of such materials may also help the sponsor get his films to the audiences he wants, which is becoming a more competitive situation all the time."

Sales exec: Charles Seager

Seager Heads National Sales for General Aniline Division

Charles W. Seager has been appointed national sales manager of Professional and Industrial Products for the Photo & Repro Division of General Aniline & Film Corporation. Norbert F. Rincker, general sales manager for the Division, made the announcement.

Seager, who joined the company in 1946, will temporarily continue his duties as manager of Federal and Contract Sales. He is a native of Cleveland, Ohio, and a graduate of North Central College, later doing graduate work at Rutgers. □

Peter Elgar Named Executive Producer at MPO Videotronics

Peter Elgar, former president of Peter Elgar Productions, has joined MPO Videotronics, Inc. He will serve the film production company as an executive producer and director.

Mr. Elgar is widely acknowledged as one of the leading directors of television commercials. He has had over 30 years of experience in the film business, primarily in the industrial, documentary and commercials fields.

Born in Vienna and educated abroad, Mr. Elgar holds Ph.D. degrees from three continental universities. He was associate producer and director of the famous *Madchen in Uniform*, one of the all-time great films. He founded his own studio in 1951 and has produced hundreds of commercials and sponsored films.

Mr. Elgar will make his headquarters at the MPO Videotronics Center in New York. □

Ray-Eye Productions Appoints Huffman Sales Vice-President

Ray-Eye Productions, Inc., has named William W. Huffman as vice-president for sales. He is

lenses, anamorphic lenses, overhead and opaque projectors and 8mm sound motion picture equipment. □

Niles chief Charles Ticho

Ticho Named General Manager of Niles' New York Studios

The new general manager of the New York studios of Fred A. Niles Communications Centers, Inc. is Charles Ticho. A veteran in the film production field, Ticho began his career with the Niles organization eight years ago at the Chicago studios.

He has been associated with Niles' New York activity since the Eastern studio was opened in 1961 and holds numerous awards for direction. Several current productions for New York World's Fair exhibition are under way in New York as well as a heavy schedule of television commercials. □

Capparos to Lens Commercials at Rose-Magwood Productions

Ernesto Caparros is the new director of photography at Rose-Magwood Productions, Inc., New York. His cinematic background includes the Academy Award-winning *Miracle Worker*, starring Anne Bancroft. For television, Caparros has lensed such audience favorites as *Naked City* and *Route 66*. At Rose-Magwood he will exclusively handle TV commercials, remaining available for features and television series. □

Lowry Named Filmex Producer

Hank Lowry, a location specialist and production coordinator in Miami for five years and recently active among New York advertising agencies on their film requirements, has joined Filmex, Inc., in Manhattan, as a producer. □

Joins Productions Unlimited

Syd Folberg is the new vice-president of Productions Unlimited in charge of 16mm non-theatrical sales. He was previously associated with United Artists Associated where he was general manager in their 8mm division. □

Capitol Library Service Has New "Production Music Series"

A new background library for film and broadcast use, the Production Music Series (PMS) has been announced by Capitol Library Services, Hollywood. PMS offers music classified by category, rather than by the usual system of individual titling. All of the subjects were especially written and arranged for the Service.

PMS is set up in the following categorical selections: sports and metro; sports and news; news and industrial; fast activities; show bus-

Radio personality Jack Wagner is pictured using the Capitol Production Music series for his syndicated program.

iness; documentary marches; scenes; light and happy; comedy and cartoon; kiddie show; fashion show melodies; "important" melodies (documentary); plain melodies; production melodies; dramatic music; short title music (open and close); percussion effects; dramatic statements, etc.

The new Capitol service is offered on 14 LP, 33 1/3 double-faced discs, containing 254 different selections and is priced at \$85. There are no leasing fees. The basic series will be added to periodically to maintain a flow of new and timely melodies. Write Capitol Library Services, Hollywood & Vine, Hollywood 28, California for details, mentioning BUSINESS SCREEN.

A/F Libraries to Distribute 30 Fire Underwriters' Films

☆ Association Films, Inc., has been named distributor of the National Board of Fire Underwriters' film library of more than 30 subjects. These films have become a Fire Prevention Week staple with thousands of schools, industrial plants, businesses, TV stations and fire departments, as well as performing outstanding work in fire prevention consciousness during the other 51 weeks of the year. They focus attention on a vital sector of interest.

The Wide World of Sponsored Pictures

Sterling staff in their new soundproof communications office are (l to r): Sharon Grubler, Lorraine Patterson, Betty Van Bergen, Marie Burgess.

Sterling Movies U. S. A. Opens New Television Booking Center

☆ Sterling Movies U. S. A. has established a new Television Booking Center in a soundproof communications office 36 floors above Park Avenue in New York. Here,

constant long-distance contact is maintained with the country's more than 600 TV stations by Sharon Grubler, Lorraine Patterson, Betty Van Bergen and Marie Burgess.

Each girl maintains a record of

the free-film preferences and current programming habits of each station they service. The records are used as an immediate source of reference during telephone conversations.

Name "Cast" for Dream Picture Win a "Screening Room" Prize!

☆ The story goes something like this: one evening after a tough day of Rheingold commercials shooting, Don Franz of J. Walter Thompson and Dave Monahan of MPO were having dinner. They were trying to relax but they just couldn't get their minds off film. Out of that conversation came a list of an "ideal" cast and crew of a dream film Franz and Monahan were working on.

It contained names like Morrie Ziduals, the virile leading man; Dolly Inn, the ingenue; 'Arry Flex, an English comic; Otto Focus, the Director of Photography; Marcus Feet, a Shakespearean character actor; Onlo Kayshun, an inarticulate male model; and Otto Sink, the sound man.

There are more, but Franz and Monahan asked for help. So Don Greene, editor of MPO's house publication, *The Screening Room*, decided to run a contest of sorts. Business Screen readers are invited to take part by suggesting film names that will be selected for the final crew and cast. Winners are promised some kind of a prize — maybe a reel of the worst of last-year's out-takes. We'll publish the full winning list of printable names when the contest is over.

The totally biased judge is the editor of *The Screening Room*. All his decisions are final unless his wife overrules him. He'll send everyone who enters a souvenir. No official entry forms — write it on the back of an old script, if you have to. Send your entries to *The Screening Room*, MPO, 222 East 44th Street, New York 17. Contest closes about October 10.

* * *

"Bud" Stone Heads Allservice Film Laboratory in New York

☆ Allservice Film Laboratories, Inc., specializing in black & white processing, has been established at 35 West 45th Street in New York City. Burton "Bud" Stone is president.

The new lab will offer 35mm and 16mm black & white service for TV and industrial producers and distributors. Dailies, sound tracks, opticals, negatives and release prints are being processed on a round-the-clock basis.

IF YOU OWN A BERTHIOT ZOOM LENS, YOU WILL NEED THIS

F&B TAKES THE WIGGLE OUT OF ZOOMS WITH THE BEELAND ELECTRIC ZOOM CONTROL

Here is a rugged yet light weight control that assures you of smooth zoom action from start to finish of each shot. Mounts directly on the lens barrel, no camera attachments are required. Interchangeable mounting clamps allow the same control to be used for the 17mm to 70mm, and 17mm to 85mm lenses for 16mm cameras, and the 38mm to 150mm lens for 35mm cameras.

\$185⁰⁰
Regular
\$275
Super- Quiet

The cameraman can control the picture size by eye or can pre-set the zoom range by quick-set limit stops on the quadrant. A silicon loaded slip clutch and mechanical limit stops provide precise control of the zoom range. The control box is equipped with instant contact push-buttons for easy finger-tip operation of zoom-in or zoom-out. The box mounts on a tripod handle, or directly on the camera for hand-held operation. It also may be held and operated by an assistant. Speed range is rheostat controlled and adjustable from approximately 2 1/2 seconds to 10 seconds of zoom time. A special feature is the very efficient motor

which operates for hundreds of moves on one set of 5 type "C" flashlight batteries. Two models are available: Regular, where noise is not a problem. Super-quiet, where whisper-quiet operation is needed for sound recording.

- Smooth, quiet zoom action
- Easy finger-tip operation
- Precise zoom range control
- Zoom speeds from 2 1/2 to 10 seconds
- Interchangeable—for 16mm and 35mm cameras.
- Mounts directly on lens barrel
- Uses type "C" flash light batteries

Now it's "Bob Hills' Shows"

Bob Hills, Famed for "Post" Shows, Opens New York Office

Bob Hills, well known for the outstanding editorial promotion shows he has put on for the SATURDAY EVENING POST, has opened a new office at 103 Park Avenue, New York. Using a temporary "working title" of *Bob Hills' Shows*, the new firm will offer creative writing and consultation services as well as Hills' own inimitable presence as "master of ceremonies" for sales and dealer meetings, product introduction shows and other business presentation functions, both large and small.

Hills joined the Post 15 years ago as Editorial Promotion Manager. Almost by chance, in 1951, he was tapped to tell the Post editorial story personally to important individual sales and advertising managers. His talks were so successful that from an introverted writer in a cubby-hole office in Philadelphia, he suddenly found himself acting the part of an extroverted spieler — giving over 500 flip-chart shows to groups of two to five people at a time all over the country.

During the past seven years, Bob Hills has made the big Post presentations for large audiences, which he wrote and conceived, the talk of the industry. He developed such blockbusters as raffling off Stutz Beareats and even a whole town (Ulcer Gulch, in Arizona), while traveling half a million miles, giving 700 performances to an audience of 70,000. At the same time he has been constantly active in preparing small presentations and doing promotion writing for the Post, as well. Hills has most recently been Advertising and Sales Promotion Manager of the weekly magazine.

In expanding and refining his shows over the years, Bob Hills has worked with Visualscope, Inc., the New York film producer, and

Wilcox-Lange, the Chicago audio-visual equipment specialists. With them he pioneered many new facets of programmed presentation. He expects to work with these concerns a great deal in the future on projects of mutual interest. □

Ruth Ratny Joins Agency as Broadcast Creative Director

Ruth L. Ratny has been named broadcast creative director for Powell, Schoenbrod & Hall Advertising, Inc., of Chicago and New York. The former

Agency exec Ruth Ratny

vice-president and creative director of the Niles Communications Centers for the past nine years, she shared major awards for both TV commercials and business-sponsored films.

From 1945, when she began

her career in advertising, Miss Ratny has been associated with the J. Walter Thompson Company, Foote Cone & Belding and Ruthrauff & Ryan. At R&R she became one of the first in the industry to write both TV commercial and shows.

While in Washington for three

years, prior to her return to Chicago in 1954, Ruth Ratny co-authored "Career Girl," a column for the Washington Times-Herald and was copy chief for Lansburgh's Department Store in charge of all departments except fashions, soft goods and their basement store. □

RPL now offers

(CONTINUED FROM PAGE 46)

tering appliances on board this modern vessel.

Within this past decade, many "workmanlike" AEG films have served us well in delivering information. A few of these merit special mention because of their quality or special content:

Highways of Power was created 10 years ago to introduce a recently well-to-do population to the new AEG plants and their wide range of products for everyday use. We have fostered the AEG brand name abroad through such films as *Between Hamburg and Karachi*, featuring new AEG-built electrical generating and production plants. This film was a cinematic journey around the world which used animated sequences to show the functions and purposes of the many power stations, factories and mines which AEG had installed or helped to equip in worldwide locations since the war.

The home maker was shown *Four Point Housing*, to dramatize the wiring and appliances now available for contemporary housing. It has enjoyed wide acceptance among builders and architects' groups and among building material suppliers as well. We maintained AEG's reputation in the field of industrial design with the 1959 production of *Form and Function*.

Three Prize-Winning Films

Shipbuilding was the subject of *Serial No. S735*, notable for a Berlin Convention music-score award received in 1959; an early color film on *High-Frequency Surface Hardening* won first prize as the best technological film in industry at Turin in the same year. We followed these with a job placement film on trade training selection titled *Fitness for Purpose* which won the Merit rating and Federal Film Premium in 1960.

Other titles which illustrate the scope of our program are: *Women Workers for Easy Hour Shifts*; *Machines With a Memory* and *The Earth-Moving Giant*.

Nominated for Academy Award

A high point in this modern era was attained by *Kahl*, our widely-heralded film on nuclear power, which was given numerous citations in 1961. After receiving the German Film Board's "High Merit" rating two years ago, *Kahl* was the German selection for the San Sebastian Film Festival and was nominated by the Academy of Motion Picture Arts and Sciences in Hollywood for an "Oscar," probably the first German documen-

Films at AEG: Power for Enlightenment

tary films of modern times to be so honored. In 1962, *Kahl* received a gold medal at the 9th International Exhibition of Electronics, Nuclear Physics and Telecommunications held in Rome. This engineering documentation of Federal Germany's first nuclear power station is covered in two color motion pictures, *Kahl* and *Kahl Atomic Power Station*.

When it was determined that this first nuclear power station should have its own fully pictorial "life record," we reviewed other relevant film material. Most of this conveyed too narrow a spectrum of information to hold the interest of a well-informed but non-professional layman. Script writer, producer and cameraman had to do a lot of groundwork until they were able to see the future outlines of the *Kahl* project and shoot the

Dr. Hans Schaller is in charge of audio-visuals at the A. E. G.

first scenes. Two disparate aspects: plant erection and its productive function were resolved by creating

the two separate color films, produced concurrently.

One of these documentaries developed the sequence of events, structural and historical, of station growth. The second feature covered the purpose and function of the nuclear generating plant. *Kahl* tells a straight-forward story, holds the interest of those who desire few technical details; *Atomic Power Station Kahl* serves the technical specialist, provides a wealth of data on nuclear processes of energy transformation.

Results Worthy of Obstacles

Intellectual hurdles were not the only hurdles to be overcome by our working team; space was at a premium within the narrow confines of the reactor vessel and buildings; erection progress could not be hindered by our cameras. But it all seemed more than worthwhile when scenes of the journey of the uranium fuel cells from Rotterdam to the site at *Kahl*, the charging of the reactor and the process which brought it to a "critical" stage were illuminated on the screen.

Showings at worldwide engineering gatherings and sizeable purchases of the longer technical version by Governmental nuclear authorities were followed by other purchases by Federal diplomatic agencies and by the German publicity agency, "Inter Nations."

Our recent color film, *Karlsruhe Cyclotron*, carries forward this new tradition of scientific-technical emphasis. It presents the form and function of a new particle accelerating device through both diagrammatic and pictorial scenes. This picture is being widely exhibited in European research and engineering centers.

A New Atomic Power Film

We are completing production of a second effort in the area of nuclear energy films. Gundremmingen, a site on the upper Danube, houses Germany's first large-scale atomic power station project. This record of present-day engineering practice in this advanced field will also feature the joint scientific and engineering progress achieved through our collaboration with American nuclear technologists. The script sets out clearly the opportunity for application of high-precision methods of industrial production, inherent in German workshop practice. We consider this film to be in the category of "general education" despite its advanced theme.

Model X-16 Xenon Arc Lamp

Strong X-16, Xenon Arc Lamp, Ready for 16mm Projector Use

Strong Electric Corp. has announced the Strong X-16, a Xenon arc light source for 16mm motion picture projection. The lamp is adaptable to the Eastman arc and incandescent, Bell & Howell, RCA, Graflex, Norelco and Hortson 16mm sound projectors.

Four models are available (450, 900, 1600 and 2500-watt) of this light source, which uses tungsten electrodes to provide an arc in a Xenon gas atmosphere, totally enclosed in a quartz envelope. The maker assures a steady, flickerless, pure white light source with no discoloration, even distribution of light over the total screen area. Write New Products Desk, c/o BUSINESS SCREEN, for additional data on this new product.

Soundseal Blimp for Arri "16" Cameras Is Designed by S.O.S.

Facilitating sync-sound shots is a new S.O.S. Soundseal Blimp, made of laminated glass fibre, lined with rubber-bonded nylon. It was designed especially for Arri-flex 16mm cameras and weighs 13 lbs., camera included. The maker notes that it fits the Arri 16 like a custom-made suit, is "skin-tight."

Cameramen can pan, tilt or angle the camera in any direction; the Soundseal Blimp will not allow rock or vibration. It also makes a shock-proof case for keeping freight charges to a minimum. The Blimp is offered in two models with three alternate front sections, permitting use of different lenses. Four interior lights illuminate the tachometer and

Below: the S.O.S. Soundseal Blimp

the latest in tools for film production and for projection

frame counter, the magazine footage counter (automatically), and the camera interior. Write our New Products Desk for additional data on the S. O. S. Soundseal Blimp.

Viewlex Unveils "Little Giant" Slide and Filmstrip Projectors

Unveiled at the 1963 NAVA Trade Show in Chicago was a new line of combination filmstrip and projectors introduced by Viewlex, Inc. The new V-8 (150-watt) and V-83 (300-watt) "Little Giants" offer changeover from

One of Viewlex "Little Giants"

strips to slides in seconds with a simple carrier change.

The V-8 and V-83 models measure only 10" and weigh just five pounds. They feature a high-

precision, three-element optically-balanced lens system with a color-corrected anastigmat lens, either f 3.3" or f 3.2 two-inch lens for wide-angle projection. Filmstrip mechanism features push-in threading, positive framing and continuous click-stop advance from frame-to-frame. Slide carrier has a built-in automatic "shutter" which eliminates glare during slide change.

Requests for detailed literature and prices should be sent to the New Products Desk @ BUSINESS SCREEN, Chicago 26.

Kodak's Heavy-Duty "Carousel"

A heavy-duty model of Kodak's Carousel slide projector, the Model AV-580, is noteworthy. A color-coded panel has been added for projection room operation and a permanently attached three-wire cord adds greater safety; a two-pronged adapter is included for conventional use. There is also a lamp safety switch which shuts off lamp in event of blower failure, protects unit against overheating.

The Carousel has remote slide-change, focussing and interval programming. It uses standard 80-slide Carousel trays.

New Emulsions Enhance Color, Detail in Three Anscochrome Films

The Photo & Repro Division of General Aniline & Film Corporation has announced three new Anscochrome type films for color motion picture production. The new Ansco films, based on new chemical formulations, offer improved color rendition and image sharpness.

Special advantage of the new emulsions is their ability to accurately record fine detail, especially useful for high-speed motion analysis, stress studies and other types of analytical color photography. They are also said to provide full-range recording from delicate values of light pastels to fully-saturated primary reds, blues and greens. Inherently high maximum density produces rich blacks. High resistance to stain and fog results in clean whites and sparkling highlights.

The new Anscochrome films: ANSCOCROME D/100: a day-

light balanced, high-speed (100) color reversal film for brilliant detailed color motion pictures by daylight illumination.

ANSCOCROME T/100: a fast tungsten film balanced for 3200K lamps with a film speed of 100. Brilliant color with maximum rendition of detail.

ANSCOCROME D/200: extremely high-speed (200) daylight-balanced color reversal film for low-light level situations and high-speed studies.

All three films are available in standard lengths of 16mm, 35mm and 70mm widths and all are sold without cost of processing included in the purchase price. They are designed for processing in the Anscochrome 80-degree F process for faster access to the final result. Write: Ansco Professional Motion Picture Products, General Aniline & Film Corp., Binghamton, N. Y. for full details.

For literature on items in these pages write: the New Products Desk at BUSINESS SCREEN, 7064 Sheridan Road, Chicago 26, Ill.

Here's an Electrol screen in use

Da-Lite Reports 230% Surge in Use of Motor-Driven Screens

A 230% increase in the use of Da-Lite electrically-operated screens over the past five years is noted by the Da-Lite Screen Company. Awarded U. L. approval, they are designed to stop automatically in the fully opened or closed position at the touch of a switch. Screen is completely out of sight when closed.

All models come complete with hanger bars, can be mounted on wall or recessed in a ceiling. Both Da-Lite Electrol and Cosmopolitan models of electrically-operated screens are available in sizes up to 20 x 20-feet, in a variety of surfaces. A card or letterhead request to our New Products Desk @ BUSINESS SCREEN will bring illustrated literature.

A-V Dealers Stock New Kodak Magnetic Sound Recording Film

Kodak audiovisual dealers are stocking a new high-output magnetic sound-recording film announced by the Eastman Kodak Company. Undistorted output of this greatly-improved Eastman Magnetic Sound Recording Film, Type A704, has been increased 40 percent over old Type A701. Type A704 is also distributed by electronic supply houses.

The new sound recording stock enables sound man to capture all of the impact of the original voice, music or special effects and to

Name identifies Type A704 stock

preserve them faithfully through the many re-recording steps which precede the final print. High-frequency sensitivity has also been substantially upgraded to produce more vibrant highs, more natural balance between highs and lows.

Here's Mast Model 135 Projector

Random Access Slide Projector Locates and Projects in Seconds

A new slide projector which will locate and project within three seconds any slide in its magazine is the Mast Model 135 Random Access Slide Projector, offered by the Mast Development Company.

The Model 135 features a unique, inexpensive digital servo mechanism which translates the digital commands into corresponding positions of the slide tray. Control is effected by a rotary digit switch (optionally installed on the projector or in a remote control unit.) Interchangeable slide magazines have a capacity of 49 slides each, accepting any slide which has a 2 x 2" mount.

A low-voltage, high-ampere lamp produces equivalent of 300-watt illumination, generating considerably less heat. Write: New products Desk, 7064 Sheridan Road, Chicago 26, for detailed literature.

Light Ampex Portable Videotape Recorder Designed for Mobility

The Ampex VR-660 Videotape portable broadcast television tape recorder, weighing just under 100 pounds, has been priced at \$14,500. It was designed for mobile and studio use and is said to be the only recorder of comparable size which may be used on the air with no additional equipment other than that presently available in most television stations.

The VR-660 (all-transistorized) operates at a tape speed of 3.7 inches per second and can record up to five hours of continuous program material on a single 12 1/2-inch reel of standard two-inch broadcast tape.

* * *

Improved Single-Frame Motor Available for Arri-16 Cameras

An improved single-frame motor is available for all Arriflex-16 cameras, according to the Arriflex Corporation of America. All special requirements for anima-

a-v equipment trade fair

tion and time-lapse work have been carefully tabulated and are now incorporated in the new motor design. It is capable of operation in either single-pulse or double-pulse modes.

Built into the new Arri DOM single-frame motor are an 8-volt DC power supply programmed to control automatically 400-foot magazine film advance and the operation of the Arri Auxiliary, capping shutter. Also included are strobe synchronization; forward-reverse selector switches; frame counter and shutter indicator light.

New System Helps Technicolor Dealers to Load 8mm Cartridges

Dealers who handle the Technicolor "Instant" 8mm projectors may now load the cartridges under

a new Technicolor system. A new portable cartridge-loading station, which applies wax evenly to both

Portable cartridge loading station for Technicolor 8's

sides of a film, employs rollers like a miniature offset printing press. Chemical and wax are dried in a forced hot-air system.

Film is wound onto the base piece of the plastic cartridge in a continuous motor-driven operation. All the operator needs to do manually is to splice the two ends of the film and seal the top of the cartridge.

Emby-Homrich 35mm Copystand for Slides, Filmstrip Masters

Newest member of the Emby-Homrich product family is a 35mm Copystand, designed as a versatile 35mm production camera. It provides print quantity runs of slides automatically; will create filmstrip masters and can produce motion picture sequences by animation.

The 35mm Copystand has reflex viewing; offers projection focus and framing. It will also handle both single or double-frame

Emby-Homrich 35mm Copystand

material (a switch alters the advance electronically for either single or double rotation of the "geneva star" transport.) Reverse film transport, precise film counter, removable film magazines are other features. The copy table has a built-in 10x10" illuminator and the console accessory compartment has film carriers for 8 x 10 and 5 x 7 as well as a condenser stage for 4 x 5 and a smaller stage for 2 1/4 square or 35mm slides.

An electronic timer with matched resistors is built into the console top. Finest German optics are supplied. Emby-Homrich equipment is a product of Sickles Sales & Service Company. Card or letterhead requests for data to our New Products Desk will receive prompt attention.

Rol-a-Chart system in use . . .

is calibrated in quarter and half-inch spaces, with alternate tinted horizontal bands for easy reference, plus vertical bands which mark the Saturday-Sunday weekends.

The King-size Rol-a-chart provides 280 half-inch or 560 quarter-inch horizontal spaces; a smaller board offers 84 half-inch; 168 quarter inch horizontal spaces. Marking is done with a special wipe-off marking pencil and/or with magnets on the larger model. All units have welded steel frames and come equipped with wall hangers. Write the manufacturer for details, prices.

Busch Film and Equipment Co. Forms Custom-Design Division

A Special Installations Division has been formed by Busch Film & Equipment Company, Saginaw, Michigan to handle custom-designed and engineered projection systems for its clients.

Noting increasing demand for special and unique projection systems, president Edwin Busch said that the new Division will facilitate the company's work in this field. Special installations have included up to eight 16mm and eight slide units interlocked for simultaneous operation; ceiling projection; automatic and remote continuous projection for exhibits and museums; and built-in systems for training, teaching, briefing and conference rooms, hospitals and others.

Busch is currently installing a

unit for the Detroit Tank Arsenal which automatically projects continuous 16mm film from the ceiling unto the walls of a saucer-shaped room. Other projects in final stages and in process of installation are at the Pro Football Hall of Fame and at Procter and Gamble.

The company has designed special projectors for the Brussels World's Fair, the Seattle World's Fair and for numerous industrial and retail uses.

Nationwide Projector Leasing Announced by Bell & Howell Co.

A nationwide leasing program for audio-visual equipment has been announced by the Bell & Howell Company. The program will be administered by B&H audio-visual dealers throughout the country. Industrial or commercial organizations may lease five or more Model 550 Specialist Auto-load Filmosound automatic threading 16mm sound projectors for a period of either 12 or 24 months.

Within the 12-month period, monthly cost will be \$35 per machine; \$24 per projector on a 24-month basis. The company will pay all maintenance and service expense, except for tube and lamp replacement, during leasing period.

Xenon Projection at Movielab

The first and only commercial screening theater in the East to offer its clients Xenon projection lamp facilities is that of Movielab, Inc., at 619 West 54th Street, in New York City.

NOW, whoever that was who said that Frank Willard is an eccentric must have been jealous of the fact that Mr. W. has built the South's most modern film studio by producing some of the most imaginative and effective motion pictures that ever copped a clack of awards. So there.

COLUMBUS FILM FESTIVAL:

(CONTINUED FROM THE PRECEDING PAGE 26)

Two filmstrips, *Communism: What You Should Know About It*, produced by University Films and *Our American Heritage of Folk Music*, produced by Burt Munk and Company, also received Chris statuettes.

Most-Honored Producers and Sponsors

Notable among multiple Chris Certificate award winners were such producing companies as Audio Productions, Centron Corporation, Bay State Film Productions, Inc., Dynamic Films, Inc., Gil Altschul Productions, Inc., The Jam Handy Organization, Inc., Parthenon Pictures, The F. K. Rockett Company, Henry Strauss & Company, and Wilding, Inc.

Sponsors identified as Certificate winners were the Bell System, Pan American Airways, American Cyanamid Company, and British Overseas Airways Corporation, all of whom received two or more awards. Government film production was ably represented by Certificate winners from the U. S. Department of Agriculture, NASA, and the National Film Board of Canada.

Health groups were represented in the Certi-

"France, With a French Accent" was awarded a statuette as the best travel picture. It was produced by Coleman Productions of New York City.

ficate winners-circle by the American Heart Association, the National Tuberculosis Association and the Mental Health Film Board.

Awards Are Presented by Civic Leaders

Presentation of awards honors at the Chris banquet was shared by Daniel M. Porter, assistant director of the Ohio Historical Society, who presented "Information & Education" certificates; by Galvy Gordon, public relations director of the Columbus Public Library, who made the "Business & Industrial" presentations; and by Dr. Peter Volpe, director of regional hospital planning of the Columbus Hospital Federation, who cited the winning "Health and Mental Health" film winners.

Banquet speaker Yung was introduced by Kenneth B. Hobbs of the Battelle Memorial Institute. No stranger to film awards, Mr. Yung's Elektra studio has won honors on 55 occasions, both at U. S. and overseas festivals. He is currently the director of programs for the American Society of Magazine Photographers and arranging the presentation of 64 "Photographs in Motion."

Born in Shanghai, China, where he was edu-

"City of the Bees," produced by Moody Institute of Science, was judged the best of religious films. Scene shows a bee with load of pollen on its legs.

"Cattle Carters" was entered by the British Petroleum company (North America) and won a Chris.

cated as an engineer, Bob Yung began his career in films nine years ago, joining Elektra in 1955. Now a vice-president of this New York film company, he has introduced many facets such as the use of still photographs as a form of motion picture expression and full documentary techniques in sponsored films.

Merits Tribute for Years of Service

Officers and trustees of the Greater Columbus Film Council and its Festival co-sponsor, The Columbus Area Chamber of Commerce, have rendered notable service to the field of factual films through their eleven years of consistent sponsorship and hard work on this event. It is a rare tribute to the film medium which merits the appreciative salute and wide cooperation given by the many kinds of organizations who have participated.

FILMS THE SCHOOLS PREFER

Modern Lists Nine Successful Films Being Widely Shown in U. S. Schools

The secret of success for films to be shown in schools is to make one that serves a definite educational need. Films that do serve such a need often are accepted as a regular part of a course of study, and are used year after year.

Modern Talking Picture Service has recently published (in *Modern Memos*) a list of nine particularly successful subjects from its catalog of films for schools. The newest release on the list — *A More Attractive You* — has been in circulation for just two years. *Scrub Game* (re-made two years ago to bring clothing styles up to date) has been in circulation for more than 18 years.

Here are the nine films:

Title, Sponsor, Producer	Shows	Audience

of deliveries are easy and pleasant, the slidefilm shows what to do in more difficult cases: if no one is home, leave the books with a neighbor; don't ever leave a book at a public telephone rack. And be careful on the job.

This latest Rossmore slidefilm contains 74 frames of art and live photography. It carefully goes over each point to be covered and, to insure good retention, repeats the instructions at the end of the program for the trainees.

Production scene during the making of "The Side That Faces Out" in the studios of Fraser Productions.

Kaiser Sales Picture Updates the Story of Aluminum Siding

☆ The "case" for aluminum siding in home construction, proven after more than a decade of successful use under many varied conditions of climate and detail, is well made in *The Side That Faces Out*, an 18-minute color motion picture recently produced for the Kaiser Aluminum & Chemical Corporation by Fraser Productions of San Francisco.

Created for a primary target audience of siding applicators of all degrees of skill and experience, *The Side . . .* reviews some "good practice" points in the application of aluminum siding while, at the same time, emphasizing the importance of the applicator's skill.

Use of the product is explored by an antagonist and a protagonist and proven, in the proper hands, to be a fully feasible system. Following the earlier days, when the prospects of the product were often derided, dissenters are found to be enthusiastic supporters after a decade of successful experience.

The film is especially directed to an industry audience.

TROIS

Henri G. Marescot, General Manager, North, Central American and Caribbean Division, Air France

... STEPS TO THE JETS

"Three simple decisions led to our film success.

ONE... We have a solid story to tell and one that lends itself ideally to pictorial treatment. Air France, the world's largest airline, pioneered the first international air route, Paris-London, in February, 1919, and today our fleet of 707 Intercontinental and Caravelle jetliners continue to service new routes throughout the world.

TWO... We select professionals to make our films. One production, **STEPS TO THE JETS**, is a perfect blending of the Air France contribution to aviation and an exciting graphic account of man's conquest of the air.

THREE... Modern was selected to distribute our films because we want professional results in all phases of our public relations program.

One, two, three good decisions? We think the results speak for themselves."

Partners in Success: A good story, professionally produced, plus distribution through Modern, achieved these results (to date).

...new paths of enlightenment in a changing world

We've come a long way from smoke signals to television. New paths of enlightenment require new couriers with new approaches in communication. Our changing world demands that change become a constant, provided change is change with improvement. That should be the target for each tomorrow. It's the target for each of us.

HOW TO TURN A DEAF EAR TO SALES RESISTANCE

Showing how to use creative selling techniques, delivers better results than mere exhortation for improved performance, most sales trainers say. They find the filmstrip

"Turning a Deaf Ear to Sales Resistance"

remarkably effective in showing men why prospects build a wall of resistance to any sales presentation, no matter how desirable.

Typical situations demonstrate how to develop the art of by-passing objectives; how to turn a deaf-ear to sales resistance; how to continue to sell . . . and to close.

Fortified with mental pictures from the color filmstrip, salesmen are immunized against the fear of prospect resistance.

One of a series of six filmstrips:

"SELLING IS MENTAL"

provides tested material for 18 meetings on sales training.

Re-Elect Saul Jeffee President of Cinema Lab Association

Saul Jeffee, president of Movie-lab, Inc., of New York City, has been re-elected president of The Association of Cinema Laboratories. His second term in that post was announced at the fall meeting of that group in Boston last month.

Three other top officers of the ACL were also re-elected. Vice president W. E. Gephart, Jr., president of General Film Laboratories, of Hollywood, continues in that post. Louis (Doc) Feldman, Du Art Film Laboratories, New York City, was re-elected treasurer; and Dudley Spruill, Byron Motion Pictures, Washington, D. C., also continues as secretary.

Mr. Jeffee is a 30-year veteran in the motion picture industry. The association which he heads was founded in 1955 and has 42 laboratory members in the U. S. and Canada as well as a number of associate members in the field of processing equipment and materials.

* * *

Alexander Film Co. Acquired by Western Business Group

The 45-year old Alexander Film Company, Colorado Springs, Colo., has been acquired by its president, Keith Munroe and a group of three Western businessmen. Sharing ownership of the 26-acre studio plant and other facilities are Cortlandt S. Dietler, Denver; F. M. Late, San Angelo, Texas; and J. A. Oleson, of Sterling, Colorado. All three men have also been elected directors of the company.

Dietler is the new board chairman and chief executive officer of Alexander. Oleson is executive vice-president; Late a vice-president and F. W. Marting has been named vice-president and controller. Also announced is the formation of a wholly-owned Canadian subsidiary, Alexander Film of Canada, Ltd.

With the exception of Munroe, the buyers have not been previously active in the film business. Dietler has spent his business years in the petroleum industry; Oleson is active in oil and ranching and a partner of Dietler. Late is an oil producer, rancher and one of the largest Chevrolet dealers in the country.

Munroe's introduction to the film business came in 1957 when Fleming, Talbert and Munroe,

Cleveland business consultants, were employed by Alexander. Named president six months later, he brought the company to a leading position in the field of television commercial production. All phases of its activities are now being broadened, according to Munroe, in a concerted effort to offer complete film services. The company employs 200 at the Colorado Springs studio and has staffed sales offices in New York, Chicago, Detroit, St. Louis and San Juan, Puerto Rico.

Pro Football Title Game to be Lensed by Blair Pictures

☆ Exclusive rights for the production of official films of the National Football League's 1963 and 1964 professional football championship games have been awarded to Blair Motion Pictures, Inc. of Philadelphia. Edwin M. Sabol, Blair president, confirmed the selection made by League Commissioner Pete Rozelle. His company produced the exciting films of the 1962 championship game played between the Green Bay Packers and the New York Giants.

The color film of that contest, produced under the most difficult weather conditions of many decades, was commercially sponsored and is still playing to thousands of groups throughout the country. It is considered a "classic" among sports pictures of this type. Opponents for the 1963 championship game were still undecided at presstime.

* * *

United World to Occupy New, Improved N. Y. Headquarters

☆ Expanding operations of United World Films, Inc. have required the new and larger quarters for its executive and main office personnel which it will soon occupy at 221 Park Avenue South in New York City.

The mid-December move from its present facilities at 1445 Park Avenue was announced by president James M. Franey. Greater internal coordination, made possible by modern communication facilities as well as the latest in film handling, storage, record-keeping and office equipment, is a primary aim of the consolidation.

United also maintains wholly-owned branch offices at Atlanta, Chicago, Dallas, Los Angeles and Portland, Oregon.

It's the picture that counts...

and MPO camera crews go all out to get the picture. For an MPO film, "A Task to Share," for the Agency for International Development, MPO photographed scenes in Washington, D. C., Syracuse, N.Y., Riverside, California, and from 500 feet above Glen Canyon Dam in Arizona. MPO production crews have worked in every state of the union, in nearly every country in the world.

Getting the picture is only one aspect of MPO's in-

depth film service. MPO's unique ability to interpret the client's message and creatively translate it into the film medium has consistently brought more awards to MPO than any other film producer.

Through the years, more and more accounts have found that it costs no more to trust their film projects to a creative, quality producer: MPO. To learn more about MPO's creative staff and new studio facilities, or to arrange a screening of recent MPO productions, call or write Judd Pollock in New York.

MPO Productions, Inc., a subsidiary of MPO Videotronics 222 East 44, New York 17, N.Y. 212 TV 7-3200 also in Detroit, Chicago, Hollywood

You can lead a man
to a screening, but...

Some people talk about "motivational motion pictures" as though they were a special kind. In business film, what other kinds of pictures are there? Good pictures, that is. Because you can lead a man to a screening, but you can't make him think... unless the picture begins with motivation and is propelled by motivation right down to the residual impression which we're hired to leave.

A picture must accomplish two things: first, pull the target audience into the store; then make them want the merchandise.

When the roomlight fades down and the screen lights up, the Step One audience attitude is, "Why should I bother paying attention?" The surest answer is to establish identification with the viewer. *Con-vair-Astronautics'* picture **LOCKED ON** addressed an audience of cynics, but at the line "I'm a yesterday guy in a tomorrow job and I don't know what the hell to do about it" they identified the happenings on the screen with their personal inner fears, and became willing (motivated) to pay attention to the message-material that followed.

At Step Two — to answer, "What's in this for me?" the motion picture must be audience-oriented. So it sounds obvious, but altogether too many business films are really constructed to make the Sponsor happy — it's the audience that's the Unbeliever, hence should be our target; and the way to the audience member's heart is to figure out honestly what is in this message for him, and why will he profit by going along with us; and then to weave this motivation into our story, subtly or openly in proportion to the intrinsic audience resistance.

The Information Operators in the A T & T film **MAY I HELP YOU?** aren't merely looking up telephone numbers, they're putting people in touch with one another; they're helping people.

Technically, business-film audiences get in free. Actually they are paying us with a most precious commodity, their time; and it is our obligation to deliver them an honest value... to inform them, persuade, inspire or whatever, in their own terms so that they go out of our show feeling, "I'm glad I came"... (because)... "There's really something to think about in that picture." In my book, that's motivation.

Kodak Names Thomas Connors to Manage N. Y. Fair Exhibit

As construction nears completion on the Eastman Kodak Pavilion, one of the first major installations to be finished for the 1964-65 New York World's Fair, that company has announced the appointment of Thomas M. Connors as general manager of its Fair exhibit. Roy F. Horne was appointed assistant manager of the Kodak Pavilion.

Lincoln V. Burrows, director of planning for the Pavilion, will continue as co-ordinator of the company's World's Fair plans. Connors has returned from retirement as general manager of the company's Northwestern Sales Division in New York city to assume his World's Fair duties.

Horne, who became assistant to the director of planning for the Pavilion in July of this year, will continue to work at the Kodak Office in Rochester until shortly before the Fair opens in the Spring of 1964.

Panacolor Signs Zeiss-Ikon for Cartridge-Load Projector

☆ Panacolor, Inc., formed six years ago to develop a new process for optically printing both color film and sound tracks on black and white film stock, has signed a contract with Zeiss-Ikon AG, West Germany, for the production of a new type of cartridge-loading sound projector.

According to Dr. Leon Wells, vice-president and director of research of Panopix, Inc., a Panacolor subsidiary, the projector (which he designed) will resemble a portable 19-inch television set with a built-in projector screen. The audio-visual "package" is contained in a cartridge measuring 7 x 6 x 3 inches, with a two-hour film capacity. Although the film dimension was not disclosed, the unit will have a built-in adaptor for standard 8mm "home movies."

The Panacolor film cartridge will have optical sound tracks; a 4-watt amplifier is built-in to power the loudspeaker with an adaptor for plugging the unit into an external high-fidelity amplifier.

Weight of the equipment was disclosed as 17 pounds; it will also have automatic focusing for optional use of external screens and provision for handling both

Eastman Kodak Pavilion, pictured above, will be one of first major exhibit buildings to be finished for the 1964-65 New York World's Fair at Flushing Meadows. View shows the southeast corner of the 393-foot long exposition of the contributions of photography and allied products.

magnetic as well as Panacolor optically-printed sound tracks. Speed control may be varied to handle standard 24 frames per second; slow motion, 16 fps and very slow motion, four frames per second.

Although no 16mm or 8mm subjects in the Panacolor process are as yet available for out-of-the-laboratory viewing, the first feature-long 35mm motion picture utilizing the process has been released by Warner Bros. (*The Castilian*) and is now in distribution.

According to Panacolor board chairman Harry Harris, the use of black and white film stock results in significant savings of print cost in all dimensions. The company does all of its processing in the Hollywood laboratory acquired some years ago from the Academy of Motion Picture Arts & Sciences at 6660 Santa Monica Boulevard. Harry Eller is the president of Panacolor, Inc.

Production prototypes of the new Panopix projector are expected to be available from Zeiss-Ikon in January, 1964.

Britain Hosts 5th International Industrial Film Exhibition

November 2-6, 1964 are the dates and London, England is the site of the Fifth International Industrial Film Festival. British Industry, aided by that country's Industrial Film Association, will host the world's leading a-v communications experts.

Educational Film Librarians Announce 1961 Festival Plans

☆ The Sixth Annual American Film Festival will be held under the auspices of the Educational Film Library Association on April 29-May 2nd at the Biltmore Hotel, New York City. All 16mm motion pictures and 35mm filmstrips which qualify under the Festival's 34 subject categories and were released in the United States during 1963 are eligible for entry. Deadline for the Festival entries is midnight, January 20, 1964.

These plans, together with the announcement of a Film Production Workshop to be sponsored by EFLA in New York on January 30 and 31 and a second Film Evaluation Workshop to be held in Los Angeles in November, 1964, were announced at the Association's annual meeting in October. Frederick A. White, director of the Bureau of Audio-Visual Instruction at the University of Wisconsin, was re-elected to serve a second term as president.

The Association's new vice-president is Sally Clark, film curator at the New Jersey State Museum, Trenton; Iola B. Tryon, director of the Film Department, Russell Library, Middletown, Conn., is EFLA's secretary-elect.

Information about the Festival and entry blanks may be obtained from the Educational Film Library Association, 250 West 57th St., New York, N. Y., 10019.

The Miniola Editing Machine

The "Miniola" is designed to meet the requirements of the smaller budget 16mm film producers while offering the same precision and many of the facilities of the higher priced models. It is portable and can be bench mounted or a purpose built stand supplied.

It has a continuous movement with drive of a novel design giving instant stop and reverse without the aid of magnetic clutches, brakes and electronic relays. Being exceedingly easy to maintain.

The upper film path is for picture and the lower film path for separate optical and separate magnetic sound. Either film path can be moved independently of each other through de-clutching the sprockets simply by lifting the knob on the front of either sprocket.

Precision cut sprockets and both film gates are in non-magnetic stainless steel.

The machine can be bench mounted or used on a special stand that is available as an extra.

\$1895

F.O.B., N.Y.

Continuous movement suitable for negative and positive viewing • Film paths declutchable • Projected picture 6 1/4" x 4 1/2" • Instant stop and reverse • High quality sound • 2000' capacity • Separate magnetic, separate optical and combined optical and magnetic heads • Synchronous and double speeds • Program timer (optional) • Footage counter • Portable

THE EDITORIAL VIEWPOINT

THE CRISIS IN GOVERNMENT FILMS

IN GOVERNMENT FILM production, the minimum quality standard may spell the difference between life and death in combat. Training failures which result from producer "short cuts" and other "economies" made by today's "low bidders" may imperil millions of dollars worth of complex equipment. The present contract situation clearly demands Congressional investigation.

When motion picture bids from experienced producer-suppliers *average* thousands of dollars above those of *unknown, questionable low bidders* who are assigned these vital jobs by today's arbitrary *price* standards, who protects the national interest? *Has the Federal government now turned its back on the organized crafts within the most experienced segment of this film production industry?* There is absolutely no chance that companies in all major U.S. centers of production can match the "low bid" standards of those who maintain no permanent staffs, own little or no equipment, lack financial stability to assure completion of specific contractual obligations and openly flaunt fair wage standards.

The situation is not restricted to the military. There is evidence of favoritism to former government employees. "We want to help them get started," is the phrase too often heard among contract officers. The one obligation these public servants have is the *fulfillment of film objectives and the best possible work is inseparable from the fairest attainable price.*

The years of experience in military and civilian production by truly qualified companies who now own and operate fully-equipped studios staffed by regularly-employed craftsmen and technicians are a vital national resource in times of peace or war. These are the companies who provided the bulk of such films during World War II. Today, many of them feel they are wasting hundreds of hours of bid estimation time as they see picture after picture going to low bidders whose work would be rejected in private industry.

Distribution service is beginning to follow production into the brambles. A National Aeronautics & Space Administration contract for the national distribution of the excellent *John Glenn Story* finds that picture being handled out across the country by inexperienced housewives and other beginners whose sole "equipment" is a manual rewind. Rejected were *all* national film distribution companies whose branches contain a minimum of \$10,000 to \$50,000 worth of electronic inspection gear, trained film inspectors and handlers. These local people collect \$1.40 for every booking. Is the government contractor capable of assuring the government of print quality under these circumstances?

Public Acquiring 700,000 Color Television

Sets This Year; Future Bright for Color Films

☆ The industry average in sales of color television receivers is 50 per cent over last year with many large retailers reporting increases of 58 to 60 per cent! At least 700,000 new color sets will be sold in 1963, up from 350,000 sold last year. Manufacturer reports confirm a "sold out" prediction before the Christmas holidays. RCA, which makes tubes for all other manufacturers, now has a "bottleneck" situation in that more sets can be sold than available color tubes. Zenith has confirmed that "production is booked to capacity for the rest of the year."

What all this spells for producers of color motion pictures is obvious. Videotape is "holding" at about 10 percent of telecast time, according to a responsible national manufacturer. Color films and color commercials are already experiencing a surge of new business. Color film processing is in for the greatest year in history, carrying through 1964.

Now let quality hold in original production and within the laboratory! Experienced producers and processors know that the stock available to them can provide brilliant, high-fidelity images. Working with television station technicians, they can provide an enthusiastic audience of present and new set owners with a tremendous new experience in viewing. *Prod-*

uct sales dependent on this new dimension can also play a key role in the whole national economy as color helps selling.

Soviet Union Frees Barghoorn; Featured in Film on "Communist Propaganda Machine"

☆ Yale professor Frederick Barghoorn, just released by the Soviet Union after being held more than two weeks "incommunicado" as a "spy," was one of the 38 experts on Communism who contributed to that important filmed television series featured in our last issue. His subject: "The Communist Propaganda Machine" was not likely to have pleased the Kremlin and the arrival of copies of BUSINESS SCREEN behind the Iron Curtain may not have been well-timed. *The truth hurts* and Professor Barghoorn's casual journey through Russia was quickly interrupted. His safe return allays some anxious moments.

* * *

Makers of Year's Best Safety Pictures

Get Plaques at National Safety Congress

☆ Culminating the 20th Annual National Safety Film Contest, winners of bronze plaques for the outstanding safety films produced in 1962, received their trophies in an impressive ceremony in the Grand Ballroom of the Conrad Hilton Hotel on the evening of October 28th.

Eleven plaques were presented before a sizeable audience attending the National Safety Congress held in Chicago during that period.

W. L. Robinson, chairman of the National Committee on Films for Safety, sponsors of the awards, made the presentations to producers and sponsors of the award-winning films. The committee includes representatives of 25 national service organizations.

The winning films were previously reported in these pages but a summary will be included in the forthcoming issue of BUSINESS SCREEN when "Films of the Year" are reviewed in a round-up of all awards received during 1963. The 21st Annual National Safety Film Contest will close its entry lists on February 15, 1964. For entry forms write to William Englander, secretary, National Committee on Films for Safety, 425 N. Michigan Avenue, Chicago, Illinois 60611.

THE EXTRA STAR ON THE MARQUEE

COLOR BY

Technicolor

...IS ALSO AVAILABLE TO YOU

Whether it is a one-reel industrial film or a multi-million-dollar theatrical production - Technicolor gives the same quality and service to all producers of motion picture film. Remember Technicolor quality costs you no more. Also, services are available to you that you can not obtain elsewhere. Give your next production that "Extra Star" - Color by Technicolor.

AUTO-SELECTIVE PRINTING FOR CONTROL OF CONTINUITY

Technicolor printers are programmed to make automatic fades, dissolves, deletions or substitutions. For instance, a 13-minute and a 27-minute version may be printed from the same original negative without recutting.

LIQUID COATED PRINTING TO PROTECT YOUR NEGATIVE

Negatives are coated with a cleansing solvent during printing; abrasion is avoided, and if already present, is rendered invisible.

MULTIPLICITY OF PRODUCT

There are over forty different methods and aspects of printing that are standard products. (Anamorphosing, deanamorphosing, enlargement and reduction of image.)

AUTOMATION IN MANUFACTURE - PERSONAL CONTROL AND INSPECTION

Continuous processing from raw stock to completed color and sound print is accomplished in one pass through processor and projected inspection. Electronic and mechanical programming guides progression of operation. Every print is objectively and subjectively inspected before packaging.

If Awards Competition Improves the Breed, Television Commercials Sure to Get Better

Television commercials may have their detractors and some current problems in the nation's capital because of their frequency and length but they also have a solid core of supporters among the growing number of groups citing this medium for awards honors.

In addition to the well-established American TV Commercials Festival, which will hold its fifth annual competition in 1964 under the direction of Wallace A. Ross, the International Film Festival of New York, organized by Herbert Rosen, made a sharp turn in that direction at its recent Manhattan gathering (see other pages of this issue).

Holding forth for the Far West's interest in television and radio media is the Hollywood Advertising Club and its International Broadcasting Awards. General chairman for that group's fourth annual contest is John T. Reynolds, senior vice-president, CBS Television Network, Hollywood.

The television awards section of this 1964 IBA event is headed by Robert Wood, vice-president and general manager of KNXT-TV. Don Estey, Morgan-Estey Productions, heads the IBA judging committee, which will select professional screening groups in London, Toronto, New York, Chicago and Hollywood. Robert L. Dellinger, executive vice-president, Grant Advertising, Inc., chairs the committee to select final judges, in cooperation with the International Advertising Association, Inc.

Participation from overseas is somewhat limited by the non-commercial nature of television on the continent. With the exception of England's few commercial t. v. outlets, European use of "screen advertising" is almost wholly limited to theatrical ad subjects. As a result, at the International Advertising Film Festivals held abroad (the equivalent of the U. S. contests noted), European entries have swept most of the theatrical ad film "firsts" while U. S. television commercials have received the top honors in that classification with numerous U. S. entries.

Production excellence in the theater medium is apparently good background for television commercials, however. Competing against 1,400 entries from 13 countries, Movie-record of Madrid, Spain, utilized its skill in that field to win the IBA's Television Sweepstakes award for *Sol de Andalucia*, a commercial created for Gonzales Byass Licquers. The Hollywood Ad Club has already confirmed 1964 entries from Australia, the Bahamas, Canada, El Salvador, England, Finland, France, Germany, Japan, New Zealand, The Philippines, and South Africa, as well as the numerous U. S. t. v. spots.

Public Relations with a Capital PR for Prudential!

Prudential's far-ranging, award-winning CBS television series, "The Twentieth Century", has become a mainstay of one of the most enlightened and successful PR projects in the country. Since 1958 Prudential has made 16mm prints of most of the programs available on a free-loan basis to schools and colleges, industries, clubs, churches and other community organizations.

Through the nationwide distribution facilities of Association Films these programs have reached an audience of more than 26 million viewers. The films have been shown in all 50 states, from New England to Hawaii. Significantly, *Association Films' high ratio of showings to bookings has delivered a "bonus" audience of 39%*

—or 139 persons per booking, compared to the national average of 100 or less.

The showings-to-bookings average (2.5) means large audiences at low cost-per-viewer, perhaps the lowest in the industry. We encourage multiple showings by users, and find that it is just one more reason the nation's educators and community leaders look to Association Films first.

We are proud to be associated with Prudential in this notable undertaking. We congratulate them and the creative team at CBS News for this contribution to education and enlightenment!

AMERICA'S FIRST DISTRIBUTOR - FIRST WITH AMERICA'S MAJOR FILM SPONSORS!

NOVELLIST PAT FRANK said it this way: "Civil Defense has the most difficult and complex information task in government. It must persuade the public to spend time, money, and energy preparing to meet a situation which may never occur, a disaster so fantastic it is almost beyond the range of human experience." And Pat had some reason to know; he'd just completed a three-month stint in the Pentagon as a special consultant to the Assistant Secretary of Defense for Civil Defense, Stuart L. Pittman and is now Director of Public Information.

Some critics have opposed civil defense on a pseudo-scientific basis; others have attacked it on violently emotional grounds. Except in times of tension such as the Cuban crisis, in many areas public reaction has been one of general apathy.

Committee Voted Expansion

And as recently as a few months ago, a House sub-committee set out to conduct exhaustive hearings on the whole civil defense program, frankly antagonistic to it. Two months later, after hearing every possible argument pro and con from more than a hundred expert witnesses, the sub-committee surprised itself by coming out almost unanimously — not for killing the program — but for greatly expanding it as an essential part of our national defense.

If a probing, economy-minded Congressional committee can be persuaded by the facts to change its mind, then obviously civil defense has a story worth telling and selling.

Film Content Offers Problem

But telling it, particularly on film, presents its problems.

For one thing, civil defense basically lacks pictorial glamor and drama. There are no soaring planes, no hurtling missiles.

For another, many of the subjects we deal with, such as Fallout and Radiation, are complex and technical in nature. Moreover, they've been clouded in the public mind by much misunderstanding and misinformation. But reducing Technical Complexity to Accurate Simplicity is not an easy process.

The "scare" approach, however effective it might be for one or two films, would soon fail to ex-

cite anyone — and eventually might backfire. Nor is it the business of a Defense Department agency to cry "wolf!" — our job should be to spread light, not heat.

So how do you lick problems like these?

We're trying to do it in a variety of ways.

Drama in Town's Decision

No drama in Civil Defense? In *Town of the Times*, a 30-minute film in color, we've dramatized the highly emotional debate that springs up in a town over a proposal to protect the town's children by putting fallout shelters in the schools. The story here is people, and the people are played by a highly professional cast headed by Ralph Meeker and Larry Gates.

No way to get through to the public on complex scientific or technical matters? In *About Fallout*, another new CD film, we've used an intricate combination of live action and complex animation to reduce the subject to basic simplicity, something that anyone can understand. It took us a year to do it and get it right, but so far, judging from the demand for the picture, it's been worth it.

Story of the Cuban Crisis

No glamor in civil defense? In *One Week in October*, a new film coming out this month, we've stol-

en every exciting plane, tank, Polaris, and missile shot that Army, Navy, and Air Force have to dramatize the story of the Cuban crisis. Much of the film, shot by service cameramen, has never been declassified until now. We've added narration by Gary Merrill and an original music score by the distinguished composer-conductor Ken Hopkins. The civil defense message in *One Week in October* is one of the softest and shortest on record — but we think people will get the message.

Already in release is another new half-hour film in color, *Shelter on a Quiet Street*, a dramatized how-to film on home shelters, designed for people living in areas far removed from community shelter.

Other Films in Production

And coming up soon are other films:

A Primer for Survival — a television series of five 15-minute films, hosted by Dave Garraway.

The Day That Made a Difference — a half-hour color film covering the massive shelter stocking drives recently conducted in New Orleans and San Francisco. This isn't just a story of supplies and rolling trucks; it's the story of the people who volunteered to help — and why. And it takes full advantage of the life and color of America's two most colorful

cities. A jazz score will be written to highlight the action.

Basic distribution of all these is through the 122 Army Film and Equipment Exchanges in as many locations across the country — the number of prints in each exchange determined by the demand in that area.

A telephone call or letter can reserve a print and there are no shipping charges.

27 Titles Are Now Available

Currently, 27 titles are available nationally, plus six one-minute theatrical trailers in 35mm which we've also put in the exchanges.

Additional film distribution — and this varies with the film subject — is made to selected school libraries, industry film libraries, OCD training schools, NATO, etc. Our films are used in Adult Education courses and University Extension courses in civil defense.

Any U. S. television station can get prints through their local Civil Defense Offices or direct from the Army Exchanges. In asking for the stations' limited public service time, we are competing with at least one hundred organizations, national and local, and we know it.

Quality and Print Quantity

So, OCD is meeting the competition problem and the specific problems inherent in a Civil Defense film program by producing quality films and by distributing them as widely as possible.

We feel that any audience will find both drama and information in these films — even in the piping times of comparative peace. Of course, in times of crisis, these would be the most popular films in town.

Scenes from the recent Civil Defense picture, "Town of the Times," produced by Wilding.

How Films Inform America About Civil Defense

Civil Defense May Lack Drama or "Glamor" (Except in Times Like the Cuban Crisis)
But Its Interesting, Informative Motion Pictures Are Alerting a Growing Audience

...only 12½ lbs. light!

**but
very
heavy
in
performance!**

Today's filming jobs break fast, demand the best equipment. So, check out the fabulous Arriflex 35. Pick it up, heft it. It has the right feel—and at no more than 12½ pounds. Makes for hours of effortless filming—studio or location, on the run or in the crowd. **ARRIFLEX 35**—the undisputed favorite when the action really counts.

Precision works throughout, too. The Arri people didn't skimp to make that weight. Better engineering does it all. From the knurl on the knobs to the brilliant reflex mirror shutter system. **ARRIFLEX 35**—the head of its class in compactness, portability, dependability.

Not to mention continuous design improvements most others only talk about. Now the clap-stick is no longer needed. Arri research offers you a built-in signal generator and automatic start-marker for true lip sync with any ¼-inch tape system; the governor-controlled motor activates marker lights which flash key frames at the start of each take. Factory-equipped, of course.

ARRIFLEX 35—a leader in film-making unsurpassed for exclusive features and money-saving advantages.

ARRIFLEX 35—the preferred camera system of cinematographers world-wide—in commerce and industry, the sciences, education, news and sports, entertainment and the arts.

There's a valid reason for it. Take an Arriflex in hand and see for yourself.

TWO-WAY RELAY FOR MANAGEMENT AND MEN

How can you win enthusiastic co-operation for your aims and policies . . . throughout your organization?

The answer is: improve communications. Success for this depends in large degree on your Supervisors.

To develop men adept at interpreting management goals and ideals . . . and conveying employee "climate" to management . . . many companies find valuable help in the color filmstrip:

"The Supervisor as a Representative of Management"

Third in a series of eight subjects clarifying the Supervisor's job, this film demonstrates practical methods . . . intensively tested and proved effective for building better two-way communications. Overall title:

"SUPERVISOR TRAINING ON HUMAN RELATIONS"

Heads Consumer Products Division of Technicolor Corp.

☆ Delbert K. Smith's appointment as a vice-president of the Technicolor Corporation has been announced by president Melvin H. Jacobs. Smith will head up the company's Consumer Products Division, including all branches engaged in the sale of 8mm "Instant" motion picture projectors, consumer films and amateur film processing, located in New York, Burbank, Sacramento, Seattle, San Francisco and Honolulu.

A former general manager of the Division at Burbank, Smith was president of Hawaii Color when that company was acquired by Technicolor in 1961. His division accounts for approximately \$18 million in sales.

* * *

Reevesound to Design, Build a Film Lab for Afghanistan

☆ The Reevesound Company, Inc. is designing and equipping a film laboratory in Afghanistan, assisting the Afghan government to develop an important communications medium. The new facility will handle both still photos and motion pictures; its operations will include news and documentary films and eventually, it is anticipated, training films.

The Reevesound contract covers a three-year period, totals \$415,000 and is a cooperative project between the Afghan government and United States Agency for International Development. It provides for building plans and specifications, procurement of U. S. building materials and the supply and installation of photographic equipment and materials. The lab building itself will be constructed by the Afghan government which is furnishing indigenous materials.

At present, motion picture processing facilities are not available within this country, requiring its use of scarce foreign exchange funds to obtain needed services elsewhere.

18th Annual Calvin Workshop Announced for February 3-5

☆ The 18th Annual Calvin Motion Picture Workshop will be held on February 3, 4 and 5, 1964 on the sound stages and throughout the buildings of Calvin Productions, Inc., 1105 Truman Road, Kansas City, Mo. There is no charge other than the visitor's housing accommodations during that period.

Cinema Laboratories Publish New Handbook for Procedures

☆ Helping to acquaint users of motion picture laboratory services with the terminology, pre-print preparation details and procedures which have become standard in that industry is a new 48-page looseleaf handbook of "Standards and Procedures for Motion Picture Laboratory Services," published in September by The Association of Cinema Laboratories, Inc., Washington, D. C.

The handbook was prepared by the Production Specifications

Cover of New ACL Handbook

Committee of ACL, and edited by the chairman of that group, Byron Roudabush, of Byron Motion Pictures, Inc. Members of the as-

sociation's reviewing committee were William D. Hedden, John J. Kowalak and Edward H. Reichard. SMPTE nomenclature bulletins (ASA PH22.56-1961) are also included in its useful text.

This reference text is composed of eight sections. These are: "Marketing Workprints to Indicate Effects", "Preparation of A&B Rolls", "Preparation of 16mm Printing Leaders", "Laboratory Practices on Films for Television", "A&B Winds and Emulsion Positions", and "Printing Flow Charts." In addition, it contains a "general information" section and the American Standards Association's nomenclature for motion picture film used in studios and processing laboratories.

Much of the handbook material is new and the balance was rewritten by Mr. Roudabush to bring it up-to-date. Encased in a convenient 3-ring binder (to accommodate new material as issued by the ACL), it may be purchased from ACL member labs or ordered direct (at \$1.50 per copy) from The Association of Cinema Laboratories, Inc., 1925 K Street, N. W., Washington, D. C. 20006.

"Galaxy of Elements" Shows Progress of Science in Sweden

☆ The story of scientific research from alchemy to nuclear engineering, from Sweden's viewpoint, is pictured in *Galaxy of Elements*, a new 19½-minute color film sponsored by the Swedish Institute, Stockholm.

Film's theme is that geographic position and historical background made possible the country's progress in the discovery of many elements through basic research. The film will soon be available for free loan bookings through the Swedish Film Center, Creativision, 1780 Broadway, New York.

Robert Kreiman (l) receives copy of equipment leasing kit from Douglas Moore (r) of U. S. Leasing Corp.

Technicolor Sets Up Leasing Program for 8mm Projectors

☆ A leasing program, established jointly between the Technicolor Corporation and the United States Leasing Corporation, will make available the Technicolor 8mm "Instant" film projector for as little as \$2 a month without deposit.

According to Robert Kreiman, general manager of the company's Commercial and Educational Branch, the leasing arrangement

for the cartridge-loading, light-weight silent 8mm equipment is also a try-before-you-buy offer since the lessor can take title at the end of a 24-month leasing period by an additional 10 percent payment in most instances.

The plan also permits subleasing. An industrial firm can pass on to its dealers, agents, customers or professional groups use of the Instant Movie Projector for a monthly rental. The Model 500 projector is available for \$2 per month, based on a 36-month lease and a total of \$50,000 worth of projectors under lease. However, Technicolor and USL have indicated acceptance of a much smaller lease, as low as \$1,000 total value.

Details of the leasing program are available through a-v dealers.

* * *

Maine Officials Confirm 20% Increase in Films' Audiences

☆ The State of Maine is an ardent believer in the public relations' effectiveness of the film medium and has the audience figures to prove it. Agriculture Commissioner E. L. Newdick noted a 20 percent increase in the acceptance of films supplied by his Department

for free public service use on television stations in the Eastern U.S.

These stations gave Maine's agricultural films, he said, a total of 1,020 showings (compared with 852 in fiscal 1962) and the number of stations using one or more Maine films increased from 177 to 207. The state estimated that a total audience of 52 million people viewed its documentary motion pictures on farm life and food products in the fiscal year which ended June 30.

Wide-screen versions of Maine films have also been made available to Eastern theaters. The film *Maine Barbecue* was shown by 591 northeastern U. S. theaters to audiences totaling 917 thousand people.

Television showings are arranged by the Department's Augusta office. H. G. Hawes, in charge of this film program, said that the year's most popular titles were *Adventures in Eating*, which had 119 television showings, and *Blueberryland*, which was shown 111 times. The Department also supplies prints to schools and civic organizations and utilizes the services of national film distributors to broaden its audience.

Rev. John Bachman to Head Broadcast & Film Commission

☆ Protestant church interests in the film and television media will be directed for a three year period beginning next February, 1964, by the Rev. Dr. John W. Bachman, newly-elected chairman of the Broadcasting and Film Commission of the National Council of Churches. Dr. Bachman succeeds Dr. Harry C. Spencer of Nashville, Tenn., general secretary of the Methodist Church's Television, Radio and Film Commission.

The Broadcasting and Film Commission is the interdenominational body through which 20 Protestant and Orthodox church groups cooperate to develop, produce and distribute religious telecasts and motion pictures. The BFC also serves National Council member denominations as a liaison with the broadcasting and film industries.

Dr. S. Franklin Mack is executive director of the BFC, with headquarters in New York. □

James Finn Elected Chairman of Educational Media Council

☆ James D. Finn, a past president of the Department of Audio-visual Instruction, National Education Association, has been elected chairman of the Educational Media Council. His election to this post was announced at its annual meeting in Washington, October 9th.

A non-profit educational group of national associations with a common interest in education as well as specialized skills in the communications media, the Council also elected William G. Harley, president of the National Association of Educational Broadcasters, as its vice-chairman. Ben Edelman, assistant manager for Government-Industry Relations, Western Electric Company (representing the Electronic Industries Association on the Council), is its new secretary. Margaret Gill, executive secretary of the Association for Supervision and Curriculum Development, was re-elected Council treasurer.

Among the Council's current projects is the EDUCATIONAL MEDIA INDEX, a 17-volume directory of all non-print media available in the U. S. (scheduled for spring 1964 publication); a series of guidelines on long-range educational problems prepared for the U. S. Office of Education; and a new manual, "Sources of Information on Educational Media." □

800 Attend Meeting in Boston of the Motion Picture & Television Engineers

General Goddard Is Principal Speaker at Opening Luncheon

SOME 800 MEMBERS and guests of the Society of Motion Picture and Television Engineers met at the Somerset Hotel in Boston on October 13-18 for the Society's 94th Semiannual Technical Conference. Papers were given on such broad topics as Photography in Medicine, Laboratory Practice, 8mm Small Format Film, Sound Recording, Instrumentation and High Speed Photography and TV Engineering Developments.

Three half-day sessions on Photography in Medicine aroused particular attention. Sixteen papers were presented by doctors and technicians from such medical photography centers as Massachusetts General Hospital, Harvard Medical School, MIT, Columbia University and the University of Washington.

Reviews Half-Century on Film

Principal speaker at the opening luncheon was Brigadier General George W. Goddard (ret.) who is now with the Itek Corporation. His talk covered a half-century of personal and expert experiences in the motion picture field, ranging from Woodrow Wilson's newsreel-recorded inauguration to the dramatic television coverage of Astronaut Cooper's space voyage.

Stressing the progressive growth in motion pictures from "gun-camera photography at 80 miles an hour to high-speed movies in space at 17,500 miles per hour," Goddard cited, in particular, the Air Force's Air Photographic

Charting Service and NASA's new Motion Picture and Television Laboratory. Both agencies, Goddard, said, "are true pioneers, keeping pace with the fantastic events and plans in space, and meeting all requirements for scientific studies, instrumentation and documentation."

Goddard further stressed the far-reaching optimism for the future of motion pictures and tele-

Reid Ray presides at the opening luncheon program of fall conference.

vision. As he said, "If you think the last half-century has been exciting—just wait around a while."

Award Honors Are Presented

Award winners who were honored at the Conference were Robert L. Lamberts (Kodak Research Labs), who received the Journal Award; Alex Quiroga (National Broadcasting Co.), the Herbert T. Kalms Gold Medal; Henry N. Kozanowski, (RCA), the David Sarnoff Gold Medal Award; Morton Sultanoff (Aberdeen Proving Ground), the E. I. du Pont Gold Medal Award; and Arthur C.

Pictured at Conference (left to right): physicist Morton Sultanoff, of Aberdeen Proving Grounds, winner of du Pont Medal Award; past-president John W. Servies; and Herb Farmer, editorial vice-president of Society.

Society president Reid H. Ray (at left) is pictured with Dr. Arthur Hardy (center) winner of Progress Medal Award. Local arrangements chairman Charles Wyckoff, Edgerton, Germeshausen & Grier, is at the right above.

Hardy (Massachusetts Institute of Technology), the Progress Medal Award.

Thirteen members of the Society were elevated to the grade of Fellow in recognition of their outstanding contributions.

Two national officers of the Society were elected and two

other were re-elected. SMPTE President Reid H. Ray announced at the opening luncheon that Deane R. White has been re-elected engineering vice-president and that Joseph T. Dougherty has been elected again to the post of financial vice-president.

Dr. White is associate research laboratory director at the du Pont Photo Products Department. Mr. Dougherty is a technical representative for du Pont in New York.

Newly elected to the office of sessions vice-president was William R. Holm of du Pont in Hollywood. Byron Roudabush, president of Byron Motion Pictures, was elected treasurer.

Among the interesting papers presented during the five-day conference were those of Noel R. Bacon (Metro Kalvar), who showed a new non-silver film product designed for black-and-white release printing. The material is said to be grainless, require no dark-room or chemical solutions and have good sensitometric character-

General Goddard's talk stressed progressive growth of film medium.

Conference luminaries (left to right): Dr. Hardy, prof. emeritus, Mass. Institute of Technology; Ethan M. Stifle, Eastman Kodak Co., executive vice-president of SMPTE; and Brig. General (Ret.) George W. Goddard.

(CONTINUED FROM PAGE 25)
istics. Robinson P. Rigg (BUSINESS SCREEN, London) described the communications needs of the developing nations of Africa, Asia and South America. Location and newsreel motion picture equipment will play a big part in this work, he said.

Norman E. Salmons (Eastman Kodak Co.) spoke on the planning and producing of visual aids for effective technical presentations. Maurice Levy (Eastern Effects) said the modern optical house faces real challenges in the demands of advertising agencies for constantly new "unusual" and "different" ways of putting their sales ideas on film.

8mm came in for a considerable share of attention, with papers by such leaders in the field as George W. Colburn (Geo. W. Colburn Lab), Richard G. Hennessey (Fairchild Camera and Instrument Corp.) and John A. Maurer (JM Developments), among others.

Morton H. Read (Bay State Film Productions) was program chairman of the conference.

George Lenke Named President of the Da-Lite Screen Company

☆ George H. Lenke, Jr., former vice-president and general manager of the Da-Lite Screen Company, Inc., Warsaw, Indiana, is the new president of that concern. He retains his post as general manager. Lenke succeeds Chester C. Cooley, president since 1947 and now chairman of the board at Da-Lite.

The new president joined the company 10 years ago, serving in factory production and engineering until his appointment as general manager in 1959. He was a bomber pilot in the U.S. Air Force during his four years of military service in World War II. A member of the board of directors of the Warsaw Rotary Club, Lenke is also a director of that city's Chamber of Commerce. He and Mrs. Lenke have three daughters, Barbara, 15; Sandra, 10; and Nancy, six.

Shake his hand.

Open the box.

Plug it in.

Let 'er roll.

This revolutionary projector sells your product anywhere. In sound and color. In broad daylight. Sets up in 10 seconds—and repeats automatically.

Technically, the Fairchild 400 is an 8mm rear-screen sound movie projector. It works more like a TV set, except you don't have to fuss with the focus.

The Fairchild weighs less than a portable typewriter and takes up less than 2 sq. ft.—wide open.

It shows up to 20 minutes' worth of color sound film. Requires no warm-up. Takes just 10 seconds to set up, plug in and turn on. *On is when it counts.*

You can demonstrate snow removal in July, a turboprop on a desktop or review a year's research in a minute. Take your customer on a field trip, a test run, or a tour of the plant. Right where he signs the

orders. When the commercial's over, the Fairchild's ready to repeat, automatically, up to 3000 times per print.

As we said, the Fairchild is an 8mm machine—the most reliable and modern ever made—but any 16mm or 35mm film can be quickly and easily reduced to 8, sound and all.

Thousands of Fairchild 400s have already gone into use. They're helping sales-

men multiply sales of automobiles, building materials, shoes, computers, bowling alleys, advertising pages and brassieres. They're converting par salesmen into crackerjacks. Demonstrating product advantages everywhere. Concisely. Dramatically.

If you have a product the Fairchild might help, call or write. We'll rush one over and plug it in.

what's new in pictures

"A Coin With Two Heads" Aids Training of Retail Clerks

THE BURGEONING RETAIL STORE business, marked by a trend toward sizeable supermarkets across the country and abroad is facing critical problems in personnel training. Thousands of new clerks, many beginning retailing careers immediately after high school graduation, need the benefits of planned, continuous training programs.

Helping to serve the need is a current 35 minute color motion picture, *A Coin With Two Heads*, sponsored by Procter & Gamble. This recent winner of a 1963 Award of Merit given by a national committee of industrial relations executives within member companies of the National Association of Manufacturers, was produced for P & G by The Jam Handy Organization. Its primary audience is supermarket owners, store and department managers.

Cited for Professional Merit

The film most adequately puts across to key personnel the importance of good retail employee training and provides a basic, proven approach. In fact, the N. A. M. Committee found this film "a very professional production whose principles are applicable to training for any job or operation."

Core of the picture is a dream sequence (with "out-of-this-world" settings) in which a manager who has given his training responsibility too little attention meets his trainee, who outlines the way in which workers beginning new jobs should be trained. Principles that may have been overlooked because they are simple and basic (therefore tending to get sidetracked) are demonstrated.

Distribution Is Restricted

A Coin With Two Heads is distributed by the Procter & Gamble Distributing Company, Cincinnati, Ohio. Mike Waller of P&G's Trade Relations Division is in charge of showing arrangements for this customer service program, largely restricted to customers of the company in the wholesale and retail fields which it serves.

Pittsburgh Glass Film Shows the World of Color Dynamics

☆ *Adventure in Color*, a new motion picture of the brilliant world of color dynamics, has been released by Association Films, Inc. for free-loan use by adult groups.

The 14-minute color film, recipient of a Chris Award at the Columbus Film Festival, and an N.V.P.A. Award, is presented by the Pittsburgh Plate Glass Company and produced by Dynamic Films, Inc.

Unusual cinematic techniques show how color affects the individual in every facet of daily living. Dazzling animation by Carmon D'Avino displays color's magical qualities — how it can raise or lower a ceiling, extend or foreshorten a wall, accent a chair or sofa, set a mood, signal a danger area, or express a personality.

Designed to increase the color consciousness of its audience, *Adventure in Color* projects every imaginable shape and hue on the screen to illustrate the various associations colors produce: yellow for the cheeriness of sunlight, the warmth of a flame; green for the coolness of a thick woods or the freshness of a mint leaf; red for the fiery brightness of a lipstick and the beauty of a rose.

"Bridge of Friendship" Shows Aid Program for German Study

☆ The German Federal Republic, expressing its gratitude to the American people for Marshall Plan Aid during the difficult post-war era, has set up special funds to underwrite studies of young Americans in the country. To explain this program throughout the nation's schools, a 35-minute black & white motion picture, *Bridge of Friendship*, is being distributed (on free loan) through all 31 nationwide libraries of Modern Talking Picture Service, Inc.

Produced by Gong-Film of Hamburg, the picture relates the experiences of typical young men and women already in German universities. James Stayer is working on his Ph. D. at Frieberg University; Arthur Waron is a chemistry student at the University of Hamburg; John Coates is a student of Germanistics at Marburg University. These are some of the 400 recipients of the government stipends.

The experiences of these recipients are shown from departure on the liner which takes them abroad to their reception at Bonn by officials of the German Federal Treasury (which sponsors the (CONTINUED ON PAGE 30))

Farm Credit System's View of Changes in Rural America

☆ A new documentary film, *Credit Where Credit Is Due*, sponsored by the 37 banks of the Cooperative Farm Credit System, gives a graphic inside look at the changing face of farm business. It takes the viewer on a 28½-minute romp through American agriculture, depicting farming from Massachusetts to Texas and California.

Much is made in the film of the fantastic strides farmers have made in improving efficiency — with fewer farmers abundantly feeding

Credit at work in farm business is the theme of this new film.

and clothing our exploding population. The footage is accented with cartoon animation, while part of the story, too, comes from the lips of actual farmers being interviewed right on their farms.

In demonstrating the vast amount of substitution of capital for labor going on inside agriculture, the film places particular emphasis on the expanding use of credit. Viewers see how a portion of this credit used in farm businesses — over five billion dollars a year — is channeled from city investors to rural communities throughout the country by the farmer-owned Farm Credit System.

Audiences are expected to encompass the whole general public, not just farmers, and the film's sponsors feel it will contribute to better farm-city understanding.

Bill Snyder Films, Fargo, N.D., produced *Credit Where Credit Is Due*. It won a Chris Certificate Award at the Columbus Film Festival. Distributor is Modern Talking Picture Service, via regional film exchanges nationwide.

"Films of the Year" Will Be Featured in the Next Edition

Award-winning motion pictures and slidefilms of the year will be the subject of special feature pages in the forthcoming Issue Eight of *BUSINESS SCREEN*, publishing on December 30th. Titles, sponsors, producers and distribution sources of these "Best of 1963" pictures will make this a memorable keepsake.

Large All-Welded Truss Bridge Detailed in a Technical Film

☆ Engineering groups and technical audiences will be interested in the film story of the building of one of the largest all-welded truss bridges, told in a new 28-minute color film sponsored by the Allied Structural Steel Company.

The new \$7 million, six-lane bridge is located at Louisville, Ky. Welded steel members were fabricated at Allied's Hammond, Indiana, plant and shipped to the site by barge. The film also shows unusual welding practices, special equipment and X-ray testing techniques employed in the project. Pilot Productions produced.

Film Board Sells Over 600 Prints of "Universe" in U. S.

☆ That great National Film Board (of Canada) motion picture, *Universe*, is now running well over 600 prints in circulation in the United States alone. This film journey through space, into the far regions of the sky now perceived by astronomers, runs 28 minutes, b&w, and is available for preview and purchase (\$130 per print) from the Film Board. Write 680 Fifth Ave., New York 10019, N. Y. for details.

Focus on Video Problems and Awards at N.Y. International Film & Television Festival

Seventh Annual Audio-Visual Exhibition Held in Manhattan

EXPANDING THIS PROGRAM of awards and discussion in the direction of the television commercial, the Seventh Annual Audio-Visual Exhibition and International Film Festival held forth at New York's Barbizon Plaza Hotel from October 10th through the 13th. Spotlighting the trend toward television were numerous awards to commercials produced in the U. S. and abroad and a forum on "Who Should Control Television Commercials?"

Moderated by Roy Danish, president of Television Information Service, panelists agreed that video advertising needs some kind of control but differed on methods. They included Fred Papert, chairman, Papert, Koenig & Lois advertising agency; actress-lecturer Monique Van Vooren; Stockton Helffrich, manager, Code Authority, National Association of Broadcasters; and Norman (Pete) Cash, president of the Television Bureau of Advertising.

Pearson Speaks at Luncheon

An awards luncheon, held on the Festival's concluding day, featured an address by Wilbert H. Pearson, chief, International Communications Media Staff of the United States Information Agency. He spoke on "Passports for Ideas: How the Government Helps Films to Go Abroad." The subject has been covered in these pages by Mr. Pearson. Industrial motion pictures in eight categories, including a Grand Award, were cited for trophy honors at the event. Grand award winner of the Festival was the film, *Hands of the Masters*,

produced for the D. H. Baldwin Company by K & S Films, Inc. of Cincinnati, Ohio.

Mike Wallace, radio and television commentator, was master of ceremonies at the awards ceremony. Federal Communications Commissioner Robert E. Lee spoke briefly, adding further emphasis to this event's turn towards the video medium. Grand award winner among TV spots was *Sounds*, an Alcoa subject produced by Warren Rossell and Art Ross for Alcoa's agency, Ketchum, MacLeod & Grove, New York.

Awards to Television Media

22 other video advertising spots shared individual honors, while 14 others shared special awards, including those given to television public service programs. These were regular television programs and the grand award winner in that group was WBNS-TV, Columbus, Ohio, for the series, *Channel 10 Reports*.

The N. Y. Festival and an accompanying trade show and audio-visual seminar are commercially-sponsored events under the direction of Herbert Rosen and Industrial Exhibitions, Inc. Mayor Robert F. Wagner of New York directed a personal word of tribute to Mr. Rosen. He also said:

"This gathering reflects a cross-section of the many different groups that participate in the production of television films. The wide diversity of skills and interests that go into the production of commercials and other films seen every day on our television screens (CONTINUED ON PAGE 90)

Awards presentation luncheon was climax event on the Festival program.

The Lighting Institute Building at Nela Park is bathed in glowing light.

Symphonic Blend of Lighting and Sound as Nela Park Observes a 50th Birthday

G E Sponsors First Industrial Light and Sound Production

LIGHT AND SOUND provide a symphony of luminescence and music as the world's first industrial park observes its 50th anniversary year. Nela Park, headquarters of the Lamp Division of General Electric, near Cleveland, is offering a nightly program of illumination with a background of symphonic music and narrated commentary for this anniversary program titled, "Son et Lumiere."

This first industrial Light-and-Sound production in America takes visitors on a tour of this "University of Light" with high-fidelity stereo tape reproduction. The sound system was designed by Wilding, Inc. as an entirely new approach by this communications company in the field of industrial showmanship. Wilding's A. J. Bradford designed the sound equipment; Harvey Wilcox of the same company built the control equipment and Wilding's Harry Flagg supervised the complex, centrally-controlled installation.

Music in Mood of Lighting

After a prelude, backgrounded by Aaron Copland's music, tour begins at GE's Product Planning and Application Engineering building, continuing the musical theme from *Subjective from Statements for an Orchestra* by the same composer. The tour continues through "Lighting Marketing and Merchandising" and "Lighting Education," with music by A. E. DeFrancesco and Lucien Cailliet. "Pure Artistry

in Lighting" pays tribute to beauty as the strains of Respighi's *Fountains of Rome* are synchronized with changing moods of light.

"Lamp Research and Development" is described by the narrator as Ronald Hanmer's *Hemisphere* sets the scene; Hanmer's music also backgrounds "Lamp Performance and Testing" and "Creative Lighting." The climax of the Light-and-Sound production returns to the theme "The University of Light" as Respighi's *Pines of Rome* are heard from the speakers.

One Track Serves Control Room

In setting up this unique show, one track of the stereo tape was used for the voice and music sound track; the other supplies voice cues to the central control room. Here, the engineer in charge controls lighting dimmers and switches, all set up with low voltage pushbut- (CONTINUED ON PAGE 90)

France Wins Grand Prix at 4th Industrial Film Festival

Britain Is Second as Films of 16 Nations Compete at Madrid

EUROPE'S FOREMOST BUSINESS EXECUTIVES responsible for communications programs, joined by delegates from the United States, the Argentine, Cyprus and South Africa, were in the viewing audience and on the juries as the Fourth International Industrial Film Festival was held at Madrid, Spain, on October 14-19. Sponsored by the Council of European Federations of Industry, this year's host group was the Confederation of Spanish Industry and the event was held at its impressive headquarters building in Madrid.

The 260 delegates reviewed a total of 137 of the world's best industrial motion pictures, submitted by 16 nations. France, winner of two first prizes, tied for another "first" and with two second prizes, won the Festival's Grand Prix by a narrow margin over England. Films from Britain also scored two first prizes, tied with France for another first, and were awarded one second and one third prize.

The single United States entry to be honored was *The Challenge of Change*, produced by Henry Strauss for the American Telephone & Telegraph Company. It won a first prize in Category E (films for marketing) and was the sole winner in that group.

The rest of the International Awards honors were well-divided. Sweden won a first prize for *Maximum* in Category H (for accident prevention, health, etc.) and also took a second place award for *Atoms in Everyday Life*. Both films were produced by AB Nordisk Tonefilm. Finland won the first prize among films on industrial techniques with *Veitsiluoto*, a forest products' subject. The Netherlands scored one second place award with a Philips' sponsored picture, *It's the Tone That Makes the Music*, and was awarded a third prize for *The Building Game*, sponsored by the Netherlands Building Trade Federation.

Germany, usually a big winner at these events, had to settle for a second place tie with Spain in the category for management and manpower training films. *Ein Arbeitstag (A Working Day)* brought this prize to the sponsor, Badische-Anilin & Soda-Fabrik AG. Spain's tying entry was *Luisillo, Jose Y 3,000,000 Mas*. Germany's other winner was the third prize film (of a public relations character), *Auf gehobener Ebene*, produced for Demag by Dido Film. The third prize awarded an Austrian-produced film, *Mit unbekannten Ziel*, rounded out the 21 awards given in the eight Festival categories.

BUSINESS SCREEN observers who attended the Festival were generally agreed that Spain was ill-prepared for these events. "A very sober show," one reported, "lacking in splendor and conducted in a spirit rarely tinged with generosity." Spain, which has given evidence of interest in business gatherings and conventions, was "out of the money" this time. The prolonged illness of State Secretary Jose Solis Ruiz was a partial reason cited but what could have been a popular attraction for interested Madrilenos played to half-empty theaters.

Britain sent the largest national delegation with 39 executives going to Madrid via a chartered airplane. Italy, France and Germany were also well-represented in both the audiences and on the Festival jury. Judging the films was especially representative with thirteen out of the sixteen participating nations represented on the jury. The delegates were universally agreed that awards were extremely fair and well chosen.

Madrid, for example, revealed that standards for industrial motion picture production are reaching new heights of excellence. To win an award in today's industrial festival is a severe challenge to both sponsor and producer who have to make a film which is not only

THE INDUSTRIAL FESTIVAL REPORT:

"tops" in production values but in "communication values" as well. There is an important difference in the European viewpoint which may have put many U. S. entries at a disadvantage.

Shown in Theaters Abroad

Films in the Public Relations categories (A, B and C), intended for the general public, must now be suitable for exhibition in Europe's commercial theaters to win favor with the international judges. Why? Because sponsored motion picture exhibition in theaters is European industry's principal public relations outlet . . . all European television networks bar the sponsored program.

With the exception of Britain, Germany and Scandinavia, non-theatrical distribution to general public audiences is not as highly-developed as in the U. S. and fiscal legislation encourages theater owners to show sponsored films to their audiences. Some of the Madrid films currently playing Europe's circuits are France's *Le Champ du Possible* (a second prize winner) and its first prize winner, *Route sans Sillage*. Danish theaters are showing *One Side of the Question*, sponsored by the Danish Employers' Confederation;

in Italy, the Italsider Steel Company's brilliant documentary *Il Pianete Acciaio* is wooing theatrical audiences.

But the film which really impressed Madrid's "expert" jurors was *Route sans Sillage*, the French prize winner. It tells the story of the laying of an underground pipeline so dramatically that you really want to get down there with the engineers and construction workers to help them get the job done on time!

Specialists on Awards Jury

Communications specialists who served on the awards juries at Madrid were nominated by their national industrial federations. Spain's delegation was headed by jury president Ricardo Ruiz-Larrea and included Jose Antonio Nieves Conde, Tomas Garvia de la Puerta, Rafael J. Salvia and Luiz Torres Marquez. Austrian jurors were Rudolph Kammel and Freidrich Wanek; Belgium was represented by Robert Haulot and M. Cantillon. Denmark's jurors were Henning Undegaard and Jorgen Bagger; Finland sent Osmo Wiio and Kaarlo Larna; France was represented by Georges Duage and Pierre Vallee.

Jury members from Germany

were Georg Bacmeister and Willi Riesenberger; Great Britain sent Richard Kelsall and Hugh Wickham. Italy named Giacomo Guiglia and Mario Tonelli. From the Netherlands, our correspondent Kerst Blaauw shared jury duties with Clemens Wilde. Swedish judges were Ulf Hasselberg and Sven Hallonsten. Switzerland was represented by Rudolph Meyer and Guido Locarnini. The solo U. S. juror was Nick D'Eesery.

Other Outstanding Pictures

Among the many films of note which narrowly missed awards honors was a German motion picture, designed for shareholder audiences, Farben Fabriken Bayer A. G.'s *Ein Werk von Hundert Jahren* (*Our Centenary*), produced by Ges. fur Bildende Filme, the Munich company which produced last year's award winner, *The Rainbownmakers*. Another excellent "industrial achievement" film was *La Presa de Aldeadavilla* sponsored by the Spanish construction company, Iberduero S. A. This story of the building of the Aldeadavilla Dam really captures the pioneer spirit of the workmen who had to overcome enormous obstacles to complete the contract.

Because such Festival films are shown completely out of context,

evaluating a motion picture intended for a specialist audience is a major problem. How can a juror evaluate the effect of a safety film on construction workers, a research film on scientists, a steel film on metallurgists? Nearly half of the films submitted at Madrid were in the specialist audience category, showing the importance of this medium in technical communication. Yet, in a majority of cases, including the entries from the United States, it was not made clear who was to see the film.

Rule Changes Are Proposed

The British Industrial Film Association will propose to the Festivals' Rules Committee that a statement of the purpose of the film and an outline of its intended audience be a definite condition of entry. Other rule changes which are being proposed call for the introduction of a category for Sales Promotion Films and the extension of Categories A and F to include "popular science" films and sponsored educational pictures. At present, many excellent sponsored films of these types are either barred from entry or rejected by jurors simply because there are no categories suitable for them.

Many Festival delegates expressed regret that they did not have an opportunity to discuss U. S. entries with a representative group of American communication's specialists. The concurrent meetings of the U. S. Industrial Audio-Visual Association, followed by the Boston convention of the Society of the Motion Picture & Television Engineers was an unfortunate calendar problem.

Britain Is Host in 1964

The Fifth International Industrial Film Festival will be held in London, England from November 2nd through the 6th, 1964. A large delegation from the U. S. is being encouraged to attend this event and BUSINESS SCREEN's London office is already making preparations for it. British industry extends a hearty welcome to delegates of all countries. ■

At left: Madrid Festival viewers in this audience scene included (at extreme left) Nick D'Eesery, managing director, Eastman Kodak, Madrid, who accepted award on behalf of Henry Strauss (USA). To right of Mr. D'Eesery is Sven Hallonsten, head of visual aids section, Swedish Council for Personnel Administration, a juror.

PICTURE STORY

Above (l to r): Dr. Mario Tonelli, Italy; Mrs. Michael Shersby, of the British delegation; Sr. D. Javier de la Cueva y Fernandez del Campo, Secretary General of the Festival.

L to r: Georg Bacmeister, Federation of German Industries; Osmo Wiio, Federation of Finnish Industries; and Willi Reisenberg, Confederation of German Employers.

Left: Snr. Giacomo Guiglia, Confederation of Italian Industries, and fellow jurist Richard Kendall (r).

Richard Williams, Larkin Studios, shares prize with Gordon Braddeley and Clive Barwell, both of London.

At official opening of the Festival were these delegates from abroad (left to right): Kerst Blaauw (Netherlands); Dr. Tonelli (Italy); Dr. Cozzi (Italy); and M. Cantillon (Belgium), all members of the jury.

THE WINNING FILMS AT MADRID

CATEGORY A

First Prize: France
"Route Sans Sillage"

("Journey Without Trace")

Sponsor: Societe du Pipe-Line Sud-European. Producer: Cinetext, Paris. Directed by: Robert Menegoz.

- A beautiful and imaginative description of the laying of an underground oil pipeline across Europe.

Second Prize: France

"Le Champ de Possible"
("The Field of Possibility")

Sponsor: Ministry of Posts and Telecommunications. Producer: Societe Nouvelle Pathe Cinema, Paris. Directed by: Bernard T. Michel.

- A report on the scope of modern telecommunications technology, presented with appeal to imagination.

Third Prize: Britain

"The Sure Thing"

Sponsor: The British Insurance Association. Producer: Larkins Studio Ltd. in association with Film Producers Guild, London. Directed by: Richard Taylor.

- An amusing, instructive cartoon to explain insurance, how it works.

CATEGORY B

First Prize: Britain

"The Big Mill"

Sponsor: Films of Scotland Committee, Colvilles Steel. Producer: Templar Film Studios, Glasgow.

- Story of the building and operation of a great new steel rolling mill in Scotland.

Second Prize: Netherlands

"It's the Tone That Makes Music"

Sponsor: Philips of Eindhoven. Producer: Uniefilm.

- A film about sound waves, what they are and how they are captured on recorded discs.

Key to Categories appears on page 78 at conclusion of awards listings.

Third Prize: Austria

"Mit Umbekannten Ziel"

("Destination Unknown")

Sponsor: Federal Chamber of Commerce. Producer: Regler-Film.

- Plastics — and the extent to which these man-made materials have penetrated our lives; their uses and their structures are pictured.

CATEGORY C

First Prize: Britain & France

(shared top award honors)

"The Home-Made Car"

Sponsor: British Petroleum Limited. Producer: James Hill Productions, Ltd. Directed by: James Hill.

- A story without words. A young vintage car buff rebuilds an old Morris from pieces discovered in a junk yard. Helped by a friendly garage owner, he also gets the girl.

"Le Mur Paysage"

("The Scenic Wall")

Sponsor: Les Claces de Boussois. Producer: Cinetext, Paris. Directed by: Robert Menegoz.

- An art film of great beauty, it shows the contribution of glass to modern architecture.

Third Prize: Netherlands

"The Building Game"

Sponsor: Netherlands Building (CON'TD. ON PAGE SEVENTY-EIGHT)

Scene from "The Home-Made Car" winner of shared first prize for its sponsor, British Petroleum Ltd.

The Finnish film, "Vietsilnato," a first prize winner in Category D.

At left: scene from France's first prize-winner, "C'est cela que vous Attendiez," and (below) a scene in "Maximum," Sweden's top prize winner in Category II. It was sponsored by Folksam Insurance Company.

"... Management's need is for people who are bigger than techniques. And there is a need, on the other hand, for Management to let those with the potential grow into the complete communications job."

—Gerald Zornow

Veteran film-maker Vince Hunter reviewed developments in audio-visual media through the years.

Industrial A-V Executives Return to Rochester

Members of Industrial Audio-Visual Association Hear Challenging Talks, Visit Kodak Facilities as They Discuss Business Communication Problems at Annual Fall Meeting

MEETING IN ROCHESTER, N. Y. for the first time in ten years, members of the Industrial Audio-Visual Association gathered 64 strong at the venerable Hotel Manger in that city from September 30 through October 3 to talk out their common problems in business communications and to check up on what is going on at Kodak these days.

As usual for this hard-working group, sessions began daily at 8:30 and went on often into the early hours of the morning with screenings and critiques of member's films. Kodak, while not an official host to the association, went all out to provide members with a searching look at the latest in film materials and techniques.

Meeting Has Three Segments

Activities at the meeting can be divided into three parts — members' own papers, presentations by invited guests, and tours, seminars and discussions with Eastman Kodak people at the Kodak office building in downtown Rochester and at the big manufacturing plant, Kodak Park. Program chairman Jack O. Flynn (Union Carbide Corp.) arranged each day's events to provide diversity and a fast moving pace.

IAVA president William J. Con-

nelly (Union Carbide Plastics Corp.) opened the sessions, commenting on the uniqueness of the association and pointing out how much it had to offer each member. He said there were almost 500 years of audio-visual experience in

Pacific Railroad) took his audience back to the origination of many of the audio-visual tools of today. He remembered as a boy going to showings of "De Cou's Dream Pictures" which were hand-colored slides shown on twin pro-

Viewing demonstration of a Kodak Viscomatic processor are (kneeling): Roy Vanderford, Gordon Tubbs of Kodak. Standing (l to r): Bill Connolly, Bill Pratt, program chairman Jack Flynn, and D. G. Treichler.

the collective membership, all available to each member for solving problems that might come up in their work.

Vincent H. Hunter (Union

jectors which dissolved from picture to picture. It was the excitement of such pictures as these which brought Vince Hunter into the film field a good many years ago.

He described his own early experiences with the brand new 16mm-size film in 1923, the birth of sound in 1927 and Kodachrome 16mm movie film in the mid-thirties. Color film was so much desired in his early days at Union Pacific to show the scenic beauties of their route that all sorts of techniques were tried out, including processes long forgotten, such as Dunningcolor and Dufaycolor.

To show motion pictures in

color of the Utah and Arizona National Parks. Mr. Hunter finally engaged Castle Films to come out and shoot a film on 35mm black-and-white film — then four prints of this 10-minute travelog were shipped to Pathe, in France, where each frame of the film was hand-colored. Later, Union Pacific sponsored what may have been the first 16mm Kodachrome film, with sound, ever made.

Pratt Talks of the Audience

Willis H. Pratt, Jr. (American Telephone & Telegraph Co.) presented an illustrated talk on *Understanding the Audience*. He said the audio-visual man must watch out for the creeping lethargy that greets some films. Audiences are not automatically receptive to films, he said, and they can sometimes reduce the potential of a film presentation to practically nothing.

But definite steps can be taken to avoid some of the pitfalls — he recommended choosing the title carefully, trying to get some punch into opening sequences, keeping the technical quality high, eliminating unnecessary gimmicks and plot, and starting with concepts the viewer will accept before challenging him with more difficult or controversial ideas.

Don G. Williams, Director of Film Production and Audio-Visual Instruction at the University of

Henry Strauss told how motivation and attitude films have changed.

At left: ascending IAVA members are Jack Flynn and Charles Shaw.

Kodak provided this panel of experts for a "problem-solving clinic". Pictured left to right are Norman E. Salmons, Mgr., A-V Services; Gordon H. Tubbs, Asst. Chief Engineer, Motion Picture Products; William F. Swan,

Mgr., Sensitized Products Sales Div.; John Flory, Advisor on Non-Theatrical Films; Joseph L. Boon, Tech. Asst. to Gen. Mgr., Apparatus and Optical Division; and Edward P. Genock, in charge of Television.

Missouri, said that communications men should no longer be concerned with the competition of one media to another, but in the greater problems of affecting the behavior of audiences. He advised his listeners to become greater involved in the planning of what to say, rather than in how to say it. There is a great need for more efficient use of communications in industry, he said.

For example, 100,000 scientific journals are published annually, but much of the material is not communicated properly - half of the industrial research going on today may be on ideas and processes that are already known.

☆ Mr. Williams said that film should be made for audiences—not for bosses — he particularized, by saying that he had yet to see any messages on so-called "featherbedding" being shown to railroad employees.

John Borza, Audio-Visual Director of the Cleveland Public

New England members of IAVA exchange program notes. Left to right are: Ed Palmer, Harold Read, Byron Campbell and Milton Sebring.

Schools, said that as he left his office to come to the IAVA meeting he could see United Freedom Movement pickets walking up and down in front of the schools. This sign of the times, he said, should warn film makers to be sure that

films are representative of all races.

Cleveland's audio-visual budget each year is \$300,000—\$2 per pupil. 43 cents of this is for new materials and the rest for maintenance of equipment and over-

head. Only ten percent of the films used in Cleveland schools are sponsored, and the reason why more are not used is that they have too much advertising content, are too long for classroom use, or have little value for the curriculum.

Problems With Sponsored Films

He cited such incongruities as the outboard motor film supposedly made for school use, but featuring boatloads of girls in bikini bathing suits along with its water safety messages. Or the Bell System hour-long science films with Dr. Frank Baxter, which could have been most valuable except that their length has precluded use in the Cleveland schools.

Schools need more films on specific regions, he said, and hoped that public utilities could do more along this line. Two films which are used year after year in Cleveland, and which Mr. Borza recommended highly, are (CONTINUED ON PAGE 93)

PROBLEMS OF COMMUNICATION IN WORLDWIDE MARKETING

by Gerald B. Zornow, Vice President, Marketing, Eastman Kodak Company

I HAVE BEEN ASKED to talk about "The Problems of Management Communications in World-Wide Marketing." With your indulgence, I would like to put the emphasis on the *solutions* rather than the problems.

I understand that Mr. Watson of IBM used to tell his people there were no such things as "problems." What they called *problems* were really *opportunities*. I firmly believe that the solutions to Management Communications problems represent a real opportunity to you who specialize in the art of communicating.

The Function of Marketing

Since we are talking about "World-Wide Marketing," I think it important to first define the function and scope of marketing. In the jargon of the trade, the job of marketing is to define customer need, see that the company's products are designed to fulfill that need, and to see that the product and the customer get together.

In other words, if a new product goes well, everyone can take a bow — the Research and Development people, production people, salesmen and management. If the new product fails in the marketplace, everyone says: "What's the matter with our marketing people?"

Total Process Is Involved

Seriously, there is no more exciting area of business . . . for we in marketing are concerned with the total process of the creation and distribution of goods. When the marketplace is the world, it is particularly exhilarating.

Before discussing the solutions to Management Communication problems, I think it's essential to define — or limit — my subject.

I shall concern myself with the communication of information *within* the company and with communications to the public and customers where the *company* controls the media. In other words, we shall not concern ourselves with advertising or public relations which make use of mass media.

World View Little Different

Now Management Communications on a world-wide scale is not too different from any other kind of communicating. You have to know what you want to say, you have to have a method of saying it, and you must, above all, talk in terms the other person will understand.

Effective communications in a domestic market is not easy. On a world-wide scale, the differences in cultures and attitudes and languages can sometimes seem impossible. As one small example, consider the plight of an American breakfast food company trying to market its products in Brazil. There is no word for "breakfast" in Brazil.

And there's the story of an American businessman who attended a formal dinner in Europe where he was seated between an English woman and a French woman. In an attempt to make small talk, the American commented on the fact that that particular day — the 21st or 22nd of December — was the first day of winter. "Why, so it is," said the English woman, "that makes this the shortest day of the year." "Ah, non," said the French woman. "eet makes eet the longest night."

There's an obvious difference of attitude here requiring a different kind of communication.

Management Communications

has one primary purpose: To effectively weld together all the resources, all the skills and talents and manpower of a company, into as efficient a marketing force as possible. This, of course, is com-

Gerald Zornow challenged a-v men to utilize the full potential of today's communications media.

munications downward. It is the area with which you in A-V have been primarily concerned up to now. This area will always need a great deal of attention but let me suggest that many management communications problems lie elsewhere and let me ask whether people skilled in audio-visual techniques can help provide the solution.

Keeping Management Informed

The biggest communication problem facing management is how to get information upwards. How to control the vast volume of information created by modern business operating on a world-wide scale. How to keep top management informed as to exactly what's going on. How to retrieve information: How to disseminate information quickly and effectively.

The contribution of industrial A-V people has been considerable up to now: BUT, gentlemen, I think it miniscule compared to the problems which now confront us.

Let us look at some random statistics about the world we live in and see if we can draw some conclusions about the future. Item one: Population. Everyone knows that this has been getting bigger

— but just look and see *how much* bigger and how fast it's been growing. Here are some nice round figures: It took 240,000 years for the population of the Earth to reach one and one-half billion. Civilizations rose and fell . . . the Crusades were fought . . . and, as I said, after 240,000 years . . . the world population crept up to one and a half billion. But it took only 60 years to double that figure to the present 3 billion mark, and the *minimum* projection is that by the end of the century we shall have doubled again to 6 billion. It's a little scary, isn't it? But it's also a challenge . . . for it means millions of people each year must be educated, influenced to new ways of thought and action and buying habits.

Explosion in Scientific Data

I think A-V's role and opportunity in educating new consumers is apparent. Here's another random fact: Since the time of Sir Isaac Newton in the 17th Century, the number of scientists has been doubling at a fairly constant rate of once every 15 years. If you have scientists, you're going to create a body of scientific information. The more scientists, the more information. Today enough scientific information was *published* in 60 languages to fill seven sets of the Encyclopedia Britannica. And that takes place every working day of the year. Does this information need to be communicated?

Most certainly. An obvious result of this scientific explosion is that 60% of the products now on the market did not even exist 10 years ago. If a company is to retain a strong, competitive position in world markets, pertinent scientific information must be readily retrievable. How can it be handled?

Retrieving the Information

For truly vast quantities, electronic data processing equipment. Latest models are able to handle information at the rate of 300,000 bits a second. For most situations, however, information can be stored photographically. Modern systems such as our own Recordak can retrieve any one of a million documents in a few seconds.

Is Information Handling and Retrieval a proper area of concern for A-V people? Well, it depends on your company and I should think it depends on your own attitude about the role of A-V. Certainly no one in your company has as much knowledge

Below: Mr. Zornow (at left) enjoys pre-banquet chat with IAVA program chairman Jack Flynn (ctr) and Tom Hope (right) of Eastman Kodak.

about things photographic as you do.

For yet another example of the kind of growth that spawns communications problems, take a look at the fantastic rate of increase in corporation size. In 1930 Kodak Company was a 75 million dollar business. It took 16 years for the company to grow to 325 million dollars — a healthy growth to be sure. But look at the figure now . . . almost five times the size in about the same number of years. When you consider the broad diversification that has helped create this fantastic increase, the size of the communication problems involved staggers the imagination. These problems represent, to my mind, A-V's opportunity for growth and influence.

As American business moves more deeply into world-wide markets and as the competitive pace quickens, the amount of information created, and needed, grows dramatically.

Familiar World Trade Names

World marketing is not entirely new in American experience. Coca-Cola, Singer, Esso, Ford and Chevrolet, General Electric . . . these and many others are familiar names around the world. Why am I putting so much emphasis on world marketing? Because the world markets used to be gravy; Now they've become essential.

American productive capacity is now well ahead of the demands of the domestic market. If our Gross National Product is to continue at a healthy growth rate, we must expand the market. Consumers throughout the world must be educated to know and want what we have to offer. Although advertising and public relations must handle the primary job, I'm sure that through sales promotion techniques, A-V can also do part of the job.

Training Salesmen, Workers

One of marketing's persistent problems is to get salesmen and managers to change with the times, to accept new marketing strategies, to learn to sell new products and technologies. This is a job for A-V. As we move rapidly into the New Industrial Revolution — Automation — millions of workers must be retrained, re-educated. Here again — A-V.

And as we said already, management needs decision-making information quickly and accurately. Communications upwards is one of the biggest voids in many corporate structures. Let me also note another big job for A-V; to

help management overcome the language barrier.

Speak Other Man's Language

At the U.N., they solve it with simultaneous translation. Overseas businessmen sell in America by learning and using our language. In Europe, almost everyone speaks more than one language, frequently three or four. But most Americans have trouble enough with one. We have been lax in this country about learning other languages. Though it is true that English is becoming a universal language, I can't help feel I would sell a Frenchman, for example, better, by speaking his language than by forcing him to speak mine.

A-V, of course, can help a great deal with this problem, not only because of the flexibility of sound track but also because of the universality of the language of pictures.

Even a brief look at world markets shows we are going to need every weapon available. The creation of the European Common Market brought about, almost overnight, a cohesive, industrial colossus almost equal to the United States in both productive capacity and population and offering far greater growth potential.

Communists Are Not Idle

And the Communist countries are not sitting still. The Iron Curtain is more than a political barrier, it is a trade barrier which cuts us out of half the markets of the world. And within their sphere of influence, the Communists are busily at work peddling their wares in the very best Capitalistic tradition. Let's not make the mistake of underestimating the competition, friendly or unfriendly, in size, in quality, in marketing strategy.

The marketing concept behind this vehicle (Volkswagen on screen) has made it so ubiquitous we almost forget it isn't made here. Cheap Japanese goods? (picture of camera on screen) Don't believe it. This one lists at \$249.95 and is well made. Let's change that slide quickly — it hurts a bit.

The Hallmark of Quality

If you go out to buy leather goods of high quality, they will probably be stamped, "Made in England" or "Made in Italy." The title of "World's Most Dependable Motor Car" does not rest in this country. (Rolls Royce scene) And many American plane manufacturers have seen fit to use jet power plants with the same insignia (Rolls Royce) — not because

Abbott Laboratories Premieres Exhibit of "Chemical Man"

Science Film Shown in Circular Theater is
75th Anniversary Gift to American People

THREE YEARS IN THE MAKING, a unique new scientific exhibit, "Chemical Man" was opened to the public this past month at the Museum of Science and Industry in Chicago. The exhibit, portraying the spectrum of molecular activity that creates and sustains human life, is Abbott Laboratories' 75th Anniversary gift to the American people.

The exhibit, which is housed in an egg-shaped plastic shell 42 feet in diameter, emphasizes the incredible precision and order of the molecules of life. The story is told by means of especially-created animated motion pictures in full color, produced by Graphic Films Corporation. Three dimensional models appear in the viewing area, alternating with filmed sequences. The films and models blend into a continuous 15-minute presentation.

To enter the exhibit, which Abbott plans

to duplicate at the New York World's Fair, viewers mount a stairway into a shell which has seating and standing room for about 70 persons within its circumference. Viewers look down into a circular well where models and films are presented. Projection from continuous repeater equipment overhead is controlled by the exhibit attendant. See the illustrations at the bottom of this page.

"'Chemical Man' is an educational exhibit which we believe will leave viewers with a sense of wonder and awe at the miracle of life," said Abbott Board Chairman and President George R. Cain, prior to dedication ceremonies. "We hope that it will stimulate younger people toward an interest in scientific careers, especially in the life sciences," he concluded.

Collateral print material is in keeping with an Abbott tradition for fine design — a booklet by Donald G. Cooley is especially noteworthy. Credit should be given to the late Thomas S. Jones, renowned medical illustrator, an early consultant, and to the Scientific Advisory Group headed by Dr. Floyd C. McIntire.

Graphic Films' Les Novros describes the production problems encountered in creating the "Chemical Man" films on the facing page. Project execution for the exhibit itself was the work of General Exhibits, Inc. The original paper was by Mrs. Edith Roberts; script by Jack Dunn; models, by Richard Rush Studio.

Above: original "skeletonized" drawings for "Chemical Man" film sequences. Right: circular theater at Museum (see diagram).

Behind the Production of "Chemical Man" Film

Graphic Film's Les Novros

Tells How Unique Picture was Created

THE FIRST UNUSUAL aspect of this production was the *round* picture field. The film was to be projected downwards and viewed from all positions around a circle.

Conditioned by years of working within a rectangular frame, we found ourselves faced with a picture having no top or bottom. With some concern, we constructed a circular screen and started looking at film. We even projected it upside down. Still, it was many weeks before we overcame our pre-conditioned thinking.

Sequences in the original script called for shots of people and faces — material resembling the *Family of Man* series. The client hoped that by some method we would be able to retain this type of image in spite of the problems it posed: that one half the audience would see the picture upside down and another one fourth would get sore necks from twisting their heads.

Strive for Realism in Early Experiments

In the first stages of production we compromised by testing kaleidoscopic or pie-sectioned images. We also tried slow, overlapping dissolves and rotation experiments which yielded an unpleasant "soup" of people and faces. Shots looking down onto groups of people were also disturbing since they appeared to be standing in a hole.

By necessity, however, we were forced away from a realistic presentation into material not immediately identifiable in terms of a normal viewing angle. Sometimes the circular screen was a great help — the atom and molecule animation was enhanced by this cut-off which added to the microscopic illusion.

But the "microcosm" itself introduced new problems. It was decided that the style of the molecule animation would determine the final design of the 3-dimensional models.

A straight diagrammatic approach, although it might best explain the concepts, was dull and uninteresting. Yet highly stylized or very abstract designing would detract from the educational nature of the material. It was obvious from the start that this animation demanded unusual treatment.

"A Simplified, Diagrammatic World"

We started with conventional chemistry diagrams and models; in this way we kept the traditional configurations as skeletons. This added a certain "scientific accuracy" to the project. Obviously, any visualization of molecular or atomic activity is symbolic since it has no basis in physical reality. The microcosm of *Chemical Man* is a simplified, diagrammatic world that is made to appear full of chemical and electrical activity. It is a compromise — enabling the average viewer to appreciate the beauty and complexity of biochemistry without offending the scientist.

Working from both flat molecular diagrams and 3-dimensional models (ball and stick as well as the Fischer-Hirschfeld-Taylor) we

arrived at a representation which could be animated and also one that the model-makers could construct without too much difficulty. (The mass and color of the individual elements compares roughly to the standard models.)

The all important step was getting the artwork onto film so that it would appear mysterious, elusive and electrical in feeling. Our first experiments were disappointing. We continued to work with the familiar techniques: animated cel cycles, multiple exposures through texture screens and distortion glasses. Yet the results were not pleasing.

Multiplane Stage Built With Four Levels

Finally we constructed a small multiplane stage that could be mounted on our standard animation crane. It was most helpful in achieving the quality we were seeking.

The device consisted of four levels of glass; two inches apart and evenly illuminated. These glasses could be moved incrementally or locked into place. Animation cels were then either taped down or changed intermittently as needed. The stage travelled with the camera bed, using the normal N-S, E-W movements. Over the glass we could place jigs and guides to hold our array of distortion glasses, supplementary lenses, lenticular elements, moiré masks and filters. We were also able to move the camera very close to the top artwork without cutting off the light.

With a shallow depth of field the foreground layers of animation were put out of focus, adding to the depth effect. Most of the molecular animation required at least four passes, (some sequences as many as sixteen), each pass using a different series of moves and distortions. Exposure was controlled by a set of neutral density filters. These enabled the cameraman to accurately vary his exposure without interfering with the normal scales on the camera dissolve shutter. This was very important since many of the passes were continuously dissolving series at critical percentages.

A big problem was controlling the distance between the lens, distortion glass and art work. Slight differentials led to wild exaggerations of effect — especially in scenes where the particle size changed. We had to standardize a series of spacers and guides for each effect, and the exposure sheet language became quite involved.

Final Effects Were Achieved in Printing

The shooting ratio between experimental and final footage was about ten to one. After these techniques came under our control we designed our layouts directly for the multiple level stage. A molecular diagram would be conceived in three dimensions and broken into layers: the foreground layers designed to move faster and out of focus; the bottom layers, slow and sharp.

Many of the final effects were achieved in the printing. ABCDE rolls were eventually needed to assemble the film, and it was here that we were able to control the final balance.

It was most fortunate that we were not pressed for time. The assignment was awarded well in advance of the final deadline. This time factor, plus a relatively free hand, presented an unusual opportunity for experiment and the results, we think, were rewarding to the client and to millions who view this fine exhibit. ☐

Continued buying power among the unemployed maintains the demand for goods and services . . . keeps other people working — the power of a pot roast in their lives.

John Sills goes back to work relatively free of debt. During the period of lay-off, unemployment insurance bridged the gap when his savings ran out.

A Paradox and a Program

Coordinated Communication Tools Are Helping Counter Misconceptions About Unemployment Insurance System

ATTITUDES OF BUSINESS, labor and the general public toward unemployment insurance offer a number of puzzling, troublesome paradoxes. An important feature of the American scene for more than a generation, unemployment insurance remains a subject about which many people have strong opinions . . . but few are really knowledgeable.

Some think benefit scales are too high . . . others, too low. Some believe administration of the law is too liberal . . . others, too strict. Many don't see why we need the system at all in a generally prosperous economy . . . while still others favor expanding it.

Each State Has Own Law

Misconceptions about "UI" are, in a way, understandable. Each of the 50 states operates under its own basic legislation. Provisions of these differing laws and their application are necessarily complex. Today's climate is vastly different from the dark and driven depression era when the system was inaugurated.

Underlying all is the feeling on the part of some people that it's somehow "wrong" for a man to accept help in supporting his family; even when the problem is urgent, temporary and not of his own making. But unemployment insurance cannot fully serve its essential human purposes, and its role as an economic stabilizer, without informed and willing co-operation from employers, employees and the public. In fact, negative attitudes in these groups actually help to create some of the

very problems about which they complain.

New Program Is Corrective

These paradoxes have given way to a corrective, educational program, based on a current motion picture, *The Power of a Pot Roast*, and coordinated communication tools. The program was developed for the Division of Employment, New York State Department of Labor, in affiliation with the Bureau of Employment Security, U. S. Department of Labor. *The primary aim is to create a climate of understanding*, in which key groups affected by unemployment insurance will more clearly appreciate *their own stake* in helping make the system work to its full potential.

This is the kind of task for which the motion picture is a uniquely effective tool. It can "visualize" complex ideas in understandable patterns without misleading oversimplification. In *The Power of a Pot Roast*, the medium helps reconcile conflicting attitudes, without glossing them over, as it translates them into common denominators of basic human experience.

Story of System at Work

The intertwined problems of attitude and information are dealt with on two simultaneous levels. Slightly over half of *Pot Roast's* 27 minutes (black & white) is factual in nature, documentary in treatment. Enriching and enlivening this factual background of the need for the system and the fairness with which the law is administered is the story of what happens to a man, his family and

his community when temporary local unemployment strikes suddenly. This "dramatic counterpoint" is woven selectively into the fabric of the film, mirroring large, impersonal problems against their recognizable human effects.

In total effect, the film conveys the feeling of a slice of life. It brings home the real significance of the "distressed areas" inevitably created by technological progress and points up the specific

importance to all Americans of the corrective measures provided by unemployment insurance.

The motion picture and related materials are available to interested organizations by request to local state unemployment insurance agencies. New York groups may direct written requests for *The Power of a Pot Roast* to: Public Relations Office, Division of Employment, New York State Department of Labor, 370 Seventh Avenue, New York 1, New York.

Children "Growing Up With Deafness"

Lexington School for Deaf Sponsors Sequel to Memorable Film

TEN YEARS AGO, a memorable film was made for the Lexington School for the Deaf, in New York, which told how young deaf children were taught to speak, to read lips, and to use whatever partial hearing they may have had to the utmost ability.

This year, the young cast of this film has been brought together again for a party, to tell the perceptive cameras and microphones of Campus Film Productions how they have progressed in speaking, understanding other people's speech and getting along in the sometimes difficult world of the hearing.

Carol, Dagmar, Pat, Susan, Jan, Beverly and their friends are now confident well-adjusted young people. While they still speak in the manner of those who are born deaf, their comments are intelligible, and intelligent. We watch them as little children in excerpts from the original film, *That the Deaf May Speak*, as they struggle to master the sounds of speech which come to the hearing so easily.

Dr. Clarence D. O'Connor, Superintendent of the school, ex-

Star of earlier film, Mrs. Dagmar Ciesla, pays return visit with one of her two normal-hearing children.

plains that the histories of such young people as these are a story of hope for all children who are afflicted with deafness.

The new film, *Growing Up with Deafness*, was made for the school by Campus Film Productions under a grant by Mr. and Mrs. Harold Greenberg, of Washington, D.C. It was written by Ann and Ralph Schoolman.

Jan Silberman 10 years ago, when she first entered the Lexington School.

This charming miss has learned the value of cleanliness.

Counsel on Personal Hygiene for Teen-Age Viewers

Winthrop Lab's "Teen Aged? Have Acne?" Offers Solace in Bright, Tuneful Setting

SPONSOR: Winthrop Laboratories.

TITLE: *Teen Aged? Have Acne?*, 15 min, color, produced by Audio Productions, Inc.

Three out of four teen-agers have acne at one time or another. Most of them, using proper care, recover easily and remember acne as an unpleasant but not too important time of growing up.

This film explains that the main treatment for acne is cleanliness. Teen-agers are at a stage in life when their glands are changing and when their pores are often over-active. Vigorous and frequent skin cleansing often takes care of ordinary cases of acne. Persistent

cases should be treated by a physician, who may prescribe diet changes and other remedies, in addition to strict attention to cleanliness.

Winthrop Laboratories, which makes antibacterial cleansing products used in the treatment of acne — such as Phisoac and others — is presenting the film as a public service. There are no commercial plugs.

It is hoped that the picture will obtain wide use in high school hygiene classes. It is framed in a typical teen-age setting of dancing parties and twist music. Most of all, it is reassuring to young people, for it says that you mustn't think fate had singled you out if you suffer from acne — you have lots of company!

8mm Sound Helps Bristol Myers Introduce New Products

Three Six-Minute Color Films Show Product Highlights to Salesmen and Customers

BRISTOL MYERS COMPANY has turned to 8mm sound motion pictures to introduce three new products to its salesmen and customers across the country. The company does not believe in bringing out a host of new products in a constant stream, so any new introduction is an important event. The products — *Score*, a hair cream for men, *Softique*, a bath oil, and *Cream Ban*, a deodorant — were introduced simultaneously, but Bristol Myers wanted each introduction to be an event in itself and presented in a unique way.

Visualscope, Inc., of New York, was selected to do the job of bringing the new products to market for the first time on film. Three six-minute color films were prepared. *Score's* introduction features sportscaster Bud Palmer, who tells about the new, clear hair cream for men.

Sports Background for Film on "Score"

Palmer comments that even though Bristol Myers' own *Vitalis* is still America's leading hair preparation, there is a big market for creams — in fact 46 per cent of men who use any hair preparation use cream. Market tests show that *Score* has tremendous potential. The style of this film is all masculine, with sequences from baseball and football games to point up Bud Palmer's remarks.

Softique, on the other hand, is all feminine with a glamor-voiced fashion spokeswoman to explain about the luxurious new bath oil which

is aiming for a top position in the big \$31,000,000 market. Called *The Softique Coloring Book*, the film says that in 1957 only one out of eight femmes fatales used a bath oil, but today it's one out of three. Backed by a high saturation TV schedule, *Softique* will reach — and sell — millions of women who never used a bath oil before.

New *Cream Ban's* introductory film is in animation — it shows that while roll-on *Ban* continues to hold its big lead, there is an important market for cream deodorants, and the new *Cream Ban* will have the quality, the promotion and the packaging to take a leading place in this field.

Salesmen Take Fairchild Units on Road

The initial showing of the new films for 600 prominent people in the drug and grocery trades took place on the *SS Rotterdam* in New York harbor. Six traveling units took the films in a 16mm big-screen version to major chain store buyers, while individual salesmen throughout the country used the 8mm films on 46 Fairchild projectors to reach individual stores.

Supervising the project for Bristol Myers was Joe Kelnberger, new products manager. On the individual films, Dick Wolf of Grey Advertising watched over *Score*; Wally Kull, of Doherty, Clifford, Steers & Shenfield worked on *Softique*; and Jim Keen, of Bristol Myers, stood back of *Cream Ban*.

Grape harvest time provides a colorful scene.

Beverage With a History

"Miracle on the Vine" Brings Story of Welch's Grape Juice to Screens

SPONSOR: Welch's Grape Juice

TITLE: *Miracle on the Vine*, 28 min, color produced by MPO Productions in collaboration with Richard K. Manoff, Inc.

The story of Concord grape juice from its beginnings as a substitute for wine during church services is told in this new film, which is narrated by Burgess Meredith. It is available for free-loan to high schools and television stations through Association Films, Inc.

Miracle on the Vine tells in historical retrospect of Dr. Thomas Welch, a 19th-Century dentist and Methodist church steward, who was determined to find a substitute for the use of wine during communion. After many experiments using Concord grapes Dr. Welch succeeded in obtaining a non-alcoholic juice using Louis Pasteur's principle of preventing fermentation by heat. His first official sampler was a local minister, who heartily approved both the taste and the non-alcoholic content.

Historic photographs, engravings and other memorabilia show the public introduction of grape juice at the 1893 Chicago World's Fair, its acceptance as the "national drink" at the 1904 St. Louis Exposition and its official recognition when served by Secretary of State William Jennings Bryan at his first diplomatic reception in 1912.

This caused a diplomatic stir as spirits had always been a feature of such functions. As grape juice grew in popularity Secretary of the Navy Josephus Daniels announced that it would take the place of rum on all Naval vessels.

Much of the film shows the growing and harvesting of the Concord grape in the fertile Chataqua-Erie Belt of New York State; and the making of grape juice and other grape products in modern U. S. plants. More than 21 million gallons of pure juice are processed every year.

Miracle on the Vine was produced for MPO by Victor Solow, and written by Ed Levy. Musical director was Oscar Brand. Robert Kibrick supervised the film for the Manoff advertising agency.

Historical episode in "Miracle on the Vine."

Films of this leading German industrial concern emphasize engineering.

AEG: Power in the 8th Decade

Part Two of Dr. Hans Schaller's Report on the Film
Program at Allgemeine Elektrizitäts-Gesellschaft

One special area worthy of mention is that of cooperative production. When a consortium of engineering firms is brought together for the building of a new plant or industrial complex, its members often call for filmed documentary or progress reports for future reference.

San Nicolas, produced in 1954, showed the planning and erection work of several power station builders (SSW, Steinmueller and AEG) in the Argentine. A later film, *Multan Power Station*, shows a similar venture with other partners who helped construct a central station in Pakistan. Color footage recorded the conception and growth of a pumped water storage facility at Glems. *Sea Coast Steel Mill* was produced with Messrs. Kloeckner Steel Works at Bremen.

A Look at the Road Ahead

The road ahead? Film devoted to definitive engineering topics are certain. Long-range programming is difficult when engineering progress is as swift as it is today in the

electrical industries. Decision-making has to be equally swift on our part, if only to escape obsolescence of the finished film.

We, as manufacturers, find the industrial film an indispensable and multi-purpose tool for conveying information in a truly practical manner to a broad spectrum of viewers. In the deftness of its contriving, art must slip in unawares. *Art does not enter our films for art's sake*. A creatively-produced picture invariably attracts audiences far beyond those we may have intended to reach. But artistic effort cannot serve beyond the reality of the information presented.

Our Films Must Be Current

The film maker must be aware of the "march of time" avoiding the wasteful expense of producing much dead wood. We find ourselves indebted to many aspects of the "American pattern" of industrial film production. We've learned from their manner of presentation as well as from their highly-informative, interesting content.

As in the United States, our film men are aware that the artistic and commercial success of a sales promotional film can be related — but that there are few sales without promotion.

The subtle persuasion which emanates from a good documentary feature is most enduring. Conscious reasoning comes into play in the brand-neutral, technological process film, yet such films are also "morale builders" in the sense that they create respect for the sponsor's achievement.

The Role of Technical Films

Brand publicity films, like television commercials and screen advertisements, serve as do their counterparts in the print media. But the technical documentary delivers specific, qualitative information

in the vein of a technical or professional paper.

Our engineers say that a production process is as good as the measurable results which it yields. The statistics of a success achieved by commercial and engineering films come from counting heads and houses. The three million "visitors" who have "toured" our plants and shared our processes and production through AEG films viewed annually over the last few years, give our management evidence of solid achievement. This consistent numerical record and the growing volume of demand and commendation from the field, at home and abroad, is as reliable an assessment of the company's public image as any other factor in a company's balance sheet.

Motivation for Better Customer Relations

"I Just Work Here" Is Latest from Roundtable Productions

FOUR UNHAPPY SITUATIONS, all of which could have been avoided if the people involved were aware of their attitudes, are the solid substance of a good new 16mm "public contact" motion picture titled *I Just Work Here*. The black & white motivational film is a new addition to the useful library of such subjects produced for rental and outright print purchase by Roundtable Films, Inc. of Beverly Hills, California.

Fortunately, all four situations are unravelled for viewers in the "second half" of the picture. The episodes involve "The Difficult Customer" who is further irritated by the cold politeness and "company rule" cited by an employee. The customer in this case is wrong but the company will suffer by this thoughtless approach. The second "case" is that of the librarian who doesn't like to be interrupted by a request and especially when the man who wants to locate a book doesn't know the title or author.

Customers on the Defensive

A banker's rejection of an improvement loan is accompanied by a needless recital of "policy" and a hint that the would-be borrower's salary makes the loan a risky proposition. Self-defense might take this customer's account to another bank. The fourth and final episode takes the viewer into a data processing center where an error (by the center) requires correction under pressure. But the customer is left inconvenienced

and angry because of a defense reaction instead of thoughtful review.

These "situations" readily interpret into the vast number of conditions where employees are unaware of their attitudes. They are enacted with convincing realism by competent professional players. A leader's guide sets up discussion of each episode, drawing out the viewer's understanding of the problems and their solutions.

Where to Obtain This Film

For terms of rental or purchase write Roundtable Films, Inc., Dept. 8, 275 South Beverly Drive, Beverly Hills, California. Ask for the list of other useful motion pictures available from this source.

IFPA JOURNAL

INDUSTRY FILM PRODUCERS ASSOCIATION, INC.

Northern California Has Full Program Ahead

Chapter Off to a Flying Start With Two Good Fall Meetings

☆ The Northern California Chapter got off to a flying start with two fall meetings already to its credit among member participants. The opening session, on September 20th, was held at AnSCO headquarters in San Francisco. Guest speaker on the evening program was the well known Hollywood cinematographer, Charles Clarke, ASC.

In a memorable talk, Mr. Clarke discussed the importance of the use of the camera to assist the film maker in communicating ideas. He also demonstrated some fundamentals of set lighting and expanded on techniques necessary to create the desired effects. As the evening progressed, the program developed into a workshop as members posed questions on special lighting problems inherent in industrial films.

It was very apparent to those present that Mr. Clarke is happiest when he is discussing his favorite subject, cinematography. He made a fine impression on a large and well-rewarded chapter audience (there were 55 members in attendance).

Hear Spies on Animation

The October 18th meeting program was held in Sacramento. Guest speaker on that evening was Richard Earle Spies of Reel 3, Hollywood. A noted authority on animation, Mr. Spies spoke on the use and application of this medium in industrial work.

Audience participation provided an informative exchange on the problems with this medium. Several film makers expressed concern about the need to improve contractual procedures when putting out sequences for animation. Government's low-bid system is a serious handicap both for quality and assured sources of supply for good animation.

Special Award to Mitch Rose

The highlight of the October 18th meeting program was the presentation of a special award (see picture) to Chapter member Mitchell Rose, its past-chairman

No. Calif. Chairman Ray Jaeger (r) presents chapter's award for outstanding service to Mitchell Rose.

and also a past national vice-president of the organization. Chairman Ray Jaeger presented Mitch with a special silver trophy honoring him for his contributions. He was the first chairman elected by the Northern California group and a charter organizer. He recently completed service in his elected office as national vice-president. We're proud of him!

IFPA Journal Invites Your Articles, Personal Items

Editorial vice-president Ed Hayes (Autonetics) reminds IFPA members that these columns in BUSINESS SCREEN are open for individual news items as well as chapter contributions. Send your material to his attention, c/o P. O. Box 564, Hollywood 28, California. Remember, we're on the lookout for those feature articles on your programs and techniques . . . share the wealth with your fellow IFPA members!

Bailey Films Names Purchin as the Manager of Production

Former national secretary of IFPA, Justin Purchin, has been named manager of production for Bailey Films, Inc. An expanded program of films was announced by president Albert R. Bailey to coincide with Purchin's appointment.

A free lance script writer who served in Korea with the Marine Corps, Purchin holds an MA from UCLA's Motion Picture Division and is studying (after hours) for his Ph. D in Communications at the University of Southern California.

5th National Conference at Disneyland Hotel

Announce 1964 Program Dates: We Meet June 4, 5 and 6th

The Fifth Annual IFPA National Conference has been announced for June 4, 5 and 6, 1964. The Disneyland Hotel has been selected for conference sessions and this famed Anaheim location will provide a new standard in facilities and guest accommodations for the 1964 program.

Conference vice-president Joseph M. Gulli also announces that a well-diversified national program is already in its formative stages, covering the many specialized fields of interest to IFPA members.

The dramatic hotel site, a 60-acre "plant" with such adjacent attractions as Disneyland itself (and its many audio-visual ex-

hibits), includes the Poolside Conference Room and many other meeting places. There's theater-type seating that provides for up to 1,200 persons, top-flight food service and the utmost in room comfort.

Special convention rates have been set with Garden Rooms as low as \$11 (single) and twin bedrooms or doubles at \$15. Singles in the Tower Building (see picture) are \$14 and twin or double bedrooms are \$18. The conference arrangements committee couldn't have made a better choice. We're looking forward to the '64 Conference and inviting member suggestions before final program arrangements are completed!

One of the 300 Garden rooms available plus the new 11-story Tower.

... and there's this complete 40-acre golfing complex for our visitors.

Newest addition to Disneyland Hotel complex is 11-story Tower Building.

Getting Through to People

Stan Freberg Speaks His Mind on Broadcast Advertising Media

I SHALL NOT ATTEMPT to deal with the techniques of the industrial film, mostly because I know absolutely *nothing* about industrial films . . . having never *made* an industrial film. Let's get that straight at the outset.

The only films I have produced are television commercials and theatrical trailers for motion pictures. I know very little then about the world of film outside of advertising . . . being so "commercially" oriented. (Brainwashed would be a better word.)

Our Objective Is the Same

But the thing that relates my little one-minutes "features," as I like to think of them, the slightly longer industrial films and *Cleopatra*, say, is that each in its own way, must communicate with people or you might as well be running a piece of salami through the projector.

At my company, "Freberg Ltd.," our business is helping clients and/or agencies communicate better with their advertising dollars by getting through to people, as opposed to simply playing to roomfuls of empty furniture.

* * *

I guess you could say that I am a humorist-satirist, devoting, at the moment at least, ninety-five per cent of my time, to toiling in the ad vineyard.

But it's a tough fight, for I have created, it would seem, a rather interesting octopus which has me in its tentacles. It all started when I wrote some commercials for Cunningham and Walsh in San Francisco, back in 1956, for Contadina Tomato Paste, built around the line: "Who Puts Eight Great Tomatoes In That Little Bitty Can?"

I did it as a kind of lark, but it was so immediately successful, that today, I am still up to my earlobes in advertising and this week, seven years later, Contadina commissioned us to do our sixth campaign, built around the same theme.

Viewer's Interest Is the Key

It seems to me that it should be perfectly obvious to anybody with a grain of intelligence that you cannot communicate with another human being, whether he be a blasé theater-goer, sitting in the tenth row at Grauman's Chinese, or a brain-washed consumer sitting in his living room, unless you get through to him in some

Stan Freberg, as he delivered that challenging Conference talk excerpted in these journal pages.

way. And you will never get through to him unless he finds what you have to say in your film of some interest to him. That is why I believe entertainment to be the best means of getting through in a commercial, as in a motion picture.

In the first five seconds of that commercial, the consumer has started mentally, if not physically, for the refrigerator and/or the bathroom. There is a type of thinking currently popular, however, in your larger corporations that a viewer will sit enthralled for the full amount of this company's allotted commercial time out of respect for the excruciating amount of money paid for this air-time.

Slim Chance to Be Creative

The advertising executive who enjoys this type of never-never-land thinking is obviously smoking opium. It would seem that a young creative person with hell bent for gray flannel, a progressive light in his eager eyes, could walk into any advertising agency today and make a few waves. You would think he would be welcomed with open arms by the old guard.

Not so! From my own experience and the experiences of the numerous disheartened creative people who have my sympathetic ear, it is like fighting your way through a tapioca curtain.

Let me define the enemy. If you, as a young, ambitious filmmaker, or creative person, should walk into a hundred advertising agencies, you would meet the same account executive a hundred times. Your fresh and original new concepts would meet the same stumbling block over and over.

This prototype is hopelessly square. He lives in the world of (CONTINUED ON PAGE 87)

COMPCO

professional quality reels and cans
are preferred by...

GEO. W. COLBURN
LABORATORY, Inc.

the most "Quality Conscious"
16 mm film laboratory in America

Only CompcO offers "a new dimension in quality" recognized and accepted by leaders in the movie making industry. CompcO's superiority is attributed to a new, major advance in film reel construction—resulting in truly professional reels that run truer, smoother, providing lifetime protection to valuable film. CompcO reels and cans are finished in a scratch-resistant, baked-on enamel, and are available in all 16 mm. sizes—400 ft. thru 2300 ft. For details and prices write to:

COMPCO corporation

1800 N. Spaulding Ave., Chicago 47, Ill.

PROFESSIONALIZE

Your Film Handling
and Save Money

Harwald's precision automatic film inspection equipment is the accepted world standard for modern film libraries — T. V. stations — or wherever motion picture film is handled. Inspect-O-Film automatically finds breaks, torn sprocket holes, scotch tape "splices", any cause of film failure. Even those defects that are virtually impossible to find by hand. Also provides for film cleaning, conditioning, timing and editing.

Seven models available

See catalog for complete listing.

Get the full story. Talk to our engineering representatives and write for our catalog containing a complete line of film room equipment.

The (R)Evolution in Film Distribution

Great strides forward have been made by the national film distribution companies whose listings appear in these pages. Automated systems for control and reporting of vital audience data; new program techniques to expand the viewing audience; electronic film inspection equipment to assure print quality... these are just a few of the many phases to be included in a forthcoming special report on "The (R)Evolution in Film Distribution" scheduled for an early issue of BUSINESS SCREEN.

SPECIAL PROBLEMS?

If you've been told it costs too much, or it can't be done, try BUCKNER'S complete custom lab! 8-16mm, all services: sound reversal, processing, printing, striping, transfers from any medium. Wherever you are, we provide "one-stop service." Write for full information.

BUCKNER'S

1128 Unruh, La Puente, Calif.
Phone: (A/C 213) 330-2902

a show stopper?

never!

Your show is one smooth, continuous performance from lights off . . . to the end, with this new KODAK PAGEANT Sound Projector.

No awkward setting-up exercise at the beginning. No embarrassing mid-performance interruptions. Everything exciting that happens will happen on the screen.

This could be the first movie projector you've ever really liked.

It's the first projector with a sound system that has no electronic tubes to burn out . . . no fragile photocells to fail . . . no touchy exciter lamp to quit on you. Not even any static, or hissing, or crackling noises.

The sound system in this PAGEANT Projector is entirely different from those in other projectors you've used. It's transistorized. Its circuitry is built to shrug off bumps and jostling. It should never require fixing. It should never cost you any money. You don't carry spare parts for it. You don't need any.

Power?—enough to pump good sound through an auditorium P.A. system and be heard crisply from first row front to last row balcony.

Fidelity?—clean, commanding, steady sound, played through its own large, 11 x 6-inch speaker. The sound this system reproduces encompasses the entire range it is possible to record on film.

Putting the show on the road is no project with this projector.

It sets up anywhere. Threading film is as easy as following a red line. Throw a lever, push a but-

ton, come back when the movie is over.

The lever you throw does everything but turn on the sound.

The button you push turns on the sound.

Instantly!

No waiting for warm-up. The sound comes on full and clear, the moment you push the button.

This projector operates so quietly it never calls attention to itself. Never distracts. Never interferes with the mood of the performance. In fact, all your audience will notice is the performance.

The brilliance of the picture, the beauty of the sound, the projector itself—all of these will be taken for granted.

The name of this new projector is the KODAK PAGEANT 16mm Sound Projector, Model AV-126-TR. We've written a booklet about it which you may have simply by writing your name and address here:

KODAK PAGEANT 16mm Sound Projector
(Model AV-126-TR)

Then send it back to us at the address below. Check this box ☐ and we'll have a Kodak dealer call you to arrange for a convenient demonstration of this new machine. No obligation, of course.

ARRIFLEX at work — ONE OF A SERIES *

MIS PHOTOGRAPHER ARAM PETER MARGOSIAN USING SYNCHRONIZED FLASH ILLUMINATION AND MODIFIED KILFITT LENS

ARRIFLEX® achieves macrocinematographic objective for Moody Institute of Science

A 10-year project of photo-documenting bees maintaining their cities, communicating, telling time and even measuring distances geometrically, was culminated when Dr. Irwin A. Moon, Director of the Moody Institute of Science, Los Angeles, California completed filming "City of the Bees." In making the notable documentary, which has attracted widespread acclaim both here and abroad, Moody Institute of Science photographers relied heavily on the Arriflex 16's mirror reflex features, highly-maneuverable compactness and famed versatility. Exploring unusual procedures in macrocinematography, they synchronized stroboscopic light pulses with the reflex mirror-shutter. This permitted maximum film exposure without sub-

jecting the sensitive, delicate bees to the disturbing, destructive heat of standard lighting. The background story of this fascinating production is reported in the SMPTE JOURNAL, September, 1962 and FILM WORLD of February, 1963.

Utilizing a variety of lenses and lens combinations, the challenges of shooting from moving vehicles... within closely-restricted tree and hive areas... or combining macroscopic subjects with normal backgrounds — were all easily met. In successfully filming "City of the Bees," Arriflex once again proved itself indispensable as a photographic tool of almost limitless capabilities. On location, or in studio, it will do the same for you.

From the microscope to the missile range... from spot locations to sound stages... Arriflex professional motion picture cameras are the dominant choice of filmmakers in science, industry, and entertainment. They're lightweight, rugged, tremendously versatile — uniquely suited to a range of applications virtually without limits. Here are some of the features that give Arriflex cameras their remarkable capabilities:

- MIRROR-SHUTTER REFLEX VIEWFINDER • REGISTRATION-PIN FILM MOVEMENT • 21°-DIVERGENCE 3-LENS TURRET • CONTOUR HAND GRIP • FRAMES-PER-SECOND TACHOMETER • COMPLETE ACCESSORY SYSTEM... lenses, standard and special-purpose electric drives, power supplies, time-lapse equipment, film magazines, sound blimps, tripods.

WRITE FOR NEW CATALOG.

*YOU ARE INVITED to send us a description of your special use of Arriflex equipment.

Cinema 60 "Power Belt" for Location Use With Arriflex

A new "Power Belt" battery, supplying power for Arriflex 16mm and 35mm cameras, is now being offered by Cine 60, New York motion picture equipment manufacturer. The belt is worn

around the waist thus eliminating the need for weighty shoulder straps.

The Power Belt, which contains built-in nickel cadmium battery cells, weighs 3 pounds 5 ounces for the 8.7 volt, 4 ampere hour Arri 16 model, and 4 pounds 15 ounces for the 17.4 volt 4 ampere hour Arri 35 model.

The Arri 35 model has a switch which permits it to also be used for Arri 16's. A built-in charger allows the battery to be recharged easily from any 110 volt AC outlet.

Price of the Cine 60 Power Belts is \$148 for the Arri 16 model and \$256 for the Arri 35. Other voltages can be supplied. Further information can be had from Cine 60, 630 Ninth Avenue, New York 10019.

BUYERS READ BUSINESS SCREEN

The Wide World of Sponsored Pictures

"The Invisible Force" Relives History of Casualty Insurance

Background on the growth and development of property and casualty insurance is provided in *The Invisible Force*, a 28-minute b&w motion picture sponsored by the Insurance Information Institute and available on free loan from its film library at 267 W. 25th Street, New York, N. Y. 10001.

A series of flashbacks trace chronologically the history of insurance. The insuring agreement between a Phoenician money lender and a sea captain; an episode on the London docks shows negotiations for marine insurance. Fire insurance is depicted as the outgrowth of the great London fire

in 1666; liability insurance got its start in the 1800's. Narrator Kent Smith concludes with a review of fast changing insurance development of the space age.

The viewer is also introduced to a variety of insurance people: agents, actuaries, adjusters and safety engineers through whom the business serves its clientele. ☐

* * *

Machinists' Informative Film Visit to "Union Headquarters"

The people who belong to the nation's big trade union organizations deserve to know how things are doing down at headquarters and what the people there are doing with their funds. The imposing structure which houses

the International Association of Machinists in Washington, D. C. opens its doors, wide and handsome, in a new 24-minute color motion picture appropriately titled *Union Headquarters*.

IAM member Ken Becker and his wife are taken on a tour of the building and told how it serves members like Ken across the continent. President Al Hayes explains his job; general secretary-treasurer Elmer E. Walker reports on how the dues dollar is spent. The Beckers see and meet people who staff their headquarters.

This candid and refreshing look at the inside workings of an American institution was narrated by Gordon H. Cole. Joel A. O'Brien produced for the IAM. The film is being made available for union meetings as well as to schools, libraries and for television. A modest \$5 rental is charged; prints may be purchased at \$90. For booking arrangements, we suggest you write Mr. Cole, (Public Relations Director of the IAM) at 1300 Connecticut Avenue, Washington 6, D. C. ☐

Seagrams' Film Shows Ford's Triumph in the Canadian Open

☆ Golf films are among the most popular film fare going. The millions of golfers around the U.S. and Canada are keeping prints of *Repeat Performance*, a 29-minute color and sound record of Doug Ford's 1963 victory in the Canadian Open Golf Classic, on a "back order" basis since its release on October 15. Seagram's Inc. is the sponsor of this Crawley Films Ltd. production.

The title is derived from Ford's previous victory in the Canadian Open of '59 but it might well apply to Crawley's role. This is the 15th consecutive time this Ottawa film company has lensed the event for Seagram's! Modern Talking Picture Service libraries in Canada (naturally) and throughout the U. S. have prints for free loan. Also ask about the equally-popular films of the *Buick Open*, available from the same source. Consult the Red Book or write 3 East 54th St., New York 10002, for Modern's nearest library. ☐

* * *

Conservation Film for T.V.

A new 16-minute color film, *Conserving a Heritage*, is available (to television stations only) from United World Films, Inc. Sponsored by the American Petroleum Institute, it shows how oil prospectors are safeguarding the beauty of wilderness areas. ☐

SCIENTIFIC FILM PROCESSING

Colburn Chemists and Technicians keep a constant check on all of the steps that influence processing quality.

Densitometers, Sensitometers, Control Strips, Charts and Graphs provide objective data for critical control.

You may never see these Scientific Controls but you will see the results each time you project a Colburn Processed Print.

N. Y. World's Fair Report

Notes in Brief by Robert Seymour, Jr.

THE WORLD'S FAIR is now beginning to look like a real Fair instead of raw concrete, girders and mud as it was a few weeks ago. As you drive along the Expressway, General Motors looks big and imposing. Kodak is rapidly taking its final shape and big color photographs are being tested on the tower. Beyond these are several dozen other handsome pavilions now in various stages of completion. Films are also getting made.

* * *

Niles' Producing Port Authority Picture With 10 Arriflex Cameras on Circular Rig

Filming is going on all over the metropolitan area for a 360-degree circular motion picture which will be shown in the New York Port Authority Building at the Fair on a 195 feet circumference screen.

Crews of Fred Niles Communications Centers are shooting with an \$80,000 camera rig made up of 10 Arriflex cameras mounted in a circle atop a specially-built Land Rover Camera car. Niles' contract with the Port Authority calls for a \$100,000 15-minute motion picture and provides for \$29,000 additionally for rental of the camera rig. Producer and director is Charles J. Ticho.

* * *

Cinerama "Journey" for the U. S. Exhibit

Progress is reported on the big Cinerama production, *American Journey*, which will play in the United States Pavilion. It is now estimated that the 15-minute film will cost \$2,500,000.

A total of 30 automatic projectors and 132 different screens - many of them moving - will be used to show the movie. Negotiations are now going on with the New York projectionists' union to determine how many men will be required for necessary "maintenance" work on the automatic projection machinery.

* * *

Kodak to Take Viewers on a Balloon Ride

Upstate, Eastman Kodak is making a film for showing at the Fair about the adventures of two chimpanzees and a girl who ride in an old-fashioned wicker basket under a balloon.

(CONTINUED FROM PAGE 37)
Trades Federation. **Producer:** Polygoon-Profilitti.

• Pictures and music are enough as this film shows new building methods in modern Holland.

CATEGORY D

First Prize: Finland
"Veitsiluoto"

Sponsor: Veitsiluoto Oy. **Producer:** Suomo Filmi, Helsinki.

• One part of Finland's important woodpulp industry — the long journey of timber to pulping factory.

Second Prize: Sweden
"Atoms in Every-Day Life"

Sponsor: The Swedish State Power Board. **Producer:** Svenska Nordisk Tonefilm, Stockholm.

• Just outside Stockholm, an atomic power station is being carved out of a mountainside to provide electricity for 30,000 people. A gas-tight retainer, the heart of the reactor, is built into the cavern.

Third Prize: Germany
"Auf Gehobener Ebene"

Sponsor: Demag-Zug GmbH. **Producer:** Dido Film.

• Pictures the production facilities and products of the Demag engineering works.

CATEGORY E

First Prize: The United States
of America

"The Challenge of Change"

Sponsor: American Telephone & Telegraph Company. **Producer:** Henry Strauss & Company, New York.

• A film to train management and staff on how to adapt themselves to changing conditions of business.

(Second, Third Prizes Not Awarded)

CATEGORY F

First Prize: Britain
"Analysis by Mass"

Sponsor: Associated Electrical Industries Ltd. **Producer:** A. E. I. Film Unit.

• A film intended for scientists and technicians in fields of research where the mass spectrometer is likely to be used. Film discusses the structure of the atom.

Fourth Industrial Film Festival Awards:

Second Prize: France
"Dynamique Experimentale"
("Experimental Dynamics")

Sponsor: French State Railways. **Producer:** French Railways Film Unit.
• A study of the behavior of railroad vehicles and their rail-holding properties.

Third Prize: Sweden
"Swedish Steel"

Sponsor: Fargesta Bruks A.B. **Producer:** Svenska Nordisk Tonefilm.

• An historical account of ore mining in Sweden, with detailed information on the manufacture of various types, qualities of alloy steel. Intended as prelude to visits by steel specialists to the Fargesta plant.

CATEGORY G

First Prize: France
"C'est cela que vous Attendiez"

("That's What You Were
Waiting For")

Sponsor: Chambre Syndicale des Banques Populaires. **Producer:** Les Analyses Cinematographiques, Paris. **Directed by:** A. Cantenys.

• A light-hearted training film to bring home to bank clerks the importance of prompt customer service and courtesy.

Second Prize: Germany (Tie)
"Ein Arbeitstag"
("A Working Day")

Sponsor: Badische-Anilin & Soda Fabrik AG. **Producer:** BASF Unit.
• Typical working day at the BASF plant in Ludwigshaven — intended to be used during induction courses for new employees.

Second Prize: Spain (Tie)
"Luisillo, Jose y 3,000,000 Mas"
Sponsor & Producer: S.I.P.S.-D.N.S.

• Pictures professional training facilities in Spanish industry.

CATEGORY H

First Prize: Sweden
"Maximum"

Sponsor: Folksam Insurance Company. **Producer:** Svenska Nordisk Tonefilm.

• The film deals with the important question of the need to adapt machines to suit the people who use them, so that they can make full use of their bodies. Problems concerning workers, office staffs and housewives are examined.

Second Prize: Britain
"Fifty to One"

Sponsor: Federation of Civil Engineering Contractors. **Producer:** Drayton Film Productions.

• Statistics show that one in every 50 British construction workers is killed through accidents at work and that those who live will have at least two accidents during their working lives. This film uses shock treatment to reduce the accident rate.

Third Prize: France

"Plainte Contre Indifference"
("A Plea Against Indifference")

Sponsor: French Association of Paralytics. **Producer:** Gaumont-Actualites, Paris. **Directed by:** Jean Dague.

• A study in depth of the problems of educating and finding work for paralytics and physically-handicapped persons. This film is intended for medical men and for employment managers.

KEY TO THE CATEGORIES

Category A: films about economic and social questions of general interest, intended for showing primarily to the general public.

Category B: films about specific industrial products, materials or projects, intended for showing primarily to the general public.

Category C: films aimed less at information than do the films in Categories A & B, but which contribute to the prestige of the industry.

Category D: films on industrial techniques (management methods, increasing productivity, efficiency and output; automation, etc., for specialist audiences.

Category E: films on marketing and sales techniques for specialists.

Category F: films on industrial application of scientific principles and research, for specialist audience.

Category G: films on management and manpower training, vocational guidance and human relations within companies.

Category H: films on accident prevention, occupational diseases, health and security — for industry.

previous location when the audience moves along on the tour. A visit to Nela Park during this 50th Anniversary "Son et Lumiere" program has been characterized as an "unforgettable experience" by those who have seen and heard this remarkable industrial show.

New Sound Recording Tapes Available from Kodak Dealers

Two new professional-quality sound recording tapes, cited by the manufacturer, Eastman Kodak, to provide the answer to the technological riddle of increasing output and sensitivity while reducing print-through, are being marketed this fall through Kodak audio-visual dealers and electronic supply houses throughout the country.

Eastman Sound Recording Tape, Type A303, is basically a low-print tape with a signal-to-print ratio of 54 db. High frequency sensitivity and undistorted output have been increased 33 percent over conventional general purpose tapes to give the user more vibrant highs, a more natural balance between highs and lows.

Eastman Sound Recording Tape, Type A304, is a high-output tape which has more than double the undistorted output of conventional tapes. Output increase of 125 percent provides the professional and audiophile greater dynamic range which is said to sharply reduce any system noise problem. Available on polyester or Durol bases.

Above: Charles Lipow, organizer of Film Editing Workshop program.

THE CAMERA MART Film Editing Workshop-Seminar, held on October 7-11 at the Henry Hudson Hotel in New York, turned out to be a resounding success. Over 600 registrants were on hand during the five-day (and night) affair, averaging 200 for each session, and ranging up to 400 in attendance during some individual sessions.

The Seminar, sponsored by The Camera Mart, a New York professional motion picture equipment manufacturer and dealer, attracted people interested in film editing from over a hundred industrial concerns, government agencies, universities and military installations. The program included 45 speakers from among New York's leading production firms, labs and service houses.

Stage Set As Editing Room

The stage, in the big ballroom of the hotel, was set as a complete editing room, with 16mm and 35mm Moviolas, editing tables, synchronizers, sound readers, complete down to the last grease pencil.

Working here, as they would in their own editing rooms, were such leading picture and sound editors as Bill Kling, of CBS News; Marcel Broekman, of Professional Film Services; Anthony Termini, of Termini Editorial Services; and Angelo Ross, of Ross-Gaffney. Closed-circuit TV cameras followed their work in tight close-ups which the audience could follow on four monitors set up around the ballroom floor.

Four Outstanding Speakers

Speaking on the art and current status of the film were such luminaries as Producer-Director Stanley Kramer; John Flory, of Eastman Kodak; George Stevens, Jr., of the U.S. Information Service; and Jack Glenn, of Jack Glenn, Inc.

Following one evening's session workshop participants shuttled across town for a guided tour of the MPO Videotronics Center,

Camera Mart Hosts Film Editing Workshop

Over 600 Register for Five-Day Sponsored Program in N.Y.

which ended after midnight.

Charles Lipow, who organized the Workshop-Seminar for the Camera Mart management (Samuel Hyman, president, Paul Meistrich, vice president, and Mrs.

Anna Browning, secretary-treasurer), said there had been some industry skepticism at first that film people would come in such great numbers to such a program as this — requiring over 50 hours of

Imaginative New Sales Film Helps Sell Graflex Projector

Taking a cue from its own extensive line of audio-visual equipment, Graflex, Inc., Rochester, New York, has sponsored another motion picture to help its dealer family demonstrate the company's new 16mm sound projector. The latest six-minute color film was produced by Holland-Wegman Studios, Buffalo, under the direction of Hutchins Advertising Company, of Rochester.

A variety of imaginative photographic techniques make the projector "talk" as it sells itself. The projector's beam flutters in synchronization with its speech, a pendulum clock and some children's puppets talk and so does a classroom model of a molecule as it flies apart and reforms itself in a dozen patterns. A piece of blackboard chalk draws the film's simple threading path.

The theme music (from the "Nutcracker Suite") was well chosen as this classroom full of inanimate objects come to life to welcome the new projector. Credit for the idea goes to Hutchins'

Zeb Pike (left), writer-director of the Graflex sales film, discusses a scene with puppeteer Jim Menke

Bill Wygant; script and direction were by Holland-Wegman's Zeb Pike and photography was by John Gates of the same studio. Charles A. Shepard and Donald R. Calver supervised both script and production for the company.

The film is being shown to its intended school and church group prospects by local Graflex a-v dealers throughout the country and abroad.

150 Free-Loan Pictures in Association Films' New Catalog

More than 450 free-loan motion pictures, ranging in subject matter from aerospace to American history, are described in a new 56-page catalog published by Association Films, Inc. The films are avail-

able in 16mm sound to high schools and colleges, churches and community organizations, industries and adult groups on a free-loan basis. It is the largest selection in the company's 52-year history.

Among Association's offerings are a greatly increased number of travel and sports films. Several new documentaries reflecting the economic and political changes in the world head the company's list.

Copies of *Free-Loan Motion Pictures and Rental Subjects*, describing the films, are available free of charge by writing to Association Films, 347 Madison Avenue, New York 17. Mention **BUSINESS SCREEN** when requesting.

Puppets' action is guided by television monitor for FHA spots.

Planfilm Uses Muppets in Television Spots for FHA

Three 20-second public service television spots were designed by Planfilm, Washington, D. C. to help the Federal Housing Administration stimulate prospective home buyers to write the FHA for a booklet dealing with prudent mortgage planning. The spots are expected to show on more than 500 stations this fall.

Spots feature Jim Henson and his "Muppet" characters. In working his hand puppets, Henson pre-records the voices, then matches the action to the sound. His "viewfinder" is a television monitor fed by a television camera placed at the side of Arriflex used for the filming. Spots were scripted by Spencer Bostwick's Planfilm, with Fred Stuart of the FHA supervising.

WHEN A PRODUCER sets out to improve film quality, he's liable to run into a barrel-full of obstacles — but he'll also find plenty of helping hands along the way. That's what Cavalcade discovered this year during a six-months' effort to work out a better way to duplicate color filmstrips.

Our quest was launched early in 1963, after we sat down and carefully compared the original transparencies of our latest sound filmstrip with the color release prints. As usual, it was a disheartening experience. The originals were exceptionally rich and vivid, with the delicate skin tones we prize so highly.

Best Originals Looked Worst!

But the release prints — contrasty and washed out; completely lacked the color saturation and "presence" of the originals. And the frames that suffered the most, of course, were the ones that had looked the best on the originals.

It was at this point that our steadily growing discontent over filmstrip release print quality hardened into resolve — some way, somehow, somewhere we had to find a better way.

On the face of it, Cavalcade was ill-equipped for such an undertaking. We're a small outfit, with scarcely a half dozen permanent staff, and none of us has any special background in the complexities of color reproduction.

We Brought Problems to Ken

Nevertheless, we plunged ahead, bedeviling lab people and others in the business with questions. Along the line, we checked in with Ken Mason, manager of the Midwestern Division, Motion Pictures Product Sales Department, of Eastman Kodak.

"Why," we demanded accusingly, "can't we get as good color quality on 35mm filmstrip reproduction as we do on 16mm motion picture prints?"

After all, we argued, we were following exactly the same procedure. We went from an Ektachrome reversal original to color negative to color positive in both instances.

Patently, Mason explained the problem. In motion pictures we were using an internegative especially made for that purpose, and designed to complement the color positive release stock.

525 Not Suitable Material

In our filmstrip procedure, however, we were using a camera negative (525) not really suitable as an intermediate material. For one thing, Mason pointed out, camera

How We Improved Our Filmstrip Quality

Results of a Search for Better Color Duplicates Told

by Dale McCulley, President of Cavalcade Productions

negative is made to be exposed at one-fiftieth of a second, while the average animation camera exposes at two-fifths of a second. Because of this, and other factors, reciprocity was bound to be a problem. In short, by using camera negative we seemed to be licked before we started.

What were the alternatives?

Some studios, Mason revealed, were using motion picture internegative (5270) instead of camera negative. It was a slow film, requiring very high light intensity, but those who were using 5270 felt that it had some advantages over camera negative.

Then Mason mentioned a Kodak internegative, widely used in

photo finishing, as a possibility. But since this particular internegative, known as Kodak Color Internegative Film, Type 6008, was not in the motion picture product line, he referred us to Don Benson, supervisor of the Technical Service Lab of Eastman's Midwestern Sales Division.

Benson, in turn, suggested that we talk to Eastman's Audio-Visual Service Department in Rochester, and we placed the first of many long-distance telephone calls to Willard Libby, assistant manager of Audio-Visual Service. Libby was unhesitating in his recommendation of 6008, and promptly sent along some samples to prove his point. Once we

Cavalcade's Charlotte Meredith checks Internegative answer print as producer McCulley looks on.

got zeroed in on proper filter pack exposure and processing, Libby maintained, we would find this particular internegative vastly superior to anything else available.

We were impressed by the tests from Rochester, and immediately set out to see if we could get the same kind of results with our own animation set-up.

Early Tests Were Disastrous

At the same time, Lakeside Laboratory in Gary, Indiana, which handles our filmstrip duplicating, was involved in a series of tests of their own on 6008. In both cases, the results were, to put it mildly, disastrous. Test prints came out of the Lab literally swarming with grain. And nobody seemed to be able to explain why.

So we called a halt to further tests, and sent one of our original transparencies off to Willard Libby in Rochester, asking him as a special favor to run it through on the tail end of one of their own animations. It took awhile, but when the tests from Rochester finally arrived, excitement ran high.

"Better than the original," was the comment by a friendly competitor who had been kibitzing on our experiments.

Find Procedure for Solutions

At this point, a three-way conference between representatives from Eastman, Lakeside Labs, and Cavalcade was set up to pin down some of the technical problems involved in using 6008 for filmstrip reproduction. While not all of the questions were immediately resolved, we did come up with a procedure for working out solutions.

Meanwhile, Cavalcade was under the gun on animation deadlines. We very much wanted to use the 6008 process on the Royal Commission series of color sound filmstrips we were produc-

LaBelle Industries, Inc. Dept. B • OCONOMOWOC, WIS.

ing for a long-time client, Scripture Press, in Wheaton, Illinois.

We huddled with our client: Would they be willing to give us an extension on our delivery date on the chance that we could give them release prints of improved color quality? The answer was a prompt affirmative, and we turned back to our animation project with renewed energy.

Getting Equipped for the Job

One of the first steps was equipment: since 6008 required time exposures of several seconds, we could not use the standard animation camera and motor combination. We started out by acquiring a venerable Bell & Howell 2709 camera, and ordered a special motor-timer combination to provide for the long exposures. As with all new installations, numerous bugs developed. Several

camera modifications were necessary before the set-up functioned as we had intended.

While we were testing the camera equipment, we were also running tests for exposure and filter pack, sending the internegative to Color Technique for processing, and to Lakeside for answer prints.

At last we began to see the results we had been looking for—prints that were rich and vivid in color saturation, and remarkably low in contrast. The long search was over, and we were able to start our first full-scale production animation.

A Bonus in Lighting Effects

During our continued experiments with 6008, we discovered another bonus in the new procedure. In the past we had often shied away from low-key shots. Frames that were slightly on the hot side seemed to come through on final release prints much more successfully.

Now we find that more dramatic lighting effects can be readily accommodated because of the built-in contrast masking of 6008. Looking back, we feel that the final results were worth every tedious hour and every hard-earned dollar we put into the project. We remember with a special warmth the fact that all along the way we found people willing to go the second mile in order to help us reach our goal.

Thanks to Those Who Helped

Eastman representatives put their vast backlog of experience and technical knowledge at our disposal.

Lakeside Laboratory ventured willingly with us into the extended testing program that was necessary. Their attitude was summed up by their manager, Wayne Shertzer, "If there is a way to get better quality, that's the way we want to do it." Lakeside is now building a special processing machine to handle 6008 internegative.

Our client, Scripture Press, gave us the necessary headroom to complete our testing program and the Repair Department at Bell & Howell contributed a great deal of helpful background and suggestions, as well as service.

And out of this experience we have reached a happy conclusion: In the film business, the yen for quality is contagious!

BUSINESS SCREEN EXECUTIVE

NEWS OF STAFF APPOINTMENTS AND BUSINESS FILM INDUSTRY DEVELOPMENTS

Wilding exec: Robert Osmun

Osmun Heads Cleveland Office as a Wilding Vice-President

The appointment of Robert R. Osmun as vice-president in charge of the Cleveland office of Wilding, Inc. has been announced by H. Williams Hammer, president of the national communications company. Mr. Osmun has been an account executive and district sales manager for Wilding during the past six years.

Osmun was associated with Goodyear Tire & Rubber Company for 11 years prior to his present affiliation. He is a resident of Hudson, Ohio, and studied at Princeton, serving in the Army Field Artillery during World War II.

Riemenschneider to Wilding Staff as Account Executive

A former Look sales representative and agency man, Robert Riemenschneider has been named an account executive for Wilding, Inc. He will serve out of Wilding offices at Hudson and Cincinnati, Ohio and is responsible for account development in that state.

A graduate of Ohio Wesleyan who has done graduate work in marketing at Ohio State, Riemenschneider is a Navy veteran who served in the Pacific theater during World War II. His family home is in Worthington, Ohio.

Bennewitz at Norwood Studios

A former Robert Lawrence Productions' sales executive, John Bennewitz, is now director of special projects at Norwood Studios, Washington, D. C. He will specialize in industrial films at that studio. In a previous assignment, Bennewitz supervised film production at Kevin Donovan Films.

Jacobs, MacCrone Form the Capitol Film Production Co.

IFPA alumni Saul H. Jacobs and Charles S. MacCrone, until recently members of Aerojet-General Corporation's Documentary Film Services Department, have formed their own motion picture company, Capitol Film Productions, 5304 Silver Strand Way, Sacramento, California.

An honor graduate of UCLA in 1955, Jacobs has specialized in film production, serving as film editor at KNTV and, for the past four and one-half years, at Aerojet-General. Saul also did freelance work and was a comedy writer for the Tex Ritter t. v. show. For two years he had his

Saul Jacobs and Charles MacCrone own weekly half-hour situation comedy program on KUSC-FM.

MacCrone also studied motion picture production at UCLA, graduating in 1958. Winner of

festival award honors for an experimental-educational film, *World of Chaos*, starring the late Frank Lovejoy, he also produced *The Fabulous North Shore*, a promotional film for the Lake Tahoe-Sierra Chamber of Commerce. Latest film produced by the new company is *No Margin for Error*, a 17-minute subject created for Hoxley, Inc., Hollister, Cal., makers of packaged explosive power used in the missile and space industry.

* * *

Di Giulio to Mitchell Camera as Director of Engineering

Edmund M. Di Giulio has been appointed director of engineering at the Mitchell Camera Corporation, reporting to B. G. Tubbs, president. The former director of engineering, E. C. Manderfeld,

Edmund Di Giulio... to Mitchell

will now devote his full time as executive advisor to the management of the camera company.

Formerly with Electro Optical Systems, Inc. as a senior scientist engaged in advanced systems development work, Di Giulio also held the post of vice-president of engineering and manufacturing at Craig Research, Inc., Los Angeles. He received his BS degree in electrical engineering at Columbia University.

* * *

Dick Bowen Named Production Coordinator at Filmack Studio

Increased activity in the industrial film division has brought the appointment by Filmack Studios, Chicago, of Richard Bowen. He will serve as production coordinator, brings 12 years of studio experience to this company.

A former vice-president of Dallas Jones Productions, Chicago, Bowen is a graduate of Northwestern University and a certified public accountant. His family residence is in Barrington, Illinois.

"ONE OF TODAY'S major problems shared by almost all producers of sponsored films is a cost-price squeeze situation. Solution to the problem calls for firm action by the producers themselves."

That is the opinion of Bruce Henry, well-known free lance film writer, who recently completed an 18,000 mile, eight month personal tour of virtually all major cities west of Chicago, during which he visited many producers and discussed their problems. With him on the tour was Mrs. Henry, former radio and TV producer, who is his professional assistant.

Hope for a Better Return

Henry, who made the trip in a 24-foot "land yacht," a complete traveling office trailer, sees some hope for an easing of the current dilemma many film makers face in trying to balance out the differential between rising creative and production costs and client acceptable pricing.

He thinks a partial solution lies in a sharp examination of all cost factors which might lend themselves to a readjustment, a determined weeding-out of all personnel who are not constantly earning their way, and a "retail marketing" viewpoint toward every department or division of the organization.

"We talked to producers in Arkansas, Texas, New Mexico, Arizona, California, Oregon, Washington, Montana, North and South Dakota, Minnesota and Wisconsin," Henry said, "and we were struck by the fact that although, for the most part, the sponsored film-making industry in those areas is a remarkably active one, profits have by no means kept pace with the increased business. It is reasonable to assume this same situation obtains in many other sections of the country and may, indeed, be common to virtually all producers."

Factors of the Economic Crisis

Henry cited what are, in his opinion, the basic reasons for the economic imbalance between what it costs to make a film and what a film can be sold for in today's market.

"The obvious ones," he pointed out, "are increased demands by labor, deliberate or innocent featherbedding practices, and a 'laissez faire' attitude shared by too many people. Less obvious are management dereliction in assessing personnel worth, lack of close supervision over departmental ef-

VIEWPOINT

Writer Bruce Henry Suggests Cost-Price Squeeze Remedies in Frank Appraisal of Producer Economics Based on Tour

iciency and failure of the industry as a whole to educate sponsors out of their mistaken notion that good films can still be produced as cheaply as they could back in the pre-inflation \$1,000-a-minute days."

Every Item Must Pay Its Way

Admitting there is a danger in oversimplifying the problem and its possible solutions, Henry said he had talked with some producers who already have taken bold steps toward an agonizing reappraisal of their dilemma, particularly with reference to so-called "deadwood" personnel and departmental inefficiency.

"In a small-profit-item opera-

tion such as a Woolworth or a Kresge store," Henry said, "each bin on a counter holding merchandise is required to pay a specific amount of rent, so to speak, for the space it occupies. If it fails to return a profit paralleling that mythical rent, it is either revised, removed or replaced. There are no alibis or excuses tolerated.

"Only by applying just such tough and arbitrary standards is it possible for a low-profit company to stay alive. Today, the sponsored film business is a low-profit operation. The same sort of 'rent' standards might well be applied to every segment of a producing studio."

Henry, who has written over 200 sponsored films and whose scripts have won 43 national and international awards, said that his own personal contribution to a solution of the problem of low profit among producers is to use his "land yacht" as a mobile headquarters and writing office.

Allservice Labs Believes in Need for Specialized Services

Allservice Film Labs, which opened its doors two months ago at 35 West 45th Street in New York, is dedicated to the idea that there is a need today for a small lab concentrating on good service and quality work that will appeal particularly to the small documentary and industrial film producer.

Burton "Bud" Stone, who heads Allservice, has been aiming for just this kind of a lab for many years. It is laid out in a circular pattern with a natural flow of work from receiving to negative, timing, cleaning, printing, developing, inspection and back into shipping.

Around the outside of these functional working rooms is a perimeter area of reception room, offices, machine shop, vaults and locker rooms. The whole thing is compact, neat and hospital-clean.

Services include 35mm and 16mm black-and-white contact and reduction printing, A & B roll printing, superimposition developing of 35mm and 16mm camera dailies and sound tracks — a complete black-and-white service.

Just installed this month is a new eight-headed reduction printer, which is particularly useful for printing TV commercials. With one pass of the negative through the printer eight release prints are exposed simultaneously. It is believed that only one other such printer exists in the New York area.

Other features of the lab are an ultra-sonic cleaner, projection room with 35mm and 16mm interlock facilities, and high-speed projectors for inspection.

Bud Stone broke into the film business as an assistant in the editing room of Hollywood Television Service after graduating from Florida Southern College. He went on to do a stint at Major Labs before becoming general manager at Consolidated Film Industries' East Coast office. Most recently he has been sales manager at Movielab, New York.

Getting Thru to People:

(CONTINUED FROM PAGE 48)
"L S M F T" and "Lucky Strike Green Has Gone To War." He thinks the average mentality of the American public is 12 years old. He is the antithesis of "originality," or avant garde. He thinks film is something Colgate removes. If you mention European art pictures and speak of "the new wave," he thinks it is a product of Alberto Culver. His idea of swell entertainment is the "Doublemint Twins" and the "White Tornado."

"Blind Leading the Blind"

He is the man who is supposed to guide a sponsor or client into fresh new paths of communication. But, unfortunately, it is the "blind leading the blind." You can't blame a client—the client is like a child. That's why he is supposed to have an advertising agency—in order to lead him out of the wilderness.

The average client's idea of a swell newspaper ad is one which proclaims in 72-point type, "Our competitor's product is garbage!" This is why he has an agency—to save him from himself. Right? They move in, research it in depth, and then, with their fine trained hand, change the line to read: "Now, proof positive . . . our competitor's product is garbage!"

* * *

Clients, of course, live in a never-never-land, believing that people are truly interested in their products and will hang on their every word, no matter how dull. He clings to his copy points as a child to a security blanket and his agency deems not to show him anything wild, fresh, inventive or artful for fear of rocking the boat and/or their fifteen percent.

Breaking the Mediocrity Barrier

From where I stand, it seems terribly obvious that if an advertiser wishes to break through the mediocrity barrier, he dare not be anything BUT artful. By the "mediocrity barrier" I refer, of course, to that enormous bulk of audiovisual rubbish which comes spewing forth from the massed media, to the tune of billions of dollars a year, somehow passing for Creative Advertising.

Occasionally, someone manages to break through this wall of trivia with a dazzling display of originality and artfulness. When they do, and their originality is carefully oriented to the product, they cannot help but communicate with the consumer.

Of course, there are those in the

7471

(CON'T. FROM PRECEDING PAGE)
business who like to pretend that Newton Minow and the rest of us "protestors" have been smoking opium ourselves all this time. They may be somewhat alarmed to learn of an organization recently formed called "The League Against Obnoxious TV Commercials."

League Members in 34 States

The League's members in 34 states vote for the "terrible ten" and the "decent few" sent along every two months with the organization's Newsletter, according to the Santa Monica O. FLOOR. In the last poll Proctor and Gamble took all the prizes. The company spends more money on television advertising than any firm in the nation—\$111,000,000.00 in 1962.

It is interesting to note, therefore, that they are the proud producer of five of the ten most obnoxious commercials according to the 2,000 members of the League.

They are respectfully: Crest Toothpaste, Gleem, Dash, Blue Secret Deodorant and Ivory Liquid Detergent. The decent few are listed as Chun King Chow Mein, Goodyear, Hallmark, General Electric, Pittsburgh Plate Glass, Heritage House, Lawn Seed, Dupont, Zerox, Nationwide Insurance, Alcoa and Volkswagen.

The People Are Being Heard

The League is dedicated to letting their feelings be known through publicity, economic boycott and even picketing of the guests who make a nuisance of themselves in the living room. The people have started at last to express themselves.

This is no mere accident . . . and it didn't happen overnight. As the insatiable greed of America's larger manufacturers swelled, not accordingly with the population, but out of all proportion, people were appropriately renamed (somewhere along the line) consumers.

In order to move this overwhelming onslaught of soap, dentifrice, cigarettes, canned goods, deodorants, breakfast foods, beer, shampoos and automobiles, to name a few, the consumer had to be convinced that his mission in life was to consume and that he wanted and needed these things in abundance, whether in fact, he did or not.

To accomplish this Herculean task, the volume of advertising obviously had to be increased and the disciples of Hard Sell along Madison Avenue leapt to the challenge and/or the billing.

In their voracious zeal to sell

Getting Through to People: Stan Freberg

sell sell, they began to irritate irritate after the manner of their great leader, George Washington Hill. This worked just fine until the novelty wore off. And the listener suddenly saw the average radio commercial for what it was. Someone hollering at him. This resentment began building up. With the advent of television, it became possible to irritate, nauseate and alienate the consumer visibly as well as audibly.

One of advertising's axioms is that people are always more interested in a new product. They can always be bludgeoned into trying something new . . . once.

* * *

It is one thing to refuse to accept the new school of painless advertising, or a growing revolt of the public toward its painful counterpart; it is quite another to

continue to nurture the very type of moldy fig technique that has today's consumers laughing at its image. It is one thing to discourage entertainment in advertising; it is another to encourage mediocrity.

Granted, commercials are supposed to move products. But advertising has another obligation, it seems to me.

Must Make Cultural Effort

As the keeper of the keys to a pretty potent communications tool, it must contribute to the cultural level of our society, to actually try and raise the level, not merely help maintain the status quo.

Of course, there is hope for us all, according to my friend Howard Gossage, the San Francisco advertising pundit, co-author of the original "Eight Great Tomatoes . . ." campaign, and the man

who got me hooked on advertising in the first place.

Mr. Gossage believes: "The very bulk of advertising is its own worst enemy because somewhere along the line an immunity starts building up against irritation."

This is one of the reasons people aren't bothered more by annoying advertising than they are. If they had to absorb it all, they would go mad. Thus, we see that as the immunity builds up, it costs more and more to advertise every year.

Agencies and clients frequently make the mistake of trying to force the creative person to get too much into one commercial. Too many copy points . . . too many descriptive adjectives . . . cramming them in, as it were, with a shoe horn. It is no wonder that humor as handled by most agencies with no elbow room in which to move or play doesn't usually come off.

A Campaign in Several Phases

You can't do everything at once. When problems arise as enormous as the ones which faced the Chun King Corporation, we recommend that a campaign be conducted in several phases.

How can you expect your audience to concentrate on the technical advantages of a certain kind of packaging like a divider-pak, with vegetables in one can, sauce in the other, let alone remember such phrases as "crisp succulent bamboo shoots," when they frankly couldn't even care less about canned chow mein in general, and specifically one particular product.

Yet, this is just what this company had attempted to do for 15 years, while going through millions of dollars of advertising money and three agencies. First of all, it was obvious that we had to get their attention. To accomplish this, Phase One employed a new and secret weapon called "honesty."

And Chun King Sales Went Up

After some four months of exposure, Chun King verified that sales of Chun King Chow Mein were up 25% nationally and in some markets, 40%. Having now gotten the audience's attention, Chun King moved on to Phase Two. The time had come to put in copy points.

Over the next few months, Chun King gradually explained its divider-pak through a series of folks songs, i. e., "You get the vegetables on the bottom . . . chow mein sauce on the top." They were sung by a group of singers

ANOTHER COMPLETE COLOR PROCESSOR by TREISE!

...designed, built, and
installed for **WILDING!**

Treise has designed, built, and installed continuous laboratory processors and provided quality accessories for many of the finest film studios and laboratories in the country. Included are such outstanding names as Metro-Goldwyn-Mayer Studios, Capitol Film Labs of Washington, D.C., Purdue University, Pathe, Movielab of New York, University Microfilms, etc. To this select list of Treise customers is now added the name of Wilding Inc., one of the nation's leading producers of industrial and commercial films!

The combination 16/35 mm laboratory processor built for Wilding (shown above) is designed to handle all types of Eastman Negative-Positive Color Films. It will process

ess positive film up to 60 f.p.m. and negative film up to 50 f.p.m. The processor is equipped with sound track applicator and waxer and features the finest quality components, such as temperature control by Taylor Fulscope, flow meters by Fischer-Porter, etc.

Photo shows a portion of the circulation system installed by Treise on Wilding Project.

Getting Through to People: Stan Freberg

doing business as "The Chun Kingston Trio." Finally, we arrived at a bit of psychological warfare.

Research showed us that a lot of housewives didn't mind carrying home "takeout" food from the Chinese restaurants in little containers with handles, but were evidently reluctant to carry it home to their husbands in cans, from the store. Whether or not such research had much validity or not, it certainly seemed to me a dandy launching pad for a campaign.

When I first told Mr. Paulucci I wanted Chun King to put little randles on all their cans to help women overcome these guilt feelings, he screamed like a wounded Chinese food tycoon. "Do you realize the problems this creates, Freberg?" he shrieked.

Nevertheless, the handles went on the cans and the commercials went on television.

"The Greatest Single Promotion"

I'm sure you would be interested in knowing that the handles campaign was the greatest single promotion Chun King ever put on. From their own salesmen and brokers, to the buyers, to the consumers, the ridiculous satire of the thing really caught fire.

The rest of their budget for last year, and then some, was invested in a one-hour television special on the eve of Chinese New Year, naturally. It bore the somewhat commercial title of *The Chun King Chow Mein Hour*.

The final commercial urged people, you may recall, to buy two cans of the product . . . one for now, one for when you're hungry an hour later. In this last campaign I had started toying around with a bit of psychiatry in a supermarket. This is an attempt to tear down mental blocks that might have previously been there.

Judging from the reactions of the public, it seems that one of the fastest ways to communicate

instantly, sock the name of the product over and leave people talking about your commercials, is to satirize the types of commercials that people find most offending.

To Communicate: First Get Thru

I hope that what I have had to say did not seem too far afield from the problems of the industrial film producer, for I don't think they were.

The purpose of an industrial film is to communicate a message which might not be as well communicated through another medium and nobody ever communicated anything to anyone without first getting through to them.

So, if I have been any help at all in stating my philosophy on the art of accomplishing this . . . then I have gotten through to you.

* * *

Thermoelectric Applications Described in New Sound Film

Principles and practical applications of thermoelectrics, which use no moving parts and have almost unlimited use for cooling, heating and temperature control, are featured in a new 25-minute 16mm sound film to be released in January, 1964, by Industrial Education Films, Inc.

The motion picture was created to help product designers in many fields to apply this versatile new technology most effectively. The film was produced under the technical direction of Carl L. Sonnenschein, director of engineering at Carter-Princeton, the electronics division of Carter Products, Inc.

Industrial Education Films produces and distributes (for rental or purchase) a wide range of audiovisual indoctrination and training aids written and produced under the supervision of foremost authorities in their fields. Films are for use by management and operating personnel. Write Film Guide Library, c/o BUSINESS SCREEN, Chicago 60626, for details.

Form Customer Service Group at Capital Film Laboratories

In a series of tactical moves to provide its clients with service to match its modernized facilities, Capital Film Laboratories, Inc., Washington, D. C., has organized a new customer service group. This group of five people has been delegated to full-time responsibility for client service problems.

Two of Capital's customer service representatives are free to travel anywhere to discuss lab requirements on films during production. The other three representatives always remain in the lab, keeping a close eye on work-in-house with the help of an automated IBM production control system.

Noting an increasing demand for full producer completion services, Capital has also expanded both editorial and sound facilities. The lab now offers two recording studios, all Selsyn-interlocked, with RCA and Westrex equipment, two (8 and 10 position) mixing consoles, narration booth and engineers at hand.

A central quality control room also remotely monitors the 16 printing and six processing machines. A continuous training program has been inaugurated.

PROBLEMS OF COMMUNICATION IN WORLDWIDE MARKETING:

(CONTINUED FROM PAGE 41)

they are cheap, but because they fulfill a need.

Other countries are catching up on that old American production know how. They are faced with over-production too. And they are selling here because of their marketing strategies and their ability to *communicate*. In matters of taste and design, they often talk our language better than we do. Many countries have plants more efficient and modern than ours if only because our planes did such an efficient demolition job back in the forties.

Examples of Progress Abroad

Who has the greatest need for rapid transportation? We do! Who has a 120-mile-an-hour Monorail? Not us, the Japanese. I can go on all evening, Gentlemen, with examples from adding machines to fine imported whiskey and with products other than consumer goods too — specialty steels, giant transformers, machine tools, plywood and on and on.

We have some very competent competition with well-defined marketing strategies. And they are learning how to sell to the consumer most effectively.

This chart (shown on screen) shows the size of the challenge. From a high point of 23 billion dollars in 1957, United States gold reserves as of September 25th are at a low of 15.6 billion. At this moment we are a bare 3½ billion above our absolute required reserves and the rate of decline is nothing short of frightening.

It's Up to American Industry

Despite possible government moves in such fields as foreign aid cuts, or bringing back our servicemen from Europe, in the long run it's still American industry and marketing know-how that offers the most promising and believable opportunity for putting our country into a more secure and favorable position in world markets.

American business cannot afford to be complacent. This is a time for us to put all our marketing strengths to work for us. This is a time to find solutions to the "Problems of Management Communications." It is time for me to "talk turkey."

I hope you won't consider me a rude or ill-mannered guest if I

put forth the suggestion that audio-visual people have not lived up to their potential in the field of communications. I don't think that A-V has been sufficiently flexible or responsive to the *complete* communications needs of large companies. Different people offer different reasons for this situation. One person puts the blame squarely onto top management. "Management people don't always recognize their own communications problems, until they are in trouble and need Audiovisual to help bail them out."

I think this is probably a fair statement. Audio-visual departments *do* tend to be relegated to the position of a service group. When someone wants a few slides to illustrate a talk, he calls A-V. But that's not likely to produce a good communication tool.

Job Viewpoints Too Narrow?

Other people put the monkey on A-V's back. They believe that audio-visual people have taken too narrow a view of their own jobs. They are not "communicators" in the full sense but, rather, experts in a specialized communications technique. Now although I think it's possible to justify this narrow interpretation of A-V, I must say that the communication needs of any corporation go far beyond this traditional view.

Being able to create visuals for a speech or produce a film to do a specific job are admirable skills to have, but we need much broader help. We need more than better bar graphs. Many things need to be communicated in ways other than traditional A-V techniques. Management's need is for people who are bigger than the techniques. And there is a need, on the other hand, for management to let those with the potential grow into the complete communications job.

Should such people come from the audio visual field? It seems sensible. You are already skilled as communicators; you need only broaden your horizons. You'll have to fight for a place in the sun. Marketing people lived a kind of underground existence for years. Engineers ran companies; production people moved up to presidencies; in some companies financial people move faster, in others, the legal or sales.

But, gentlemen, when the need

arose for broad marketing concepts rather than narrow specialization, marketing people who had been preparing for years came out like moles, blinking in the sun.

Need is Total Communication

I'm suggesting to you that A-V is nearing a similar situation. The need for "total communications" ability is becoming readily apparent. Some large corporations are already setting up "Communications Managers" — specialists who report to the president or similar high echelon executives. I'm sure that in this room are people with illustrations of communications activity that begins to move in this direction. Let me give just a few examples of how management has used A-V people imaginatively and effectively.

One of your members who works for a large oil company was sent to South America to solve a rather odd situation. The country had recently nationalized the oil industry. The workers were protesting. They preferred to work for the American company. The A-V "specialist's" job was to help sell them on the benefits of working for their own government. Not exactly a "Yanqui, go home" situation and it speaks well of the oil company. His mission, I understand, was accomplished. I am certain that the virtues of A-V rose dramatically in the eyes of his management.

A Cue from Photo-Journalism

Another example: A soft drink company was having difficulty getting accurate market information from a certain area. They decided to send a skilled photographer-reporter to this country. His job was a journalistic assignment, just as if he were employed by LIFE Magazine or United Press. He spent several weeks on the report, returning with several hundred slides and a four hour report, a report which was seen and heard by only ten or so executives.

Another example: An Audio Visual specialist from one division was brought in to do a communications survey of another division which marketed entirely different products. The job: To find out where the company's internal communications tended to break down, to devise better methods for getting messages upward, to measure the effectiveness of signals downward.

Management Seeks Broad View

Obviously, this kind of communications activity goes far beyond the production of a slide presenta-

N. Y. WORLD'S FAIR REPORT:

(CONTINUED FROM PRECEDING PAGE 77)

80 Days, the chimps drop in on such Rochester activities as a Little League baseball game — the chimps get in the game and win it.

The balloon got away the other day — with no one in it — and Kodak director Sam Scribner had to chase after it in a rented plane. It finally came down in a field about 50 miles away. Some days you just can't win!

* * *

Protestant Council Objects to Content of Film on Christianity Planned for Fair

At the Protestant and Orthodox Center a controversy has arisen over a film on Christianity which has been planned for showing during the Fair.

Co-chairman Emilio B. Knechtle of the Protestant Council and program director J. Marshall Miller have resigned in protest at the content of the film, which they have called "sacrilegious".

The film has been said to depict Christ or a figure seemingly like Christ in the role of a circus clown riding on a donkey. But the Rev. Dr. Dan M. Potter, executive director of the Protestant Council, says the hero is not Christ, nor a clown, but will be an allegorical Christian made up in the manner of pantomime to express sympathy and joy.

The dispute in the Council is said to be between liberal and evangelical members. Mr. Miller believes the film would only appeal to a sophisticated few, and would fail to reach the thousands of possible converts at the Fair.

The council is going ahead with the film as planned. Rolf Forsberg, of Chicago, is now completing the script for the picture.

STATEMENT OF OWNERSHIP, MANAGEMENT AND CIRCULATION (Act of October 23, 1962; Section 4369, Title 39, United States Code). 1. Date of filing: October 8, 1963. 2. Title of Publication: Business Screen Magazine. 3. Frequency of issue: published eight times annually, at six-week intervals. 4. Location of known office of publication: 7064 Sheridan Road, Chicago, Cook, Illinois 60626. Location of headquarters of general business office of the publishers: same. Names and addresses of publisher, editor, and managing editor: Otto H. Coelli, 7064 Sheridan Road, Chicago, Illinois 60626.

7. Owner: If owned by a corporation, its name and address must be stated and immediately thereunder the names and addresses of stockholders owning or holding 1 percent or more of total amount of stock. If not owned by a corporation, the names and addresses of the individual owners must be given. If owned by a partnership or other unincorporated firm, its name and address as well as that of each individual must be given. Business Screen Magazines, Inc., 7064 Sheridan Road, Chicago, Illinois 60626; O. H. Coelli, 7064 Sheridan Road, Chicago, Illinois 60626; Robert Seymour, Jr., 442 West 37th Street, New York, N. Y.; D. D. McCutcheon, Chicago, Illinois; Helen Speer McCutcheon, San Francisco, California; Catherine M. Baker, Evanston, Illinois.

8. Known bondholders, mortgagees, and other security holders owning or holding 1 percent or more of total amount of bonds, mortgages or other securities (If there are none, so state): NONE.

9. Paragraphs 7 and 8 include, in cases where the stockholder or security holder appears upon the books of the company as trustee or in any other fiduciary relation, the name of the person or corporation for whom such trustee is acting, also the statements in the two paragraphs show the affiant's full knowledge and belief as to the circumstances and conditions under which stockholders and security holders do not appear upon the books of the company as trustees, hold stock and securities in a capacity other than that of a bona fide owner. Names and addresses of a corporation which itself is a stockholder or holder of bonds, mortgages or other securities of a publishing corporation have been included in paragraphs 7 and 8 when the interests of such individuals are equivalent to 1 percent or more of the total amount of the stock or securities of the publishing corporation.

10. Total No. Copies Printed (Net Press Run): Average No. copies each issue during preceding 12 months: 8,500; Single issue nearest to filing date: 8,500. B. Paid Circulation: 1. To term subscribers by mail, carrier delivery or by other means; average number of copies each issue during preceding 12 months: 7,500; single issue nearest to filing date: 7,517. 2. Sales through agents, news dealers, or otherwise: none. C. Free distribution (including samples) by mail, carrier delivery or by other means: average No. of copies each issue during preceding 12 months: 1,000; single issue nearest to filing date: 983. Total number of copies distributed (sum of lines B1, B2 and C): Average No. of copies each issue during preceding 12 months: 8,500; single issue nearest to filing date: 8,500.

I certify that the statements made by me are correct and complete.

Otto H. Coelli, Publisher

INDUSTRIAL A-V MEETING:

(CONTINUED FROM PRECEDING PAGE 39)

General Electric's *A Is for Atom* and Ford's *The American Cowboy*—both excellent contributions to classroom education.

Mr. Borza saw little future for the 8mm format in Cleveland schools — with \$4,000,000 invested in films and equipment—all on 16mm—there is little likelihood of changing over to another system.

Rigg Describes A-V Activities in Europe

Robinson P. Rigg, of the LONDON FINANCIAL TIMES and European Editor of BUSINESS SCREEN, described audio-visual activities among various European countries.

In Britain, a new British Industrial Film Association has been formed and seems flourishing; in Germany, industrial film men form a committee on the German Federations of Industry; French sponsors and producers belong to the Centre d'Etude et de Diffusion du Film d'Information; Norwegian Industrial Council's a-v training course before joining the industrial audio-visual association.

Belgium's industrial film organization is called the International Audio-Visual Technical Centre. Mr. Rigg showed examples of European industrial film work.

A-V People Must Face Attitude Changes

Henry Strauss, of Henry Strauss & Co., spoke of many of the illusions that persist in considering ways of motivating people and changing attitudes. For instance, he said, it is an illusion that the language of management speaking to workers is anything like that of workers talking to workers; it is an illusion that everyone wants to make a lot of money as a major aim in life. There have been many changes in attitude amongst both workers and management in the past 15 years; what was valid in 1946 is not necessarily true any more. Audiovisual people must now be prepared to face such new problems as international marketing on a major scale.

Eastman Kodak's role in the IAVA meeting was coordinated by the company's two Advisors on Non-Theatrical Films, John Flory and Tom Hope, who did a splendid job in providing top level officials to answer every sort of question on how Kodak operates on its own audio-visual affairs, and what it now offers in the way of new materials and technical assistance to audio-visual practitioners everywhere.

See Early Film on Visit to Eastman House

During a visit to the George Eastman House and its museum of photography, members were shown an early commercial film—circa 1916—which described the perils of writing checks without a Todd Photograph check-writer. At the Kodak office building, tours were made through five departments of the company which are concerned with audio-visual affairs. The company produces information films for use by the general public; it supplies slide shows with recorded talks for camera clubs; it provides audio-visual services to management; produces sight and sound training materials for in-plant training; in fact, as befits the world's largest photographic man-

(CONCLUDED ON FOLLOWING PAGES 94 & 95)

TELL YOUR STORY EFFECTIVELY-AUTOMATICALLY

America's most popular audio-visual sales and training tools... pictures and sound work together automatically to present your story effectively for maximum impact and retention.

**AUTOMATIC
FLIP-TOP**
Sound Filmstrip Projector

MICROMATIC
Sound Filmstrip Projector

A most effective sales tool... this compact, lightweight, self-contained brief case type unit automatically presents 35mm sound filmstrips on its 9 x 7 screen without darkening the room. Sets up ready for use, in seconds.

DuKANE

Effectively presents your training story for maximum retention. Just set it up and turn it on... use the built-in screen for table-top training... also projects brilliantly onto a large, conventional screen for big classes.

DuKANE

IN THE PICTURES

At left: Bill Connelly and Bob McCaslin with Kodak's Gordon Tubbs during "fast take" of meeting film. Right: Frank Meitz and Charley Shaw checking a Kodak Reflex camera.

INDUSTRIAL A-V MEETING:

ufacturer, Kodak is thoroughly audio-visualized in almost every aspect of its operations.

But "audio-visual" is not a word the company overly admires - it connotes "high budget" to many people, whereas Kodak uses these communications tools on a day-in day-out basis for briefing, information, training, reporting - as commonly as the printed word and with greater effectiveness.

Facilities Designed for Audio-Visuals

To use audio-visual materials properly, rooms should be designed to accommodate them —Kodak has a multitude of rooms which combine not only all the design factors necessary for audio-visual and conference use but which are also handsome and simple rooms as well. Dr. Henry Yutzy, an Eastman Kodak vice-president, spoke to IAVA members about research and development now going on in the company, and where it will lead.

After a tour through the film manufacturing facilities at Kodak Park, the IAVA group inspected the facilities of the Kodak Auditorium, one of the finest such buildings anywhere. Its capacity is 2,224, and the stage is 119 feet wide by 37 feet deep and five stories high. Lighting, sound and projection equipment — 35mm, 16mm and slide — are as extensive as those in any of the country's larger theatres.

From Noon-Hour Movies to Conferences

In a demonstration, synchronized 35mm and 16mm reduction prints of the same subject were projected side-by-side on the giant screen to show comparisons of brilliance, grain and color.

In addition to regular use for in-plant lunch-hour movies, Kodak employs the auditorium for technical and management conferences, and for experiments in theatrical motion picture technical characteristics.

Closing out the meeting, a Kodak panel of Norman E. Salmons, Manager, A-V Services; Gordon H. Tubbs, Assistant Chief Engineer,

Motion Picture Products Sales Division; William F. Swan, Manager, Sensitized Products Sales Division; John Flory, Advisor on Non-Theatrical Films; Joseph L. Boon, Technical Assistant to the General Manager, Apparatus and Optical Division and Edward P. Genock, TV film department, answered questions from the floor on technical and operational problems of IAVA members.

Believe 8mm Future in Magnetic Sound

Among other subjects covered, the Kodak panel said that they believed the future of 8mm sound films still lay in magnetic sound, not only because it is inherently better sound, but because magnetic prints retain their picture qualities longer, suffer less from scratches because of the magnetic track's own width being a protective layer. This, they said, was very important for 8mm films receiving much usage.

They believe that it will be possible some time in the future to "freeze" the magnetic track so it could not be erased, and there exists now a method of putting an ultra-sonic note on the 8mm track which can be detected by a film inspection machine. If the note has been disturbed, the machine notes it immediately.

Zornow Challenges A-V Men at Dinner

The featured speaker at the IAVA banquet, Gerald B. Zornow, Vice-President, Marketing, of Eastman Kodak Company, put forth the suggestion that audio-visual people have not lived up to their potential in the field of communications. They tend to be relegated to the position of a service group — experts in a specialized communications technique.

This narrow interpretation should be changed, Mr. Zornow feels, "because management needs people who can do the complete communications job. You are dedicating your lives to one of the most exciting areas imaginable. Communications is the glue which holds society together. It is the stuff of which great corporations are built. It is the secret in-

INDUSTRIAL A-V MEETING:

gradient in every vast and successful enterprise."

IAVA's program committee for the fall meeting was: Jack O. Flynn, Chairman, (Union Carbide Corp.), William H. Buch (American Cyanimid Co.), Gordon W. Butler (American Can Co.), Willis H. Pratt, Jr. (American Telephone & Telegraph Co.), Daniel Rochford (Standard Oil Co. - N. J.), Frank S. Rollins, (E. R. Squibb & Sons), Henry F. Stolte (Chas. Pfizer and Co.), D. G. Freichler (Socony Mobil Oil Co.) and Alan E. Yost (Bethlehem Steel Co.).

New members elected during the meeting were J. Richard Worthington, a producer of audio-visual materials at General Motors in Detroit, and Craig Tenney, a presentation consultant at Collins Radio, Cedar Rapids, Iowa.

Annual Meeting in Chicago Next April

Other business included the confirmation of the new Continental Hotel in Chicago as the site of the next meeting, to be held on April 28-29-30, 1964. Program Chairman Paul Dowty (International Harvester Co.) has already lined up some exciting speakers, including Ward Quaal, head of the Chicago Tribune Group of television stations.

As a special inducement for members' wives to attend, Mrs. Ellen Dowty, Mrs. Velma McCaslin and Mrs. Nancy Warnock are arranging fashion shows especially for the IAVA ladies in the big stores along the Miracle Mile, as well as luncheons at the Chicago Yacht Club on the city's Lakefront.

New Oxberry Name Reflects Broad Line

The well-known trade name "Oxberry" has now been applied to the new corporate name of the Animation Equipment Corporation, 38 Hudson Street, New Rochelle, New York. Now known as the Oxberry Corporation, this firm has broadened its lines from animation stands and Oxberry animation cameras and is now manufacturing optical printers, filmstrip equipment, special projectors and several types of process cameras. There has been no change in ownership or finances, it is noted.

The Oxberry precision film movement is featured on most of the company's products, however, and an expansion of the company's engineering staff is planned as it speeds development on new concepts and designs.

Now It's Stewart Filmscreen Corporation

A long-established manufacturer of seamless projection screens used in theaters as well as motion picture and television studios also has a new corporate name. The former Stewart Trans-Lux Corporation is now the Stewart Filmscreen Corporation, according to its president, Roy C. Stewart.

Problems of Communication:

(CONTINUED FROM PAGE 91)
tion or a film. It demands a sensitivity and an awareness to the company's policies and philosophies, long term objectives and marketing strategies. It demands people who understand the "who, what, why, where, when and how" of the journalist, and who can apply this kind of straightforward thinking to any management communications problem.

It's More Than Techniques!

Slides — yes. Films — by all means. Programmed learning machines — very likely. Closed-Circuit TV — perhaps. The techniques of communications must be available and mastered. But Management needs more than techniques. It needs creative thinking and perhaps a higher degree of sensitivity to an audience than Management itself may have. For their *internal communication problems* Management needs the kinds of talent and creativity, concepts and skills which they now command in the mass media field from Advertising and from Public Relations.

Let me put it this way: If a company is engaged in world-wide marketing, I am absolutely certain that the management team has large, unresolved communications problems. These problems must be solved. I don't claim to know the answers. I'm not a communications man. Neither are the top executives in your company. But I am certain they are aware of the problem; and I am certain that they will recognize the solution — if and when you provide it.

An Opportunity for Growth

As I said, you'll have to fight for it. No one is going to hand out big budgets just because you ask for them. No one is going to build the path for you; you might even get a few rocks thrown in your way. But if you have solutions to Management communication problems, the Audio-Visual Department in your company is going to be more important than it has ever been before.

Gentlemen, I thank you for this opportunity to let off some steam. You are dedicating your lives to one of the most exciting areas imaginable. Communications is the glue which holds society together. It is the stuff of which great corporations are built. It is the secret ingredient in every vast and successful enterprise. And right now, gentlemen, it is needed more than ever before in history.

THE CASE FOR SPONSORED FILMS

POSITIVE EDUCATIONAL CONTENT
— UNACCEPTABLE COMMERCIALISM
ACCEPTABLE FILMS FOR SCHOOL USE

Miss Emma Fantone, Co-Director, Audio-Visual Center, Montclair State College, Montclair, N. J.

WHY SOME TEACHERS USE SPONSORED FILMS (and why some do not)

"SOME DO because an effective film can make a positive contribution to the curriculum and serve an educational need. When a film relates well to basic concepts, it becomes for many teachers a durable instructional resource. A sponsored film can, and often does, bring into the classroom the most up-to-date information about industrial processes and techniques. Unobtrusive sponsor identification in a good film is not objectionable. Its running time should permit showing and discussion within a single class period.

"SOME DO NOT when a film does not relate to the course of study, when the content is too elementary, too general or too specialized...when its content is biased, misleading, obsolete or factually incorrect...or if it is not available when and where it is needed. Most important, the classroom cannot be a market for 'hard sell' advertising. Distasteful commercialism keeps films on the shelf instead of on the projector."

Partners in Success: These films qualify as successful school programs. Each tells a sound, educational story and each was professionally produced. Distribution through Modern achieved these results:

WHAT MAKES PROSPECTS DOLLAR CONSCIOUS?

The salesman's own attitude towards price often can build price resistance in the prospect.

To immunize your men against price-fear, here's a forceful color filmstrip. It shows how to focus sales presentations on product advantages:

"Developing the Right Attitude Towards Price"

stressing the need to put price in its proper place, by a knowledge of product properties and benefits. Salesmen learn how to handle price resistance, and how to build prospect acceptance inspired by the virtues inherent in a product.

This practical and resultful color filmstrip is one in a series:

"SELLING IS MENTAL"

filled with valuable ideas on attitudes and techniques in dealing with people. Six filmstrips designed for use in 18 sales meetings.

Entry Deadlines Loom for National Film Award Events

READER INTEREST in 1964 film awards events dictates that *impending entry deadlines* for some of the most worthy of these programs should be our first order of business. Most imminent is the midnight, January 20th, closing date for entries of 16mm films and 35mm filmstrips to compete for Blue Ribbon Awards of the Sixth Annual American Film Festival, sponsored by the Educational Film Library Association.

There are 34 categories which EFLA groups under the general headings of Art and Culture; Business, Industry and Public Relations; Education and Information; Health, Safety and Medicine; and Religion and Ethics. Information about this April 29-May 2 Festival and entry blanks may be obtained from EFLA, 250 West 57th Street, New York, N.Y. 10019. ☐

* * *

Entries Close February 12th for 21st Safety Film Contest

☆ If you've produced or sponsored an outstanding motion picture or sound slidefilm for safety education in 1963, entries are invited for the annual safety film contest conducted by the National Committee on Films for Safety. The closing date for the 21st annual competition is February 12th.

Safety film contest categories are: Occupational, Traffic & Transportation, Home, General Safety and TV subjects. For information and entry forms write at once to William Englander, Secretary, National Committee on Films for Safety, 425 N. Michigan Avenue, Chicago, Illinois 60611. ☐

* * *

NAM Invites Entries of Best '63 Industrial Relations Films

☆ An important showcase for the best in films for industrial relations purposes is again being provided at the forthcoming 36th NAM Institute on Industrial Relations, sponsored by the National Association of Manufacturers, to be held at Hollywood, Florida, March 8-13. Both motion pictures and sound slidefilms either produced or first made available to the public during 1963 are invited to enter on or before February 10, 1964.

Awards were made for the first time last year to five outstanding subjects. To qualify, these titles must be "related to the specific

needs of the industrial relations function or be suitable for showing to employees on an interdepartmental basis"; they can "be appropriate for showing to the employees of the average American industry, rather than only to those of one particular industry;" and, they should be "directed primarily toward an audience of employees, rather than toward the customer or the community as a whole."

The closing date impends. All inquiries and entries should be addressed to William G. Johnston, Director, NAM Institutes on Industrial Relations, 2 East 48th Street, New York, N.Y. 10017. ☐

* * *

So. Cal. Industrial Advertisers Include Films in Competition

☆ Of a more regional character but most deserving of mention is the 8th Annual Industrial Advertising Awards Competition sponsored by the Association of Industrial Advertisers of Southern California. The chapter includes motion pictures, sound slidefilms and slides in this program. Uniquely, it also separates color from black-and-white entries; high from low budget projects, so that all entrants compete at their own budget levels.

For entry blanks (deadline here is February 1st) call Gerry Holtz, awards chairman, Maurice A. Kimball Co., DUnkirk 8-6178 in Los Angeles. ☐

* * *

Entry Lists Close February 1 for American TV Commercials

☆ Entry deadline for the 1964 American TV Commercials Festival is February 1st. All U. S. and Canadian commercials telecast for the first time during 1963 are eligible to compete. Entries may be made by advertisers, their agencies, producers and television stations.

Board chairman Barton A. Cummings of the Compton Advertising Agency heads the 1964 Council of Judges which will meet in five regional groups. Awards luncheon will be held Friday, May 15 at the Waldorf-Astoria in New York. Entry forms are available from Festival headquarters, 40 E. 49th, New York, N.Y. 10017. ☐

* * *

☆ The 14th Annual Production Review (our *next* issue) will list all awards programs in detail. ☐

The Miniola Editing Machine

The "Miniola" is designed to meet the requirements of the smaller budget 16mm film producers while offering the same precision and many of the facilities of the higher priced models. It is portable and can be bench mounted or a purpose built stand supplied.

It has a continuous movement with drive of a novel design giving instant stop and reverse without the aid of magnetic clutches, brakes and electronic relays. Being exceedingly easy to maintain.

The upper film path is for picture and the lower film path for separate optical and separate magnetic sound. Either film path can be moved independently of each other through de-clutching the sprockets simply by lifting the knob on the front of either sprocket.

Precision cut sprockets and both film gates are in non-magnetic stainless steel.

The machine can be bench mounted or used on a special stand that is available as an extra.

\$1895

F.O.B., N.Y.

Continuous movement suitable for negative and positive viewing • Film paths declutchable • Projected picture 6 1/4" x 4 1/2" • Instant stop and reverse • High quality sound • 2000' capacity • Separate magnetic, separate optical and combined optical and magnetic heads • Synchronous and double speeds • Program timer (optional) • Footage counter • Portable

Camera Eye THE EDITORIAL VIEWPOINT

GREAT AUDIENCES FOR GOOD FILMS

THE AWARD-WINNING FILMS listed in this issue (see page 13) are only *symbolic* of hundreds of current, useful pictures serving their intended audiences. But it is no coincidence that our second cover feature, reporting trends in film distribution, leads off the main editorial section. The potential audience for good, useful films of all kinds is the greatest in modern history!

Consider the facts which illuminate an important new era in factual films. In chronological sequence, the nation's secondary schools are among the best-equipped owners of 16mm sound equipment. There are 12,100,000 teenage boys and girls enrolled in both public and non-public high schools. And there are 4,386,000 young men and women enrolled in U.S. colleges and universities.

The total labor force in 1962 approaches 75 million. Shareholders in American business have increased from 6,500,000 in 1952 to 17 million in 1962. Consider the much-maligned business of farming — about 23 million people (one in every three in our work force) — have jobs related to agriculture. Farmers are spending more than \$28 billion every year for production supplies and another \$15 billion for the everyday needs of family living.

These figures are not diminishing. The teenage population, in fact, is growing by leaps and bounds. And the means at hand for reaching these *types of viewers*, these vast potential audiences, are expanding in like proportion.

16mm sound motion picture equipment continues to go into the nation's schools, churches, industries and community organizations at the rate of 40,000 new machines each year; the tremendous year-end surge in color television set sales has opened a new vista for color films. The public's urge for truly interesting, informative viewing fare is reflected in the popularity of public-service films on television.

Theatrical opportunities have been increased for factual, colorful short subjects as new drive-ins and shopping center theater construction more than makes up for a temporary lull in that area. At least 15,500 theaters are "open" to sponsors of good pictures which meet exhibitor and theatergoer quality standards.

The nation's specializing film distributors have evolved many new techniques; have opened new paths to larger audiences. Employees are viewing films at lunch hours; Films for Freedom have been collated; "Resort Cinema" is bringing films to vacationers.

What are we waiting for? Subjects abound; ideas must generate creative answers for alert, intelligent sponsorship. Television has already proven that *print alone is no longer enough*. Let the talents of production meet the needs of business with courage and imagination. The audiences are waiting and the means are at hand to reach them via *sight and sound!*

Don't buy it

try it.

The way to sell anything easier and better is through visual persuasion. Demonstration. Right on your prospect's desk.

How? With the Videotronic 8, the lightweight repeating 8mm sound projector that puts your sales story across the same way every time, at any time. Simple to use. One-knob control. Takes up to 15 minutes of motion-picture film. Has a self-contained screen and sound system.

You can try this proven sales-improvement system by simply leasing the Videotronic 8. No need to make a major capital investment to equip your

sales force. Most lease plans average out to less than 75¢ a day per man.

Any film you now have can be easily converted to use in the Videotronic 8. Or we can make a film for you. After all, MPO is the world's largest producer of sponsored films.

Call or write MPO Videotronics, Inc., Repeater Sales Div., 210 W. 65 St., N. Y. 23. (212) TN 7-8200.

ARRIFLEX® 35

... only 12 1/4 lbs light!*

**but
very
heavy
in
performance!**

Today's filming jobs break fast, demand the best equipment. So, check out the fabulous Arriflex 35. Pick it up, heft it. It has the right feel—and at no more than 12½ pounds. Makes for hours of effortless filming—studio or location, on the run or in the crowd. **ARRIFLEX 35—the undisputed favorite when the action really counts.**

Precision works throughout, too. The Arri people didn't skimp to make that weight. Better engineering does it all. From the knurl on the knobs to the brilliant reflex mirror shutter system. **ARRIFLEX 35—the head of its class in compactness, portability, dependability.**

Not to mention continuous design improvements most others only talk about. Now the clap-stick is no longer needed. Arri research offers you a built-in signal generator and automatic start-marker for true lip sync with any ¼-inch tape system; the governor-controlled motor activates marker lights which flash key frames at the start of each take. Factory-equipped, of course.

ARRIFLEX 35—a leader in film-making unsurpassed for exclusive features and money-saving advantages. **ARRIFLEX 35—the preferred camera system of cinematographers world-wide—in commerce and industry, the sciences, education, news and sports, entertainment and the arts.**

There's a valid reason for it. Take an Arriflex in hand and see for yourself.

Steel Shapes the World's Fair

"Designs Against the Sky" an Exciting Preview of N. Y. Exposition

SPONSOR: American Iron & Steel Institute.

TITLE: *Designs Against the Sky*, 13 min. color, produced by Audio Productions, Inc.

★ The modern, versatile steels which are being used to create new architectural shapes and designs for the New York World's Fair are the subject of this 13-minute color motion picture, *Designs Against the Sky*. Their application to a variety of breathtaking projects by architects, designers and engineers is recorded for the guidance of builders of the future.

Here, in one place and at one time, much of the nation's finest talent from the design professions is at work on a billion dollar undertaking that will set the styles for tomorrow.

Shape of Things to Come

Their imaginative designs, framed with steel, are being fashioned into airy circles, triangles, curves, arches and soaring free-forms. They show in dramatic fashion how modern steels can be used to create buildings of every conceivable shape. But most of the variegated steel skeletons will not be seen by visitors when the fair opens on April 22. By that

time they will be covered by exterior building materials.

Recognizing this, the American Iron and Steel Institute asked Audio Productions, Inc., to produce a film to show the role of steel in the construction of the fair. *Designs Against the Sky* is a tribute to the creative architects, designers and engineers whose imaginative steel designs will help establish themes and moods for 70 million visitors to the fair.

Shows Versatility of Metal

For years, many people have thought of steel as an old fashioned material of great strength but little beauty, suitable mainly for massive structures such as skyscrapers and bridges. But the film of the fair structures shows the great versatility of modern steels, which permit the designer to let his imagination soar without limitation — to design structures of any shape, with exquisite beauty and economy.

The film shows the pavilions and exhibits from the designer's viewpoint, stressing creative design concepts as well as imaginative uses of steel. Most of the designs call for large, open spaces within the structures, unobstructed by supporting columns. New high-strength steels and new design techniques provide necessary structural strength with great saving of space, materials and money.

Erection Speed a Key Factor

Speed of erection was another factor favoring steel designs, because the fair structures have to be completed before opening day April 22. Structural steel parts can be prefabricated to precise dimensions under closely controlled shop conditions — then speedily erected in the field under almost any weather conditions.

High salvage value of steel was another important design consideration, as most of the pavilions must be torn down after the fair. Steel-framed buildings not only

(CONTINUED ON NEXT PAGE)

Above: steel-framed prisms staggered vertically to 80-foot height form complex of geometric shapes housing Electric Power and Light exhibit. Below: Simmons Company exhibit utilizes this structural steel frame designed as an "oasis of tranquility" symbolic of the trade name "Beautyrest."

Below: 120-foot heliport is atop Port of New York Authority exhibit building. Glass-enclosed restaurant is below the flight deck.

focus on film safety

Kalart/Victor 16mm projectors have a reputation for film safety. For 35 years, Victor Projectors have had three Safety Film Trips (one for each film loop) as exclusive components of the film transport mechanism. These Safety Film Trips spot film trouble before it happens and stop the projector instantly and automatically. Saves thousands of dollars in film damage annually.

Kalart/Victor's large diameter Single Drive Sprocket moves film in and out of the projector smoothly and at one constant speed . . . no chance for film "pile up." These features give even beginning projectionists full confidence, allow them to concentrate on putting on a good show, with no interruptions. And a good show it will be with a clearer, brighter picture and brilliant sound . . . a combination that increases learning power. For full details see your Kalart/Victor dealer or write:

Unique 10-Camera Rig Used by Niles for Port Authority Film

The Port of New York-New Jersey Authority, completing a circular theater in its Heliport and exhibit building at the New York Fair, will literally surround viewers with a 360-degree film presentation. The 12-minute film telling the dramatic story of the New York-New Jersey Port and its 14 million neighbors will feature panoramic views of the area, emphasizing transportation facilities operated by the Authority.

Crews from the New York studios of Fred A. Niles Communications Centers, Inc. are said to have developed new filming techniques for the "wrap-around" picture. A sub-contract was awarded to the Chicago firm of Behrends, Inc. to design and build, in consultation with Niles' technicians, the unusually distinctive camera needed for the circular images.

10 Cameras on Circular Rig

The intricately-synchronized device is actually composed of 10 professional 16mm Arriflex cameras mounted on a circular rig. Weighing 650 pounds, the unit was leased to Niles for six months to

cover duration of filming. It is undergoing rugged use with crews shooting from helicopters, rafts on the Hudson and from the top of the George Washington Bridge. It will also be hung under a jet plane to capture dramatic scenes.

The rig is 40 inches in diameter and the same height. The 10 cameras are mounted to shoot up into 10 circularly-aligned mirrors. Each camera is equipped with a 12½mm lens by Taylor, Taylor & Hobson of London, covering an angle of 42-degrees. The extra six-degree latitude on each lens will be corrected by masking on the projection equipment. Without the mirrors, continuity between cameras of objects moving horizontally at close range would be broken.

Ralke Is Equipping Theater

Audio-visual contractor William C. Ralke, long experienced in this special field of presentation through his work on the Circarama Theater, etc. is already at work on the theater installation. It will utilize a central projection gondola with 10 Eastman synchronized 16mm sound projectors, with the new Xenon cold lamp source. This marks Ralke's third World Fair installation. He previously designed special a-v equipment for use at the Brussels and Seattle Expositions.

* * *

"Atomsville, U. S. A." at Fair Brings Science to Youngsters

☆ Young visitors to the New York 1964-1965 World's Fair will receive special attention in a section of the Atomic Energy Commission's exhibit. The exhibit at the Fair's Hall of Science in the Transportation Area

Niles' crew member adjusts shade protecting ring of 10 cameras and mirrors on unique rig used to film 360-degree picture for N.Y. Port.

will introduce the principles of atomic science to the youngsters as they operate interesting new science-educational devices.

This children's section, called *Atomsville, USA*, is designed to appeal to youngsters between the ages of 7 and 14. The rest of the exhibit, titled *Radiation and Man*, is also devoted to explaining principles of nuclear science, but for older students and adults. It includes other new educational displays and a large percentage of audience-participation devices.

A featured unit of the exhibit is a short motion picture projected from overhead to give a 360-degree image on a horizontal, bowl-shaped screen below. This film shows the tracks of subatomic particles as they appear in cloud chambers, bubble chambers and spark chambers.

There will be another short motion picture on power reactor installations throughout the country.

Show Abbott's "Chemical Man" Exhibit to N.Y. Fair Visitors

These columns have already previewed (NUMBER 7, 1963) the "Chemical Man" exhibit theater and its fascinating film-in-the-round at Chicago's Museum of Science & Industry. The sponsor's (Abbott Laboratories) exhibit at the New York World's Fair will duplicate the setup, adding untold thousands of viewers of this "spectrum of molecular activity that creates and sustains human life." The film, a combination of animation, live action and phase microscopy, was created by Graphic Films Corporation, of Hollywood.

Graphic Films is also in production (in conjunction with John Houseman) on a monochrome Cinemascope film, *A Voyage to America*, telling the story of immigration. It will be presented in the U. S. Government Pavilion at the New York Fair.

An excursion through space and time, projected in a dome-shaped theater via 65mm color film, is also in production at Graphic Films for the Fair. It combines animation, 3-dimensional models and live action to take viewers beyond the farthest galaxies, moving finally through earth to man, the cell and, ultimately, to the atom itself.

Sight and Sound at the Fair

The General Cigar Company will show a spectacular color mo-

tion picture as a feature of its New York Fair exhibit. Film Effects of Hollywood is completing special effects on the picture.

Recorded sounds of primitive languages will be heard by visitors to the "Pavilion of 2,000 Tribes" at the Fair. The Wycliffe Bible Translators, Inc. (WBT) is the sponsoring organization of the 8,000 square-foot exhibit in the International Area. The story of primitive cultures and arts and crafts will be shown through a large photo exhibit.

United World Films announces the release of a 28-minute documentary on the New York Fair, titled *Come to the Fair*. The film was produced by Dudley Pictures Corporation and is being offered for sponsorship by industry by UWF, an official licensee.

"And Then There Were Four," Safety Film Classic, Re-Issued

The classic highway safety motion picture, *And Then There Were Four* (narrated by James Stewart) has been "out of print" for months and unavailable to many groups and organizations who recognize its impact for safety education showings.

These prospective users will be gratified to learn that the film is being re-issued. New prints as well as replacement sections are now available from Datafilms, c/o Parthenon Pictures, 2625 Temple Street, Los Angeles 90026. Direct your inquiries to the attention of W. T. Palmer.

Rev. Fore to Direct BFC for National Council of Churches

The Rev. William F. Fore is the new executive director of the National Council of Churches' Broadcasting and Film Commission. He was director of the Department of Visual Education, Methodist Board of Missions where, since 1954, he has been responsible for planning, production and distribution of audio-visual materials in the home and foreign missions programs of The Methodist Church.

Effective February 1st, Fore will assume responsibility for religious radio-TV and film production and distribution on behalf of 31 major Protestant and Eastern Orthodox communions cooperating through the National Council. He will also head the BFC's broadcast training program for churchmen nationwide.

A MAN YOU CAN LEAN ON THAT'S KLOPMAN

and ... to put a sales message across

Klopman leans on "Moviematic"

Klopman Mills, Inc., a division of Burlington Industries, wanted to show their new color film "Man You Can Lean On" to 4500 top buyers and store training directors across the country, plus about 7 to 8,000 retail sales people. To do this they supplied each of their local representatives - all women - with a KALART VICTOR Moviematic Repeater projector loaded with a 16mm sound print of the film. These representatives then carried the convenient Moviematic to the store people. If however the buyer, Klopman pictured the "Man You Can Lean On" in the best selling atmosphere ... and you can do the same for your business. With the Moviematic you're not selling in the dark. You can see what arouses your prospect's interest ... then clinch the sale. That's because the last time you showed it, the film was rewinding itself ready for this time. Is Klopman enthusiastic about Moviematic? You bet! More buyers are specifying Klopman, not just any fabric. How about your product? You can purchase, lease or lease-to-buy the Moviematic. Ask your KALART VICTOR dealer or write:

A Preface to These "Consensus" Awards

— THE COVER FEATURE —

THE "CONSENSUS" WINNERS of 1963 awards at 10 national and international film festivals are presented on the facing page. These 115 sponsored motion pictures have been cited by juries of widely-varying pedigree — but all serving in good faith and with great diligence the cause of a medium for which all have intense enthusiasm. Fortunately, also, an increasing number of these jurors had the expertise in *subject matter* to qualify for serious judgment of these complex subjects.

One thing is certain. This magazine does not *use* the film medium as a self-serving, promotional gimmick, promoting "awards" to please advertisers or cluttering the field with so-much "hardware" and "wallpaper." If anything, we maintain vigilant watch over a too-evident trend towards the film awards program as a fund-raising and tourism promotional device.

List Winners at 10 Events

The 10 programs from which these "consensus" citations derive include the American Film Festival, sponsored annually by the Educational Film Library Association; the exemplary, community-oriented Columbus (Ohio) Film Festival; the Council on International Non-Theatrical Events (CINE) which clears films to overseas events; and the International Industrial Film Festival, sponsored by the Confederations of European Industry and including U. S. films which are selected through our National Association of Manufacturers.

Readers of this publication are aware that our "model" of film awards selection is that of the National Committee on Films for Safety, representing on its juries the heads of every principal national organization concerned with safety education. In 1963, also, the National Association of Manufacturers gave further consideration to the valuable role of the film medium in its sponsorship of an Industrial Relations Film Forum, held in conjunction with the NAM's annual Institute on Industrial Relations.

Includes Industry Producer Awards

Members of the Industry Film Producers Association selected the best films produced within that group, awarding both "Cindy" and (CONTINUED ON PAGE 64)

READY — AIM — FIRE

The only reason for a sponsor to invest in a business film is to persuade some people to do something; think something; feel or decide something . . . to motivate them toward a desired objective.

In less abstract terms: like a gun, a picture needs an aim, a bullet, and a trigger.

The "aim" is the residual impression we want the film to leave — what our viewers will be thinking or feeling, perhaps subconsciously, as they leave our screening and, hopefully, for some time afterward. "Maybe I'd better not follow other cars so close on the Freeway" . . . I wonder if I'm carrying enough insurance?" . . . "This company seems to have a real concern for its customers, I'll look for their labels."

The "bullet," of course, is the actual content of the film; the facts and figures, the solid materials which will provide the impact.

And the "trigger" — I've never been able to work out a satisfactory term for it, but call it the motivation-seed. This is the phrase, hopefully not more than a dozen words (and preferably fewer) from which the whole picture will grow, and out of which will emerge our residual impression. Sometimes, with real luck, this seed can be captured in the picture's title; to express a drug company's quality image, "WITH CARE AND CONCERN" . . . to stimulate tourist travel . . . "THE MANY MICHIGANS" . . . to increase job-respect for telephone information operators, "MAY I HELP YOU?" . . . for Planned Parenthood, "FAIR CHANCE" and "THE COSTLY CROWD" . . .

Sometimes the seed phrase must be longer. A 1947 Disney film was built on "Menstruation is the periodic visible evidence of a normal and natural cycle which is going on continuously within the body." (With this seed-phrase crystallized, this difficult picture was halfway home.) And in "AND THEN THERE WERE FOUR" the seed-phrase read: "The only difference between a minor violation and sudden death is a tenth of a second and God's providence." These pictures were released in 1947 and 1951, and are still active; largely, I think, because of "the good seed."

This motivation-phrase, this persuasion-core, or whatever we call it, sounds so simple — after we get it. It usually comes hard. But in the familiar progression — "Ready — Aim — Fire," the key word — without which the others waste the sponsor's good money — is the first word.

The Washington Film Commentary

by Mary Finch Hoyt, Correspondent

THE HIGHLY-SUCCESSFUL 16-day U. S. Food and Agriculture Exhibition recently concluded in Amsterdam drew more than 135,000 visitors to the enormous steel and glass R.A.I. exhibition building in that Netherlands city. Well worth the price of admission alone (55¢ in U. S. currency) was the opening exhibit, an eight-minute, 70mm Panavision motion picture titled *Bounty Without Boundaries*.

Shown on a huge encircling screen in the "Multi-Vision Theater" at the Exhibition, theme of the brief film was the common interests of farmers in Holland with their counterparts on the American farm; both of them benefiting from foreign trade. The 120-foot circular theater was constructed with 14,000 cinder blocks; narration was in Dutch language.

Fred A. Niles Communications Centers produced *Bounty Without Boundaries* for the Department of Agriculture. Highly-specialized 65-70mm optical printing equipment and unique matte printing techniques were used in the production of its photographic special effects. These were supplied by Film Effects of Hollywood.

J. K. McClarren, Director, International Trade Fairs Division, Foreign Agricultural Service, U. S. Department of Agriculture, was in charge of the Netherlands' Exhibition. Other features of the \$1.5 million show included a miniature American county fair, a supermarket, kiddie kitchen and a Western (cookout) barbecue, all of which were extremely popular with European visitors.

Peace Corps Receives 12,500 Filmstrips from E B Films

☆ The Peace Corps has accepted a gift of 12,500 educational filmstrips valued at \$75,000 for use by its volunteer teachers in Africa, Asia and Latin America. Donor was Encyclopedia Britannica Films, Inc.

The filmstrips will be assembled into 350 libraries on English, geography, biology and America. These will go to all 47 countries in which Peace Corps volunteers are presently serving. The largest supply, 203 libraries, will go to African countries, with the largest concentration of Peace Corps teachers. Latin America will get 57 libraries; the Near East and Southeast Asia, 48 libraries; and the

Newton Minow of Encyclopedia Britannica Films shows filmstrip to Peace Corps' director Shriver who received gift from film company.

Far East is to receive 42 libraries.

In accepting the filmstrips, Peace Corps director Sargent Shriver said the gift "represents a unique degree of cooperation between the Corps and the American business community.

"In nearly every country where our volunteers serve," Shriver said, "there is a critical shortage of teaching aids. Our task is to provide manpower to the developing nations but we have no funds to give backup support with teaching aids or other material goods. The gift by Encyclopaedia Britannica Films will substantially extend the effectiveness of our work throughout the world."

A limited number of battery-operated filmstrip projectors will be shipped with the strips, the Peace Corps said.

"Wilbur Gets the Message" About Payroll Savings Plan

Companies conducting Payroll Savings campaigns among their employees are encouraged to show a new 16mm free-loan sound film, *Wilbur Gets the Message . . . About Payroll Savings*, now available through state offices of the Savings Bonds Division, United States Treasury Department.

The film stars Alan Young and the cast of TV's popular "Mister Ed" series. Premiered for leading Treasury volunteers at the recent national Savings Bonds sales conference in Washington, the film was sponsored by the Chrysler Corporation and produced by Filmways Productions, as a public service. Jake Mogelever, veteran director of promotions for the Savings Bonds Division, supervised production from Lou Derman's broad-appeal script. Al Simon was executive producer for Filmways.

Guided **FILM** Missiles

ROCKET

PICTURES

6108 Santa Monica Boulevard
Hollywood 38, California

IN WASHINGTON:

Thiokol Film on Navy Missile Program Approved by Defense

Script approval for an industry-sponsored film on the Navy Missile program has been given by the Department of Defense to the Thiokol Chemical Corporation. Filming is scheduled to begin in early 1964. The picture will outline the historical development of Navy missiles, documenting their modern-day employment in control of the seas.

Thiokol has played a key role in the development of Navy rocket engines over the years, most recently on Bullpup, X-15, Polaris and Subroc plants. Script for the new project was created by Carl Ragsdale Associates, Inc., New York City, in cooperation with the Navy and Thiokol. They will produce the film in association with Film Enterprises, Inc.

Four Black November Days Recreated in an Historic Film

A short, dignified film containing historic motion pictures of the four black November days after President Kennedy was assassinated has been made available for 8mm and 16mm projector owners. Adapted from Telenews' professional footage, the 10-minute reel was edited by Robert Johnston of Capital Film Laboratories, which will also distribute the film.

As yet, the motion picture chiefly evokes a familiar sense of be-

reavement. But while viewing the unprecedented footage, one also knows that soon—and always thereafter—pride will replace the sorrow.

There are many unusual scenes in the film, which was narrated by Julian Barber. For those with a sense of history, the account of President's Kennedy's tragic death is available in 8mm silent (\$5.95), silent 16mm (\$11.95) and in 16mm sound (\$19.95) from Capital Film Laboratories, 470 E. Street, S. W., Washington 24, D. C. National or regional film distributors who wish to secure prints should use this same address.

Communicable Disease Center Announces Four Appointments

Staff changes in the Public Health Service's Audiovisual Facility at the Communicable Disease Center (U. S. Public Health Service) in Atlanta have been made as part of its current reorganization and expansion moves.

Charles N. Farmer Jr., LL.B., is now Chief, Utilization and Distribution Section; Norman L. Cole has been named Chief, Graphic and Photographic Arts Section. George C. Maloney, former vice-president at Film Counselors, Inc., New York, has been appointed Chief of the Scenario Unit. Former ATLANTA JOURNAL staff writer Katherine Skogstad, is now Information and Publications Officer for the Facility.

Report Shows How Television Stations Use Sponsored Films

A NEW RESEARCH REPORT, "How Television Stations Use Business Sponsored Films," will be published in January by Modern Talking Picture Service, Inc.

Advance text studied by BUSINESS SCREEN shows that 98 out of every 100 television stations show sponsored, public service subjects and that the majority telecast them on a weekly basis.

The stations were asked what subjects they would prefer in future free films. A wide variety was mentioned, but the leaders were sports, travel and public service, in that order.

The stations also indicated a very strong interest in programming films in series format (related subjects for a specific audience, such as women or sports fans).

"This study was commissioned to obtain current data on how sponsored films are used and to

profile the factors that determine their acceptance and use," says Ralph Del Coro, Modern's vice president in charge of sales promotion and development.

"In recent years, almost every new sponsored film has been produced with television circulation as one of its primary goals. The opportunity is as great as ever, as our study shows. But competition for air time has become keen. We think the study can help sponsors and producers win that competition."

The study was prepared by John T. Fosdick Associates of New York. It is the third such television survey commissioned by Modern since 1955.

Copies of the report will be available free in January from any Modern sales office or from the company's headquarters at 3 East 54th Street, New York, N. Y. 10022. Write on your business letterhead to offices noted.

ARRIFLEX at work — ONE OF A SERIES *

NBC NEWS CORRESPONDENT MARTIN AGRONSKY (FAR LEFT) INTERVIEWS CAPT. EDWARD COOKE ABOARD U.S.S. GEORGE WASHINGTON WHILE ARRIFLEX RECORDS THE EVENT.

DOWN UNDER, WHERE ELBOW SPACE IS A LUXURY, THE COMPACT ARRIFLEX FILMS MISSILE-FIRING ACTIVITY.

Filming of a realistic exercise aboard Polaris submarine U.S.S. George Washington, was climaxed by the actual launching of its missiles into the Atlantic Missile Range. News Correspondent

Martin Agronsky, Associate Producer Daniel Karasik and a crew of four created an hour-long documentary color film, "Polaris Submarine: Journal of an Undersea Voyage," shown over NBC-TV Network. Director Tom Priestly and Cameraman Scott Berner selected the compact, easily maneuverable Arriflex 16 for the pioneering job. The NBC newsmen, first TV team ever permitted aboard during a mission, met the Polaris

ARRIFLEX® goes underseas in pioneer recording of POLARIS missile launching

sub at sea. Once submerged, the George Washington was under "battle" orders not to resurface — for any reason — for 16 days.

Working day and night, approximately 14 hours a day, the camera crew

filmed duty tours, church services, recreation activities and "bull" sessions of officers and men, then settled down to the serious business of missile-firing activity — recording the underwater launching after the warheads had been removed. Meeting all challenges on land, in the air, on the sea — or under it — Arriflex does its usual dependable job rapidly, accurately and economically. It will do the same for you.

From the microscope to the missile range... from spot locations to sound stages... Arriflex professional motion picture cameras are the dominant choice of filmmakers in science, industry, and entertainment. They're lightweight, rugged, tremendously versatile — uniquely suited to a range of applications virtually without limits. Here are some of the features that give Arriflex cameras their remarkable capabilities:

- MIRROR-SHUTTER REFLEX VIEWFINDER • REGISTRATION-PIN FILM MOVEMENT • 21°-DIVERGENCE 3-LENS TURRET • CONTOUR HAND GRIP • FRAMES-PER-SECOND TACHOMETER • COMPLETE ACCESSORY SYSTEM... lenses, standard and special-purpose electric drives, power supplies, time-lapse equipment, film magazines, sound blimps, tripods.

BUSINESS SCREEN INTERNATIONAL

304 Motion Pictures of 24 Countries Compete in Fourth International Labor-Industrial Film Triennial in Antwerp

EUROPE AGAIN emphasized the important role it accords the film medium with a second international film competition, following close on the heels of the recent Fourth International Industrial Film Exhibition at Madrid. On November 20-27, Antwerp, Belgium, was host as 304 motion pictures from 24 countries competed for honors at the Fourth International Labour and Industrial Film Triennial.

The event was the fourth within the past decade and was under the direction of Belgium's General Commissariat for Work Promotion, assisted by the Royal Belgium Archive of Films and by the International Audio-Visual Technical Centre.

52 Pictures Survive Preview

With screening time very limited, only 82 films survived early previewing. Of these, 18 out of the 42 originally submitted came from neighboring Germany while 13 British productions competed with nine French titles and eight from Belgium. The U. S. was represented in the finals with six films; Canada and Italy had five subjects up for honors. Holland and Sweden were represented by four each; two films were contributed by Switzerland and Czechoslovakia. Also represented by single titles were Norway, Hungary,

Yugoslavia, India, Israel and Luxembourg.

Emphasis on Industrial Training

The "Antwerpiade," as this triennial congress is known, differs in character from such festivals as Madrid, held under the sponsorship of the European Council of Industrial Federations. Emphasis at the Belgian showings was on training within industry with the human factor an important consideration.

52 diplomas, citing top honors for "Mastership" and others for "Merit," were presented at Antwerp. The Federal Republic of Germany, with four Master and four Merit awards, was closely followed by France with three Masters and two Merits and by Sweden, which gained two Master awards. Belgium won a Master diploma and two Merit awards. The Czechs and Swiss had one Master award apiece. Britain and the United States each gained two Merit awards. The U. S. honors were shared by *Safety Belt for Susie*, a Charles Cahill Production; and by *Pole Top Rescue*, a Bay State production.

Discuss Economics, Film Planning

Study groups were an important part of the program. Topics discussed included a comparative analysis of "Slides or Film" and "Criteria for Good Labor and In-

dustrial Films." Henri Bonnier of France led a discussion on the economic aspects of industrial film-making; R. Houlout of Belgium also spoke on this same topic.

Speaking for Germany, Dr. Hans Schaller of AEG, Frankfurt, provided a 13-point outline for a good industrial documentary, stressing informational content, actuality and inspiration as its main points. Czechoslovakia's Antonin Novy, surveying the film production of the eastern European countries, quoted an annual expenditure for Labor and industrial film work exceeding \$50 million. This includes informational and training films for widely-diversified fields of industry.

A Comeback for West Germany

Germany's "comeback" at Antwerp was notable, in light of comparatively few "firsts" achieved at Madrid. The awards were spread over a wide sector of industry, including films made over the past two years. They justify, according to BUSINESS SCREEN's representative at Antwerp, "the policy of putting a hard core of basic instruction beneath an enticing shell of general information."

San Francisco Festival Jurors Cite "Film as Communication"

Golden Gate Awards, highest honors of the "Film as Communication" category at the recent San Francisco International Film Festival, were shared by a television film documentary, *The River Nile*, produced by Louis J. Hazam for NBC News and *The City of Necessity*, produced by Robert Newman.

Silver Awards in this group of factual films, went to six additional titles. The motion pictures *Stress*, produced by AB Centralfilm for the Swedish Council on Personnel Administration, and *The World of Pulses-Electronics and Living Organism*, produced by Sozo Okada's Tokyo Cinema Co., of Japan, were leading winners from abroad.

Dimension Films of Hollywood won two Silver Awards for *The Tree*, a 10-minute subject, and for *The True Story of an Election*, a 55-minute film. Both are distributed by Churchill Films of the same city. Other Silver Award winners were *The Happy City*, produced by William Deneen; and *Initial Teaching Alphabet: the Forty Sounds of English*, produced by John Bransby Productions, of New York City.

12 other entries received Honorable Mentions, including *Man and Safety: Communication*, a 30-minute film produced by Graphic Films Corporation, Hollywood, for the Secretary of the Air Force, Washington, D. C. Others winning Honorable Mention were *The Cry for Help*, produced by George C. Stoney Associates; and *The Toy-maker*, produced by Vision Associates, both of New York City.

Jurors for Film as Communication were C. Cameron Macauley, Bertha Landers and Edwin L. Wilbur. Mr. Wilbur supervises motion picture activities for the Atomic Energy Commission.

Honor Dr. Robert Richter at Reception, Premiere in N. Y.

A reception at New York's Plaza Hotel honored Dr. Robert Richter, president of Arnold & Richter K. G., Munich, Germany, last month. Host to Dr. Richter and a galaxy of guests from the motion picture and television industries was Paul Klingenstein, president of the Arriflex Corporation of America.

Reception guests saw the premiere showing of a 20-minute color film, *The Arri Story*, and heard a tribute to Dr. Richter for the pioneering accomplishments and

engineering genius from which his cameras have evolved.

On the final leg of a round-the-world trip, Dr. Richter responded with a report on his journey. "During the last decade," he noted, "motion pictures have become ever more important in television, industry, education, medicine and science. Our company has benefited from this trend and we have committed a great deal of engineering man power and funds to

Dr. Robert Richter (ctr), president, Arnold & Richter, with (l) Paul Klingenstein, president, and v.p. Victor James of Arriflex.

continued research and development in order to maintain the leading position of Arriflex in the years ahead."

Pratt Elected President of CINE Following D. C. Charter

Serving U. S. factual film producers and sponsors as a clearing house for their participation in overseas cultural festivals, the Council on International Nontheatrical Events has now become a non-profit corporation, chartered in the District of Columbia. Willis H. Pratt, Jr., film manager for the American Telephone & Telegraph Co., was elected president of the Council at its recent seventh annual meeting in the nation's capitol. He succeeds John Flory, Eastman Kodak Co., in that post.

Other elected officers include four vice-presidents: Tom Hope, of Kodak; J. Edward Oglesby, Virginia State Department of Education, Richmond, Va.; Anna L. Hyer, DAVI, National Education Association, Washington, D. C.; and Charles Dana Bennett, Farm Film Foundation, also of Washington.

Brig. Gen. Willard Webb (ret.), head of the American Science Film Association, is treasurer; Alden Livingston, E. I. duPont de Nemours & Co., Wilmington, Del. is the secretary of the Council.

Entries for 1964 festival events are now being invited. These include participation at Adelaide and Melbourne (Australia), Cannes, Edinburgh, Venice, Padua, Vicen-

CINE president Willis H. Pratt

za (Italy), Victoria (Canada), Cortina, Berlin International and the Berlin Agricultural Festival.

Harold E. Wigren, re-elected coordinator for CINE, notes the March 2nd deadline for eligible films (released during 1963 or in January-February, 1964). Application forms may be obtained from CINE, 1201 Sixteenth St., N. W., Washington, D. C. 20036.

Quality-Bilt Film Shipping Cases

- Best quality domestic fibre
- Heavy steel corners for added protection
- Durable 1" web straps
- Large address cord holder with positive retainer spring
- Sizes from 400' to 2000'

1961 Advertising Program of American Oil Shown on Film

☆ The entire 1964 advertising program of the American Oil Company, showing increased use of newspapers and a 52-week radio campaign as well as that company's billboards, point-of-purchase materials, magazine ads and television program plans, has been built in a 30-minute color motion picture.

The sound film features TV and radio personality Charley Weaver and is now being used to present the advertising program to marketing personnel, dealers, agents and jobbers throughout the country. ★

"Truth About Hair Coloring"

Told in a New Clairol Picture

Clairol has introduced a new film called *The Truth About Hair-coloring* (25 min., color) which will be distributed to women's clubs and other groups.

Six typical haircoloring users are shown in the documentary-style film, with detailed reasons for their switch to haircoloring. All of the actresses are authentic in that they never previously had their hair colored.

Parts of the film were made in an actual beauty shop, and emphasis is given to the key role of professional hairdressers, particularly with regard to first-time users of haircoloring.

The film is designed to answer the questions about haircoloring asked most frequently by women. Though primarily educational, the motion picture includes sequences on the excitement of color in our everyday lives.

The film was produced by Dolphin Productions, New York, with Allan Stanley as director and Richard Ellison as writer. Mundell Lowe did the original score.

Prints of *The Truth About Hair-coloring* can be obtained from the national distributor, Association Films, Inc. ★

Begin Finalist Judging for '64 Hollywood Ad Club Awards

☆ With entry lists closed for the fourth International Broadcasting Awards, sponsored by the Hollywood Advertising Club, preliminary screening has begun in London, Mexico City, Toronto, New York, Chicago, and Hollywood of 1963 television and radio commercials entered in that competition. Formal awards presentation is scheduled for February 25 at the Hollywood Palladium. ★

CECO EXCLUSIVE!

THE 16mm PROJECTOR
WITH 35mm QUALITY!

The Incomparable **BAUER SELECTON 16mm PROJECTOR**

Perfectly Suited For
Theater Projection

Ideal For World's
Fair Exhibitors.

Under Test, This
Projector Has Run
12 Hrs. A Day For
2½ Years... And Is
Still Running
Trouble-Free.

Some of the features that put the Bauer in a class by itself:

- 2½ hrs. uninterrupted showings with 5000 ft. reel
- No skilled operator needed — simple push button operation.
- XENON LAMP operates 1500 continuous hrs. ... No carbon replacement ... No lamp maintenance ... No mirror splatter ... No exhaust system needed (Generates no carbon monoxide fumes ... Instant starting at peak output ... Quality closest to daylight ... Variable light output with no change in color quality.
- 2000 WATT XENON LAMPHOUSE delivers 4100 lumens — fills Cinemascope screen over 40 ft. wide 1000 watt Xenon gives 2300 lumens for Cinemascope screens to 30 ft. wide.
- CONTROLLED LIGHT TO DESIRED INTENSITY.
- Exclusive lamphouse "Cold Mirror" reduces aperture heat — extends film life
- Film Pulldown System, Maltese Cross Design Intermittent Sprocket, insures positive, safe film engagement — no claw mechanism to damage film.
- Circulating Lubrication System for trouble-free operation.
- SOUND SYSTEM — Optical & Magnetic Sound Heads ... Amplifier handles optical & magnetic signals ... 15 watt amplifier for optical and magnetic reproduction.
- CECO 2-Speed Synchronous Motor 16 & 24 F.P.S. available.
- Simple Installation.
- Guaranteed Parts & Service.

Distribution Must Be Creative

by Robert Finchout V.P., Association Films

WE CAN LEARN from the work of the specialists in theatrical film exploitation. If any word would seem to sum up their unceasing labors it is: "enthusiasm."

It is just as important for a distributor of a sponsored motion picture to impart to our potential users — teacher, program chairman or TV film director — that *here* is a film of significance, viewer appeal and all-around merit.

We at Association Films look for unique promotional values in every picture we take on. Does it serve a need for top management groups? Will it help a college instructor explain something about our distributive system? Will a church leader find it useful in stimulating discussion? Will the film be useful in a career seminar and help a teacher cope with drop-out problems? Does it present the principles of profit motivation with conviction for, say, a group interested in comparing free enterprise with communism?

Select "Films for Freedom"

Last year we developed what was to become one of the most successful distribution concepts ever undertaken. We called these: "Films for Freedom," selecting from our library of some 600 sponsored motion picture titles about 80 films which contribute something concrete to a better understanding of our democratic and free enterprise traditions.

These films had to have something of lasting merit: a vitality that could lead into a discussion or seminar. There were six basic categories including, "The American Tradition: Freedom and En-

terprise," "Spokesmen for Freedom" (biographies of statesmen, Presidents and great leaders of our times), "In Defense of Freedom," "The Alien Philosophies: Communism and Fascism," "World Trade: Bulwark of Freedom," and "Expanding Freedom's Frontiers" (space and science in the sixties).

Over 15,000 Adult Bookings

To date we have made more than 15,000 "Freedom" bookings — primarily to adult organizations. Many industrial plants, fraternal organizations, banks and businesses have ordered "Freedom" films in series on a weekly, bi-monthly and monthly basis. From a prestige standpoint, hardly anything could have been more felicitous. We have received commendation from the White House, letters of congratulation from the Governors and national leaders, mention in the CONGRESSIONAL RECORD, and the coveted George Washington Honor Medal from the Freedoms Foundation.

For the 28 sponsors whose films were among the "Films for Free-

Union Carbide's picture, "The Petrified River," has brought peaceful uses of atomic energy to the screen. In use for more than eight years, it has been telecast over 1,600 times.

dom" there has been unusual exposure (to large adult audiences) and nationwide recognition for their efforts in promoting the cause of freedom through films.

Individual film promotion must be equally imaginative, sometimes daring, but always reflecting the enthusiasm of the distributor and the creativity of the producer. As an example, when we launched American Airlines' unusual and unique film, *The Masters*, we contacted every TV station in the

(CONTINUED ON PAGE 48)

Every day and night, throughout the year, groups of influential Americans are seeing factual films in clubs, lodges, meeting halls.

REPORT ON SPONSORED FILM DISTRIBUTION: I

CONSIDER THE FILM MEDIUM. Compare the power of *uninterrupted attention* to an explanation of policy, product or service for 20 or 30 full minutes of combined sight/sound presentation! Compare it to the average *seconds* of attention to the printed advertising page. And then examine the millionfold attendance reports of specializing film distributors and long-active film sponsors. Add to this the "welcome mat" laid out by theaters, television stations, influential community groups; the vital importance of reaching our tremendous teen-age citizens of tomorrow. Then look to the "communications" program of your company or trade group and ask, "why aren't we using films?"

These pages on today's trends in sponsored film distribution are only a preface to an issue-by-issue continuing focus on this critical phase of the factual film industry's future. Growing density of population, reflected in the corresponding growth of all kinds of special-interest groups whose attitudes and purchasing power is of vital concern, has put the spotlight on the methods and potentials of film distribution. The current surge in color television set purchases; the revival of theater construction; continued acquisition by groups of 16mm (and 8mm) sound motion picture projection equipment — are a few factors which underscore the importance of these pages.

Drive-in theaters are exhibiting colorful sponsored short subjects whenever film quality and interest meet their audience standards.

Buick Open Golf Tournament film scored well over 500 telecasts, with estimated audience of more than 17 million viewers to a recent date.

Centrally-located Los Angeles office of Modern Talking Picture Service is typical of 32 film libraries now serving community audiences.

Modern Forecasts Gains in '64

Notes Sharp Upturn in Community Audiences; Color TV Needs

IT'S BEEN A BUSY YEAR for Modern Talking Picture Service.

It's been a year of many measurable gains.

And it's been a year of seeding for the future. The developments of 1963 have already made it clear that there will be new gains in 1964.

Look, for example, at the bed-rock "non-theatrical" groups, or as they are called today, "community audiences." What is happening to them in this age of galloping communications? They're galloping!

Figures for July through November, the first five months of Modern's current fiscal year, show an increase of 19% in community film bookings over the same period a year earlier.

Impact of "Resort Cinema"

An important factor in the community audience boom was the development of Modern's "Resort Cinema" — a concerted and successful effort to cultivate audiences at vacation resorts. "Resort Cinema" is expected to grow steadily in the coming years. And the spe-

cial new techniques used to reach the resort audience already are helping Modern make some significant gains in circulation to other adult audience groups.

Concerning school bookings, enrollment statistics are growing each year and the output of school oriented films appears to be keeping pace with this growing opportunity. The importance of reaching a youthful audience is a fundamental part of marketing for a growing number of sponsors. The quality of school films is better than it has ever been. Sponsors are aware of the need for producing films that will make a positive contribution to the classrooms of the schools they want to reach.

Modern has had a close working relationship with the nation's schools throughout its 26 years. And Modern has been close to the new educational programs. Its Modern Learning Aids division has distributed the PSSC physics films for several years. Early this year it was appointed distributor of the CHEM Study chemistry films.

This fall the MLA Division was

chosen to handle the elementary school teacher training films of the School Mathematics Study Group. Another acquisition of the year was the film library of Colonial Williamsburg — films and filmstrips variously suitable for social studies classes and adult audiences.

32 Libraries in Major Cities

Modern serves community audiences through its 32 film libraries in major cities from coast to coast (and in Anchorage and Honolulu). Each of these film libraries has from \$10,000 to \$50,000 worth of equipment, including specially designed electronic film inspection machines.

These offices are staffed by trained film inspectors, bookers and supervisors. This de-centralized network permits faster service to film borrowing groups and allows the sponsor a considerable measure of print economy by reason of faster turnover.

TV Demand for Color Prints

In television distribution, the growing importance of color is a significant development for many sponsors. 1963 has been the best year so far for the sale of color sets and, accordingly, Modern has noted a 30% increase in requests for color prints from station film programmers. With 653 stations on the air at the end of the year — and with a promised expansion in the years ahead — the outlook for television use of sponsored films is as bright today as it has ever been. A new research report entitled, "The Television Audience and Business Sponsored Films," will be released in January.

Theatrical circulation continues to be an exceptional buy for the sponsor with the right film. Some

16,500 conventional and drive-in theaters in the United States play to an average weekly audience of 42 million people. Short sponsored films included on the programs are getting big exposure.

Theatrical exposure in 60 foreign countries is now offered through overseas affiliates.

Community audiences abroad — in Europe, Asia and Australia — can also be reached through an exclusive membership in Inforfilm, an international association of film distributors.

Now Has Library in Canada

The company opened its own Canadian film library in Toronto nearly three years ago. The Canadian office serves many Canadian accounts, and, in addition, has been gratified to find a number of U. S. sponsors interested in distribution in Canada. Canada, a film-conscious country, has been quite receptive to Modern's offerings — true for television as well as for community audiences.

One of the most interesting developments of the year has involved the company's electronic computer. The IBM 1401 has now operated for its first full year. The basic tasks formerly handled by routine punch card equipment have been converted to the high-speed computer, providing clients with faster reporting of results.

More important, the computer is producing by-product information that is refining the job of matching audience demand with print availability. The new tool will increasingly help sponsors to measure just how well their films are doing and how well they're reaching the goals set for them.

A decided trend to the use of supplementary literature with films (CONCLUDED ON PAGE 49)

Below and right: an IBM 1401 computer installation has now been in operation for its first full year at Modern headquarters in New York. Reporting results to clients as well as effective economies in print handling have been expedited by this modern data processing equipment.

It's G M's 25th Year in Films!

Predict 170,500 General Motors Film Showings for Past Year

SINCE GENERAL MOTORS launched its film activity 25 years ago, the corporation has recorded 5,426,000 showings to an estimated total audience of 371,500,000 people, including those who have seen GM motion pictures via numerous public service telecasts. During this period, GM films have had 24,900 reported television showings to an additional estimated viewer audience of hundreds of millions. The figures include showings through October, 1963.

The company notes that it has used the film medium for communicating information about its activities, products and policies. A statement reflects firm belief "that this has represented an excellent method to promote a better understanding." And audience figures substantiate public interest in the program with a steady growth in distribution over years — from 53,400 showings in 1940 to an expected 470,500 showings in '63.

Available to Any U.S. Group

GM films are made available to any group within the United States requesting their loan; schools and colleges are the most active users, accounting for 92% of the reported showings. They are distributed from three film library offices located in Detroit, New York and San Francisco. No charge is made, other than return postage.

Currently there are 50 films available with an inventory of 7,600 prints in the GM film libraries.

An additional 4,600 prints have been purchased by schools, universities and business film libraries. In addition, many of the films are distributed abroad by GM's Overseas facilities. A recent tabulation of attendance report cards received from users of GM films indicates that 65% of the persons returning the cards submitted comments. Of these, 98% complimented the films.

List "Most Popular" Titles

Some of the most popular titles are: *ABC of Hand Tools*, *ABC of Internal Combustion*, *ABC of the Automobile Engine*, *ABC of the Diesel Engine*, and *ABC of Jet Propulsion*. "Classics" which rate high in popularity are GM's widely-seen *We Drivers*, *Where Mileage Begins*, and *American Harvest*. Several film subjects in the GM film library have become a permanent part of school curricula in many areas. Films, such as these, which continue to be popular over the years are remade from time to time to keep them up to date.

Principal promotional tool for the program is GM's Film Catalog, published annually and mailed to all secondary schools within the United States and to groups using GM films in the past. These catalogs are also made available to General Motors dealers throughout the country. The dealers, in turn, bring the film listings to the attention of groups who are in need of films in their local communities.

Millions See Santa Fe Pictures

Railway's Film Library Helps Promote Freight, Jobs, Travel

THE FILM MEDIUM is helping the comforts and economy of rail transportation as well as the advantages of stop-over sightseeing for the tourist. The Atchison, Topeka and Santa Fe Railway Company is a "veteran" among film sponsors, for both travel and shipping promotion. During 1963 Santa Fe films were shown 35,366 times to an audience of 2,357,992. All of these were group audiences, showing Santa Fe films on their own 16mm sound projectors.

In addition, Santa Fe motion pictures were distributed to television stations by a major film distribution company. "Good results" are reported by the railway people. One title, *The Better Way*, was telecast 140 times for a total estimated viewer audience of nearly 2,500,000. This program was initiated early in 1962, terminating during 1963.

How Films Are Distributed

Community and school group audiences are served by the road's own distribution centers in the West and Southwest; distribution to groups in the Eastern and Midwestern states is handled by the headquarters' film bureau in Chicago. Prints have also been placed "on deposit" loans in the audiovisual libraries of school systems in the areas served by the road. In

1963, these deposit prints accounted for an audience of 691,943 persons.

Film showings are promoted through the mailing of special flyers, directed to specific types of audiences. For example, one of the objectives of *The Better Way* was to show engineering students the challenging job opportunities in the railroad industry. To reach these students, 3,000 flyers on this film were mailed to colleges and universities over a two-year period. To date, *The Better Way* has been seen by 7,000 engineering students. Some 20,000 flyers have been mailed to other types of groups since this title was released.

Audiences Like Indian Films

"Most popular" of the Santa Fe's current pictures are the road's Indian films, *Arts and Crafts of the Southwest Indians* and *Indian Ceremonials*, which have been enjoyed by more than half a million persons. About 250 prints of these titles are in circulation.

"Firmly believing in the use of films to reach and influence potential customers," the Santa Fe is releasing a new title on California early in 1964. This film is similar to other state films which the road has sponsored during its many past years of successful use of the film medium.

Motion picture industry and government sources provide figures showing increase in theater construction and upturn in movie attendance.

3,500 More Shows for Bethlehem

Steel Maker's 25 Films Shown to Adult Audiences and on TV

The 25 film titles of the Bethlehem Steel Company, made available to nationwide adult audiences through the facilities of Modern Talking Picture Service, Inc., gained nearly 3,500 additional showings in 1963 over the previous year. Total audience figures also showed a slight increase over last year. 1963 certified attendance was 627,787; in 1962, the total attendance was 602,350.

Bethlehem's most popular subject is the 20-minute color film entitled *This Is Steel*. This educa-

tional review of basic steelmaking processes was shown nearly 6,000 times to a total audience of 213,000 in 1963. Released in 1961, the film replaced a 15-year old black & white version which was seen by over a million people at similar non-theatrical showings.

Two other current Bethlehem films, *Ore From Venezuela* and *Hull 1679*, received 129 telecasts on public service time during the past year. Viewers of these films were conservatively estimated at 4,138,700 persons in '63.

American Airlines: Film User With a Plan

Fortified By a Colorful Series of New Pictures, This Sponsor Has Evolved a Budgeted Program of Production & Distribution Which Is Getting Results

FEW COMPANIES are using public relations films more effectively than American Airlines. This firm achieves wide-spread coverage; it has a great amount of flexibility in its distribution operations; its films are widely praised for their entertainment qualities, yet the company gets consistently good identification; and all this is accomplished at a reasonable cost.

It was only last year that American began its new film program. For a number of years (going back to 1934, in fact) there have been sporadic forays into the film media, a picture here and one there, but no regular activity was maintained until the middle of 1962 when Red Sutherland, Director of Special Services in the advertising and public relations department, undertook the job of setting up a film program with a firm budget and a determination to get as much mileage as possible out of the funds at hand.

Good Share of Budget for Distribution

With the close support of Willis Player, vice-president in charge of advertising and public relations, Mr. Sutherland sold the program to top management on the basis of doing quality films, doing them on a regular basis, and above all, allotting a good share of the budget for the final key to success of any film program — distribution.

While most airlines have made travel pictures, they have all too often been in the familiar vein of the Fitzpatrick travelog. To change this line of approach and offer the public something newer and more exciting, Mr. Sutherland started experimenting with short 4½ minute films about a year and a half ago.

A series of three on ocean fishing were made, this being a subject to interest not only the general public but particularly to the 250,000 American businessmen who are frequent travelers and are the backbone of any airline's trade.

Each of these little miniatures was made on

a very tight budget, but by one of the world's greatest makers of this kind of film, Larry Madison. Such titles as *Bluefishing at Montauk*, *Acapulco Sailfish* and *San Diego Albacore* went out to television stations rather tentatively at first with a hope that they might find some play as fillers for sport shows or after-game time.

Distribution Response Was Phenomenal

What happened was one of the most phenomenal successes in recent film distribution history. *Bluefishing at Montauk*, for example, in the past year and a half, has received 426 television showings to an estimated audience of 19,407,400. As a part of a trilogy of three ocean fishing films it has been televised 133 more times to an additional audience of 6,701,500 — to say nothing of almost 2,000 plays before 16mm audiences in half a year. And its playing time is far from finished — in fact it seems as popular today as when it was introduced.

The success of this series has prompted American Airlines to go all out to supply similar short films on other subjects. Already completed are trilogies on the moods of cities, on landmarks of early America, and on the nation's natural wonders.

Notable Pictures Are Key to Acceptance

During 1964 several other series will be produced. Larry Madison Productions has done most of the films to date, while a few have been produced by Bob Downey. They are all notable for superb photography, a carefully underplayed narration, and an almost throw-away credit for American Airlines at the end. The credit is so off-hand and appropriate that it comes on strong with almost no objections from TV stations or audiences anywhere.

In addition to the trilogies of short films, American Airlines has continued to do longer films on travel — the very successful *New York, New York* and *Mexican Impressions*

are both popular and very different travel films which were produced by Audio Productions. Audio also made *Flight Plan* which describes the fantastic amount of planning which goes into every flight on American's schedule.

"The Masters" Tells Maintenance Story

The most recent release in the airline's film program is the brilliant, off-beat *The Masters*, made by John Peckham Productions, which visualizes — with a minimum of narration — the operations of America's maintenance center in Tulsa. The 15-minute films are intensely modern in character. Most of them manage to appeal to both the highest kind of movie snob and the general public as well.

American Airlines films are distributed by both Association Films and Modern Talking Picture Service. Mr. Sutherland feels that the

Twin-towered Marina City is pictured in a five-minute film showing "Mood of Chicago."

services of both distributors are complementary and each has a special place in the company's overall plans.

Historically, airlines' films have been distributed on a very restrictive basis — no films to be booked in certain states, or to certain kinds of audiences. American broke this pattern a year ago — films are now distributed throughout the country, even to areas where it does not fly — such as the northwest, or the southeast.

American Will Get Its Share of Travel

The company feels that as people get more travel conscious, which is the aim of all the films, American will get its share of the business. Which is not to say that a good emphasis on promotion and distribution do not go to American's own prime areas. For every print which is stocked in a Seattle exchange, for instance, there will be 10 or 15 in Los Angeles.

The "trilogy" system has proved to be amazingly flexible, not only for providing television stations with a large number of films

American Airlines' color picture, "New York, New York" is attracting visitors to the World's Fair.

"Mood of San Francisco" is captured in a five-minute visit to the city by the Golden Gate.

on a wide variety of subjects, but also in direct selling efforts. One print of each of the airline's films is permanently maintained in each of the company's 55 sales offices. Representatives going out to call on groups can carry along reels individually spliced to cover whatever interests the group might have.

Resort Promotion Aids Fishing Trilogy

The company is flexible in its approach to audiences, too, and looks for them everywhere they can be found. For instance, Modern Talking Picture Service did a special promotion on the fishing trilogy this summer to resorts and fishing camps. With 25 prints allotted for this effort, the film received 133 showings in July, 193 in August and 162 in September, which is some kind of a record for summertime film bookings. Another new activity now under experimentation is the use of Fairchild 8mm repeater projectors in the lounges of airline terminals.

As each new film is released it is previewed in the areas covered before audiences of state and city officials, travel agents, radio and TV, newspaper men. This activity has generated a great deal of good general public relations exposure for the company.

A Great Believer in the Film Medium

The film program is only a small part of Red Sutherland's responsibilities at American Airlines, but it is one in which he takes a great deal of satisfaction. He is a great believer in movies and what they can do for an alert sponsor. In the past year, he says, films have proved to be one of the company's best means of reaching the traveling public and impressing on them the safety, and reliability, comfort and convenience of traveling by American. That's the goal of this program.

Footnotes on the Summary of Distribution

These American Airlines' figures do not include 55 prints of every subject sent to each sales office. For bookings, divide times shown by two. Figures should not be used for averages or annual rate of distribution. Most films have been circulated for less than a year; others are brand new. About 50% of television prints are available in color.

CINE Presents 80 "Golden Eagle" Awards

**Council on International Nontheatrical Events Honors U. S. Producers
at Sixth Annual Awards Ceremony Attended by 600 in Washington, D. C.**

THE SIXTH ANNUAL AWARDS CEREMONY and exhibition of festival films, hosted by CINE (The Council on International Nontheatrical Events), brought nearly 600 producers, sponsors and government people to Washington, D. C. on November 21. 80 American-produced motion pictures were honored as "Golden Eagle" winners in the modern auditorium of the National Education Association, host group to the Council organization. The "Eagle" recipients were selected from the 254 films submitted for overseas festival participation to representative juries serving the Council throughout the country.

Edward R. Murrow, director of the United States Information Agency, took the occasion to salute the Council for the seven years it has served the nation in this field, noting "the impressive work it is doing to assure creditable representation of the United States in the many international film competitions that take place around the world each year.

Seek an 'Olympic Team' for Overseas

"The members of your Council and the many cooperating organizations and individ-

uals are providing a significant service as they seek out an 'Olympic team' of appropriate, outstanding films to represent our country in these international events."

Although not in itself a film festival, many who attended CINE's sixth annual program in Washington, D. C., called it the outstanding event of its kind in this country, even surpassing many foreign film festivals. This year, reflecting the keen interest in viewing more of the winning U. S. pictures, an afternoon exhibition was held just preceding the evening dinner and awards ceremony.

Summarizes Council's Accomplishments

CINE past-president John Flory, retiring after serving as its national chairman for the past two years, summarized the many accomplishments of the Council. They included a broadening of the number of U. S. films selected for overseas events.

"By having a larger selection of motion pictures in our 'Golden Eagle' group, we have been able to participate in many more film festivals," he noted. "Whereas three or four years ago we were in five or six events, in

1963 we entered seventeen." The Council participates only in recognized festivals.

Derek M. Day, First Secretary of the British Embassy, presented diploma awards to U. S. films selected for showing at the Edinburgh Film Festival last year. Count Edgardo Sogno del Vallino, Counselor of the Italian Embassy, conferred the awards given films participating at the Venice Film Festival. A total of 68 U. S. films (all of them among the "Golden Eagle" recipients) were judged at international film festivals this past year and 42 of them won top awards, according to Flory.

Incorporated in District of Columbia

Now incorporated under a charter granted by the District of Columbia, the Council is composed of a hard-working Board of Directors, has a part time secretariat (directed by Dr. Harold Wigren of the National Education Association where facilities have been main-

Count and Contessa Edgardo Sogno del Vallino, Italian Embassy Counselor, pictured at the reception preceding the CINE awards ceremony.

tained from the outset) and it publishes a yearbook listing selected film entries.

Flory also paid special tribute to the National Education Association (Mrs. Robert Wyatt, wife of the president of the NEA was an honored guest at the awards ceremony) for "providing a home for CINE during these early formative years." Incoming president Willis H. Pratt, Jr., film manager of the American Telephone & Telegraph Co., also took part in the events. He urged "every producer, sponsor and distributor to make it his business to see that CINE is given the opportunity to look at the best of 1963's films.

"Conscientious as we at CINE try to be,"

At Sixth Annual Awards Ceremony, past-president John Flory introduces winners of the Council's "Golden Eagle" awards, also shown in picture.

Formal dinner and reception at Washington headquarters of the National Education Association preceded the awards presentation in the auditorium.

Honored guests at awards dinner: Mrs. Robert Wyatt, wife of the president of the National Education Association, and the Honorable Myron Cowen, former ambassador and a recent U. S. delegate to Edinburgh and Berlin festivals.

he said, "it is always possible to overlook some outstanding nontheatrical film or short subject unless each of you makes it his personal responsibility to recommend every worthwhile picture." Entry invitations have been sent.

Dinner, Reception Precede Awards Program

The awards ceremony at the NEA Auditorium was preceded by a reception and a dinner at the Association; honored guests were then saluted at a late evening, informal gathering held in the Executive Suite at Washington's Madison Hotel. Titles of 1963 "Golden Eagle" winners are included in the "Consensus"

Another view of large audience which participated in the CINE Awards program.

Awards listing pages appearing elsewhere in this issue (see page 17).

Among the Festival winners honored were: *Steel by Stopwatch* (a Jones & Laughlin film); *Miles Over Water* (Louisiana Department of Highways' picture); *Music, The Expressive Language*, produced by Sutherland Educational Films, Inc.; and *Human Growth, 2nd Edition*, a Wexler Film Production for the E. C. Brown Trust. *City of The Bees* (Moody Science Films) was applauded at the exhibition.

Other awards have been received by *The Kite*, Blackbird Productions; *Icarus Montgolfier Wright* created by Format Productions.

Deadline for entry of 1963 productions (including films released in January and February of 1964) is March 1. Applications for entry blanks should be sent at once to the attention of Dr. Wigren, c/o Council on Non-theatrical Events, National Education Association, 1201 Sixteenth Street, N. W., Washington, D. C.

Pictured at reception (l to r): Glenn Mentch, Eastman Kodak Co.; Helen Wilson, Girl Scouts of America; and Mr. and Mrs. Nathan Golden.

Award-winners (l to r): producer Reid H. Ray, David Ridgway, of Harvey Mudd College; with Council host and past-president John Flory.

Award-winners (l to r): producer Avalon Daggett; Robt. Bleiden and R. W. Burgess, of Louisiana Dept. of Highways, with Council host Flory.

Pictured (l to r): producers Ed Feil and Mrs. Phoebe Flory; Cinecraft-Continental executive Julius Potocsny; and Dr. Theodore Messerman.

Producer Homer Groening and composer Maurice Engleman (from left) receive congratulations from Mr. Flory on their prize film, "Surf."

TWA is pioneering the latest in scientific equipment to assure safe travel.

"This Is Your Captain Speaking"

Equipped With a Sight/Sound Presentation, These Pilots Are Bringing Story of Trans World Airlines to Business

TRANS WORLD AIRLINES pilots are telling the story of the airline's history, schedule reliability, passenger services and safety procedures to business organizations throughout the nation.

In a program initiated September 15 by the airline's Transportation division, selected pilots are being teamed with sales representatives and a specially prepared stillphoto and motion picture presentation made by The Jam Handy Organization.

Designed for Business Groups

The entire presentation, entitled "This Is Your Captain Speaking," is slanted toward businessmen and professional organizations, such as Lions Clubs, Chambers of Commerce and Kiwanis.

This is the first time a group of jet pilots have been gathered together in a coordinated effort to bring the story of an airline's behind-the-scenes-operations, dependability and reliability to the business and professional communities.

In the past TWA's pilots have

done an outstanding job as speakers at various types of functions on an individual, uncoordinated basis. Now TWA has drawn up a specially-designed presentation for use by pilots who have volunteered to accept speaking engagements in their domicile areas.

Lauds Services of Pilots

Thomas B. McFadden, vice president for Marketing, welcomed the contribution of TWA's pilots toward the fulfillment of the company's total marketing effort.

"The knowledge and experience of our pilots should prove to be an excellent sales tool in our continuing campaign to increase TWA's share of the business travel market," McFadden said.

The men who fly TWA jets fill meeting engagements in their own home areas — Chicago, Los Angeles, Kansas City, New York, Newark, Boston and San Francisco.

So that these seasoned and skilled "transcontinental commuters" may demonstrate in thirty minutes the story of the growth of

airline services and the new equipment and controls that assist them, Captain Ed Hall, a TWA pilot, worked with The Jam Handy Organization in the preparation of a

TWA Captain Orm Grove, shown in "Memoirs of a Pilot" historical sequences, carries 5-gallon cans to refuel his plane in the early days.

thoroughly professional presentation.

Motion pictures and wide-screen still photography are combined during the presentation so that high interest is maintained in what is on the screen without dimin-

Scrap book sequence shows the early days of air transportation.

ishing the intimacy of the speaker-audience relationship.

The motion picture sequences are projected when essential in the center area of still-photo "frames." This makes it possible, for example, to show at one time a flying route as a still and TWA jets operating along it, in motion picture footage.

There is wide latitude for the pilot-speaker to use his own personality and his individual experience so that cordial contact is kept with various audiences. A key factor in the success of the presentations is the availability of TWA captains as speakers. The captains are carefully rehearsed (by JHO) in platform techniques and in the use of the voice so that they feel almost as comfortable and confident in front of a group as they do in the front end of a jet.

135-foot high Central Theme building at Los Angeles International Airport.

Behind the Scenes at "No. 1 World Way"

TELLING CITIZENS of Los Angeles and surrounding communities about the facilities of their International Airport is the mission of "No. 1 World Way," an informative and recent-award-winning 16mm color film sponsored by the City of Los Angeles' Department of Airports and produced by Cate and McGlone.

The film was cited at the recent Columbus Film Festival and by Los Angeles Advertising Women. It's a fine documentary of the history, growth, operations, financing and, most of all, of the import-

ance of this ultra-modern transportation center to the individual and the community at large.

Sequences tour the Port, on the ground and from a helicopter cruising over buildings and runways. The film details the work of the Department's 500 employees.

The final sequence of the 25-minute film is sheer glamour, at the busiest part of the day, when thousands of visitors share what the narrator calls, "the greatest show on earth, sunset time at the Airport." A worthwhile visit to "No. 1 World Way."

Circled area picks out Vista-Sell as used with a "Broadway" street scene exhibit; not as effective here as when it is the exhibitor's main attraction.

In this Pfizer exhibit, Vista-Sell filmstrip is the center attraction and is much more effective in gaining and holding viewers' attention at show.

Pfizer Puts ACTION in Exhibits

Continuous-Flow Filmstrips, Used as Central Attraction, Are Gaining Viewer Attention for Exhibits of Pfizer Co.

HOW DO YOU GET and hold the attention of visitors to a trade show exhibit? Audio-visual tools and techniques of many types are being effectively used by experienced exhibitors, including repeater-type motion still picture projectors. Contributing to exhibitor experience through long and careful study of these problems is the Visual Presentation Department of Chas. Pfizer & Company.

This Pfizer department is now making extensive use of continuous flow filmstrip presentations in trade show exhibits. These films as created by Pfizer, are long strips of frameless 35mm color film which are projected on DuKane Vista-Sell equipment. Images move horizontally across an 11 x 20-inch rear-screen surface.

Motion Pulls Exhibit Viewers

Pfizer Visual Presentation manager, Henry F. Stolte, chose the continuous flow technique because "motion is high on the list of attention-getters and will draw people to an exhibit." Publicly-audible sound can often be a distracting nuisance, especially in exhibits. But motion has great stopping-power and, Stolte believes, the continuous flow technique has the quality of holding viewer attention throughout the message.

Pfizer's VP executive takes the professional a-v man's view that it is part of his job to evaluate the requirements of each communications problem assigned by his company to fit the tools and the budget to the task at hand.

Henry Stolte sets up art being considered for use in a Pfizer continuous-flow filmstrip exhibit.

An added factor in the choice of Vista-Sell was its relative economy.

In an exhibit for the Pfizer Chemical Sales Division at the recent American Chemical Society Convention, Stolte's department coordinated with free-lance artists to produce a crawl strip. For the C. K. Williams Division (paint pigments) exhibit at the Paint Industry Show all art, from storyboards to final material, was handled within the department. Costs were kept "in line" by good use of existing materials such as catalogs, color photographs, advertisements, etc. Titles were done on clear overlays by the Letraset process.

Processed at Bebell & Bebell

All the continuous flow material is then processed into an interruption-free, frameless filmstrip at Bebell & Bebell Color Laboratories in Manhattan. This lab has designed a specially-modified aperture for use on an Oxberry camera and

animation stand to handle this kind of work.

Pfizer's Stolte has found that the continuous flow projector is more effective when it is the central attraction of the exhibit. In one show, the screen was incorporated within a busy Times Square street scene. In this instance the visuals could not attract as much attention as in the recent C. K. Williams Division display (see illustration), where company officials estimate that the Vista Sell attracted about three times as

many interested viewers as in a previous exhibit which did not have the moving filmstrip as a central attraction.

New Vistas in Exhibit Ideas

Present plans at Pfizer call for further use of the projector in another exhibit being designed by the Visual Presentations Department for the upcoming Concrete show. These Pfizer continuous-flow filmstrips are opening new "vistas" of their own in pioneering industrial applications of the technique as they have done.

Through the Ages With the Common Cold

SPONSOR: Schering Corporation.

TITLE: *Treatment of the Common Cold Through the Ages*, 5 min., b w, produced by ACI Productions.

This is a funny little film specifically prepared for filling five-minute public service spots on television. It will probably fill a great many of them for it is timely, with winter's cold season on hand, is also entertaining and not too commercial.

Back in caveman days the common cold was thought to be caused by evil spirits. Despite his wife's song and dance incantations to ward off the disease, our caveman sneezes and feels miserable.

Hippocrates, in 400 BC, noted that bleeding was used as a cure for the common cold, but he candidly noted, "it didn't do any good."

Physicians during the 17th Century treated coughs due to colds by having a patient put some of his hair between two slices of bread and feeding it to a dog. Our renaissance man and his wife try this: the dog sneezes.

Many of us remember hore-

hound tea, mustard plaster, hot bricks, salts, castor oil, etc. which were the common treatments of yesterday. Our man gets all these treatments, and they make him feel worse than the cold did.

But today — how easy it is! Modern man's wife brings him a tray with fruit juice and a bottle of Coricidin. He happily takes two pills, starts to sneeze, but stops. Narrator says: "Someday the common cold may be as dated as the dinosaur. In the meantime, if your great grandmother suggests a vinegar-soaked neck scarf for your cold, tell her about the modern cold treatment."

The modern way to "cure" a cold...

Show 1964 Chryslers in "New Dimensions"

Dealers and Salesmen See New Models in Lively Musical Presentation

☆ NEW DIMENSIONS is a magazine that isn't. It is a mythical publication created by MPO Videotronics' Detroit arm, Kerbawy-MPO, as the theme for the 1964 Chrysler-Plymouth dealer-salesmen new model introduction show.

Set in the form of a musical comedy "book" show, the filmed *New Dimensions* unfolds the story of Burton Crane, publisher of the magazine, who *hates* cars and his staff, which loves them. Leon Shaw, playing the role of Crane, opened the show with a rousing chorus of his theme, *I'll Never Buy Another Car Again*.

Cast Appears "Live" and on the Screen

The show consisted of integrated live and film portions. To smooth the transitions from song and situation on stage to the big screen color demonstrations of the new cars on film, the same cast in the same costumes was used in both techniques. Thus, as the female automotive editor works on a story about a young couple who live in a carriage house and buy a new Valiant, projected film sneaked in smoothly to show a demonstration ride and get across the salesman's pitches on new features. Use of scrims, effective stage lighting and logical situations helped smooth transitions from live to film and back to stage.

Live reveals on stage of the new Valiant, Plymouth, Chrysler and Imperial came as climaxes to the story action. Fast pace, fresh lyrics, singable melodies and quick gags combined to keep the show moving swiftly.

The Show Was Presented in Six Cities

And so Burton Crane was won over. And so was the audience. The show played in six cities: Oakland, Dallas, Chicago, Detroit, New

York and Jacksonville. In Oakland, the show played to the national press as a preview for reporters and editors on the day before the dealer production. The cast consisted of 16 actors, singers, dancers, supported by a pit orchestra of 24 pieces. A United Airlines plane was chartered to move the large cast and staff from city to city in order to make shows on time.

New Dimensions was produced by Haford Kerbawy from a book by Ed Reveaux.

Below: a musical interlude which helped introduce the 1964 Chrysler line to its sales force.

Connelly Named Advertising Manager

Joining the illustrious circle of Industrial Audio-Visual Association members who have moved into top executive ranks in American business is IAVA president William J. Connelly, recently appointed director of advertising for the Union Carbide Plastics Corporation. A former assistant advertising director of the company, Bill has played an active role in the company's audio-visual presentation work. Congratulations on a well-deserved promotion are due this energetic gentleman.

Publisher meets car-loving staff in another scene from MPO-Kerbawy production for Chrysler Corp.

"Conserving a Heritage"

Preservation of Wildlife Is Theme of New American Petroleum Picture

SPONSOR: American Petroleum Institute.

TITLE: *Conserving a Heritage*, 27 min, color, produced by Carl Ragsdale Associates, Inc.

Can the oil industry continue its search for new petroleum resources and, at the same time, preserve the nation's wildlife as well as its scenic and recreational values? This new American Petroleum Institute film, *Conserving a Heritage*, gives ample evidence that it is being done.

The film follows drillers and conservation officials into some of America's finest wildlife preserves: the National Moose Range in Alaska, barren deserts of the West, Pennsylvania state forests, salt marshes in Texas, and the off-shore waters of California. It points up the care and effort going into wildlife preservation, whether the drilling is done in shadow of tall timber or miles out at sea.

Oilmen Themselves Help Tell the Story

At times, the story is told by the oilmen themselves, on location, as they plan their drilling operations. Through close cooperation with forest rangers and conservation people, they are able to map entrance routes to drilling sites which conserve timber, provide effective firebreaks and help create new forage areas.

The nature of the film provided producer-director Ragsdale with some unusual production problems during planning and photography stages. The film deals primarily with wildlife in its natural habitat — moose in Alaska, antelope in Utah, deer and whooping cranes in Texas — and cameramen were faced not only with the problem of *finding* the animals but also getting close enough to capture them on film.

Lamar Boren Shot Underwater Sequences

A notable exception was the underwater photography of fish around an off-shore drilling rig. Plentiful and easy to find, the natural curiosity of the fish brought them into close-up range for Lamar Boren, veteran underwater cameraman on such filmed TV series as *Aquanaut* and *Sea Hunt*. But Boren had to wait weeks for off-shore storms to subside and the waters to clear up.

Cameraman Herbert Kitchen had another problem with the easily-aroused and ready-to-charge moose in the Alaskan sequences. He made good use of long focal length lenses to keep from being detected by the animals. Small bush planes were used to locate moose in the vast oil fields. Then the cameraman was landed on the nearest small lake to trudge into the wilderness, crossing the dense Alaskan tundra with heavy camera equipment and large calibre rifles for protection. Snow flurries and rain were continuing obstacles . . . even in fair weather the early fall sun limits good color shooting to less than four hours a day!

One of the most colorful sequences takes the viewer over the Aransas National Wild-

life Refuge in a chartered plane. This southern Texas area is the nesting ground for pelicans and flamingos and the nearly-extinct whooping crane. Only 30 of these rare cranes remain in existence and they are strictly protected by the U. S. Fish and Wildlife Service. Since camera crews are also prohibited from entering this sanctuary, Ragsdale placed his cameras on a boat to traverse an inland water route passing close to the refuge. With 300mm lenses he finally succeeded in filming 14 whooping cranes in their native salt marshes. Aerial photography from the plane completed this remarkable sequence.

Challenge of Problem Captured in Film

The oilman's problem of protecting this national heritage of fish and wildlife while he presses the search for new sources of energy is a challenging one. Much of the sense of this challenge is captured in *Conserving a Heritage* and more than a few additional problems were met and solved by the film maker in bringing this story to the screen.

Conserving a Heritage: in picture (at left) one of the many elusive "stars" featured in scenes which help make American Petroleum Institute film one of year's most interesting.

Above: producer Carl Ragsdale checks a camera setup for location shot. Crews traveled in Alaska, California, Pennsylvania and in the Southwest to lens this conservation film story.

THINKING BIG FOR SOHIO'S TV COMMERCIALS

Thinking *big*, in its recent television commercials, Standard Oil of Ohio and its advertising agency, McCann-Marschalk, Cleveland, had this mammoth carburetor model, 18 feet high and 14 feet wide, created by producer,

Fred A. Niles Communications Centers, Inc.

Concept behind this 40-times-up model, originated at agency, was to illustrate dramatically through large-scale demonstration, just where carburetor throat deposits can form and

how Boron gasoline works to remove them.

Pictured below, inside carburetor colossus, are (l to r) Niles' account executive, Mrs. Edith Klaeser; studio president Fred A. Niles; and (in shirt sleeves, naturally) the agency's tv. producer Sal DeMarco, who supervised effective SOHIO series of commercials.

On the track to victory: a scene in the picture "12 Hours of Sebring"

A Dynamic Look at Auto Racing

Serving Enthusiastic Fans as Well as Industry, This Producer Has Made Over 300 Racing Films in 15 Years

ABOUT 15 YEARS AGO, Nat Zucker, president of the newly formed Dynamic Films, Inc., of New York, was approached by several sponsors in the automotive field with the idea of doing a series of films on auto racing. While not interested in racing per se, Mr. Zucker was something of a car buff, and he was quick to see the potential of this type of film among millions of other enthusiasts in this "nation on wheels."

Dynamic's first ventures in racing films were not intended for the general public. Rather, they were planned to be an entertainment feature of special interest to the 500,000 dealers, jobbers and salesmen in the auto, oil, tire and accessory fields. The idea was that if a good film was to be shown at a sales meeting the men might turn out with a little more enthusiasm than if they faced an unmitigated pep meeting with no sugar coating. The films were quite successful in this way right from the start. And after awhile, as auto racing became more and more popular, sponsors

started to release them for public showings.

The Figures Are Impressive

Fifteen years later, Dynamic has now made over 300 half-hour films on auto racing, and there are currently 1,500 prints in active distribution to 16mm audiences, plus another 400 prints circulating among TV stations for public service programming.

While automotive films are only a part of Dynamic's activities, they remain a constantly active factor. During 1963, the firm produced auto performance and racing films for such sponsors as these: Autolite, Bowes Seal Fast, Champion, Chrysler, Dodge, Firestone, Ford, Gulf, Grey Rock, Hurst Campbell, Kaiser Aluminum, Mercury, Mobil Oil, Monroe Shocks, Plymouth, Pure Oil, Regal-Ride, Stewart-Warner, P.A. Sturdivant and Willard Battery.

They Aimed to Entertain

In most of these films the main idea is entertainment, combined with a discreet demonstration of the product's performance. It might seem that doing a dozen or so films a year showing cars

"Dynamic has now made over 300 half-hour films on auto racing and there are currently 1,500 prints in active 16mm distribution"

driving around a circle without having them all look alike might tax the ingenuity of the most imaginative of film makers.

Mr. Zucker and the Dynamic creative staff find that rather than being stifled by the subject, they are constantly finding more and more new ways to look at racing and performance tests. Principally this is because racing is essentially a human competition — it is not only the Offies and the Lotus-Fords, but the Parnelli Joneses and Jimmy Clarks who are of the essence. Mr. Zucker thinks that at every Indianapolis race, for

Drivers, watch that flag! Scene from one of Indianapolis films.

Hours of Sebring, a film about the 12-hour Grand Prix of Endurance, which once a year transforms a sleepy little Florida town into the capital of all the sleekness and elegance of the sports car world.

The film, sponsored by Gulf Oil, is a timeless impression of what Sebring looks like — it has no winners — spends much more time looking at the townspeople and their kooky-looking visitors than at the circling cars. It is extraordinary not so much as an auto racing event, but as a fascinating film for its own sake.

Showings at the Ford Museum

From January 12 through February 9, *12 Hours of Sebring* will be exhibited on a three-times-a-day basis at the Ford Museum in Dearborn, Mich. Association Films is now distributing 100 prints. Response was so high, and so fast, that over a thousand booking requests were made for the film in less than a month.

Another recent Dynamic auto film is *National Teenage Road-E-O*, made for Ford's Lincoln-Mercury Division. 1,000 prints of the film are being used by the National Junior Chamber of Commerce to promote contests for driving skills, featuring state winners who receive scholarship awards. This program has been endorsed by the White House — in the film Press Secretary Pierre Salinger underscores its importance towards promoting good driving procedures and lessening the accident and death rate in the United States.

Second in Paid Attendance

The audience for auto racing films seems almost limitless. It is interesting to note that auto racing is now said to have the second-largest paid attendance of any sport in the country — behind basketball, but ahead of baseball and football. Auto racing fans are (CONTINUED ON PAGE 55)

Nat Zucker (left) tells a *Voice of America* interviewer of auto racing film experiences. They're extremely popular among the fans abroad.

instance, there are a hundred poignant stories to be told.

Dynamic regularly covers the Indianapolis 500, as well as such other major events as Sebring, Riverside, Atlanta, Milwaukee, Trenton, Bonneville and Pikes Peak. Using skilled cameramen who have worked with the company for many years, as much as 17 hours of footage may be exposed to make a 28-minute film. And more than a thorough coverage, each event is given its own personality, its own central theme combined with complete authenticity and credibility.

For instance, from its own largest automotive sound effects library in the world, Dynamic engineers have to know and match the pictures and sounds of Watson Offies, Laid-Over Offies, Novis, Lotus-Fords, Ferraris, etc., each of which might sound alike to the layman, but which would be picked up as wrong by real racing enthusiasts. They must know just where a sports car will "back off" on coming to a corner, and the difference between tire squeal and brake squeal.

A good example of Dynamic's coverage of racing events is 12

The Big Oval at Indianapolis: scene from a recent "500" color film.

Professional Baseball Premieres Series Film

Millions Await Color Picture of Dodger's Four-Game Sweep

THE WORLD'S SERIES VICTORY of the Los Angeles Dodgers over the New York Yankees last fall has been re-created in another of those epochal 37-minute color motion pictures! Produced under the direction and supervision of professional baseball's film chief, Lou Fonseca, the 1963 picture was again filmed by Jack Lieb Productions, of Chicago.

Countless millions will again share the hundreds of color prints made possible by the leagues and a sponsoring organization (Coca-Cola) including men and women in the armed forces in the U. S. and abroad. The film was premiered in mid-December for members of the sports fraternity, starting with a showing at Toots Shor's restaurant in Manhattan on December 18.

Excellent coordination of the camera crews covering the unprecedented four-day sweep by the Dodgers brings all the highlights of the games to the screen. As before, walkie-talkie radio was used to cue in key action and to develop

special "close-in" views of the Dodgers' pitching mastery.

The new World's Series picture is a "classic" in terms of pitching fundamentals as Koufax sweeps through the Yankee batting lineup, striking out Kubek, Richardson and Iresh in succession in the first inning of the opening game. Strikeouts of both Mickey Mantle and Roger Maris followed in the second inning and the tempo of the series (and the film) was established from the outset. Koufax had shown his complete mastery.

The *World's Series* motion pictures amass a total attendance into the millions within the first six months of each year following their release. They are credited with being among the first 10 films of any kind, whether for theatrical entertainment or education, in terms of total audience interest in the U.S. Fonseca has been in charge of this program from the outset, originating the idea in the professional baseball world nearly two decades ago.

Met's Film a Tribute to Fans

First in Hearts of Fandom: Last in the National League

FIRST IN THE HEARTS of their fans and last in the National League (for the second straight year), the New York Mets were a saga unto themselves this past year. They drew 1,080,108 rabid fans into the antiquated Polo Grounds and the sound and fury of these Met-mad rooters could be heard all the way over to Los Angeles' Chavez Ravine.

That saga, starring the historic Casey Stengel and assorted players as well as unforgettable scenes of the fans themselves, is told in a 20-minute color epic titled, *Let's Go, Mets!* Prelude to a grand re-opening, which takes place on Flushing Meadows when the Mets occupy their brand-new Shea Stadium this Spring, the film brings the club's official family to the screen, sets the scene in Manhattan and plays "hearts and flowers" with the great traditions of baseball in New York. Wilding, Inc. was the producer.

For Dodger and Giant fans of the past are the Met's worshippers of today. Stengel, the Old Master from Yankee Stadium, is the catalyst and the character but his troupe of tried and true (how true!) underdogs have found their errant ways into the hearts of blase New Yorkers. As the film track notes, "baseball is part of the New York fan's blood stream. And though the pulse was slow

in the dark days of baseball history — it quickened with hope — hope for better days ahead. And so the Mets were born."

The Mets can look for even better days in '64, with good reason. Shea Stadium is next door to the New York World's Fairgrounds and the All-Star game will be played in their park. And the club has as its most ardent fan Mrs. Charles Payson, principal owner of the Mets. Plus Stengel and a good number of young and willing players on its roster.

Let's Go, Mets is replete with scenes of fandom in full regalia — carrying the homemade signs (including our beagle friend above) in worshipful tribute, paying homage at Duke Snider Night and shedding a tear of farewell to the Polo Grounds as old Casey makes his way to the clubhouse on that final, fateful night that marked the last home game of the Mets before this year's move to Flushing Meadows. This picture is dedicated to Met fans of today and aimed to move Met fans of tomorrow into the stands in '64.

Production of the film and its widespread showings around the East is typical of the promotional savvy of both team and management. Besides there's nothing under the sun to match a Met fan and what better way to share their rare and wonderful adulation with future converts?

Met's fans are legion and loyal — from the Bronx to Brooklyn!

Title Picture Proves It! Bears Are Champions

THE CHICAGO BLARS took the starring role played by the Green Bay Packers last year as they scored their 14-10 victory over the New York Giants to win the world's championship of National Football League in Chicago last month.

The Bears' victory was the subject of another exciting color film produced for the League by Blair Motion Pictures and its president, Ed Sabol, of Philadelphia. Sabol's company also filmed the 1962 championship game, held in Yankee Stadium. That picture, filmed under near-blizzard conditions, was appropriately titled, *Pro Football's Longest Day*. The game in Chicago, though played in 10-degree weather, had a clear playing field and bright sunshine aided the hard-working Blair crews.

How to Book the Picture

The 1963 championship film is commercially-sponsored (by Old Gold) and will be available for free loan by adult groups and organizations. The 1962 film, in color and sound, is still available for bookings from Del Shofner at 445 Park Avenue, New York City.

But the Giants won't mind if their fans don't applaud this year's version, either. They can take con-

solation in the sheer courage displayed by the injured Y. A. Tittle, Giant quarterback, who played the entire second half of the game despite a severe leg injury. But the ferocious Bear defense shares the starring honors with their will-to-win quarterback, Billy Wade, and the two touchdowns which were enough to complete Bear coach-owner George Halas' long-awaited championship season.

Stark Films, Baltimore, to Produce Film on the Olympics

Stark Films, Baltimore, Maryland, have been awarded another contract to produce a successor to their prize-winning film, *Hold High the Torch*. Scenes have already been shot at the Pan-Am Games of 1963 in Sao Paulo, Brazil.

Milton Stark will personally supervise shooting at Innsbruck, Austria, scene of the Winter Games, and at the games in Tokyo later this year. The film tells the story of the selection, training and housing of U. S. Olympic athletes. As of September 20, 1963, 80 million people are said to have viewed *Hold High the Torch*. An even larger audience is predicted for the 1964 picture.

Scene from this "delightful pictorial essay" of the "World of a Girl."

Scott Shows "World of a Girl"

Bringing a Message on Personal Hygiene to Young Girls,
a New Scott Paper Film Has Warmth and Excellent Taste

SINCE 1947, the Disney-produced motion picture on personal hygiene for young girls, *The Story of Menstruation*, has achieved the status of a widely-used "classic" among educational films. Its sponsor, Kimberly-Clark (makers of Kotex), has received the plaudits of untold millions of feminine viewers during these past 16 years. Personal Product's Modess is another sponsor in this special field of interest. That company's *It's Wonderful Being a Girl* has been sharing audience popularity over the past three years since its introduction.

A third entry into this rigidly-circumscribed audience field (12 and 13-year-old girls) is the soon-to-be released *World of a Girl*, sponsored by the Scott Paper Company.

The Picture Had to Be Good

The potential audience obviously leaves room for very few "classroom" films on the subject. Thus, there is a tendency for the "best" to take all the marbles, leaving few viewers for the "also-rans."

Scott Paper, which makes a product called Confidets, approached the idea of doing a film on menstruation with the conviction that it ought to be something quite different, that just re-doing the spirit and techniques of the older films would be a waste of time and expense. The new film the Scott people felt, had to be fresh and interesting, but at the same time completely acceptable to girls and to their teachers as well.

The subject is a difficult one for screen treatment. It isn't right if it's too cold and technical a treatment, but if it's too "personal" it can be embarrassing to school-

room viewers. After much consultation and a survey of recent production, Scott selected Elektra Studios, New York, to prepare ideas on how the new film should be done.

Outlines Film's Basic Idea

Elektra producer Bob Yung described the film's approach as putting parts of the story — the introductory setting of mood — in the young girls' own words, in their own voices, perhaps almost to overhear them as if they were chatting on the back steps; later to go on with technical animation to describe the menstrual function in accordance with correct medical and pedagogical procedure.

Scott Paper bought the idea, after some soul-searching, and the work began. Arrangements were made to visualize and to record sound at a girl's camp and at a school. What we see on the screen in the first part of the picture is a delightful pictorial essay of the *World of a Girl*, the picture's title and theme.

Focus on Realistic Scenes

Moving cameras and long lenses pick out the faces of young girls going about doing the funny, touching, dopey things which girls do at that age. Meanwhile, the sound track is picking up the voices of girls telling most naturally how they first "got it" and how they felt about it. The idea here is to provide a point of reference — the universality of all young girls coming to this time of their lives. It is done with much warmth and in excellent taste.

A middle sequence is a family scene. Mother and big sister talk to young Sue, who has just begun to menstruate, about what it

means to start becoming a woman. Finally, there is a classroom scene in which an impressionistic animated sequence shows the medical aspects of the subject.

The "message" of *World of a Girl* is that the onset of menstruation is something for a girl to take in her stride. The business of growing up has been going on for a long, long time and it is nothing to worry about.

Credits for Elektra include:

Robert Yung, producer; Paul Harvey, director; Larry Ravitz, writer; Peter Yung, production coordinator; and Don Swartz, composer of the film's musical score. Photography is by Henry Javorsky; special effects by Al Maysles and creative supervision was by the late Abe Liss.

National distribution of this 20-minute color film will be handled by Modern Talking Picture Service, Inc.

Accident Prevention for the Senior Citizen

"A Matter of Seconds" Has Earned Its National Safety Award

SPONSOR: Merck Sharp & Dohme, for the Southern Medical Association.

TITLE: *A Matter of Seconds*, 29 min, color, produced by Campus Film Productions.

* * *

Accidental injuries rank sixth as a cause of death among the elderly, and over half of these deaths occur in the home. This new film emphasizes the need for making the home a safe place for older people. It makes clear that personal practices by older persons and those responsible for their care must compensate for the impairment of physical abilities which often accompany the aging process. Old age is inevitable — but accidents are not.

While old age can be a good time for many people — with a lessening of responsibilities and a slower pace to life, unnecessary accidents can make the last years a tragic lingering unto death.

The film visits a nursing home for the stories of three elderly people — all victims of crippling accidents that could have been foreseen and prevented. Martin stood on a rickety chair to change a light bulb, and lost his balance; Emily fell down stairs because the stairway was dark and without a railing, and she was confused with her new bifocal glasses; Werner leaned back too far in an old office chair in the playroom. Now, all are invalids for the rest of their lives.

Three careless accidents, avoidable injuries that changed the lives of three people looking forward to pleasant satisfying years to come, only to have it destroyed in a matter of seconds.

The film says, "What most people fail to realize is that they are in a different period of life than they were 20 — even 10 years before. They are not the same physically and should not want

to be the same psychologically or emotionally.

"Yet accidents don't happen because of physical changes alone. There are two contributing factors. First, attitude: too often the aging person isn't aware of the changes or refuses to admit them.

"The second is physical environment: making our homes or apartments a safe place to live. These things are important for older people because as we get older the chances of accidents are greater and the results are much more serious. To make our homes safer we must seek out the hazards and remove them — or guard against them."

The film is a significant contribution to public information on a problem of concern to physicians, health and safety officials. It is recommended for screenings by community audiences and will be of special interest to families with elderly members.

A Matter of Seconds was a recent winner of a National Safety Council Award. It is available from the Southern Medical Association, 2601 Highland Avenue, Birmingham 5, Ala. and the Merck Sharp & Dohme Film Library, 1728 Cherry Street, Philadelphia 3.

One careless mis-step can lead to years of helpless misery . . .

New Hope for the Handicapped

"Walk With Me" Shows Abilities, Character of Disabled in a Film Sponsored by Methodist's Board of Missions

THE NATIONAL GOAL of 75 million jobs, as set by President Johnson, puts important emphasis on employing the handicapped. Lending considerable support through its realistic portrayal of both physically-handicapped and blind persons playing their useful, real-life roles, is a new 22-minute black & white motion picture, *Walk With Me*, produced by Stoney Associates for the Board of Missions of the Methodist Church.

The competence of job-holders with handicaps, their strengths of character and personality and their appreciation of appropriate help is portrayed by six people filmed at the Ohio Valley Goodwill Industries Rehabilitation Center in Cincinnati. Their voices comprise the narration which director George Stoney selected from his hour-long interviews with staff members and students at the Center.

Suzie Warner is a seamstress who has walked on crutches for most of her 65 years. She says, "I'd just like to always keep a

Kay Irion and George Bogarde at the Ohio Valley Goodwill Industries' Rehabilitation Center.

learning Braille and typing. George's teacher is Charles Baumgartner, blind since birth, but an active participant in civic campaigns. He says,

"When the public sees one blind person doing a job and doing it capably, they're more apt to give the next one a chance." He helps children in his neighborhood form positive attitudes toward handicapped people in the scene which provides the film's title, *Walk With Me*.

The fourth man is Sharon Florer, a journalist, business executive and church layman. He walks with two canes because he's had arthritis for 25 years. He suggests that the able-bodied take their cues from the handicapped:

"If you think they need your help, say 'can I help you?' But don't reach before you ask. Don't push your services upon them."

The film was produced as a resource aid to those studying the church mission to the handicapped. It has a twofold purpose: "to help adults and youth in study classes to see how they can help handicapped persons by responding to them as real persons rather than as objects of pity or curiosity; and, secondly, to show adult and youth viewers how persons are helped through the ministry of a Goodwill Industries' Rehabilitation Center.

Winner of a CINE "Golden Eagle" this year, *Walk With Me* will be shown at the Florence (Italy) Film Festival in January. Cleared for television, prints may be purchased (at \$128) from A-V Services, 475 Riverside Drive, New York City 10127.

Dr. Albert Szent-Gyorgi pictured in his lab.

Research Into Heart Disease

American Heart Association and Squibb Join in Presenting "Of Men and Minds"

SPONSOR: American Heart Association and E. R. Squibb & Sons (Squibb Division Olin)
TITLE: *Of Men and Minds*, 29 min, color, produced by the American Heart Association

Some of the many paths that scientists follow in search for the answers to the problems of heart disease are explored in this new film now being distributed nationally by the Association and Squibb. Dr. James V. Warren, president of the Association, said at a recent premier in New York that the film will explain to the general public how the dollars it contributes through the Heart Fund are used in research which may one day resolve the unanswered questions of heart disease.

The film features Nobel Laureate Albert Szent-Gyorgi, a scientist who, in 1948, received the first research grant ever made by the American Heart Association, at work on basic studies seeking to learn what causes the human heart to beat. From Szent-Gyorgi's laboratory at Woods Hole, Mass., the camera moves to the shores of the Pacific for a look at the work of a young Established Investigator of the AHA, Dr. David Jensen.

Dr. Jensen is trying to isolate and identify a chemical substance in the heart of a primitive fish which is believed to initiate its heartbeat. These studies will hopefully shed light on the action of the human heart and may open the way to better treatment of heart failure.

Of Men and Minds also describes the Heart Association's research policy which emphasizes giving support to "men and minds rather than to laboratory trappings, machinery, glassware."

Of Men and Minds was written and directed by Hal Marc Arden, photographed by Gene Peterson, edited by Bernard Friend and Larry Kreeger, and narrated by Joe Julian.

Below: an official of the American Heart Assn.

Charles Baumgartner shows children what a blind man can do . . .

job . . . I can't wait till Monday morning sometimes to get back."

David Scharff, who lost an arm in a mining accident, helps the Goodwill truck driver collect heavy donations. He supports his wife and five young children and says, "I've just commenced to teach myself to fix TV sets at home. Funny thing about it, a handicap can remind you to do things that should-a been doing all along."

George Bogarde, now blind, was studying to be an engineer. Exploring for a new career, he is

Lunar launching pad where giant boosters will help send man on soaring flight to Moon.

Project Apollo: Manned Flight to the Moon

First Created to Help Explain the Nation's Space Goals to the Congress,
This Great Film Is Reaching Ever-Widening Audiences at Home and Abroad

ABOUT A YEAR AGO, the National Aeronautics and Space Administration came up to another of its critical budget periods. Was it, or was it not, about to get the funds from the Congress necessary to keep Project Apollo, the manned space flight to the moon, going along on schedule?

NASA uses many forms of persuasion during these times. One of them, which it considers to be more than ordinarily effective is the rifle-shot motion picture, dead-aimed at influential congressional leaders and designed specifically to explain what the project is, how important to the nation it is, and why it is necessary that it be properly financed to keep on a planned time schedule.

Work on Film Began in December, 1962

Project Apollo-Manned Flight to the Moon is such a film. It was put into motion on the 13th of December, 1962, because Brainerd

Holmes, then director of the office of Manned Space Flight, needed a film to indoctrinate various governmental and Congressional figures concerning Project Apollo.

Byron Morgan, well-known film writer and producer on the NASA staff, was assigned the job of producing the film. Gene Starbucker was selected to write, and with Paul Haney, NASA Technical Advisor, as part of the team, the three worked out the content and approach they thought the film should take.

Pelican Films, New York, and its producer-director, Ted Lowry, were chosen as producers because Mr. Morgan and his staff liked the excellent animation concepts they had shown in *Air Force on Canvas* and the European Community film, *Europa*. Something fresh was wanted, with the sweep and push forward of the spirit of Project Apollo.

The NASA team also knew that the film

could not be caught up in details of the project — which were constantly changing — so a rather impressionistic instead of an exact style was thought to be the best solution. Literal-minded engineers would not then be beating them over the head about some detail, some knob or antenna which had come out in the wrong shape.

Not Affected by Changes in Details

The picture was completed in March of '63. Along the way a great many technical details concerning the lunar landing vehicle were changed, but the production team was not caught on any of them because of the approach they had taken.

The film was originally intended to be a technical report for a limited audience, but it has proved to be so popular among widening circles of audiences that it is now in almost world-wide distribution. French, Spanish, Portuguese, German and Italian versions have been made. The United

The lunar space capsule in simulated landing.

States Information Agency is considering distribution to its posts, and NASA is distributing it in Europe through the Spacemobile program. The film "helped some" on the NASA budget requirements, but the problem is a never-ending one, which no one film will ever solve.

Use Many Sources of Visual Material

A great many sources of visual material were used in the film, which details what Project Apollo is intended to do, and much about how NASA intends to go about it. NASA publicity stills, architectural rendering by NASA contractors, models of boosters and spacecraft and original art all had to be combined into a style which would achieve uniformity.

Ted Lowry, a talented animation designer, devised the technique which employed the use of reproduction by Kodalith of the borrowed still picture and selected art, and then these Kodalith prints were photographed on the stand under colored cells. The original animation was drawn to fit into this pattern.

The animation scenes which required NASA spacecraft were photographed with the help of NASA scale models. The models were photographed in the perspective indicated by the animation layouts. The photographs were then reproduced by the use of a Xerox process on cels, painted in color and re-photographed with art backgrounds and other cels. Much use was made of a multiplane effect which gives the scenes a considerable amount of depth. A film worth seeing!

Orbital path for the manned flight to the Moon, circling Earth and off into far space.

IFPA JOURNAL

INDUSTRY FILM PRODUCERS ASSOCIATION, INC.

Delaware Hosts First East Coast Conference

Well-Attended Program Features Speakers and Useful "Cinemars"

AN IFPA "FIRST" took place on the East Coast in mid-November when industry film makers from New England to Florida gathered at the Walt Whitman Hotel, Camden, New Jersey for our first East Coast Industry Film Producers Conference. The big weekend program included nationally-known speakers, workshop sessions ("Cinemars") and trade exhibits. Film showings, a cocktail party and a gala banquet rounded out the November 15-17 festivities.

The conference was conceived, planned and staged by the Delaware Valley Chapter, under the leadership of Chapter Chairman Peyton M. Stallings. The idea for the conference grew out of a growing appreciation for the plight of members too far away from a chapter to attend the regular monthly meetings.

Because of the diverse nature of production in the East and the lack of adequate chapter coverage, this problem was particularly apparent to the Delaware Valley group, largest IFPA chapter outside of California. Admittedly an ambitious project, it was judged a success by all those who attended.

Keynote speaker was Lee Davis, President of the Calvin-DeFrenes Corporation, Philadelphia; famed script writer Oveste Granducci, who moderated the Writing Cinemar, was the featured speaker at

Chairman Pete Stallings welcomes guests at Saturday a.m. session.

the Saturday evening banquet. Other notables from the profession were in charge of various Cinemars. These included:

The Cinemar workshop on Animation, moderated by Phillip Arnest, Production Director, Motion Picture Department, Creative Arts Studios, Washington, D. C.; Morris Haitzband, ASC, Director of Cinematography for the television series, *The Defenders*, moderator of the Cinematography Cinemar; and Arnold Eagle, independent producer and business magazine columnist, moderator of the Editing Cinemar.

Ken Rapiieff, independent announcer-narrator (formerly with NBC), spoke at the Saturday morning session. Our own Jack R. Smith (of the New England Chapter), Supervisor of Motion Picture Services at the MITRI Corporation, CONTINUED ON THE NEXT PAGE

Banquet night at the East Coast Conference: radio-TV star Paul Taylor was m.c. (standing); others at head table included speaker Oveste Granducci (l); Pete Stallings; and at right, publicity chairman Frank Weikel.

WELCOME I.F.P.A.

Col. James Hunter, Chief of Air Force's Los Angeles Office of Information, does the honors for Major Betty Jane Williams.

Betty Jane Williams Becomes Major in Air Force Reserves

One of two women holding the rank of major in the world establishment of the United States Air Force, both active and reserve forces, is our own Betty Jane Williams, one of the original founders of the Industry Film Producers Association. She received the promotion to her new rank while serving her annual 15-day tour in October as an active reservist.

Betty, who has served as our Convention Vice-President and, later, as Vice-President, Membership, has a mobilization assignment with the 1352 Photographic Group, the Air Force motion picture production facility on the West Coast, located at the top of Lookout Mountain. On her recent duty tour, however, she served with the Secretary of the Air Force, Office of Information, Los Angeles, assisting with various motion picture-television projects. Her first IFPA assignment was that of publicity director.

During World War II, Major Williams was an Air Force Service Pilot, flying military aircraft at Randolph Field, Texas, as an engineering test pilot. During the Korean conflict, she was a writer-producer with the Air Force mobile television unit which pioneered in the use of this medium for the armed forces.

In civilian life, Betty is in charge of motion picture production for sales/advertising for the Lockheed-California Company, Burbank. She's our "Gal of the Year!"

Joe Gulli at Work on Program for 5th National Conference

THE INDUSTRY FILM JOURNAL

East Coast Gathers:

moderated the Film Group Management Cinemar. Jack is presently serving as Executive Vice-President of IFPA.

Gene Starbecker, independent producer, moderated the Directing Cinemar; and Paul Taylor, Philadelphia radio and TV personality, served as master of ceremonies at the banquet.

"Cindy" Winners at Open House

Sessions began with a Friday evening "get-acquainted" Open House, including a film program where some of the 1963 "Cindy" winners and other outstanding films were shown. The Conference got down to business in earnest on Saturday morning with welcoming remarks from "Pete" Stallings, as host and chapter chairman.

Following Lee Davis' thought-provoking challenges to the industrial film maker in his keynote address, narrator Ken Rapiëff commented on industrial films as seen by the hapless narrator. He was both profound and witty and chances are that no producer in attendance will ever think of his narrator in the same way again!

The Cinemar sessions began after lunch with two principal groups. Writing, Cinematography and Management sessions were in the first group; Direction, Animation and Editing discussions were in the second group. Thus all participants were able to attend two of the six Cinemars. Gene Starbecker surprised his group by actually staging and directing a scene, using an actor and actress he brought along from New York.

All of these discussions were so successful that they had to be halted by the conference directors so that the program could be kept on schedule.

Granducci Speaks at Banquet

Saturday evening was devoted to socializing, with a cocktail party (hosted by Byron Motion Pictures) opening the festivities. Featured speaker at the banquet was Oveste Granducci, who left the audience with some interesting thoughts about the industrial film business, plus a delightful description of the Virgin Islands, where

Keynote speaker at first general session was Lee Davis, president of the Calvin-DeFrenes Corporation.

he now has both his office and his home.

The evening's activities were formally concluded with the awarding of a handsome array of door prizes but actually went on into the wee hours as old friendships were renewed and new ones made.

Hold Moderators' Round Table

Sunday morning, at a considerable 10 a.m., the program got underway again with an hour of interesting films. Then came what some people judged to be the highlight of the entire conference — the Moderator's Roundtable, where Messrs. Arnest, Eagle, Davis, Granducci, Starbecker and Smith engaged in a lively discussion of the film medium, moderated by Chairman Stallings.

The Conference was organized and directed by members of the Delaware Valley Chapter. Chairman Pete Stallings assumed overall responsibility and coordination; Chapter Secretary Jim Preston handled the program arrangements; Chapter Program Chairman Ron McNally was responsible for hotel arrangements, sponsors and exhibits; Treasurer Charles Gindhart served in the same capacity for the conference effort; Membership Chairman Jacques Van Vlack handled the registrations; and Publications Chairman Frank Weikel had charge of all printing and publicity.

Trade exhibits were presented by Creative Arts Studios; S. O. S. Photo-Cine-Optics, Inc.; and O. H. Hirt, Inc.; were well-attended. □

this may be the first
movie projector sound system
you never need to fix

!

Its sound system can be trusted.

It has no electronic tubes to burn out; transistors replace the old tubes.

It has no photocell to go haywire; a space-age *solar cell* takes the place of the old photocell. Its exciter lamp is rated to last the life of the machine. You'll never have to carry spares.

This projector won't embarrass you or harass you.

It even takes good care of your film.

Kodak equips all PAGEANT Projectors with a spring-loaded film sprocket. These are like shock absorbers, so when you start the projector the film isn't jerked. Sprocket holes and film itself stay new longer that way.

These are the only projectors with a reverse *powered* sound drum. This means the film rolls with the sound drum when "*reversed*," instead of being dragged over it, hazarding scratches.

Another thing you can safely do with this projector is reverse it from full speed forward to full speed the other way, in one whack!

Kids can't hurt it either, but a child can set it up and operate it.

Anyone who can follow a red line can thread film into it.

Move one lever forward. Push one button. And you have a sound movie. Brilliant picture. Beautiful, clear, noise-free sound.

Incidentally, this sound is instant sound. That means it comes with no warm-up. No empty silence. No awkward waiting. And

the speaker doesn't hiss, or crackle, or pop, either.

This projector doesn't do anything to distract an audience.

Its machinery consists of so few

moving parts that it never speaks above a whisper while the show is on.

And the show always goes on. You're not left suddenly in a fix.

With this projector, there's so little that could possibly ever need fixing.

Its name is the KODAK PAGEANT 16mm Sound Projector, Model AV-126-TR.

If you'd like to see and hear one work, or read illustrated literature about it, write your name and address here:

Then send it back to us at the address below.

Check this box ☐ and we'll have a Kodak dealer call you to arrange for a convenient demonstration. No obligation, of course.

12-47

country by "jumbo" telegram informing them that this was something different, lensed by Bernard Hirschenson (camera operator on *David and Lisa*) and with a jazz score by Cy Coleman. Station requests poured in, attesting to the interest of programmers in films with creative values, name and talent.

Distributors Follow Audiences

There is — and should be — an old adage in our trade that a *creative distributor follows his audience*. If they're in their teens, reach them in school; if they belong to clubs, contact the program chairman; if they stay home and watch TV, be sure sponsored films are being programmed in their market area.

We feel, as do many advertising agencies, the TV networks and youth marketing specialists that the teenager is too often overlooked or minimized when determining public relations and advertising budgets. With 18 the most popular age for marriage (!),

People-to-People Health Foundation's Film, "Project Hope" was telecast 692 times in less than two years. It has reached 22 million people.

young men and women have developed a market potential that may be far beyond the published \$10 billion a year they spend.

It's a readily-accessible market, too, if the distributor has the list sources and the creative resources to do something about reaching them. With teen-agers in mind, we are launching, this winter, a "Career Clinic" film program consisting of films relating to job preparation, education, good grooming, job-seeking, and other hard-fact films on specializing careers such as accounting, medicine, public service, social work and the armed forces.

Teachers will be encouraged to use the films and contact sponsoring companies and associations for literature, guides and other helpful materials. We hope that the concept will help in the dangerous drop-out situation and encourage young people to complete their educations, to go out into the world better prepared to cope with the problems of a fast-moving, vastly-changing society.

Other projects afoot reflect our feeling that it is *our* responsibility to make films do not only the job they're designed for, but perhaps that little extra which may never have occurred to the sponsor or the producer. Call it the utilization bonus for 1964!

State of Maine Pictures Seen by 52 Million in Single Year

☆ A record-breaking audience of 52 million people saw State of Maine documentary motion pictures on farm life and food products during the last fiscal year. Agriculture Commissioner E. L. Newdick affirms that the year showed a 20 percent increase in the acceptance of films supplied by his department for free public service TV use in the East.

United World Keeps Pace in Distribution

FROM OUT OF their spanking new headquarters facility, located at 221 Park Avenue, South in New York City, United World Films' officials direct a network of 43 distribution libraries, handling sponsored film distribution from coast-to-coast.

This subsidiary of Universal Pictures Company, Inc. has *both* television and theatrical experience through its major film company affiliation. But it has also been concentrating attention, within recent years, on what it calls "Custom Service" (sponsor-generated bookings) as well as serving 16mm projector owners through its accessible libraries.

Key district offices in New York, Chicago, Los Angeles, Dal-

Automated equipment speeds reporting and helps expedite shipment of sponsored films to borrowers.

stitute film, *Born in Freedom*, was shown 16,130 times in less than 36 months. Over 60 months, the film is expected to reach an additional 25,000 groups.

Well-Equipped Headquarters

The new headquarters' installation in New York has been equipped with the latest in electronic, automated film handling and control equipment. But UWF people feel that the experience and personal ingenuity of its field staff people, the bookers who know their audiences, are a key factor working on behalf of both users and sponsors. Matching the right film to the right group is a plus-value which experienced film distributors must provide for maximum performance.

This company also places high value on film promotion. Its public relations department in New York prepares a widely-distributed catalog, individual brochures and magazine advertising. Through participation in trade shows and conventions, UWF generates additional audience requests.

Vice-president John Desmond, reporting to president James M. Franey, is UWF's man-in-charge of the sponsored film distribution operation at the company's New York headquarters.

Here's UWF branch library at Los Angeles. Film requests are received in person, by phone or in the mails.

las, Atlanta and Portland, Ore. are the backbone of the service. Fanning out from these centers are the other 37 branch libraries. How well these perform, UWF notes, is best told in facts and figures.

9,756 Showings for NASA

For the National Aeronautics and Space Administration, the company was commissioned to get widest possible distribution for the film, *Friendship Seven*. Within six months, UWF reported a total of 9,756 16mm showings to a verified audience of 912,756 persons. With only 300 prints of this hour-long color film, UWF produced 3.6 bookings per print per month. On television, 235 showings reached an additional estimated audience of 35 million viewers.

Theatrical showings of *The Adventures of Dudley Worthington* totaled 22,855, bringing the National Livestock and Meat Board a total of 6,500,000 persons coast-to-coast, including an 8-week stand at the Forum Theater on Broadway in New York.

The American Petroleum In-

Team of experienced film bookers is handling sponsored film requests at one of UWF's 43 U. S. offices.

Modern on the Move:

(CONTINUED FROM PAGE 30)
has been noticed during the year. The company is distributing teacher's guides, introductory remarks for program chairmen and audience handout pieces for an increasing number of clients.

32 community film libraries are supplemented by similar facilities serving television and theaters. Nine regional TV offices and 30 theatrical film exchanges serve the specialized needs of these channels of circulation. Corporate headquarters are at 3 East 54th Street, New York, New York.

Millions View a Color Picture About Colonial Williamsburg

☆ Colonial Williamsburg in Virginia has shown its 40-minute introductory film, *Williamsburg — The Story of a Patriot*, in the twin theaters at the Information Center to well over 4 million persons.

The six and one-half-year-old Vista-Vision color film runs an average of 175 times a week; played to 656,156 people in the period of one year ending November 20, 1963. In addition to its use in Williamsburg, nearly 700 prints have been purchased by the Defense Department and approximately 300 prints have been leased to schools. These prints are shown to approximately one million additional viewers each year.

Combined Audience for Space Picture Reaches 25 Millions

ASSOCIATION FILMS REPORTS that the hour-long documentary on America's manned space program, *"The Mastery of Space,"* has reached a combined non-theatrical and television audience of more than 25,000,000 persons since its release in May, 1962.

The number of persons per booking averages 150, or about 50% higher than the industry-accepted average of 100 persons. This is attributable to the unusual number of auditorium and large-group showings the film has had, as well as the high showings-to-bookings ratio of 2.3.

"The Mastery of Space," presented by the National Aeronautics and Space Administration (NASA), has been shown 42,893 times in high schools and colleges, business and industry, churches, veterans groups, and other community organizations. It has been televised 438 times, with prime-time telecasts in such markets as New York

EXCLUSIVE WITH CFI

GOOF PROOF

There's no mistake about it. Our system makes mis-labelled or illegible 16 mm release print leader a thing of the past.

First, we include all identification data in the negative leader. It's then automatically printed on the head leader of all release prints. Next, we convert this clear film to reinforced opaque white leader thru our special, patented* process. Result: legibility, durability, infallibility. Makes old-fashioned, hand-labelled leaders obsolete. See for yourself!

CONSOLIDATED FILM INDUSTRIES

959 Seward Street, Hollywood 38, Calif.
HOLLYWOOD 2-0881 or HOLLYWOOD 9-1441

Astronaut John Glenn's triple orbit is highlight of this space picture.

(CONTINUED FROM PAGE 49)
City, Philadelphia, Chicago, Boston, Washington, Detroit and other major cities.

To launch the film Association Films placed a full-page ad in a television business journal and had commitments from more than 150 stations, prior to John Glenn's triple orbit, a highlight of the film. A comprehensive advertising, direct-mail and publicity campaign has kept the film booked to capacity, with requests running months ahead.

The record performance of the film is particularly significant in that it has a running time of 58 minutes. The industry norm is 26 minutes, a length more easily programmed into class periods and meetings.

The film has acted as a "recruitment" vehicle for sponsored films by being ordered by many professional, technical and special-interest groups that don't ordinarily show films. These groups were contacted by publicity and selective advertising, according to the distributor.

Prints of the film are serviced by Association Films' electronically-equipped film centers in Ridgefield, N. J. (Broad at Elm); La Grange, Ill. (561 Hillgrove Ave.); Oakmont, Pa. (324 Delaware Ave., Allegheny County); Dallas, Texas (1621 Dragon St.) and Hayward, Calif. (25358 Cypress Ave.)

Surge in School Population

☆ The U. S. Office of Education forecasts a total student enrollment in public schools of 57 million in 1970 and more than 70 million by 1980. 16mm sound projectors in use in the public schools now exceed 150,000.

Filmstrips Are a Medium at General Mills

Ship Out 23,434 Color Strips in First 11 Months of Past Year

GENERAL MILLS is a firm believer in educational filmstrips as a prime informational medium. The company has been lending these 35mm color strips to schools (principally for Home Economics use) for eight years, revising subjects at regular intervals such as when baking techniques are improved. In the first 11 months of 1963, a total of 23,434 filmstrips were distributed. An additional 2,505 filmstrips were sold outright.

While the company keeps no attendance figures, attendance cards are included with each shipment and they are screened when the film is returned to glean comments, other requests, etc. These cards

are then sorted and sent to each department sponsoring the subject. Some of these may keep attendance records at their own option. With each classroom showing averaging a modest 25 or 30 keenly interested viewers, plus multiple showings for each shipment, General Mills is very pleased with results to date.

Also Use Motion Pictures

Motion pictures continue to be an effective medium. Three films featuring the nationally-known sports and religious personality, the Reverend Bob Richards, Olympic pole vault champion, account for approximately 75% of the company's motion picture distribu-

tion activity. Titles of the Richards' films suggest their inspirational character: *Life's Higher Goals*, *Response to the Challenge*; and the most-recent, *Motivation for Living*.

All filmstrips are mailed via parcel post for greatest economy with ample time allotted for arrival. In order to facilitate this, General Mills starts each fall school season with 1,000 prints of each strip on hand. Sales and an occasional damaged print make it necessary to supplement the minimum inventory at least once more during the school year. Continuing advertising in Home Economics journals promotes the distribution effort.

Streamline Film Operation

Due to a streamlining of operations, M. F. (Mike) Hosp, supervisor of the audio-visual program and of the library, was able to report doubling of the film and filmstrips within the past five years without any increase in department personnel. This department also handles film production activity and audio-visual projection within headquarters buildings. 100 showings of this type are the average per month; six motion pictures are produced for internal use each year, plus special experimental "shorts" for TV testing, etc.

* * *

U.S. Department of Agriculture Reports 7½ Million Audience

— The United States Department of Agriculture, serving rural America through its Motion Picture Service for the past 51 years, is currently tabulating more than 6,000 television showings of its films and an additional 115,000 group showings (via 16mm) annually. The Department estimates attendance of 7,500,000 at these 16mm group showings last year.

Noting that these estimates are on the "low side," a spokesman says that the figures do not include many unreported showings and that figures also do not include showings of prints sold through the U. S. educational film contractor, Norwood Films.

"Audiences are greater now, with more television stations anxious to run service films than at any time in our history," says C. A. Carrello, Chief of the Motion Picture Service.

* * *

Distribution Report Continues

☆ Part 2 of this continuing study of film distribution trends will appear in the first issue of BUSINESS SCREEN following the Production Review.

Science Saga: Rubber Out of Petroleum

Bureau of Mines Offers Prints of Goodyear-Sponsored Film

THE DEVELOPMENT by industrial scientists of a synthetic rubber, made from petroleum but duplicating the properties of the natural product, is the subject of a new 27-minute motion picture, *A Stretch of Imagination*. The new film is the latest addition to the film library of the Bureau of Mines, U. S. Department of the Interior.

The picture was made under a cooperative agreement between the Bureau of Mines and The Goodyear Tire and Rubber Company. The industrial sponsor paid all production costs and has supplied the Bureau with prints of the film for nationwide free loan distribution by the Bureau. Wilding, Inc. was the producer.

Combines Animation, Live Action

Combining effective animation and perceptive photography, scenes depict the search for a material that would substitute for natural rubber in all its applications. Opening on a sequence in a rubber-tree forest, the film sketches the story of natural rubber from prehistoric times to the discovery of vulcanization in 1839. Later, scenes of agricultural machinery, automobiles, trucks and aircraft show how the uses of rubber have multiplied and how indispensable it has become in modern times.

Wartime shots of merchant ships under attack by enemy submarines illustrate why America could not depend on resources of far-away rubber plantations and how industry scientists undertook their long search for a way to synthesize rubber from a domestically plentiful raw material . . . oil.

Shows Development of Substitutes

The development of a variety of practical substitutes, culminating in the creation of two new synthetics — polybutadiene and polyisoprene — is shown step by step. Simplified flow diagrams, supplemented with live-action shots

of an actual production line, help viewers understand the process. Production sequences, filmed on location in Texas at one of the nation's largest synthetic rubber plants, show how industrial engineering makes it possible for a 60-acre installation to match the output of a 45,000 acre, 5 million tree rubber plantation.

The film has been approved for public service and educational television use. Prints are also available for group showings via Graphic Services, Bureau of Mines, 4800 Forbes Ave., Pittsburgh 13, Pa. ☐

"POP" Rivet Distributors Get Film Tools at Sales Conference

☆ Industrial distributors in the U. S. handling the "POP" Rivet line of the Fastener Division, United Shoe Machinery Corporation, are reaping the benefits of three separate and intensive selling conferences recently conducted in Atlantic City, Highland Park, Ill., and North Hollywood, California.

Product manager Thomas Freeman and training director Edwin Stemler, Jr., of the Fastener Division, led the conferences. Audio and visual tools provided for selling use in the field by company sales representatives were premiered. These included:

1. A 25-minute color sound film, *The Story of "POP" Rivets*.
2. Two 13-minute sound slide-films, *Applications Unlimited* and *Know Your Competition*, together with DuKane sound slide-film projectors for field use.
3. A meeting guide to aid planning, preparation and presentation in the field, and
4. A 10-page chart for guiding the individual presentation.

With these aids, the company's sales representatives were equipped to conduct sales meetings with distributors from coast-to-coast.

WHAT IS A PRODUCER? What does he do?

Most people outside the picture business, and too many inside it, haven't the foggiest. But putting aside the numerous jokes on the subject, purely for lack of space because some of them are pretty funny except to the Producer, I'd say the nub is quite simple. Viz:

The Producer starts with an idea and ends with a finished motion picture.

To do this he selects — or promotes — guides and coordinates the various talents, craftsmen and services whose contributions will accumulate over the months into the finished film: he's the "general manager," with his department managers (the writer, director, editors, etc.), moving into and out of the enterprise as the film builds.

He is the liaison between Constituted Authority — in theatrical films the studio head or the banker, in business-films the sponsor — and the Audience.

He may be the owner of the studio, or an employee, but he's the prime mover of his film project; although the producership function may sometimes be spread over two or three different individuals, as when an executive producer guides and collaborates with associate producers, or, in certain very august operations, assistant producers. (One of the jokes, credit Mike Connelly, holds that an Assistant Producer is a mouse learning to be a rat).

In theatrical films, the initial "idea" may be anything from an actual idea for a story, an option on a book or play, a notion for a way to use a certain star, a vague hunch that musicals are coming back, to meeting a stage-struck Texan with some loose money.

In documentaries and business films, the starting point is a Sponsor's problem, desire, or need.

The first of the talents which the Producer must arrange is, using the term in its biblical sense, money; because that's what makes all the other talents available. The first talent he hires is probably the writer, with whom first he will set up the basic concept (the "seed" of theme, structure, tempo, atmosphere, look, and so on, from which the picture will grow) and with whom he will advise (or perhaps collaborate) as the script progresses.

With the script in hand he will assign a production manager or staff, and when the breakdowns

VIEWPOINT

My Son, the Producer (Color Him Plaid)

by Charles (Cap) Palmer, Parthenon Pictures

are made and the picture is about ready to go on the floor or out to the locations, he will select and "blend" the key members of his picture-making team — the Director, set designer and casting head; head cameraman, gaffer and key grip; sound mixer, make-up man, prop master, and so on.

The Director controls set design and supporting cast (on my pictures at any rate), but the Producer must make sure that the results are consistent with the concept. During actual photography he drops in on the set frequently to smooth any ruffled feathers and spot any untoward trends, and of course he sits with the staff on the screening of the dailies, again to

spot and stop anything inconsistent with his prized concept, and to encourage any unexpected beneficial trends.

And when photography is finished, he will supervise the editorial phase, probably running the rough cuts night after night at home; work with the music men on the scoring, supervise the dubbing session, and front for the studio at the interlock and answer print showings. After that he can get a haircut.

There are constant references above to keeping everything consistent with the concept. And perhaps that is really the Producer's core function — "The Keeper of the Concept." Usually he's quali-

fied for this by being a rather positive character personally, and his pictures will all tend to reflect a "point of view" which becomes his style.

Often his only hobby is the picture business, if only because that's all he has time for, and his wife is apt to wish she had married some regular-hours unpreoccupied type like a bookkeeper or a banker who'd have gotten acquainted with the kids.

He can never admit there's such a word as "final," but constantly re-examines everything about his project, eternally looking for those seemingly minor improvements (nothing about a movie is really minor) which may help to make an adequate picture into a good one, or a good picture into a very good one.

Unfortunately, since this process is not self-stopping upon the completion of the picture, he probably is inwardly a bit impatient with everything he has ever done. Obviously, all the way along he sells; cajoles and reasons, cons where he must; kids, argues, disciplines and promotes.

And finally, much as he relies on all the varied talents that go into this most collaborative of the arts, the ultimate decisions are inevitably his . . . and it can get very cold and lonely out there on the limb.

Up to this point it might seem that the theatrical or TV Producer and the business-film maker, are brothers. And so they are, on the physical side of the job. But in their philosophies, and their responsibilities to their respective audiences and employers, they work in different worlds.

The theatrical and TV Producer's job is to attract people — to the ticket offices or the TV sets — and then to entertain them with a show that will make them recommend the attraction to others.

But the job of the business-film Producer is to sway people — to cause them to learn something, decide something, or feel something — advantageous to his Client's product, operation, or corporate image. Since this film-planted "attitude" should endure, his vehicle is not entertainment *per se* but interest; his goal is not applause, but belief. His medium could be print or speech or art; it happens to be film.

True, the film medium has certain unique advantages and the Producer must know how to manipulate its intricate mechanisms

to best effect, but this part of his job is gear-shifting and throttle-pushing. The business-film Producer's essential function is to pin down the Client's objective and figure out how to fulfill it, and so he is first an analyst — then a merchandiser (of skills, products, ideas, concepts and attitudes) — and finally, a persuader.

How does one learn to be a Producer? First, of course, by coming up through one of the major crafts; doing and observing and analyzing, until he has accumulated his body of principle.

Along the way he will make his share of mistakes: although I had what, looking back, was the unbelievably good fortune to work in close association with Walt Disney, Louis de Rochement, MGM's Dore Schary, Arthur Mayer, and the great and beloved Jesse Lasky, for every important thing I know about picture business I can show a matching piece of scar tissue.

Because with all the help and the guidance and the craft training, a man learns to produce by producing, and he just prays he won't louse things up too much before he gets his foothold.

Once inside, of course, he constantly wonders why he ever let himself get mixed up with this round-the-clock rat race . . . but in his heart he has a deep and abiding pity for all the unfortunate people in the world who have to do something else.

Better Business Bureau Offers New Color Slide Presentation

✧ The Association of Better Business Bureaus has brought out a new color slide presentation designed to be shown to the business community on behalf of the BBB.

Consisting of 43 slides and a narration script, the presentation demonstrates the operating rationale which made the BBB movement important to business in the

public interest. It is intended for use by BBB professionals, directors and business leaders.

Kawneer Film Shows Design & Building of "Sealair" Windows

✧ Design and construction of Aluminum Sealair Windows is the subject of a new 15-minute color motion picture by that title just released by the Kawneer Company, Niles, Michigan. Lukas Film Productions, of Chicago, was the producer.

Animation and strobe sequences as well as conventional techniques are used to show the exclusive new design of this product, said by the manufacturer to provide storm-proof performance. A new design concept, the exclusive Pressure Equalization Slot, eliminates leakage due to siphoning action caused by rain and high winds.

Kawneer's nationwide sales organization has been provided with prints to show architects, engineering and other specifying groups.

D4 Delivers Two Refrigeration Training Films to Air Force

✧ D4 Film Studios of Newton, Mass. has recently completed two new training films on refrigeration for the U.S. Air Force. One, *Principles of Mechanical Refrigeration*, is a 12-minute animated film, and another, *Refrigeration: Evacuating and Charging*, 13½-minutes long, is part animation and part live.

The films are designed to meet the needs of training men on refrigeration problems, both in housekeeping tasks on Air Force bases and depots, and in airborne situations.

Supervising the production, which was undertaken in D4's extensive studios just outside Boston, were officers of the 1350th Production Squadron, Dayton, Ohio.

what's new in pictures

From: "Wondrous World of Sight"

Topflight Pictorial Sequences in "Wondrous World of Sight"

☆ Sequences of spectacular beauty, lavish in their pictorial quality and interest highlight a new 25-minute sound and color motion picture, *The Wondrous World of Sight*, sponsored by the Murine Company and produced with masterful effect by Jack Lieb Productions, of Chicago.

Since the film's mission is to emphasize the importance of sight, the always colorful and sometimes breath-taking sequences are well-chosen. Of special audience value are scenes of the earth made from John Glenn's space capsule; outdoor sequences show the reality of nature's grandeur for those who protect their vision. The sponsor has little need to "commercialize" and, in fact, Murine has let the films excellent visuals "speak" for themselves.

There are, however, informative technical scenes on the anatomy of the eye and useful suggestions on the preservation of good eyesight through proper care. The audience objectives include both adults and young people.

Modern Talking Picture Service exchanges nationwide will have prints for free loan to group audiences.

"The Long Haul" Shows How Social Security Aids Disabled

☆ Helping Americans understand social security disability benefits is the objective of *The Long Haul*, a new 14½-minute color film now available for free loan through

A scene from "The Long Haul"

all district offices of the Social Security Administration.

The picture opens with scenes of a sardine ship tossing on the Pacific swells in early morning. Sparky Aiello and his friend, Joe Ferrante, are two of the many sardine fishermen facing difficult times because their "catch" has almost disappeared from the fishing grounds off Monterey.

The pair goes to San Pedro to try to get jobs on one of the big tuna boats. In the confusion of traffic and machinery at the cannery wharf, Joe misses his footing and suffers a crippling fall. The result: Joe Ferrante, with a wife and 10-year old son, is confined to a wheel chair — permanently handicapped and unable to do the only work he knows.

The Long Haul shows how Joe

receives social security benefits and a start toward rehabilitation. He progresses from bitterness and despair to confidence in a regular income and hope for a new career.

The picture was produced by Columbia, using 35mm Eastman-color. It has a music score composed by Dr. Ron Nelson and performed by the Air Force Symphony Orchestra.

"Instant" Sales Aids for GE

☆ Salesmen will be demonstrating General Electric air conditioning units in the field via Technicolor "Instant" 8mm desk-top projectors. Two short (four and one-half minutes each) color films, showing in-plant operations, have been produced by Keitz and Herndon, Inc., Dallas, as a two-part aid to GE's salesmen.

"Sasci" explains Penney system.

Penney Slidefilm Provides an Effective Inventory Course

SPONSOR: J. C. Penney Company.

TITLE: *Tickets, Please*, 10 min., color ssf, produced by Seymour Zweibel Productions, Inc.

☆ When the J. C. Penney stores introduced a new system of stock control last year, each item in the store was ticketed and tickets were to be removed and put on a spindle after each sale. Thus, an automated system of replenishment of stock could be maintained with much less need for frequent on-hand inventories.

It is a *good* system, and has produced excellent results, but during the first few weeks — as a Penney bulletin put it — Murphy's Law prevailed: "If it can go wrong, it will." Not used to the system, Penney Sales Associates often forgot to tear off the tickets, or forgot to spindle them properly.

Aware that some confusion might be caused by the new system, Penney management set up a quick training course on how SASC — (SemiAutomated Stock Control) works, and how important it is, not only to management but to the sales associates, themselves. A principal part of this training program, *Tickets, Please*, has now been shown to all the thousands of Penney sales associates throughout the country.

Tickets, Please, which has not only been effective in the stores, but has been an award winner in several film competitions on its own artistic merits, introduces a sexy little ticket called "Sasci" who explains how the system works.

As a counterfoil to Sasci's wiles, Punchy, a beat-up old ticket on the floor, tells how rough it is with the likes of Sally Slipshod forgetting to pull him off the package or put him on the spindle. He calls a strike of all the tickets . . . until Sally realizes how much harder it is to do all those inventories than to put the tickets on spindles.

Transport of Future Shown as Car Rides on Air Cushion

☆ A short (7½-minutes) color film introduces what may be the automobile of the future. Sponsored by British Petroleum and Britten Norman Limited, *Cushioncraft* shows the "CC2" which rides on a cushion of air at 40 mph, powered by a 250 bhp Rolls Royce V8 engine and carrying 12 passengers.

Derek Stewart Productions turned out this factual report of the new vehicle, which uses standard

Fueling up the Cushioncraft

automotive fuel and lubricants and can travel 400 miles without refueling. The Cushioncraft is propelled by two air fans and can be driven by any competent driver. It is seen undergoing trials which suggest uses for pleasure, agriculture, fire-fighting, passenger transport and rescue work.

English Steel Previews New Plant Via Closed-Circuit TV

☆ 800 guests were taken on a closed-circuit television tour of facilities as they waited for the opening of English Steel's new plant at Sheffield, England, by Prince Philip, Duke of Edinburgh.

24 monitors provided picture and commentary as a 100-ton arc furnace, half-a-mile away, was tapped. They followed the steel on screen through the 42-inch blooming mill until it burst into real life as it sped past the audience on a specially-erected tiered stand in the rolling mill building.

The TV and film coverage of

this event was supervised by Alan Faulkner-Taylor, English Steel's director of photography and (in his spare time) one of Britain's foremost wild life cinematographers.

Six television cameras, fitted with zoom lenses, were supplied by Sound Services Ltd. of London. They were set up over a weekend in order to avoid interference with the plant work schedule. It was one of the most ambitious uses of CCTV so far undertaken in Britain.

Londoners See Fritsch Film

☆ One of the world's largest suppliers of essential oils, Fritsch Brothers, Inc., of New York City, recently entertained friends in the food, perfume and confectionary business at the London Hilton. 400 guests heard Dr. Ernest Guenther, senior vice-president of Fritsch, describe the age-old quest for the fragrant plant oils which form the base of their products.

And they were shown how the company has developed a thriving business in the Caribbean islands by means of a fascinating film, *Essential Oils of the West Indies*.

Lee Savage Creative Director at Elektra Film Productions

☆ Lee Savage has been appointed creative director of Elektra Film Productions, Inc., New York. Sam Magdoff, executive vice-president, announced Savage's appointment with this comment:

"He has made important contributions to the art of film making and is a worthy successor to the late Abe Liss, who recognized Lee's talent and originality." Savage has won more than a dozen top awards since joining Elektra in 1960. He received three citations in 1963 from the New York Art Directors Club for commercials which he wrote and directed, including a Gold Medal for his animated Chevrolet commercial.

In addition to his film work, Savage is a talented painter.

THAT "DYNAMIC" LOOK (CONTINUED FROM PAGE 40)

flocking to racing films to the extent of some 9,000 16mm showings a year and 900 TV showings for Dynamic-produced motion pictures, alone. Perhaps surprisingly, the audience category with the largest attendance among group viewers are church groups but the films have proved themselves with almost all other kinds of groups, as well.

EVERYTHING? That's right, we have everything in professional equipment for the film industry. Just call or write us and tell us what you want. You can buy, rent, lease—and, yes, we take trade-ins. If you need something special, we'll custom-build it for you. We carry the best-known names, new and used equipment, in every category you can think of. For instance? 35mm studio and newsreel cameras... 16mm studio and newsreel cameras... lenses and viewfinders for motion picture and TV cameras... accessories for same... equipment for animation, special effects & titling... lighting equipment... sound recording equipment and accessories (optical or magnetic)... projection and film-handling equipment... editing and cutting-room supplies... printing and processing equipment (motion picture & microfilm)... lab testing equipment... electrical equipment... camera & recorder motors... stage scenic materials... technical books... and the nearly-endless services of our skilled staff. Try us. You'll see why we call ourselves "The Department Store of the Motion Picture Industry." And why the industry likes that idea.

U. S. Productions Completing Eleven Films on Oceanography

☆ A new series of motion pictures on oceanography is being produced for National Education Television by United States Productions, Inc., New York.

The filming, which began in March 1963, has taken USP camera crews to the Virgin Islands, Miami, Bimini, Iceland, Thailand, San Diego, Alaska, New Zealand, Samoa and Hawaii. The series of 11 films are being coordinated with the research efforts of the George Lamont Observatory, Columbia University and the National Science Foundation. Frank Thayer, USP president, is coordinating the production activities from New York.

Filmex Shoots TV Spots in France for Chrysler-Simeca

☆ Filmex, Inc. has just completed a TV commercial production assignment in France for Young & Rubicam on behalf of the Chrysler-Simeca account. Y & R copy chief, John LaPiek, and Stan Dragoti, agency producer, worked with the film crews on all aspects of the production.

The group used Paris as a home base and commuted to location 25 miles north, near Chantilly. This permitted daily screenings of all rushes at the new Filmex office in Paris.

Camera Mart Building Houses Expanded New York Facilities

☆ After 12 years on the second floor at 1845 Broadway, New York, The Camera Mart has acquired the entire third and fourth floors of the building, in addition to its present quarters. The building from now on will be known as the Camera Mart Building and the entire front will be remodeled and modernized.

The increased amount of floor space will permit an expanded sales and rental operation, with more facilities for maintenance and repairs, sound recording department, lighting equipment and office quarters.

Announce Reciprocal Exchange for RLP, Ltd., VPI, New York

☆ A reciprocal agreement making available facilities and personnel between both companies has been reached by Robert Lawrence Productions (Canada) Ltd. and Video Pictures Inc. of New York City.

RLP will represent VPI on

American work done in Canada and VPI will represent the Toronto-based operation on Canadian work done in the United States. The agreement was announced by RLP president John T. Ross and George Tompkins, president of Video Pictures.

Chapman 5 Acquired by Flint

☆ Complete ownership of Chapman 5 Productions, Inc. Glendale, California, has been acquired by James H. Flint, president of that three-year-old film production company. It was founded in November, 1960 by Flint and Robert A. Lieban.

Ray-Eye Productions Shut Down

A comparative new-comer to the Chicago production scene, Ray-Eye Productions, of suburban Evanston was "temporarily shut down" in early December. The company had shifted its operations from Kansas City, where it was located for seven years. A principal client was the U. S. Gypsum Company.

Form Herb Klynn & Associates to Serve Broader Film Markets

☆ To place more emphasis on creativity, Herb Klynn & Associates has been formed at 4721 Laurel Canyon Boulevard, North Hollywood, Calif., and Format Films, of which Klynn was president and board chairman, has been dissolved.

Hank Jordan is executive assistant to Klynn. Ray Thursby is production manager, Rudy Lariva, director, and Joe Siracusa is head of the editorial department.

With the objective of developing a stronger form of graphics, the animation firm will work in the areas of the business-sponsored film, educational television and entertainment production, utilizing live action where it is called for in combination with animation.

Prints for Mathematics Series Awarded to General Film Lab

☆ Modern Learning Aids, New York, has selected General Film Laboratories, Hollywood for the 16mm sound, color release printing of the 30 half-hour films for the new MLA series, *Modern Mathematics*. Wide distribution is expected, with the principal use by school systems. The series is expected to require hundreds of prints of each title.

Improved Filmstrip Color

System Offered by Manhattan

☆ Manhattan Color Laboratory is now offering an improved system for the production of negative-positive color for filmstrips.

This specialized filmstrip and slide laboratory has announced the exclusive processing of Eastman Internegative 6008 for filmstrips and slide masters.

The lab is using a film stock only recently introduced in 35mm, and has developed a formula for automatic processing of this material with answer prints ready in less than 24 hours.

For those producers maintaining their own camera facilities, the new film will be available from MCL in 100 foot rolls. Since it is very different from Eastman 5251, average exposures per frame will be eight to ten times longer. This might require adapting timing devices for longer exposures. In order to become familiar with the stock and appreciate its advantages, a camera test should be made first.

The film, being an internegative emulsion, has the characteristics of being pre-masked and therefore, contrast masking or original transparencies will no longer be necessary. Having the advantage of eliminating masking, shooting cost and preparation time both will be reduced considerably, according to MCL. In addition, much more detail is possible without any loss in color density or quality.

MCL has been using this stock for the past several months with notable results. Sample prints are available. For information on 6008 and filmstrip prices, write Bernie Barnett, Marketing Manager, MCL, at 210 West 65th Street, New York City 10023.

Technicolor R & D Division to Build, Operate Lab for NASA

☆ The Research and Development Division of the Technicolor Corp. has been awarded a sizeable sub-contract to provide photographic services for the National Aeronautics and Space Administration and the Lunar Landing Program.

Technicolor will provide complete management services for the installation, operation and management of a photographic laboratory to be constructed at the new Launch Operation Center, Merritt Island, Florida. Prime contractor under the multi-million dollar contract covering a three-year period is the LTV Range Systems Division of Ling-Temco-Vought, Inc., Dallas, Texas.

Universal Fibre-Glass Blimp for Arriflex 16mm Cameras

A new Universal Fibre Glass Blimp designed to accept either the standard Arriflex-16S or the new Arriflex-16M camera has been announced by the Arriflex Corporation of America.

New Fibre Glass Blimp weighs only 31½ lbs.; with an Arri-16S, 400' magazine and synch motor, total weight is only 47 lbs. Overall measurements are approximately 22" x 11¾" x 20" and shell is fabricated from molded fibre glass. Interior acoustic installation holds residual noise level to less than 30 phons (studio quality). Blimp is wired for both AC and DC.

Remote follow-focus control and remote diaphragm control are both provided; a special 3-way switch presents bold, clear distance numbers and F-stops for three lenses. Basic Universal Blimp is designed to sell for \$2,890.00; accessories additional. Write Arriflex Corp. of America, 257 Park Ave., South, New York 10010 for further details and availability.

Model 871 Projection Stand Introduced by Compeco Corp.

The Compeco Model 871 projector table has been introduced by the Compeco Corporation, Chicago. Completely self-contained, it may be used for motion pictures, slide or slidefilm equipment; outlets for projector as well as ex-

Compeco "871" Projection Stand

ternal sound and room lights are provided. Also included is a slide previewing screen which enables the operator to conveniently check slide sequence, by-pass or change slides during a showing.

Vinyl-coated top is easy to clean and durable. Tubular legs have mar-proof vinyl caps. The 871 Table folds easily and is self-standing for small space storage. Write: Compeco Corporation, 1800 N. Spaulding, Chicago, Illinois 60647. Mention BUSINESS SCREEN. 

a-v equipment trade fair

NEW PRODUCTS & ACCESSORIES FOR PRODUCTION AND PROJECTION

Here's full view of the Cine 60 "Power Belt" described on page 74 of previous Issue Seven. Cropping of illustration cut off the belt itself (at waist-high position above). In three-pound belt, nickel cadmium battery cells supply power for Arriflex 16 or 35mm cameras. Write Cine 60, 630 Ninth Ave., New York.

Four High-Powered Projection Lamps Introduced by G. E.

Four new high-powered projection lamps — three for 16mm and one for 2 x 2 use — have been announced by the General Electric Company's Photo Lamp Department. They include a 1,000-watt CTS, 750-watt CWA, and the CYS at 1,200-watts. The 750-watt DGR is designed for 2 x 2 projectors. CTS and CWA are 25-hour lamps; brighter CYS has a rated life of 10 hours.

All three have professional features which include corner-to-corner white light; heavy duty bi-plane filaments; king-size proximity reflector with beam-smoothing "dimple." Special "hard" glass used is heat and blister-resistant; internal fuse protects both equipment and circuit. Dual collector grids help lamps burn brighter and longer. 

Atmorep, miniaturized 8mm Sound projector, showing very small size.

(CONTINUED FROM PAGE 25) is 8mm magnetic-striped, continuous loop, for 10-minute showings. The battery provides eight hours of running time on a single charge; up to 60 showings of an 8-minute film!

Film transport is revolutionary, eliminating film gate and pull down to reduce film wear to a minimum. This should be an extremely useful a-v tool for sales demonstrations, either industrial, office or for home demonstrations. For details write Stanley G. Fitch, Movicol Sales Ltd., Lawley Works, Edinburgh Way, Harlow, Essex, England. Mention BUSINESS SCREEN.

Electro-Static Film Cleaner

An electro-static film cleaner attachment for 8mm and 16mm motion picture projectors which requires neither chemicals or liquids is now available. The Lindau Film Cleaner provides two specially-treated camel's hair brushes which remove dirt particles from film before it enters the gate. 

"Communications Wall" Provides Complete A-V Center

For maximum convenience in audio-visual presentation, plus the flexibility of multi-media tools at hand for training, information and conference use, Busch Film and Equipment Company, Saginaw, Mich., has introduced a complete "Communications Wall" concept.

The Busch Communications Wall provides a combination of 35mm slides, filmstrips, 16mm motion pictures, overhead projection, bulletin and chalk boards in a single installation which can serve as a room divider wall. Films can be shown to either of two classrooms by simply flicking a lever. Automatic controls for projection operation are at the instructor's fingertips. Ample space is available within the wall for equipment and materials storage.

Integrated use of the several

still and motion picture tools is available to the trainer or presenter. Material can be pre-programmed, ready for group use.

Presently designed for formal school application, the Busch Communications Wall concept offers special advantages in business and industry. The designer-manufacturer, Edwin Busch, plans to make the wall unit available as a complete package through a Special Installations Division of the company. For details: write 214 So. Hamilton St., Saginaw, Michigan. 

Right: here's the Communications Wall as designed by the Busch Film and Equipment Company for multi-media presentation in training rooms or for conference use.

All types of still and motion picture equipment are inside the divider wall, readily at hand.

NAVA DEALERS... ON THE JOB

Selecting A-V Materials?

We can help

Locating the right film, record, slide or other A-V materials takes a specialist who understands your needs.

Your local NAVA dealer is well versed in the old and new. He regularly screens a wide range of films — the latest as well as time-proven releases.

Perhaps you know what you want, but can't specify the title or type of presentation... your NAVA man is ready to help you in selection and suggest possible presentation methods.

Your best A-V plans begin with your NAVA man. Call him today. For a List of NAVA Dealers, showing services and rental equipment offered by each, write—

The 14th Annual PRODUCTION REVIEW

Industry Mourns Passing of Elektra's Founder, Abe Liss

Nationally-known film designer and director Abe Liss, president and creative supervisor of Elektra Film Studios, died suddenly in New York on December 1. He

The late Abe Liss

was 47. Before forming his own producing company, he had served in creative and executive capacities in New York and Hollywood with UPA, Transfilm, Inc., and Academy Pictures.

Since its founding in 1946, Elektra has won top awards in major film festivals in the U. S. and abroad under the guidance of Mr. Liss. He is survived by his widow, May, and a daughter, Carla.

"Ad" Schneider Dies Suddenly at Magna Studios in Boston

☆ A veteran of broadcast news and the former head of the film unit inaugurating physics film production at Massachusetts Institute of Technology, is dead at 53. Adolph J. Schneider, vice-president in charge of production for Magna Film Productions, Inc. of Boston died suddenly at the company's studios on December 3rd.

A graduate of the University of Omaha, he received the university's Alumni Association Achievement Scroll in 1952. He also taught radio and television courses at Columbia University for five years. Internment was at Sarasota Memorial Park in Florida.

Directors Guild of America Ends Merger Talk With SDIG

☆ The Directors Guild of America (Hollywood) has broken off merger talks with the Screen Directors International Guild (New York) after five months of discussion between the two groups. SDIG officials were quoted as stating their belief that a merger is desirable and necessary, that its Executive Board will report merger terms to the membership.

While screen shows intersection ahead, students use "Tri-Angle Vision" to determine their next driving move in this Drivotrainer classroom scene.

Aetna Goes Widescreen on Drivotrainers

A NEW SERIES of wide screen color films featuring "Tri-Angle Vision" for greater realism in classroom driver training simulators has been introduced by the Aetna Life Affiliated Companies. Designed for use with the Aetna Drivotrainer system, behind-the-wheel simulator now used by over 300 high schools and colleges, the series of 16 films will be available to schools by February.

How Effect Is Achieved

The series was produced using a new photographic technique called Drivavision to achieve increased clarity and definition. With Drivavision, scenes are photographed on 35mm film through a special "anamorphic" lens before being reduced to 16mm prints for use with classroom projectors. By using the wide screen, the Drivavision method increases the picture angle by 50 percent and gives students a panoramic view more closely approaching normal windshield vision.

The Tri-Angle Vision effect is achieved by showing side and rear view mirrors on the screen in all

"first person" or driver's eye view scenes. Students in the Drivotrainer cars thus have a simultaneous view of traffic situations in front, behind, and to the left rear or passing side of their cars.

The use of color and sound in the new film series further heightens the realism of the classroom driving environment. Traffic signals stand out vividly and highway signs and markings appear in their true color. Most of the sounds heard in a moving vehicle are recorded on the sound track — the swish of passing cars, motor noises, horns, and the screech of emergency braking.

Begins With Fundamentals

The film course begins with fundamentals and ranges through virtually all phases of driving. Included are expressway driving, driving on ice and snow, making U and Y turns, parallel parking and backing. One film is devoted to highway emergencies such as brake failure, blowouts, and a number of other situations calling for split-second reaction. The series runs in a progressive sequence

of instruction, but each film is a separate unit and may be used independently for specific local needs.

Students are made immediately aware of right and wrong actions by narration at various stages in each film which asks whether the appropriate response was made. In addition, an automatic recorder, mechanically triggered by notches in the film, provides a permanent printed record of each student's performance.

Three Basic Camera Angles

Photographed on streets, roads and expressways at locations in Florida, Connecticut and Massachusetts, the films were taken from three basic camera angles.

In the "demonstration" angle, the camera is stationed at a distance from the car, allowing students to observe the vehicle being maneuvered through traffic situations. For "third person" views, the camera is mounted in the back of the camera car so students can observe an expert driver's correct actions. Students are placed at the wheel with the "first person" scenes in which the camera is positioned beside the driver's head as he drives the camera car, providing on the screen a driver's eye view of the road ahead.

A Good Use of Techniques

Other Drivavision techniques include "freeze frames," in which action is stopped to permit analysis of critical situations; "pans," in which the camera swings from left to right, creating on-screen simulation of the driver's eye and head movement; and animated circles, arrows, and other symbols which pop on the screen to pinpoint significant details.

The new film series was produced by the Aetna Life companies to incorporate the latest audio-visual techniques into the Aetna Drivotrainer system, now marking the 10th anniversary of its introduction.

Drivotrainer Prints by Movielab

☆ Color prints for the new Aetna Drivotrainer film series are being made by Movielab, Inc. Prints are 16mm wide-screen color and will be released by February.

278 New U. S. Movie Houses: 183 Are of Conventional Type

☆ A survey of the construction boom in new movie theaters, made by the Theater Owners of America, recently disclosed that 278 new houses have been built or an-

nounced within the past 24 months. The trade group says this marks the biggest surge in construction since the drive-in building boom after World War II.

Theater men are building nearly twice as many conventional (indoor) theaters as drive-ins. The association counts 183 new indoor film houses built or announced over the past two years, against 95 drive-ins. 65 of these are or will be in shopping centers. The association also estimates about 16,500 indoor and drive-in theaters in the U. S. not counting theaters built in the past 24 months.

Graham is Now General Mgr. of Du Pont's Photo Products

☆ Harlan L. Graham, Jr., has been named general manager of the Du Pont Photo Products Department, succeeding the late George H. Loving who was killed in the airplane disaster near Elkton, Md., December 8.

Graham, who is 46, has been assistant general manager of the department for the past year. He has had broad experience in sales and production during his 25-year career in the photographic industry, starting as an operator at the company's Parlin, N. J. plant where he became a shift supervisor within two months. Returning to Parlin in 1946 after military service, he became chief supervisor of the casting area, responsible for production of Du Pont motion picture and X-ray film. Two years later he was appointed plant production superintendent.

THE DIET that Frank Willard went on one sunny day last August really worked. Now, instead of walking heavily about set and location, he sleekly masterminds a skeleton crew working on some of the world's finest productions from a comfortable couch of culm. Feet firmly on the ground, he writes, directs and produces some of the finest films that ever came out of camera and pen. "Win with Slim!" our clients say. They've never lost yet.

But Frank does look bad, doesn't he?

If you want it best, fast, and pretty reasonable, contact

DAMAGED FILM HOSPITAL

Why Junk DAMAGED FILM?

"The Film Doctors'" (specialists in the science of film rejuvenation) can restore scratched, brittle, and worn film at a fraction of new print costs. Old, damaged 8, 16, 35mm film can be restored to original screening quality and its life can be prolonged indefinitely.

RAPIDWELD: restores damaged originals, negatives and prints.

RAPIDTREAT: completely protects and prolongs the life of new prints indefinitely.

RAPID FILM SHIPPERS: vault storage, international distribution and inspection facilities.

PROFESSIONALIZE Your Film Handling and Save Money

Harwald's precision automatic film inspection equipment is the accepted world standard for modern film libraries — T. V. stations — or wherever motion picture film is handled. Inspect-O-Film automatically finds breaks, torn sprocket holes, scotch tape "splices", any cause of film failure. Even those defects that are virtually impossible to find by hand. Also provides for film cleaning, conditioning, timing and editing.

Seven models available
See catalog for complete listing.

A Preface to Awards:

(CONTINUED FROM PAGE 16)
"Finalist" trophies in their traditional Industry Film Producer Awards program. The National Visual Presentation Association did likewise in its well-attended "Day of Visuals" program, held annually in Manhattan.

Special mention must be given the Freedoms Foundation, Valley Forge, Pa., for including the motion picture among its annual awards. Finally, the commercially-sponsored International Film Festival of New York continued its awards program, broadening into the field of television commercials during 1963.

Pharmaceutical Mfrs. Catalog Lists 169 Free Loan Pictures

☆ 169 motion pictures suitable for lay viewing and pertaining to the health field are described in a new catalog issued by the Pharmaceutical Manufacturers Association. All of the films were produced by prescription drug firms but do not promote products. All are 16mm sound.

The films, which are available on a free-loan basis to both lay and professional groups, cover such widely-discussed topics as accidents, alcoholism, allergies, artificial respiration, geriatrics, retirement, dental care, mental health, home safety, and career opportunities in the medical and allied professions.

On the technical side, the films present drug research, scientific agriculture, arthritis, open heart surgery, and the treatment of specific conditions of the digestive system, the heart, lungs and kidneys. Copies of the catalog are available upon written request to: Director of Public Information, Pharmaceutical Manufacturers Association, 1411 K. Street, N.W., Washington, D. C., 20005.

To the **vital few**

Delivering essential instruction to a small group on a new process or a new policy can be just as important to your company as today's critical messages transmitted for public relations via large-screen theatrical showings—or to *select* audiences with 16mm projectors. Without prejudice as to method, delivering *the right story* to the *right people* at the *right time*, is our business.

or to the **multitude**

Over 25 million persons saw Jam Handy public relations films this past year in American theaters. Many millions of other viewers also saw our customers' presentations on television screens and in clubs, lodges, schools and in community groups via 16mm projection.

we work with you ...against the clock

Wherever in the world you are, if you're near a major airline, you're close to our laboratory's fast schedule for quality processing. Here are a few typical examples from our files.

In our home town, 35mm or 16mm negative in by 11 p.m., developed and dailies ready 9 a.m. next day. 16mm Ektachrome developed overnight.

Ektachrome in for developing ...color workprints in customer's hands in 3 to 4 days total elapsed time. (Some schedule for Honolulu customers.)

17,000 miles and through customs four times; Ektachrome developing and workprints delivered in 5 days. 35 mm color or b&w negative in 4 days.

Three days round trip for developing and dailies, for 35mm color or black-and-white negative, including four custom stops along the way.

Far 35mm or 16mm, anywhere in Puerto Rico or the Conal Zone, the round trip takes three or four days for most processing assignments.

16mm release prints in quantity and top quality, color or b&w, from 16mm A and B rolls through dupe, five to ten working days.

2-8

How about you? Jet transportation, combined with General Film's fast gearing of procedures and facilities, has solved many producer problems.

A One-Day Workshop for Advertisers on "How Effective Use and Distribution of Sponsored Film Can Help Achieve Marketing Goals" will be presented in the Terrace Room of the Plaza Hotel in New York on Tuesday, April 14, by the Film Producers Association of New York with the cooperation of The Association of National Advertisers.

Scheduled for appearance are such speakers as Charles F. Dolan, President, Sterling - Movies USA; Carl H. Lenz, Executive Vice-President, Modern Talking Picture Service; and Robert D. Mitchell, President, Association Films, Inc., who will discuss the "new distribution patterns and programming concepts" and "how sponsors can earn a greater return on their film investment through planned distribution."

Values in TV Film Series

Willis H. Pratt, Jr., Film Manager, American Telephone & Telegraph Company, will speak on "hidden values in film series produced for television."

Participants will have a preliminary look at the A.N.A.'s nationwide study of advertiser practices in producing and distributing business films, as presented by Wil-

right off the newsreel

Hold Advertisers' Film Workshop in New York on April 14

liam J. Connelly, Manager of Advertising, Union Carbide Corporation Plastics Division.

George Stevens, Jr., Director of Motion Picture Services, United States Information Agency, will be a guest speaker at the luncheon.

Examples of Profitable Use

In the afternoon, examples of how advertisers are using films profitably will be given by Jack Borland, Director of Medical Film Unit, Smith, Kline & French Laboratories; Leslie Buckland, Coordinator of Marketing Presentations, Eastman Kodak Company; Meck Howlett, Director of Sales Promotion, American Airlines; Arthur Railton, Public Relations Manager, Volkswagen of America; and Ben Williams, Director of Public Relations, Pittsburgh Plate Glass Company.

The concluding speaker, William Berns, Vice President of Communications of the New York World's Fair, will describe exhibitors' use of film at the Fair.

Registration Fee for the Workshop will be \$25 per person, covering luncheon and reception, gra-

tuities, copy of proceedings, all printed material distributed and other meeting expenses. Registration forms are available from the Film Producers Association, 165 West 46th Street, New York City, N. Y. 10036.

AF Films Acquires Interest in Canadian Film Service Group

Association Films, Inc. has acquired an operating interest in Industrial Film Maintenance, a Canadian film service organization. It was jointly announced last month by Robert D. Mitchell and Mrs. Jean Lewis, presidents of the two companies. IFM is engaged in television commercial film procurement, distribution, syndication, film editing, sponsored motion picture distribution and AV monitoring services. The new company will be called Association-Industrial Films. It will be located at the present address, 135 Peter Street, Toronto, Ontario.

Industrial Film Maintenance was founded in 1955 by Mrs. Lewis and her late husband, Larry

Lewis. Upon his death in 1962 Mrs. Lewis assumed the presidency. In 1952 IFM went into TV commercial print procurement and distribution. In 1960 IFM innovated a program monitoring service, enabling advertisers and agencies to check the use of their own and competitive commercial and programs on Canadian television. Monitored materials are reproduced by "Photoscript" copies of the actual broadcast.

Mr. Mitchell has been named president of Association-Industrial Films; Mrs. Lewis, vice president and general manager; B. James Bach, vice president, sales; and David Joseph, secretary. George Weiland, manager of Association Films' central area exchange will act as liaison between the two companies.

* * *

Barnett Named Vice-President of Manhattan Color Laboratory

Chuck Robbins, President of Manhattan Color Laboratory and its subsidiaries, has announced the election of Bernie Barnett as a Vice-President and a member of the Board of Directors. Mr. Barnett, previously Marketing Manager, will continue to direct MCL's marketing programs.

We are proud to announce our appointment as the exclusive distributors of Pyral 16, 17½ and 35mm magnetic stripe and fullcoat film in the United States and Mexico.

WE WELCOME AN OPPORTUNITY TO QUOTE ON YOUR REQUIREMENTS FOR FILMS, QUALITY MATERIAL AT LOW COST, WITHIN THREE HOURS. TECHNICAL SPEC SHEET IS AVAILABLE ON REQUEST.

What does MPO stand for?

A trade columnist, unable to answer the same question, finally gave up and quipped: "Good government." Quite right in a way. MPO does *stand* for good government—or good management, if you must be literal—but that's not what MPO *means*.

MPO does not mean Motion Picture Organization as is assumed by some folks who have a penchant for translating the letters on other people's license plates into memory props. Although MPO is a motion picture organization, it is much more than that, too.

MPO, although it is the world's largest producer of filmed television commercials and sponsored motion pictures, is also one of the most diversified companies in audio-visual communications. Besides MPO Videotronics, Inc. (television spots) and MPO Productions, Inc. (sponsored films), there are MPO Sales Meetings, Inc. (sales meetings, presentations, industrial shows, slide and film strips); the Repeater Projector Division (the Videotronic 8-automatic projector for sales and training); Kerbawy-MPO (complete A-V and industrial show services in Detroit); MPO-TV of California (complete West Coast facilities, staff and studios for films and commercials); MPO, Inc. (Chicago sales-service office); Special Projects Divi-

sion (military and government films and projects); Kenco-Tape Films Division (Print servicing, lab expediting, cataloguing, vault storage and shipping). MPO divisions cover *every* area of communication—programming and counseling.

MPO maintains the East's largest, most modern motion picture facilities at the MPO Videotronics Center in New York (9 sound stages, 18 editing teams, screening rooms, shops) as well as a complete Hollywood production center. And MPO's full-time permanent staff of directors, cameramen, writers, editors and technicians regularly gathers more awards for creativity than anyone else in the business.

Next time you need a television commercial, sales training or public relations film, motion picture report, industrial show, sales meeting, sales projector, presentation, or want to consult about any audio-visual and communications project, call MPO. Ask for Judd Pollock. He's the "P" of the MPO. You see, back in the days when MPO was just a motion picture organization, it meant Madison, Pollock and O'Hare. MPO, 222 East 44 Street, New York 17, N. Y. 212 TN 7-8200.

Florman Acquires Control of Camera Equipment Corp.

Florman & Babb, Inc., of New York, one of the nation's larger suppliers and servicers of professional motion picture equipment, has acquired a controlling interest in the Camera Equipment Corporation and Ceco Industries, Inc., another large motion picture equipment concern.

For Arthur Florman, President of Florman & Babb, the acquisition represents the realization of an ambition.

Notes Rising Production Trend

"With the industry showing a steady increase in the production of theatrical, commercial, indus-

—Art Florman, key man in merger

trial, educational and scientific films, it became obvious that if the present rate of growth was to be maintained, more and better facilities would have to be made available to the film producer. We think our move is a big step in that direction and one that will insure continued growth," he said in discussing the new organization.

In acquiring a controlling interest in the Camera Equipment Corporation and Ceco Industries, Inc., Arthur Florman also pointed out that mere assets are not the only, or major consideration in the transaction.

Bregman Is Chairman of Board

"The combined knowledge of the enlarged staff of technicians will be made available to all producers, large and small. Their collective know-how, with respect to the tools of the trade, cameras, lighting, grip, sound and editing equipment, for example, will be entirely at the producer's disposal."

Robert Bregman, a Wall Street broker, represented Ceco Industries, Inc., during the negotiations. Florman & Babb was represented by Gilbert Parker, financial consultant, Milton Cooper, F & B attorney, and Mr. Florman.

Known as F & B/Ceco, the company will be headed by Robert Bregman as Chairman of the Board, and Arthur Florman as President.

The former Ceco headquarters at 315 West 43rd Street, New York, will be the main office of the combined company. The F & B store at 68 West 45th Street will also be kept open with a full line of equipment for the convenience of producers in that area; Leonard Dickstein is manager.

MPO Reports \$10 Million in Sales for 1963: Up 22.5%

MPO Videotronics, Inc. has issued its annual report for the fiscal year ended October 31, 1963.

The report shows sales for the

1963 fiscal year at a record high of \$10,088,773, compared with sales of \$8,231,917 for the previous year, an increase of \$1,856,856, or 22.5 per cent.

Earnings after taxes in 1963 increased to \$206,789 from \$102,631 in 1962. Earnings per share were 44¢ in 1963, compared with 22¢ in 1962 on the total number of shares outstanding.

In his letter to shareholders, (CONTINUED ON PAGE TWELVE)

"HOW THE OPINION MAKER MAKES OPINIONS"

American Medical
Political Action Committee

Last year's "Physicians in Politics" seminar program was addressed exclusively to the medical profession — and demonstrated the fundamentals of how doctors can make their unique position in their communities felt in behalf of their political candidates.

This year, "How the Opinion Maker Makes Opinions" develops one of these aspects in detail: first clarifying the doctor's uniquely influential position with many people he meets (from patients to postmen); showing him how to work up his simple platform statement; and then demonstrating how he can steer casual conversations into opportunities to pass along his beliefs and recommendations . . . all without taking time from his already heavy schedule, and without even altering his daily routine.

Although the locale of the film is a doctor's practice, the development of the "Opinion Maker" and his approach to his opinion-making activity is universal. No political bias is expressed, simply the attitudes and techniques.

ARRIFLEX® 35

CELEBRATES ITS

25TH

ANNIVERSARY

Literally born a classic, the first Arriflex 35 became commercially available in 1939. This brilliantly conceived professional motion picture camera inaugurated a new era in cinematography. The ingenuity of its original mirror-shutter reflex system is today's most imitated feature . . . both a tribute to, and an acknowledgement of Arriflex's leadership.

Its many exclusive features plus lightweight compact design, ruggedness and economy of operation have provided Theatre, Television, Industry, Science and Education with their most important and versatile cinematographic tool. More than any other motion picture camera, Arriflex has made possible the "new wave" of

cinematography that was the cover subject of Time magazine's recent article, "Cinema as an International Art". Arriflex was singled out in this regard.

We take pride in having contributed to the success of Arriflex in the U.S. during the past decade, and extend our heartiest congratulations on this 25th Anniversary to its originators, Dr. Robert Richter, Dr. August Arnold and Mr. Erich Kaestner, chief design engineer.

And to the thousands of Arriflex owners, who have given meaning to its capabilities: Sincere thanks for your invaluable contribution to this memorable occasion.

IMPORTANT IMPROVEMENTS THAT MAINTAIN ARRIFLEX 35's LEADERSHIP AS TODAY'S MOST ADVANCED PROFESSIONAL MOTION PICTURE CAMERA

Arriflex's familiar silhouette has remained basically unchanged through the years because of its masterly original design. But many internal improvements and additions have been incorporated during the last ten years to keep pace with the demands of modern technology and motion picture industry requirements.

Among the most important improvements are:

NEW! Reflex shutter with approximately 180° shutter opening.

NEW! Magazines with larger capacities for color film and new improved film take-up mechanism.

NEW! Cardioid cam-driven transport claw for high precision film movement.

NEW! Variable shutter.

NEW! Signal generator with electric "clap-stick".

NEW! Stronger variable speed handgrip motor with "forward" and "reverse" switch.

NEW! Transistorized governor-controlled motor.

NEW! Adjustable matte box with leather bellows.

NEW! Comprehensive accessory system, from sound blimps to time-lapse mechanisms.

...celebrate with us!

YOUR TRUSTY **OLD**

ARRIFLEX 35

MIGHT BE WORTH **\$2,500⁰⁰**

If you are the owner of an old Arriflex 35 "that has seen its day", take advantage of our 25th Anniversary Offer.

We will accept up to 25 old Arriflex 35's, REGARDLESS OF OPERATING CONDITION, in trade against a new model and allow you \$250.00 towards the purchase price.

AND, IF YOURS HAS THE EARLIEST ORIGINAL SERIAL NUMBER, of the traded-in cameras, WE WILL REFUND YOUR ENTIRE PURCHASE PRICE up to a total of \$2,500.00!

So, if you have been thinking about a new Arriflex 35, take advantage of our 25th Anniversary Trade-In Celebration.

Your traded-in Arriflex might be worth \$2,500.00, or at the very least, \$250.00 if you act fast!

PARTICIPATING DEALERS:

(CONTINUED FROM PAGE SIX)
 Judd L. Pollock, President, discussed the recent production contract entered into with a leading advertising agency, J. Walter Thompson, which tends to assure the company of substantial and continuing volume of film production work from this client.

Mr. Pollock pointed out that this development would enable the company to plan for future production on a more efficient basis. "Successful operation of this system will not only help the company's profit picture," he said, "but may well improve the total marketing picture of the entire industry."

MPO Videotronics is one of the nation's largest producers of television commercials and sponsored films. In recent years, the company's diversification program has resulted in a broad range of communication services being offered to its clients.

The firm has additional divisions operating in the field of industrial shows, sales meetings, sound slidefilms, audio-visual presentations, and for the production and marketing of the Videotronic 8, an 8mm sound repeating motion picture projector for sales and training use.

Newsfilm Editor Ken Brighton Is Victim of Parkway Accident

Kenneth E. Brighton, 34, Managing Editor of Newsfilm, Inc., New York, was killed January 23 when an approaching car on the Northern State Parkway, Long Island, jumped the divider and struck his car.

Beginning his career as a film editor for NBC, Mr. Brighton joined Marathon International Productions as Manager of Newsfilm in 1954. In addition to his wife, Joan, he is survived by two sons, Kenneth, 7, and Robert, 5.

Bobker to Lead Seminars on "Contemporary Film" at NYU

☆ A series of screenings and seminars on the *Contemporary Film* will be given this Spring by Lee R. Bobker, President of Vision Associates, at the Department of Television, Motion Pictures and Radio of New York University.

Meetings will be held in the Washington Square Room in Loeb Student Center. Admission is free. Seminars will be an exploration into the art of the film through the ideas and techniques of four

leading contemporary film makers.

Dates for the screenings are as follows: April 9—The Film Maker and Truth: *Rashomon* by Kurosawa; April 30—The Film Maker and Time: *Hiroshima Mon Amour* by Resnais.

DRIVER EDUCATION

(An 8mm Data/Set)

Standard Oil Company (Indiana)

One of the first "packages" of 8mm silent instructional films in a new technique adaptable to salesman's "motion brochure" use; salesman and dealer instruction; employee job training; user's "motion instruction manual," service and repairs education, and so on.

The eight films are "single concept," each developing one key idea or phase. Length — each 1½ minutes. Wording, distilled and simplified to the essence, appears in super-imposed "titles." Diagrams are so slotted that the projector may be stopped and the frames studied.

The films are packaged on a choice of conventional reels for universally-available 8mm home-movie projectors, or loaded in cartridges for the Technicolor projectors. The price is so low that prints are disposable, like brochures; to be distributed on a non-returnable basis . . . the eight B&W prints in this "Driver Education" package sell to the Dealers at less than \$50; boxed and with manuals.

THE EXTRA STAR ON THE MARQUEE

COLOR BY

Technicolor

...IS ALSO AVAILABLE TO YOU

Whether it is a one-reel industrial film or a multi-million-dollar theatrical production—Technicolor gives the same quality and service to all producers of motion picture film. Remember Technicolor quality costs you no more. Also, services are available to you that you can not obtain elsewhere. Give your next production that “Extra Star”—Color by Technicolor.

AUTO-SELECTIVE PRINTING FOR CONTROL OF CONTINUITY

Technicolor printers are programed to make automatic fades, dissolves, deletions or substitutions. For instance, a 13-minute and a 27-minute version may be printed from the same original negative without recutting.

LIQUID COATED PRINTING TO PROTECT YOUR NEGATIVE

Negatives are coated with a cleansing solvent during printing; abrasion is avoided, and if already present, is rendered invisible.

MULTIPLICITY OF PRODUCT

There are over forty different methods and aspects of printing that are standard products. (Anamorphosing, deanamorphosing, enlargement and reduction of image.)

AUTOMATION IN MANUFACTURE— PERSONAL CONTROL AND INSPECTION

Continuous processing from raw stock to completed color and sound print is accomplished in one pass through processor and projected inspection. Electronic and mechanical programing guides progression of operation. Every print is objectively and subjectively inspected before packaging.

AWARDS COMPETITION FOR BUSINESS FILMS

THE AMERICAN FILM FESTIVAL

Sponsored by the Educational
Film Library Association
New York City April 29-May 2, 1964

The 1964 American Film Festival, sponsored by the Educational Film Library Association, representing school, university and public libraries, and film libraries throughout the U. S. will be held April 29-May 2 at the Biltmore Hotel, New York City.

CATEGORIES: 32 major areas of education and information, art and culture, religion and ethics, business and industry, and health and medicine will be offered for final judging by screening groups during the Festival. Elections will have been made by pre-screening juries for final entries.

AWARDS: Blue Ribbon (certificate) Awards to be presented at banquet, Friday, May 1st. Entries closed on January 20, 1964.

THE 12TH ANNUAL COLUMBUS FILM FESTIVAL AND AWARDS

Sponsored by the
Film Council of Greater Columbus
in association with the
Columbus Area Chamber of Commerce

Awards Screenings: Lazarus Auditorium
September 14 through 18, 1964
Chris Awards Banquet: Columbus Plaza Hotel
September 25, 1964

ENTRIES: Film producers and sponsors are invited to enter motion pictures and filmstrips produced in 1962, 1963 and 1964, provided they have not been previously submitted to any Columbus Film Festival. Entries (in the categories enumerated below) must be accompanied by 3x5 cards (for preview committees) noting type of audience intended.

Films are judged by professionals in the various fields. Entry fee per film is \$5 for films up to 1,500 feet; \$7 for films of 1,600 feet or more. Entrant also pays round-trip postage on films. A flat charge of \$7 covers all feature films (16mm) regardless of length. A flat charge of \$10 for all feature length 35mm prints. (Both U. S. and foreign feature films will be judged in separate category.) An entry fee of \$1.00 is charged for each set of filmstrips entered; the same applies to sets of slides. *Entries for films and filmstrips are being accepted now. Closing date for all entries is August 15, 1964.*

CATEGORIES & CHAIRMEN: (Motion pictures and filmstrips should be shipped directly to the following:) Business & Industry (job training; sales promotion; industrial relations; public relations; industrial safety and general information); *Galvy Gordon, Columbus Public Library, 96 S. Grant Ave., Columbus 15, Ohio;* Information & Education (classroom instructional films; specialized instructional; general information), General Filmstrip (business, ed-

National & International Programs

Evaluating the Factual Film Media

ucation, mental health, travel, U. S. & foreign, fine arts, religion), *Kenneth B. Hobbs, Battelle Memorial Institute, 505 King Avenue, Columbus, Ohio;* Health & Mental Health (health & hygiene; mental health; general medicine; professional medicine; dental), *Peter A. Volpe, M. D., Director, Regional Hospital Planning, Columbus Hospital Federation, Box 2239, Columbus 16, Ohio;* Travel U.S. & Foreign & Special Fields (arts & crafts, music, experimental, religion); Feature Films (16 or 35mm, U. S. and foreign), *Daniel F. Prugh, Film Council of Greater Columbus, 280 East Broad Street, Columbus 15, Ohio.*

AWARDS GIVEN: This is the sixth year of the Chris Statuette Award, presented to the outstanding films in each category. Films receiving the Chris Statuette must be voted "best in photography, story value, and technical aspects of production." Chris Certificate Awards are given to motion pictures, filmstrips, and slides considered "finalists" but not receiving the statuette award.

FARM FILM FOUNDATION

PROFESSIONAL IMPROVEMENT AWARDS

AWARDS: For the 10th consecutive year, an inscribed certificate and \$500.00 will be given to an active member of the American Association of Agricultural College Editors, who is selected by a committee of three Judges as having made, through work in motion picture production, the most outstanding contribution to the advancement of agriculture, home economics, rural-urban relations, and the public interest during the past two years. Honorable Mention Awards of \$50.00 each may also be given at the discretion of the judges.

PRESENTATION: The Awards will be presented at a dinner co-sponsored by the Farm Foundation and the Foundation for American Agriculture at the annual meeting of the American Association of Agricultural College Editors scheduled for July 13, 1964 at New Mexico State University, University Park, New Mexico.

ELIGIBILITY: Any active member of AAACE engaged in some phase of motion picture production are eligible to apply for the Award.

FREEDOMS FOUNDATION AWARDS

Sponsored by the Freedoms Foundation
Valley Forge, Pennsylvania
Closing Date for Entries: November 1, 1964

CATEGORIES: Consideration is given to all films produced or released during 1964, which are aimed at building a better understanding of the American Way of Life.

AWARDS: A distinguished jury of State Supreme Court jurists and other eminent citizens selects one film for the top award and approximately 10 others for the George Washington

Honor Medal recognition. Awards will be announced at Valley Forge on February 22, 1965.

TO NOMINATE: Nomination forms are available from Freedoms Foundation, at Valley Forge, Pennsylvania.

ANNUAL INDUSTRY FILM PRODUCERS ASSOCIATION AWARDS

IFPA Conference — June 4, 5, 6, 1964
Disneyland Hotel, Anaheim, California

ANNUAL AWARDS COMPETITION in recognition of growing number of motion picture units set up for the production of factual films. The purpose of the IFPA awards is to stimulate a constant improvement in efficiency of production, quality of films, and their effective utilization by industry, education and government.

CATEGORIES: Public Information; Technical Information; Sales Promotion; Training; Orientation and Indoctrination; Out-Plant Production.

ENTRY INFORMATION: Films may be submitted by any Active IFPA Member. Out-of-plant films produced for an IFPA Active member may be submitted by that member in the Out-Plant Production category. Any film completed for release during the calendar year of 1963 is eligible. Films completed earlier under government security classification, but declassified during 1963 are also eligible. More than one film can be submitted. Entry deadline is March 15, 1964. Entry fee for each film is \$10.00. For additional information write to Kenneth J. Maurer, Chapters' Vice-President, 9028 Norma Place, Los Angeles, California 90046.

THE 22ND ANNUAL NATIONAL SAFETY FILM CONTEST

Sponsored by the National Committee
on Films for Safety
(Entries close about February 15, 1965)

ELIGIBLE FILMS: All motion pictures and sound slidefilms produced or released during 1964 whose primary objectives are safety or which have important accident prevention sequences.

CATEGORIES: Motion pictures, non-theatrical (16mm) in each of four fields: 1. Occupational. 2. Home. 3. Traffic and transportation. 4. General. Sound slidefilms are judged separately, as are television and theatrical subjects, TV shorts and spots.

AWARDS: Bronze Plaques will be awarded to top winners in each of the various areas of safety. Award of Merit Certificates will be given to other films for special reasons of subject treatment, production excellence and or unusual contribution to safety. At the discretion of the judges, awards may be given separately for "instruction-teaching" and for "inspirational" purpose films.

PRESENTATION: Films winning the Bronze Plaque will be shown in October during the (AWARDS LISTINGS CONTINUED ON PAGE 16)

NEW • EXCLUSIVE • NEW

The Miniola Editing Machine

The "Miniola" is designed to meet the requirements of the smaller budget 16mm film producers while offering the same precision and many of the facilities of the higher priced models. It is portable and can be bench mounted or a purpose built stand supplied.

It has a continuous movement with drive of a novel design giving instant stop and reverse without the aid of magnetic clutches, brakes and electronic relays.

The upper film path is for picture and the lower film path for separate optical and separate magnetic sound. Either film path can be moved independently of each other through de-clutching the sprockets simply by lifting the knob on the front of either sprocket.

Precision cut sprockets and both film gates are in non-magnetic stainless steel.

The machine can be bench mounted or used on a special stand that is available as an extra.

\$1895

4TH INTERNATIONAL FILM & TV FESTIVAL OF NEW YORK

(Held in Conjunction With the
Industrial Film & A-V Exhibition)

The Fourth International Film & TV Festival of New York is scheduled for November 4-6, 1964, at the Americana Hotel, 53rd Street & 7th Avenue, New York City. Industrial and other sponsored films as well as TV commercials are eligible for entry.

CATEGORIES: Business films may be entered in (1) Sales Presentation; (2) Training; (3) Public Relations; (4) Scientific; (5) Educational; (6) Public Service; and (7) Documentary categories. Television commercials are grouped into (1) Live Action; (2) Animation and Puppet; and (3) Live and Animation, and are divided into (a) up to 30 seconds; and (b) over 30 seconds.

AWARDS: Grand Prix is awarded in each of the two primary groups, Business Films and TV Commercials. Each category in these two groups is eligible for First Prize and Special Awards. Special achievement awards are given for contributions in Best Direction, Best Musical Sound Track, Best Special Effects, Best Photography, Best Art Work, etc.

ENTRIES: For entry forms and fees apply to Industrial Exhibitions, Inc., sponsors of the Festival, 17 East 45th St., New York, New York 10017. Phone: ONford 7-4978. ☐

12TH ANNUAL AWARDS COMPETITION of the NATIONAL VISUAL PRESENTATION ASSN.

The "12th Day of Visuals" and attendant awards events of the National Visual Presentation Association, usually held in the Spring of each year, have been postponed because of the impending New York World's Fair, opening on April 22nd.

Dates for this event, now tentatively set for mid-June, 1964, will be announced later. For up-to-date information address: The National Visual Presentation Association, New York Area Chapter, 19 West 44th Street, New York 36, N. Y. BUSINESS SCREEN will carry details as soon as they are announced. ☐

COMMUNICATIONS IN MOTION

OUR FILM SCOPE... **UNLIMITED**

ASSIGNMENT the WORLD

With an openness to knowledge, we have assumed a responsibility to our clients who have multiplied and diversified throughout the years. Coupled with our accomplishments, the horizon of our company activity has expanded to global proportions.

We have established a flexibility that has taken our activities from Zamboanga to Atlantic City and has included scenes filmed in the Sulu Sea and in the bush of Africa. Our cameras have seen the Inland Empire at harvest time and have flown above the 6th Fleet in the Mediterranean.

Responsibility, integrity, plus dependability have been important factors in the more than half a century of continuous production leadership. A priceless heritage has been established.

The Canadian Film Institute,
The Canada Foundation

MANAGEMENT COMMITTEE: Consists of representatives from each of the sponsoring organizations plus technical advisers, who are associated with the film making industry in Canada. Roy Little, *Chairman*, Canadian Film Awards, 1762 Carling Avenue, Ottawa 13, Ontario.

CATEGORIES: Awards will be given for films produced for TV in two categories, fictional and documentary, and for filmed TV commercials. Other categories are: Theatrical, shorts and features; Non-theatrical, arts and experiment, children's, general information, public

relations, sales and promotion, training and instruction, travel and recreation, amateur. Award for Cinematography presented by Canadian Society of Cinematographers. Films released during 1963 by Canadian film producers are eligible for award. Entries closed January 31, 1964.

AWARDS: Award for the Canadian Film of the Year, a Certificate of Merit for best in each category, trophy of the Association of Motion Picture Producers and Laboratories of Canada for the best amateur film.

THE FIFTH INTERNATIONAL INDUSTRIAL FILM FESTIVAL

London, England, November 2-6, 1964
Sponsored by the Council of European
Industrial Federations

Great Britain is the host country for the Fifth International Industrial Film Festival. Sponsored annually by members of the Council of European Industrial Federations (CEIF). European film entries are selected through national industrial film festivals held in each of the respective countries. Films of the United States are invited to participate though the National Association of Manufacturers in this country.

CATEGORIES: the following types of films are admitted to this International Festival:

A. Films about industrial questions (economic, social, technical or scientific) of general interest and intended for showing primarily to the general public.

B. Films about specific industrial products, materials or projects, intended for showing primarily to the general public.

C. Films aiming less at information than do the films in categories A and B, but which have the purpose of contributing to the prestige of the industry concerned or of a firm, intended primarily for the general public.

D. Films about specific industrial products, materials or projects or about industrial techniques (management methods, measures for increasing productivity, efficiency and output, rationalisation, automation, application of modern techniques, etc.) intended primarily for specialist audiences.

E. Films on industrial application of scientific principles and research intended primarily for special audiences, including educational establishments, rather than for general showing like categories A, B and C.

F. Films on management and manpower training (for example, vocational guidance and training, training within the firm) and on manpower promotion and human relations within the firm, intended rather for an industrial audience than for the general public.

G. Films on accident prevention, occupational diseases, health, re-education and measures of social security, intended rather for an industrial audience than the general public.

CLOSING DATES: films should be received by the sponsoring organization in Britain, the (AWARDS LISTING CONCLUDED ON PAGE 20)

INTERNATIONAL AWARD COMPETITION

(CONTINUED FROM THE PRECEDING PAGE 18)

British Industrial Film Association, not later than August 15, 1964. A list of films selected in each category must be transmitted together with a synopsis of each (not exceeding 250 words) not later than August 1, 1964. Synopses are to be supplied in the English, French and German languages. Only National Federations may participate through their respective organizations.

CINE

THE COUNCIL ON INTERNATIONAL NONTHEATRICAL EVENTS

(Processing United States Entries
for International Film Festivals)

OFFICE (of the Coordinator): 1201 Sixteenth
Street, N. W., Washington, D. C. 20036.

OFFICERS: Willis H. Pratt, Jr. (American Telephone & Telegraph Co.), *President*; Thomas W. Hope (Eastman Kodak Co.), *First Vice-President*; J. Edward Oglesby (Virginia State Board of Education), Anna L. Hyer (National Education Association), Charles Dana Bennett (Farm Film Foundation), *Vice-Presidents*; Willard Webb (American Science Film Association), *Treasurer*; Alden Livingston (E. I. duPont de Nemours & Co., Inc.), *Secretary*; Harold E. Wigren (National Education Association), *Coordinator*; John Flory (Eastman Kodak Co.), *Past President*.

OTHER DIRECTORS: Eyre Branch (Standard Oil Co., New Jersey, retired); Otto H. Coelln (Business Screen Magazine); Ralph P. Creer (American Medical Association); Robert Disraeli (American Jewish Committee); Kirby Grant (Actor-Director); Carolyn Guss (Indiana University); Emily S. Jones (Educational Film Library Association); Stanley McIntosh (Teaching Film Custodians, Inc.); The Rev. Michael Mullen, C. M. (St. Johns University); Reid H. Ray (Reid H. Ray Film Industries); Frank Rollins (E. R. Squibb & Sons); Randall Whaley (Wayne State University); Janet R. Wilkins (New York City); and Don G. Williams (University of Kansas City). Note: the above serve not as representatives of their organizations, but as individuals.

PURPOSE: CINE is a voluntary organization established to coordinate the selection of U. S. nontheatrical motion pictures, other than those produced by the United States Government, for submissions to foreign film festivals.

1964 ACTIVITIES: Selection of U. S. nontheatrical films for entry in the following festivals is being handled by CINE: Berlin International Film Festival; Berlin International Agricultural Film Competition; Padua International Exhibition of the Scientific-Didaetic Film; Valencia Music and Dance Motion Picture Contest; Venice International Film Festival; Cortina International Competition for Sports Motion Pictures; Edinburgh Film Festival; Melbourne Film Festival.

SAN FRANCISCO

INTERNATIONAL FILM FESTIVAL

(Film As Communication Section)

November 5-18, 1964

CATEGORIES: I. Art and culture (relating to subject matter); II. Industrial, government and institutional films for internal use; III. Government films for general information to the public; IV. Films sponsored by industry, individual companies or other commercial institutions, for the general public; V. Films sponsored by civic and community organizations or other non-profit organizations, intended for public use; VI. Classroom films (primary and elementary schools); VII. Classroom films (secondary schools and colleges); VIII. Continuing education (graduate, technical, training and other instructional films).

ENTRY INFORMATION: Application blanks should be sent for and mailed in April; receipt of forms deadline will be August 1, 1964. Only 16mm release prints will be acceptable but original gauge may be another.

SCREENINGS: For film as communication entries, final screenings and conference will be held from Wednesday, November 11, through Saturday, November 14. The general Festival dates will be Thursday, November 5, through Wednesday, November 18, 1964.

APPLICATION BLANKS should be requested from and mailed to: San Francisco International Film Festival, Film as Communication Section, 172 Golden Gate Avenue, San Francisco, California 94102.

FILM AS ART: This is a new category, established in 1963 to replace "Creative-Experimental Films" and will be devoted entirely to experimental films. Participation of independent film makers is encouraged and entries will be judged on the basis of the originality of their contribution to the film medium.

MIFED, INTERNATIONAL FILM, TV FILM AND DOCUMENTARY MARKET

IX Cine-meeting, April 15-25, 1964

X Cine-meeting, October 12-21, 1964

CATEGORIES: Feature (entertainment) motion pictures, telefilms, publicity films and documentary motion pictures may be screened at this market-place for possible re-sale.

MARKETS: Two sessions are held each year. The Spring session in April is concurrent with the Milan International Trade Fair. A Fall session is held in October (see above).

ENTRIES: Address requests for entry forms, etc. to Commissariato del MIFED (Mercato Internazionale del Film, del TVFilm e del Documentario), Largo Domodossola, 1, Milano (640) Italy.

News of specialized film award programs sponsored by financial, transportation, advertising and other groups is provided during the year in the pages of regular issues of BUSINESS SCREEN. We keep readers informed.

“Selective Audiences” replace mere numbers with real people

Developing selective audiences for public-relations films is a challenge that a progressive distributor must accept.

Selective audiences are a product of our belief that the bland assortment of audiences in too many of today's distribution programs are not doing the job they should do for the film sponsor.

The obligation to do this job properly lies with the distributor. The goal he should strike at is not the vague assortment of adult and school audiences, so common today, but a *precise* selection of audiences that aims at the sponsor's range of *immediate* interests.

“Selective Audiences” are not just the heady stuff that shop talk is made of. Our sales consultants offer these precise distribution programs as part of our standard services, and they wind up being spelled out in our contracts every day.

We hold that these programs are the most advanced in the industry. They give the sponsor a high return on his distribution investment and equally important to sponsor and producer, they add a clear measure of extra value to the already proved function of public-relations films.

If you'd like more information about “selective” film distribution, we'll be glad to get in touch with you. Just call or write any of the Sterling Movies U.S.A. sales consultants below.

focus on film safety

Kalart Victor 16mm projectors have a reputation for film safety. For 35 years, Victor Projectors have had three Safety Film Trips (one for each film loop) as exclusive components of the film transport mechanism. These Safety Film Trips spot film trouble before it happens and stop the projector instantly and automatically. Saves thousands of dollars in film damage annually. Kalart/Victor's large diameter Single Drive Sprocket moves film in and out of the projector smoothly and at one constant speed . . . no chance for film "pile up." These features give even beginning projectionists full confidence, allow them to concentrate on putting on a good show, with no interruptions. And a good show it will be with a clearer, brighter picture and brilliant sound . . . a combination that increases learning power. For full details see your Kalart/Victor dealer or write:

Meetings on the Audio-Visual Calendar

95th Technical Conference of SMPTE Opens April 12th

The 95th Technical Conference of the Society of Motion Picture and Television Engineers launches a busy spring and early summer meeting program when sessions get underway April 12th at the Ambassador Hotel in Los Angeles. Convention Vice - President George W. Colburn has already announced a formidable list of key arrangements chairmen for the West Coast gathering.

General chairman is John P. Kiel of Photo-Sonics, Inc., Burbank, California, assisted by Ralph E. Lovell of the 3M Company's Los Angeles office.

In charge of hospitality is Theodore B. Grenier of the American Broadcasting Company. Hollywood and hotel arrangements are under the direction of W. Daniel Carter of Consolidated Film Industries' local headquarters.

Luncheon chairman is G. Carleton Hunt, Glen Glenn Sound, Hollywood and Dennis F. Godfrey, Eastman Kodak Company, is the banquet chairman. The Ladies Program is in the capable hands of Mrs. William E. Gephart, Jr. and Neal Keehn of General Film Laboratories is in charge of publicity.

Other program arrangements are being handled by E. B. McGreal, Producers Service Company, Hollywood (in charge of registration) and A. B. Johnson, Pathe Laboratories, is the Conference Auditor. This year's equipment exhibit is being supervised by George Kendall, Moviola Manufacturing Company, North Hollywood.

Noteworthy in the long list of technical papers to be presented during the week-long conference are those on Cinematography; Color and New Photographic Materials; Medical Photography; Motion Pictures, Television and Education; Projection Practices; Short Film Subjects and a session on Small-Format Films.

John M. Waner, Eastman Kodak, Hollywood, is chairman for the technical program.

CINE to Review Films for Festivals Abroad April 7-10

☆ The Council on Non-Theatrical Events (CINE) will hold final judging sessions for motion pictures to go to inter-

national film festivals in the Auditorium of the National Education Association in Washington, D. C. on April 7-10th.

The annual meeting of the now-incorporated (non-profit) organization will be held in the Board Room of NEA headquarters on Tuesday, April 7th. Meeting chairman is Willis H. Pratt, Jr., CINE President. The judging sessions follow the nationwide review of overseas festival entries by regional juries. Their selections are then sent to Washington for final decision and allocation to the various festivals held throughout the world later this year. ☐

Educational A-V Specialists Meet in Rochester April 20

The Department of Audio-Visual Instruction, National Education Association, will bring together specialists in a-v education techniques and tools when it holds its national convention at the War Memorial Auditorium in Rochester, New York on April 20-25th.

A special program has been arranged by the Eastman Kodak Company for presentation to convention delegates. A report of these proceedings will be provided in these pages. ☐

NVPA Board Votes to Hold a "Day of Visuals" in June

After considerable discussion and a keen awareness that New York City will be a major tourist attraction when the World's Fair is in full swing, directors of the National Visual Presentation Association have now resolved to hold that organization's traditional "Day of Visuals" program in late June.

Although final details were still to be confirmed, the site is apparently again to be the Hotel Commodore. But Vice President Herbert C. Rosenthal's motion for the "late June" date was seconded by Treasurer Norman L. Bebell and passed by a near-unanimous vote of the directors present at the February 27 meeting of the organization's Board of Governors and Directors.

At presstime, no decision had been made by the NVPA Board on exhibits during the "Day of Visuals" program. A Seminar program is definitely planned for the one-day event.

Industrial Relations Experts Select Best Films at Forum

In our next issue we'll bring you the selections made at the Industrial Relations Film Forum sponsored by the National Association of Manufacturers and held on March 8-13 at the Hollywood Beach Hotel, Hollywood, Florida.

The best in recent industrial relations motion pictures were screened by specialists in that field during the general conference.

Industrial A-V Association Meets in Chicago April 27-30

In Chicago on April 27th, members of the Industrial Audio-Visual Association will not be concerned with World's Fair reservation problems as they convene for the annual convention of that professional a-v management group.

The "members-only" sessions of IAVA will be held in the new Hotel Continental along Michigan Avenue's "Magnificent Mile." Program chairman for the four day convention is Paul L. Dowty, International Harvester Company. Assisting in program arrangements for the annual gathering are Central Region members.

Hold 5th National Conference of Industry Film Producers

Rounding out the calendar of key meetings of professional industrial film people is the Fifth Annual Meeting of the Industry Film Producers Association, Inc., opening at the Disneyland Hotel in Anaheim, California on June 4th.

Conference Vice - President Joseph M. Gulli is in charge of arrangements for this important gathering of industrial filmmakers, which will be climaxed by the association's "Cindy" awards banquet on June 6.

National Audio-Visual Show Opens in Chicago on July 18

Audio-visual dealers from all over the U. S. and Canada will converge on Chicago for the 25th Anniversary convention and Audio-Visual Exhibit of their National Audio-Visual Association, scheduled for the Sherman House from July 18th through the 21st.

Joining with them to attend concurrent special meetings and a-v forums will be representatives of a-v user groups

from education, industry, medicine and allied sciences. The NAVA convention program includes an Audio-Visual Education Forum for school and college audio-visual directors and administrators; an A-V Workshop for Industrial Training Directors, attended by training supervisors from business and industry; and an A-V Conference of Medical and Allied Sciences as well as meetings of members of the National Visual Presentation Association and of the Industrial Audio-Visual Association.

The display of audio-visual products, often called the "largest audio-visual trade show of them all," opens at 1 p.m. on Saturday, July 18th and continues through Sunday, Monday to close at 1 p.m. on Tuesday, July 21st. James Hulfish is Exhibit Manager for the National Audio-Visual Association, at Fairfax, Va.

Britain Is Host at November Int'l Industrial Film Exhibit

Over 3,000 industrial organizations, advertising agencies and specialized film producers have been being invited to enter films to represent Britain at the Fifth International Industrial Film Festival to be held in London, England from November 2nd through the 6th.

Britain is the host country for this year's Festival, annually sponsored in Europe by the Confederations of European Industry of Britain and the Continent. Michael Shersby is Festival Director. He has announced that final selection of the 15 films to represent that country will be made by the Council of the British Industrial Film Association. Sir Ivone Kirkpatrick, Chairman of the National Bank and former Chairman of the Independent Television Authority, is President of the BIFC.

Mr. Shersby said that the Federations of Industry in at least 15 countries would be submitting national entries. He estimates that during the six days of the Festival, over 150 industrial films would be exhibited. Our own Robinson P. Rigg, European Editor of BUSINESS SCREEN INTERNATIONAL, is serving as Publicity Director for the event.

The National Association of Manufacturers is traditional host group for the U. S. entries.

A MAN
YOU CAN
LEAN ON
THAT'S
KLOPMAN

and ...
to put a sales message across

Klopman leans on "Moviematic"

Klopman Mills, Inc., a division of Burlington Industries, wanted to show their new color film "Man You Can Lean On" to 1500 top buyers and store training directors across the country, plus about 7 to 8,000 retail sales people. To do this they supplied each of their local representatives — all women — with a KALART VICTOR Moviematic Repeater projector loaded with a 16mm sound print of the film. These representatives then carried the convenient Moviematic to the store people. *Wherever* the buyer, Klopman pictured the "Man You Can Lean On" in the best selling atmosphere ... and you can do the same for your business. With the Moviematic you're not selling in the dark. You can see what arouses your prospect's interest ... then clinch the sale. That's because the last time you showed it, the film was rewinding itself ready for this time. Is Klopman enthusiastic about Moviematic? You bet! More buyers are specifying Klopman, not just any fabric. How about your product? You can purchase, lease or lease-to-buy the Moviematic. Ask your KALART VICTOR dealer or write:

A Preface to the Review

MAKERS OF FACTUAL FILMS were given many important assignments in the past year: interpretation of the economy; explanation of social problems, ranging from those of youth to the aged; public information of vital concern on the nation's resources; exposition of corporate policies and programs; health and safety education as well as professional medical instruction; and the training of workers as well as salesmen at both ends of the business spectrum.

Their colorful reels also brought re-enactment of thrilling spectacles of sport: auto racing, baseball's World Series; professional football's championship game; the best in golf, tennis and other sports. Films bridged the oceans to share with millions of viewers the vistas of far-off places and of the peoples of a world no farther away than the screens which brighten tens of thousands of community halls and other meeting places where they are shown.

A Pope once proclaimed these the "*pictures which enter men's hearts and minds*" and cautioned for their constant betterment. *What a field of great endeavor for men and women of talent to enter . . . what tremendous potential lies ahead in a world as complex as ours has become!* Yet, neither the world nor the film people who serve it through the enlightening power of their pictures, lack problems.

Festivals Are Fun, But "Working Films" Merit More Recognition

☆ Is it a "problem" of our filmmakers that we tend to over-estimate the value of present-day film festival competition? We would not discourage a single one of these, for "exposure" is probably worth the price in New York, Columbus or San Francisco. Does it matter that the great majority of "festivals" at places like Edinburgh and Venice are simply to promote tourism and that, especially at Edinburgh, the factual film plays the back-halls and side-streets to meager audiences?

Positive emphasis would place the National Safety Film Contest on a high plane; films judged by experts in this highly-specialized field are screened again by representatives of the most prominent organizations involved in the process of safety education. The specialized character of the International Industrial Film Festivals, held annually in Europe, might well be emulated in this country.

But the most positive problem of all is that there is literally no recognition of *working films*, of *films as tools* assigned to accomplish specific tasks and proving their salt in companies which have learned to regard them for *solid values* rather than optical technique.

Such films, we submit, are the hard core of this industry; these are the pictures which earn their keep. Sharing the case histories of programs where they are developed would merit the attention of

corporate management. Where are they? Clues are found in the listing pages which begin on page 107: in the report by veteran producer Charley Beeland on his success with Smm sound; in the story of the American Oil-sponsored Smm safety education package told in this issue. The evolution of a program of recognition for the most valuable assets in the field of factual film is a key objective for BUSINESS SCREEN throughout the rest of this year.

When Government Buys on "Price" Alone, the Nation Will Suffer

The Federal Government's recognition of the film medium is emphasized again in the listing pages devoted to its audiovisual programs. But government film procurement has become one of the film industry's critical problems. The government people who procure film services from the lowest bidder *on that basis alone*, will either get bad pictures — or do irreparable financial damage to the good company which takes the assignment on that basis.

Going down to Washington on the air shuttle from New York the other day, a friend happened to sit next to the film buyer of a government agency. In the course of conversation, the subject of the current rules for bidding on government pictures came up.

"Why," our friend said, "with those regulations, even if you got a low bid from a taxi-driver you'd have to take it."

The government man laughed. "As a matter of fact, one did, and we did accept it." It seems that among 159 "producers" bidding on a recent film was an honest-to-God taxi-driver who was also an enthusiastic amateur movie-maker with a closet-full of equipment. He bid \$9,567 for a 27½-minute color film calling for 15 locations. Under the rules, his bid was the lowest received, and was accepted.

Let the industry's trade groups and its labor organizations ask the Congress if that's the way the American taxpayer gets *his* money's worth out of government spending? This is a vital medium, requiring real skills to deliver the intended message. It helped win in wartime; it can help win today's *war* on ignorance and poverty.

Let the Industry Unite on a "Research & Development" Program

Finally, there is an area which is no "problem," but one of *opportunity*. This highly-divided industry, in terms of national *trade* unity, is really united in spirit and in the common goal of self-preservation. It has urgent need for the formation of a national council to further such objectives, to establish a program of "Research and Development" on film objectives and results. On such a council there should be representation for both sides of the trade: production and distribution.

The character of men like Jamison Handy, Bill Hammer, Reid Ray, Frank Speidell, Hank Strauss, Dick Westen, Stan Webb, John Sutherland . . . to name only a few of many . . . is evidence of our resource of leadership. Let them join with Frank Arlinghaus, Chuck Dolan, Bob Mitchell and others to look ahead into the industry's *full potential*! This is another area in which we pledge our continued effort.

Producer Listings-in-Depth Present 2,554 Titles for Reference

We will sum it up again, but this 14th Annual Production Review brings into sharp focus the personal and physical resources of 377 producing companies in the United States, 14 in Canada and 65 abroad. It provides references-in-depth on their work, available as proof of ability, on 1,921 motion pictures and 633 slidefilms. 2,015 names of key production people are identified by title in the U.S. alone.

This was a formidable task of census-taking. And we're equally proud that the country's leading companies have joined with us, in the advertising pages of the Production Review, to tell their story in those additional, interesting display messages.

On to the next quarter-century with a 25th volume under way as another great World's Fair opens in New York on April 22nd. It seems like only yesterday . . . when we reported the '39 New York Fair in the same detail with which we bring you the story of the 1964 edition — soon after that momentous opening day . . . — OHC

Benjamin (Agricultural Consultant), *Secretary*; Charles Dana Bennett, *Special Consultant*; Lewie B. Martin (Pope, Ballard & Loos), *Counsel*; Dickson Loos (Pope, Ballard & Loos), *Assistant Treasurer*.

BOARD OF TRUSTEES: Mrs. Viola Armstrong (Indiana Statewide Rural Electric Cooperative), Elmaar Bakken (Boy Scouts of America), Earl W. Benjamin (Agricultural Consultant), Mrs. Edith T. Bennett, *Exec. V. P.*, Henry O. Bereher (International Harvester Co.), William T. Brady (Corn Products Co.), Mrs. Anna Breckenridge (Potomac Grange), Roger Corbett (New Mexico State University), P. O. Davis (Assn. of Land Grant Colleges), Beatty H. Dimit (National Grange), Walter D. Fuller (Walter D. Fuller Co.), Ken Geyer (Connecticut Milk Producers' Assn.), James E. Gibson (Peace Corps), H. G. Hawes (Maine State Dept. of Agriculture), Karl D. Loos (Pope, Ballard & Loos), Herschel D. Newsom (National Grange), E. M. Norton (National Milk Producers Federation), J. K. Stern (American Institute of Cooperation), Carroll Streeter (Farm Journal), R. Douglas Stuart (Quaker Oats Company), Webster Tenney (Future Farmers of America), Orville F. Walker (National Assn. of County Agr. Agents), Walter Wightman (Michigan Farm Bureau), Francis Wilcox (Sunkist Growers, Inc.), P. O. Wilson (National Live Stock Prod. Assn.).

HONORARY LIFE MEMBERS: Frank W. Jenks, James A. McConnell, Wheeler McMillen, Mrs. Raymond Sayre, William T. Spanton.

BOARD OF CONSULTANTS: Roy Battles (Clear Channel Broadcasting Service), E. G. Cher-

boanier (Foundation for American Agriculture), Don Donnelly (American Farm Bureau Federation), Creston Foster (American Farm Bureau Federation), C. M. Hall (New England Homestead), Kit H. Haynes (National Council of Farmers Cooperatives), Jack Jackson (National Grange), J. Don Parel (Association of America Railroads), Val Sherman (National Milk Producers Federation), C. Maurice Wieting (Ohio Farm Bureau Federation), Louis H. Wilson (National Plant Food Institute), Judd Wyatt (Missouri Farmers' Association).

MEETINGS: The Trustees meet each year in June. The Board of Consultants meet to screen films on call of the Executive Vice President.

PURPOSE: The creation of better understanding between rural and urban America through audio-visual education.

ACTIVITIES: (1) Distributes through its main office and cooperating depositories 16mm motion pictures found suitable by Board of Consultants for Foundation endorsement. Distribution is principally to rural America. There is no cost to film users except for return postage. There is, however, a small library of special purpose rental films maintained at the main office. (2) The Foundation, through its contacts with all phases of rural America, makes available a unique consultation service to film sponsors and producers.

**THE INDUSTRIAL
AUDIO-VISUAL ASSOCIATION**

OFFICE (of the Secretary): Harold W. Daffer, Honeywell, 2753 Fourth Avenue South, Minneapolis, Minnesota 55408.

OFFICERS: William J. Connelly (Union Carbide Plastics Co.), *President*; Robert C. McCaslin (Caterpillar Tractor Co.), *First Vice-President*; H. Leroy Vanderford (American Telephone & Telegraph Co.), *Second Vice-President*; John T. Hawkinson (Illinois Central R. R. Co.), *Illinois' Vice-President*; Harold W. Daffer (Honeywell), *Secretary*; Donald G. Peterson (Caterpillar Tractor Co.), *Assistant Secretary*; Frederic J. Woldt (Illinois Bell Telephone Co.), *Treasurer*.

DIRECTORS: *Eastern Region*: Alan E. Yost (Bethlehem Steel Co.); *Northern Region*: Marshall C. Barnes (Bemis Bag Co.); *Central Region*: Paul L. Dowty (International Harvester Co.); *Western Region*: Walter V. Hardy (Autonetics); *Southern Region*: Robert L. Strickland (Lockheed Aircraft Corp.).

FILM LIBRARY and TV Film Room Managers

Harwald's precision automatic film inspection equipment is the accepted world standard for modern film libraries — T. V. stations — or wherever motion picture film is handled. Inspect-O-Film automatically finds breaks, torn sprocket holes, scotch tape "splices", only cause of film failure. Even those defects that are virtually impossible to find by hand. Also provides for film cleaning, conditioning, timing and editing.

Seven models available
See catalog for complete listing.

Get the full story. Talk to our engineering representatives and write for our catalog containing a complete line of film room equipment.

PROFESSIONAL FILM USERS GROUPS

(CONTINUED FROM THE PRECEDING PAGE 27)
PURPOSE: To study all means of audio-visual communications including creation, production, appreciation, use and distribution; to promote better standards and equipment and to establish a high concept of ethics in the relations of members with associated interests.

ANNUAL MEETING: At Chicago, Illinois—April 27, 28, 29, 30, 1964. Members only.

THE INDUSTRY FILM PRODUCERS ASSOCIATION

OFFICE: Post Office Box 564, Hollywood, California 90028

NATIONAL OFFICERS: Jack R. Goetz, *President*; Everett C. Kelley, *Financial Vice-President*; Kenneth J. Maurer, *Chapters Vice-President*; Joseph M. Gulli, *Conference Vice-President*; Jack R. Smith, *Executive Vice-President*; Edward L. Hayes, *Editorial Vice-President*; H. Gene Burson, Jr., *Past President*.

CHAPTER OFFICERS: Southern California: Henry Martin, *Chairman*; Ronald Johnson, *Secretary/Treasurer*; Robert Duff, *Program Chairman*. Northern California: Raymond Jaeger, *Chairman*; Edward Carroll, *Secretary/Treasurer*. Delaware Valley: Peyton Stallings, *Chairman*; Charlie Gindhart, *Treasurer*; James Preston, *Secretary*. New England: William A. Muttitt, *Chairman*; John H. Sheehan, *Secretary/Treasurer*.

MEMBERSHIP: Primarily composed of defense, aviation-space and electronics industry film managers, their crews and technicians supported by membership from commercial labs, equipment firms, independent production studios, etc.

PURPOSE: Study and discussion of problems and fields of interest related to industrial documentation and motion picture coverage of projects and products of members' organization; up-grading nationally of standards and abilities of members of film communication profession; formalizing industry-wide cooperation and exchange on techniques and applications.

PUBLICATIONS: The Official Magazine of the Industry Film Producers Association is **BUSINESS SCREEN**.

1964 ACTIVITIES: Fifth Annual National Conference and IFPA Film Awards Banquet, June 4, 5, 6, 1964, at the Disneyland Hotel, Anaheim, California.

THE NATIONAL COMMITTEE ON FILMS FOR SAFETY

OFFICE (of the Secretary): 425 North Michigan Ave., Chicago, Illinois 60611.

OFFICERS: W. L. Robinson (American Automobile Association), *chairman*; William Englander (National Safety Council), *secretary*.

MEMBER ORGANIZATIONS: American Automobile Association, American Association of Motor Vehicle Administrators, American National Red Cross, American Public Health Association, American Society of Safety Engi-

neers, American Society of Training Directors, American Standards Association, Association of Casualty & Surety Companies, Association of Safety Council Executives, Auto Industries Highway Safety Committee, Automotive Safety Foundation, Council on Occupational Health of the American Medical Association, Industries Highway Safety Committee, Insurance Institute for Highway Safety, International Association of Chiefs of Police, National Association of Automotive Mutual Insurance Companies, National Association of Manufacturers, National Association of Mutual Casualty Companies, National Fire Protection Association, The National Grange, National Safety Council, U.S. Air Force, U.S. Army, U.S. Bureau of Public Roads, U.S. Junior Chamber of Commerce, U.S. Navy.

PURPOSE: A co-sponsored group of national organizations, with active interest in accident prevention through use of films, who wish to accomplish the following objectives: 1. To stimulate production and use of safety films. 2. To raise the quality of films produced. 3. To establish film evaluation standards. 4. To recognize film excellence in awards program.

1964 ACTIVITIES: April meeting of the Committee as a Board of Judges to screen and finally judge entries in their 21st Annual Safety Film Awards Program. October evening showing of top winning films and presentation of awards to representatives of sponsors and or producers (during the National Safety Congress and Exposition in Chicago, Ill.).

THE NATIONAL VISUAL PRESENTATION ASSOCIATION, INC.

FOR INFORMATION: National Visual Presentation Association, Inc., 19 West 44th Street, New York 36, N. Y.

BOARD OF GOVERNORS: W. Blair Adams, Norman L. Bebell, William J. Connelly, Charles Corn, Rodd Exelbert, Roger Hall, William A. Klauber, Leon Luxenberg, Joseph C. McDonagh, Selwyn Robbins, Hebert C. Rosenthal, Henry Stolte, Emma Treadwell, William W. Weltman, Janet R. Wilkins, Robert Yung.

PURPOSE: To advance and encourage the more effective use of visuals to promote better communication in industry, business, education and government. To increase the prestige of the visual communications specialist by adherence to the highest ethical standards.

ANNUAL AWARDS COMPETITION: Deadline for awards entries for the "Best Visuals of 1964" to be announced later. Annual event usually held in the Spring of each year has been postponed until mid-June because of impending New York World's Fair events.

MEETINGS: Monthly luncheon meetings, second Thursday, September through June, in New York and Chicago; visitors welcome. The "Day of Visuals" Audio-Visual Exposition, Seminars and Awards Banquet will be held in the fall, following the close of the New York World's Fair and availability of hotel accommodations for "Day of Visuals" guests.

EXECUTIVE DIRECTOR: Harold Klein

PURPOSE: An organization of professionals in the art and craft of motion picture making, dedicated to preserving standards of quality, service, good practice, ethics and to the development of the Industry. The organization, through membership meetings and active committees, works to advance the motion picture industry in all of its branches; to establish and maintain a high standard of ethics among producers, their employees, their suppliers and their clients; to distribute accurate information with regard to technical improvements; to advise the general public on the importance of the film industry in the nation's economy; to encourage responsible people to enter the industry; to promote, stabilize and coordinate all elements of the industry.

THE FILM PRODUCERS ASSOCIATION OF MINNESOTA

OFFICERS: Norm Hamilton (Studio One, Inc.), *President*; Cliff R. Sakry (Promotional Films, Inc.), *Executive Secretary*; Anthony Lane (Anthony Lane Studios, Inc.), *Treasurer*; Floyd Klang (Countryman-Klang Film Productions, Inc.), and Richard Polister (George Ryan Films, Inc.), *Managers*, two- and one-year terms respectively.

MEMBERS: Countryman-Klang Film Productions; Empire Photosound, Inc.; George Ryan Films, Inc.; Promotional Films, Inc.; Reid H. Ray Film Industries, Inc.; Rusten Film Associates; Anthony Lane Film Studios, Inc.; Studio One, Inc.

PURPOSE: The advancement of the arts and crafts of film production for the betterment and improvement of the film industry; the establishment of improved client relations and the exchange of technical information.

PROJECTS: Advertising, publicity and public relations campaign to build recognition and prestige for the accredited local film producers; to enlighten business and industry in the types, uses and advantages of films and to encourage wider use of films in training, selling, advertising and public relations.

MEETINGS: Third Monday of each month, 6:30 p.m., Minneapolis.

**Not what they are-
but what they do!**

Eyeglasses are valued for the improved vision they give the wearer.

Color sound films are like eyeglasses . . . they bring clearer vision, keener insight, to the viewer.

This viewer may be a recruit, a trainee, a consumer but, whoever he is, he needs the spectacles of Audio-Visual . . . for utmost clarity, instant communication.

We call this Audio-Visual method of Communication:

AuViCation*

your surest way to sell an idea, a product, a service, a viewpoint, a technique . . . to motivate your employees and your public most powerfully.

Consultation with us could lead to a new realm of progress and profit for you.

**THE ASSOCIATION
OF MOTION PICTURE PRODUCERS
AND LABORATORIES OF CANADA**

OFFICE (of the President): 19 Fairmont Ave., Ottawa 3, Ontario. (of the Executive Secretary): Suite 1301, 55 York Street, Toronto 1, Ontario, Canada.

OFFICERS: C. H. Everett (Crawley Films Limited, Ottawa), *President*; S. Dean Peterson (Peterson Productions Limited, Toronto), *First Vice-President*; Roger J. Beaudry (Pathe-Deluxe of Canada Limited, Toronto), *Second Vice-President*; John T. Ross (Robert Lawrence Productions (Canada) Ltd., Toronto), *Past President*; Frank A. Young, *Executive Secretary*.

DIRECTORS: Sydney Banks (S. Banks (in-television) Ltd., Toronto); E. W. Hamilton (Trans-Canada Films Ltd., Vancouver); Michael Spencer (National Film Board, Montreal); Findlay Quinn (Trans-World Film Laboratories Ltd., Montreal); William Kennedy (Crawley Films Limited, Toronto); David Bier (David Bier Studios and Film Laboratories, Montreal).

MEMBERSHIP: Canadian firms, proprietorships, partnerships and corporations engaged in motion picture production or laboratory work are eligible for Active Membership. Persons, firms or organizations acceptable to the membership and interested in the furtherance of the motion picture industry in Canada are eligible for Associate Membership. Present membership: 47

**Producer and Laboratory
Trade Groups Abroad**

Active Members; 12 Associate Members; Total 59.

PURPOSE: To promote the common interest of those engaged in the motion picture production and laboratory industries in Canada by maintaining the highest possible standards in the production of motion pictures for commercial, theatrical, or television release; to represent the industry in its relations with government, other associations and the public at large; to encourage government agencies to have required films let by tender to private producers.

1964 ACTIVITIES: 1. To emphasize the position of the Canadian private film production industry — that in order to survive, government agencies must halt their growth and let an increasing amount of work by tender to private producers and laboratories. 2. To continue our program of acquainting industry, advertising agencies, television stations, networks, and other potential sponsors with the work of Canadian film producers. 3. To draft and submit a brief to Canada's Royal Commission on Bilingualism and Biculturalism. 4. To intensify our efforts to assist the development of the Canadian Film Awards presentations—to be held in Toronto in May of 1964—in order to gain recognition for this event as the all-Canadian Film Showcase.

**FEDERATION OF SPECIALIZED
FILM ASSOCIATIONS**

OFFICE (of the Secretary): 2, Bourehier Street, London, W. 1, England. Telephone: REGENT 3781. Nicholas Cory, *Secretary*.

PURPOSE: The Federation represents and promotes the interests of all branches of the specialized film industry through its constituent member Associations: (1) Association of Specialized Film Producers representing the producers of cinema shorts, documentaries, sponsored industrial and Government films. (2) Advertising Film Producers Association representing producers of advertising films for television and cinema. (3) British Animation Group representing producers of cartoon, animated diagram, special and model animation films. Each Association is represented on the Federation Council by its Chairman and Vice-Chairman and elected representatives.

**SCREEN ADVERTISING
WORLD ASSOCIATION LTD.**

OFFICE: 17, Berkeley Street, London W. 1, England. Phone: GROSVENOR 1471/2. Cable: Fest-film London W. 1.

OFFICERS: Ernest Pearl, *President*; Charles Ruedi, *Vice-President*; Lionel Gale, *General Secretary*; Peter Taylor, *Festival Director*.

PURPOSE: To promote and develop cinema screen advertising on an international basis to assist in the promotion and trade among producers. (CONTINUED ON THE FOLLOWING PAGE 36)

"The Restless Sea" Adds Laurels to Bell Series

☆ The ninth program in the Bell System's excellent Science Series of motion pictures explored *The Restless Sea* in its nationwide color television premiere and will be eagerly awaited by the many thousands of schools and other group audiences to whom it will be available at a later date in 16mm prints.

This latest program, produced by Walt Disney, voyages over and under the ocean from the vantage point of a 355-foot research vessel, the *Flip* (floating instrument panel). The scientists on board this sea-borne laboratory include physicists, biologists, chemists, meteorologists and geologists, all concerned with probing the restless sea.

A high point of the film comes when *Flip* does literally that! The vessel is upended amid 30-foot waves, standing on tiptoe to make accurate recordings of ocean sounds. 1,500 tons of sea water are pumped into its stern sections so that oceanographers are provided a stable instrument platform to receive and record sounds free of the rolling, pitching movements of the ocean's surface.

Viewers learn from the film that Benjamin Franklin is credited with discovery of the gulf stream, that he drew up the first chart after years of observation and study. On Atlantic crossings, Franklin made his own observations of currents by picking up buckets of water. He recommended this technique to sailing captains as a guide to entering and leaving the warm waters of the gulf stream.

Look at the ocean through the underwater cameras in *The Restless Sea*; explore its depths in a bathyscaph. Consider the marvels of salt-water conversion machines, of magnesium extraction from sea water and of ocean oil exploration. The ninth program adds lustre to the entire, well-conceived Science Series and its sponsor. 景

THE EDUCATIONAL AUDIO-VISUAL ORGANIZATIONS

AUDIO VISUAL COUNCIL ON PUBLIC INFORMATION

OFFICE: 1201 Spring Street, Fairfax, Virginia.
OFFICERS: Sam Barefield (TRAVCO), *Chairman*; Scott Mitchell (The Jam Handy Organization), *Vice Chairman*; Betty Ellingboe (American Lutheran Church), *Secretary*; Alva I. Cox, Jr., (National Council of Churches of Christ in the U. S. A.), *Treasurer*.

PURPOSE: A joint industry-church committee concerned with the improvement of Religious Education through wider and better use of audio-visual materials and methods. It aims to inform constituencies of religious bodies on the significances and advantages of audio-visual materials, through publications, magazine articles and slidesets. Two recent publications of AVCOP are *Has It Made Any Difference?* and *Using Audio Visuals in the Church*, both available from Council office.

CATHOLIC AUDIO-VISUAL EDUCATORS ASSOCIATION

ADDRESS: Box 618, Church Street P.O., New York, New York 10007.

OFFICERS: Rev. Michael Mullen, C. M. (St. John's University), *President*; Rev. Joseph Coyne, O. S. A. (Cascia Hall, Oklahoma), *Vice-President*; Sister Agnes Virginia, C. S. J. (Brentwood College), *Secretary*; Rev. Bernard Butcher (St. Mary's Church, Meridan, Conn.), *Treasurer*.

PURPOSE: To further the use of Audio-Visual equipment and materials in Catholic education and to encourage production of suitable films for Catholic school use.

ANNUAL CONVENTION: CAVE is coordinating its Thirteenth Annual Convention with the National Catholic Educational Association national convention, March 31-April 3, in Atlantic City, New Jersey. Audio-visual equipment and materials may be exhibited at this joint convention. No registration fees are required.

DEPARTMENT OF AUDIOVISUAL INSTRUCTION OF THE NATIONAL EDUCATION ASSOCIATION

OFFICE: 1201 Sixteenth Street, N.W., Washington, D. C. 20036. Anna L. Hyer, *Executive Secretary*.

OFFICERS: Mendel Sherman (Asst. Dir., AV Center, Indiana Univ.), *President*; Donald P. Ely (Dir., Center for Instructional Communications, Syracuse Univ.), *President-Elect*; Robert O. Hall (Head, Div. of Education, Alameda State College), *Vice-President*; William Allen (Dir. of Research, Dept. of Cinema, Univ. of Southern Calif.), *Past President*.

PURPOSE: The improvement of instruction through the better, wider use of audio-visual equipment, materials and techniques. Membership consists primarily of directors and specialists in colleges and universities, state depts. of

National Groups Concerned With the School, Church and the Community

education, and county and city school systems. School supervisors and administrators, classroom teachers, librarians and audio-visual specialists in the armed forces, in industry and among religious groups are included in membership.

COMMITTEES: More than 40 national DAVI committees and commissions are organized into the following five divisions: Division of Professional Specialization; Division of Operational Committees; Division of Professional Development; Division of Professional Liaison.

1964 CONFERENCES: National Convention, April 19-24, War Memorial Auditorium, Rochester, New York; June 29, DAVI meeting to be held in connection with annual NEA convention, Seattle; Lake Okoboji Audio-Visual Leadership Conference, August 16-20, Lake Okoboji, Iowa; Joint AASL-ASCD-DAVI Conference, June 26-28, St. Louis, Missouri.

1964 ACTIVITIES: DAVI has given major attention during the past year to identification and analysis of some critical issues presently facing the audiovisual field. A Panel was assembled to work on the task. During the 63-64 year, six editorials were devoted to critical issues, each one dealing with one issue and written by a Panel member. Attention was also given to development of a position relative to proposed changes in the copyright law and the FCC TV channel assignments. Steps were taken to increase cooperation and activities with NAEB and AASL and to strengthen the 45 affiliated organizations.

PUBLICATIONS: *Audiovisual Instruction* (monthly except July and August); *AV Communication Review* (quarterly). Other recent publications include: *Learning From Pictures*; *The Role of the Computer in Future Instructional Systems*; Monographs—*The Automation of School Information Systems*; *Language Laboratory and Language Learning*. Filmstrip on Programmed Instruction; Conference Proceedings of National Society for Programmed Instruction.

THE EDUCATIONAL FILM LIBRARY ASSOCIATION

OFFICE: 250 West 57th Street, New York, New York 10019.

OFFICERS: F. A. White, *President*; Sally Clark, *Vice-President*; Iola Tryon, *Secretary*; Emily S. Jones, *Administrative Director* (at headquarters).

COMMITTEES: Frederic Krahn, *Festival Chairman*; Iola Tryon, *Nominations Chairman*; Sally Clark, *Membership Chairman*; Paula Zweifach, *Evaluations Chairman*.

MEMBERSHIP: (Constituent) — 525 non-profit educational institutions; (Service) — 61

commercial organizations and interested individuals; 4 international members (government agencies, film groups of other countries); 46 sub-memberships and 162 personal memberships.

PURPOSE: To encourage and improve the production, distribution and utilization of educational films. EFLA conducts a film evaluation service.

1964 AMERICAN FILM FESTIVAL: To be held April 29-May 2, at the Biltmore Hotel, New York City.

PUBLICATIONS: For members — Evaluations, EFLA Bulletins, Service Supplements and Film Review Digest. A catalog containing descriptions of EFLA "general" publications is provided on letterhead request.

THE UNIVERSITY FILM PRODUCERS ASSOCIATION

OFFICE (of the President): Oscar E. Patterson, Department of Cinema, University of Southern California, Los Angeles, Calif.

OFFICERS: Oscar E. Patterson (Univ. of Southern Calif.), *President*; Jesse L. Senn, Jr. (Motion Picture Production, Purdue Univ.), *Vice-President*; Luella Snyder (Route No. 1, Winnsboro, Louisiana), *Secretary*; Sol Wrenn, Jr. (Film Production, Virginia Board of Education), *Treasurer*.

COMMITTEE CHAIRMEN: Larry Silverman (Wayne State University), *Associates Delegate*; David Anderson (Yale University), *University Classroom Films*; William Drake (Ohio State University), *Conferences*; Herbert E. Farmer (University of Southern Calif.), *Constitution*; Raymond Fielding (UCLA), *Curriculum*; Sherman Willson (Wayne State Univ.), *Ethics*; Vincent Talbot (Marquette University), *Equipment*; J. E. Oglesby (Va. State Bd. of Education), *Festivals and Contests*; John Mercer (Southern Illinois Univ.), and Kenneth Mason (Eastman Kodak Co.), *Historians*; Don G. Williams (Univ. of Missouri at Kansas City), *International Relations*; Ernest Rose (Univ. of California), *Media Research*; Mrs. John A. Flory (Penfield Central Schools), *Membership*; Byrl Sims (Univ. of Illinois), *Personnel*; and Robert W. Wagner (Ohio State Univ.), *Publications*.

PUBLICATIONS: The formal publication of UFPA is a quarterly issue, *The UFPA Journal*, (subscription to non-members is \$4.00 per year). Other special reports and papers published at intervals for member guidance. The *UFPA Digest* is a publication for members only and is published monthly. The Association is represented annually at Film Festivals and at the International Congress of Schools of Cinema and Television in Europe.

ANNUAL CONFERENCE: 18th Annual Conference to be held August 17-22, 1964. Hosted by the University of Oklahoma. Ned Hockman (Univ. of Oklahoma) in charge, *Program*.

**THE NATIONAL AUDIO-VISUAL
ASSOCIATION, INC.**

NATIONAL OFFICE: 1201 Spring Street, Fairfax, Virginia 22030.

CONTACT: Don White, *Executive Vice-President* or James W. Hulfish, *Director of Information*.

MEMBERSHIP: A trade association of the commercial audio-visual industry; membership consists of (1) A-V dealers and film libraries; (2) A-V materials' producers; (3) A-V equipment manufacturers; and (4) independent A-V suppliers' representatives.

PURPOSE: The Association was organized in 1939 to (1) collect and furnish data which will benefit A-V business; (2) improve the professional status and business practices of the industry; (3) provide business education and information; and (4) promote better relations between A-V suppliers, distributors, and customers.

OFFICERS: Robert P. Abrams (Williams, Brown & Earle, Philadelphia, Pa.), *President*; Harold Newman (Newman Visual Education, Kalamazoo, Mich.), *First Vice-President*; Eloise Keefe (T.E.A. Film Library, Dallas, Texas), *Second Vice-President*; Joseph Meidt (Cousino Electronics Corp., Toledo, Ohio), *Secretary*; Max Rarig (Rarig's, Inc., Seattle, Wash.), *Treasurer*; Harold A. Fischer (Photosound of Orlando, Orlando, Fla.), *Chairman of the Board*.

27 Million Persons were in the World's Fair "Preview" Audience!

All over the nation, from Main Street to Megalopolis, Americans have watched (and are watching) the monumental transformation of Flushing Meadow Park into the 1964-1965 New York World's Fair. Three World's Fair "Preview" films, produced by John Campbell Productions, have reported to America on this billion-dollar achievement dedicated to peace through understanding.

To be sure each film would reach the largest possible audience—in the shortest possible time—the New York World's Fair Corporation commissioned Association Films to do the national TV and non-theatrical distribution. Results from the first two films: 637 telecasts in 12 months. The third film, "World's Fair Report With

Lowell Thomas", bids fair to reach even larger audiences, based on initial responses.

How do we get these results? By giving sponsors *creative* distribution, imaginative program concepts, and a quality service that is the hallmark of the industry.

During 1964-1965 community organizations and TV stations will be encouraged to theme their meetings and programs to the World's Fair. We will soon be offering a portfolio of films and ideas, "A World's Fair of Entertainment and Enlightenment". Incidentally, if you are planning to attend the Fair, we do hope you will drop by and see us, at 347 Madison Avenue.

A BID INVITATION TO PRODUCERS

THE NATIONAL COUNCIL OF TEACHERS OF MATHEMATICS is interested in the submission of proposals by qualified film or videotape producers for the production of a series of half-hour films on modern mathematics for elementary school teachers.

1. **Objective:** to offer in-service training that will help teachers understand the basic concepts encountered in programs of modern mathematics in the elementary schools.

2. **Description:** each film will include an instructor with one or more metal blackboards and a high-top table on which three-dimensional materials can be displayed. Proposals for additional methods of presenting the subject matter will be welcome.

3. Bids and Specifications:

A. Film producers are requested to submit two proposals covering the complete production of 15 to 20 one-half hour films, as described above:

- 1) PROPOSAL ONE: cost per film on shooting 16mm black and white.
- 2) PROPOSAL TWO: additional costs assuming that the series is to be shot in 35mm black and white film.

B. Videotape producers are requested to submit a proposal for all videotape production costs down to and including a satisfactory 16mm answer print on black and white film obtained from a master film transfer of the final edited one-half hour videotape. Indicate type of video cameras and film transfer method contemplated.

C. Although budget considerations require simple methods of presentation, producers are encouraged to submit creative proposals which they feel will most imaginatively accomplish the objectives of the series.

D. All proposals should include:

- 1) A production schedule showing the time required to complete one film and the frequency with which the series can be produced.
- 2) A breakdown of production costs.
- 3) A description of personnel, studio space and equipment to be provided, including specific number of cameras.

4. Information to All Producers:

A. The NCTM will be responsible for the instructor and overall supervision of the project.

B. The NCTM will take responsibility for the basic subject matter of all scripts.

C. First consideration will be given to those organizations which are experienced in the production of educational films or tapes.

D. The entire project must be completed by June, 1965.

E. Arrangements for release and distribution of prints will be made by NCTM separately.

F. The NCTM will have full title and right of distribution or other disposition of all films.

G. The production of these films for the NCTM is being subsidized by the National Science Foundation.

H. Proposals should be submitted to:

Harry D. Ruderman
2624 Davidson Avenue
Bronx, New York 10465

and should be on hand prior to May 1, 1964.

I. Further information can be obtained by writing to:

Reinald Werrenrath
2105 Park Lane
Highland Park, Illinois 60035

WASHINGTON FILM COMMENTARY

Government Figures Reflect Growth of the Factual Film Audience

GOVERNMENT-SPONSORED motion pictures are getting wide exposure throughout the U.S., not only through commercial distribution sources (i.e. the Peace Corps' *Mission of Discovery*), but also among community groups, in plants, offices and schools and via public-service television showings. Two active programs — the Motion Picture Service of the U.S. Department of Agriculture and the Bureau of Mines, Department of the Interior — reported sizeable audiences during the past year.

* * *

2,980 TV Shows in Six Months Reported by Agriculture Dept.

An unanticipated slight increase in use of Department of Agriculture films by the nation's television stations (over a six-month period) was reported in January. Following the Department's release (in the last half of 1962) of the "Centennial Series" of nine films, all previous audience records were broken.

Expecting a natural decrease following this upsurge, USDA films not only maintained strong support in the following six-month period (January to June 30, 1963) but showed a slight increase. Total public-service television showings were 2,980, with an estimated total viewer audience of 149 million persons. The audience "estimate" is based on a "50,000 viewers per showing" formula.

Six Agricultural films reached the 2-million-plus mark and one exceeded the 3-million-viewer total (*Snuffy, Smokey Bear's Pal*). The six other titles included *Foreign Marketing Newsreel*, *Comments by Farmers*, *Burning Issue*, *The Forest and The New Alaska*. Remaining titles among the "top ten" for Agriculture in 1963 were: *Miracles from Agriculture*, *Our Land — Its Many Faces*, *The Wilderness Trail* and *Your Meat Inspection Service*.

Three of the seven "top films" and 17 of the Department's 38 "best sellers" are 30-minute programs. This is a significant amount of public service TV time.

* * *

Show Bureau of Mines Films 189,000 Times to Nine Millions

Motion pictures informing Americans about their mineral heritage, produced cooperatively by industry and the Department of the Interior's Bureau of Mines,

were shown more than 189,000 times last year to audiences totaling over nine million persons. The Department report includes only direct shipments to self-equipped 16mm audience groups. Additional millions are estimated to have seen the films on public-service telecasts.

Six of the more than 50 productions currently included in the Bureau's free-loan library were shown more than 10,000 times each during 1963. One of these titles, *California and Its Natural Resources*, achieved over 15,000 (CONTINUED ON PAGE 42)

"MAY I HELP YOU?"
and

"20 INFORMATION CALLS"
for the
Bell Telephone System

Addressed to the Information Operators of the Bell Telephone Companies, "May I Help You?" recognizes that skills-training is most effective when the Trainee *wants* the instruction — and is personally sympathetic to the objectives. Hence, in this film, a brief but carefully-analysed "story frame" provides a vehicle of emotion and personal identification on which the specific skills-training can ride.

A companion film ("20 Information Calls") extracts the training material only, for follow-up use. A Leaders' Guide, Operator's Review Booklet, and a series of bulletin-board posters complete this Bell System Training package.

35 YEARS OF OUTSTANDING
FILM PRODUCTION SERVICE

The Washington Film Commentary:

(CONTINUED FROM PAGE 40) showings, topping its previous record by more than a thousand exposures.

All of these films are produced in cooperation with private industries, which pay all of the production costs and provide the Bureau with prints for circulation, on request, to schools, colleges, business organizations, scientific and technical societies and similar groups. Most of the subjects depict methods, techniques and equipment used to extract and process the minerals and fuels on which the nation's economic and industrial advancement depend.

Approximately a dozen of the titles present comprehensive views of the mineral and other natural resources of various states.

The 10 "most popular" films and the number of times each was shown in 1963, as verified by the Bureau in February, 1964 are as follows:

1. *California and Its Natural Resources* (15,740 showings); 2. *The Petrified River* (The Story of Uranium — 11,726 showings); 3. *Copper, The Oldest Metal* (11,522); 4. *Alaska and Its Natural Resources* (11,385); 5. *The Magic of Sulphur* (10,589); 6. *Arizona and Its Natural Resources* (10,133); 7. *Texas and Its Natural Resources* (9,007); 8. *The Story of a Storage Battery* (8870); 9. *Washington and Its Natural Resources* (7,782); and, 10. *The Drama of Steel* (7,684 showings).

Two other subjects, both distributed by the Bureau since 1959, broke their previous records for total annual showings. These were *Asbestos* — *A Matter of Time* and *Rubber From Oil*.

The *California* film is a perennial favorite. The current version of this picture, produced in 1960, has already been shown more than 45,000 times and viewed by nearly three million persons, excluding television audiences. More than 11 million have seen one of the three versions of *California* circulated by the Bureau since 1948.

In addition to their extensive use in the U. S., several films from the Bureau's library have been selected by the United States Information Agency and the Agency for International Development for translations into foreign languages. With the permission of their respective sponsors, these motion pictures have been made available through the two agencies for showings in more than 60 countries.

Admiral Clark to Head Board of Carl Ragsdale Associates

☆ Admiral Joseph James Clark, U.S.N. (ret.) has joined Carl Ragsdale Associates, New York film production company, as Chairman of the Board.

In the course of a distinguished career in the Navy, Admiral Clark

Selecting the Year's Best TV Commercials Ad Execs Take Active Role on American Commercials' Juries

THE TELEVISION COMMERCIAL, a potent force in today's advertising, is receiving the considered judgment of leading U.S. advertising executives as the fifth annual competition of the American TV Commercials Festival gets underway. What Festival Director Wallace A. Ross calls "the most authoritative group of creative advertising men yet assembled for this event" make up the 1964 Council of Judges.

Such respected figures as David Ogilvy and William Bernbach have joined the Festival's Advisory Board of agency heads and advertising and marketing managers, headed by Barton A. Cummings. Other Board members include Charles H. Brower, Leo Burnett, Fairfax Cone and John P. Cunningham from the agency field; sponsor representatives on the Board are such men as Edwin Ebel, General Foods; James S. Fish, General Mills; A. Craig Smith, Gillette; Douglas L. Smith, S. C. Johnson & Sons; Ray Weber, Swift & Co.; and Alfred A. Whitaker, Bristol-Myers.

175 Join Regional Juries

Additionally, a number of prominent creative heads, art directors and copy chiefs have accepted invitations to join the active judging groups. In all, some 175 ad executives are participating as members of six regional judging councils — East, Southeast, Midwest, Southwest, West Coast and Canada. 68 advertising agencies, 36 sponsors, six television stations and 17 associations or consulting groups are represented.

Preliminary judging of product categories began on March 4th. Finalists will be judged in all six regions during the first two weeks of April. For the first time, also, score sheets will be tallied by the automatic processing facilities of John Felix Associates' research organization in New York.

Festival at Waldorf in May

The initial festival, a two-day affair, including product category and finalist screenings, workshops and the awards luncheon, will take place in the Waldorf-Astoria Hotel on May 14th and 15th. Festivals have also been scheduled for June 2nd in Chicago, under the auspices of the Chicago Copywriters Club, and on June 4th in Toronto, where the Radio and TV Executives Club of that city will be the host group. Other nationwide screenings will follow during June.

Int'l Conference to Explore Photographic Science Frontiers

The frontiers of photographic science, extending from the ocean depths to outer space, will be explored in a major international conference opening in New York on April 27.

The Society of Photographic Scientists and Engineers will hold its 1964 International Conference on Photographic Science and Engineering at the Hotel Americana, April 27-May 1. Co-sponsors of the conference, which is expected to attract 1,000 scientists, are the United States Air Force and Columbia University's School of Engineering, which celebrates its centennial this year.

General chairman for the conference is Dr. Walter Clark, head of the applied photography division of Eastman Kodak Company's research laboratories in Rochester, New York. Among the principal speakers are Dr. Hans Zweig of International Business Machines Corporation, San Jose, California, who will present results of research on the values and limitations of lasers as light sources in photography and Dr. John Ott, Time-Lapse Foundation, Inc., Lake Bluff, Illinois, who will demonstrate new techniques and applications of time-lapse photography.

A special report on audiovisuals at the N. Y. World's Fair will be featured in an early issue.

THE EDITORIAL VIEWPOINT

ONE INDUSTRY: UNIFIED IN PRINT

UNIFIED IN THESE PAGES of the 14th Annual Production Review are the most capable producers of the many forms of audiovisual communication in the U. S., Canada and abroad. They are defined as such by their ability to establish references of staff, facilities and client experience. They are joined by the foremost companies in the field of film distribution, talented writers and by our resumes of the professional and trade organizations through which the art and craft of the field is advanced.

We begin our 25th volume of this publication with a 218-page detailed compendium of all that's *right* in a *great* and *growing* industry. With deep gratitude for the privilege of serving both the medium and its makers, we look to the new quarter century with enthusiasm and verve, soundly based on long, happy years of cooperation and the goodwill of our many friends.

And now, *let's move ahead* with better tools, more talent to serve a growing clientele . . .

* * *

President of New York Film Producers

Cites "Confusion and Unrest" in the TV Field

☆ George Tompkins, newly-elected president of the Film Producers Association of New York, told the membership in his inaugural speech at the annual meeting, February 25th, that New York's television commercial production business is "in a state of confusion and unrest."

Mr. Tompkins' statement came as no surprise to anyone involved in the New York film/tape production scene. During the past year, several of the leading TV commercial producers — Sutherland Associates, Sarra, and Robert Lawrence among them — have closed their local shops and not a few have been "close to the line" on several occasions.

But Mr. Tompkins, who is president of VPI, one of the larger TV commercial production houses in the city, proposed that the membership take immediate steps to correct the abuses which have plagued the industry, saying he intended to submit recommendations to the FPA board for a workable code of ethics and a plan to insure producers a fair return for dollars invested.

Provide References to Protect the Film Buyer

That hot-bed of World's Fairs and of filmed television commercials that raises its towers beside the Hudson has been having its problems with both topics. But the latter concerns some very able specialists in the TV spot business, who, not only have to cope with advertising agencies' geni but with their less scrupulous brethren, labor costs, the FTC and the

Screen Actors Guild, just to name a few . . .

There probably are too many undercapitalized entrepreneurs who find it easy to work up 20-30-60 and even 90-seconds of what they call "TV commercials." Fortunately, few of that breed even try to work in the infinitely more difficult field of *longer factual, business films*.

Those long, long pages in the New York business telephone directory carry a lot of names. We carry a goodly number of Manhattan producer listings, too, but the wild-catter is stopped at the door by our prerequisite of CREDITS. We provide this service without recompense from any listed producer; if we SOLD these listing columns we'd lose our independence.

But because we *are* independent and free to choose, the 120 names of New York producing companies listed in this issue give sponsors, the agencies and every buyer a most dependable guide to "who's really who" in the field. ☐

* * *

Let's Get That Phrase "Non-Theatrical"

Out of the Lexicon of Our Great Industry

Too important a part of the great field of factual film production still labors under a *negative* definition of its role. The phrase "non-theatrical" is as old as the legendary Dodo and twice as dead. But they haven't heard about it yet (except in the accounting department) at Eastman Kodak and the otherwise forward-looking Hollywood Museum-to-come has a "Non-Theatrical Division" which its very progressive director, Jack Copeland, is carrying around under his title.

We *ain't* non-theatrical, folks. We're *factual, documentary, educational* and even *business-like* at times. But *NON*-theatrical, what's that? If it means that most of our films are *tools* (when they're most effective) and that many are *not* "theatrical" in the grandiose concepts of old show biz, then we are surely non! But meanwhile we're just non-plussed that the business which accounts for more mileage of raw film base than those "theatrical" moguls ever dreamed of would remain *NON*-anything in a smart shop like Kodak's or an imaginative new enterprise like the Hollywood Museum.

Business films, we got; factual films, we make; audiovisuals, we cherish. But, as Charles DeGaulle most always says to his Uncle Sam, "*NON, NON*" NO MORE! ☐

Notes in Retrospect With Opening Day of the New York World's Fair Only Weeks Away

☆ The New York World's Fair, opening just a few weeks from now, promises to offer more new exciting audio-visual experiences than any event in the history of the sight and sound medium. One major exhibit, using films in a dozen different new and stimulating ways, is so far out that even at this late date corporation officers are worrying that they may have gone too far — will the public really understand what the company is trying to say?

Chances are the public will not only understand and appreciate this exhibit, but make it one of the most popular and significant on the Fair grounds. For one thing that has always (CONTINUED ON THE FOLLOWING PAGE 54)

EXPERIENCE . . .

*At Your Service . . . Our Team
of Location Specialists With a
Great Record of Field Experience !*

We've been serving leading producers for more than a quarter-century as a team of specialists who know location problems, at witness the many outstanding features and industrial films we've helped to create.

PERFORMANCE IS THE YARDSTICK OF ABILITY

CREDITS INCLUDE: *Electronics and the Wonderful World of Tomorrow* (Delco-Radio Division, General Motors); *Temperatures Made to Order* (Harrison Radiator Division, General Motors); *Black Fury* (Warner Bros.); *Land of the Trembling Earth* (Warner Bros.); *Bayou* (United Artists); *Force of the Wind* (United Artists); *Firebird Two* (General Motors); more than five hundred television clips . . . and many others.

COMPLETELY EQUIPPED TO MEET EVERY LOCATION REQUIREMENT

INCLUDING: . . . 16mm and 35mm Mitchells; Mole-Richardson lighting; cable, generators, sound, grip and full inventory of every field requirement to meet location filming.

Keynote Talk on "Human Values in a World of Technology" to Open Rochester Convention of Audiovisual Specialists

KEYNOTING THE 1964 convention of the Department of Audiovisual Instruction (DAVI) is Harold Taylor, former president of Sarah Lawrence College and one of the most outspoken liberals in American education today. Taylor will speak on "Human Values in a World of Technology" at the opening general session in War Memorial Auditorium, Rochester, New York on Monday evening, April 20.

Frank Barron, research psychologist at the Institute of Personality Assessment and Research, University of California, Berkeley, will address the second general session on April 21. Dr. Barron has devoted a career of some 14 years of teaching and research to an intensive study of the human personality. Recently he has concentrated on isolating and appraising personality factors that reveal man's potential for creativity.

Peter G. Peterson, president of the Bell & Howell Company, will address the third general session. A young man with a flair for "getting ahead" in the business world, Peterson has had a spectacular career, jumping in three years to the position of executive vice-president of Market Facts, Inc., while still a graduate student at the University of Chicago. In 1953 he joined the McCann-Erickson advertising agency and three years later was general manager of the Chicago office. A year later he became a director.

In 1958 he joined Bell & Howell and again, in three years, became president of that company, stepping at the age of 34 into the shoes of Charles H. Percy who is now running for governor of Illinois.

Other convention features include three special programs highlighting DAVI's role in international communications. The International Relations Committee, under the chairmanship of Gale C. Griswold, has planned a full schedule of events for a large group of foreign guests, starting with an International Orientation Tea at Eastman House on Sunday afternoon, April 19.

DAVI President William H. Allen, director of research, Department of Cinema, University of Southern California at Los Angeles, and Anna L. Hyer, DAVI Executive Secretary, will welcome guests at the tea.

An International Film Showing will be held on Sunday evening.

Vaughn R. DeLong, program planning officer for the Bureau of International Education, U. S. Office of Education, Washington, D. C., will be in charge.

On Monday, April 20, guest speaker at an International Committee meeting will be Dr. J. A. Harrison, director, National Foundation for Visual Aids, London, England, who will speak on the topic, "Developments in Educational Film Productions in Europe."

On Wednesday, April 22, Robert C. McClelland, Kodak Director of Training, will speak at a luncheon meeting and Griffith Davis, from the Agency for International Development, will discuss "Mobile Audiovisual Units" which the Agency is using in various African nations.

DON'T SELL IT DOWN THE RIVER!

See That Your PR Film Gets All the Benefits of Custom Distribution

A good deal of money, time and effort has gone into the production of your public relations film. Your message is an important one—and you want it to reach a *receptive* audience. You want proper handling of prints, quality promotion and intensive—as well as extensive—distribution.

DON'T SETTLE FOR LESS!

The same care you lavished on production should be equalled, if not excelled, in distribution. This is why United World's concept of *Custom Distribution* came into being. Custom Distribution assures achieving the fullest potential for your film, because it is tailored to the specific needs of that film . . . and the public relations program it supports. UWF strives to give you the widest possible circulation—with the least amount of waste circulation — while reaching the explicit *theatrical*, *television* and *non-theatrical* audiences you want.

Expensive? Not at all! You may be surprised to learn that our rates are the lowest in the industry . . . including all the "extras" that go with Custom Distribution . . .

- Our own marketing and field surveys to measure the actual effectiveness of our clients' motion picture programs.
- Our ability to give uncompromising attention to a client's needs because there is no product or service conflict with other clients.
- A continuing program of promotional aids for clients' films created and devised in our own well-staffed advertising, publicity and promotional departments.
- First-class handling, inspection and servicing of a client's prints through our modern, electronically-equipped distribution offices.

Ford Stages a Unique "Merchandising Fair"

Audiovisual Tools and Techniques in an Award-Winning Setting

MOTION PICTURES, SLIDEFILMS and related audio and visual tools and techniques played a key role among the 18 exhibits viewed by some 700 Ford dealers who attended that company's unique "Merchandising Fair" held at Chicago's McCormick Place on Monday, March 2nd. The Fair was planned to graphically illustrate how the Ford Division is assisting the dealers in all phases of their business.

Topics covered in the displays and discussions range from fleet and leasing, truck, youth and performance, marketing, sales promotion and advertising to customer relations, service, parts and business management. The "Day With Ford" was one of a series of 12 company-dealer meetings held in cities across the nation during February and March.

"Most Important Meetings in Years"

Lee A. Iacocca, Ford Motor Company vice-president and general manager of the Ford Division, addressed the opening business session, terming the meetings "the most important we have held with our dealers in recent years." He described the Merchandising Fair as a display and program designed to "show Ford dealers what we have done and are doing to help them be better dealers, sell more cars, and — above all — to give better service to their customers."

The award-winning setting for 18 display booths making up the

pylons and ceiling grids won the Owens-Corning Fiberglas Reinforced Plastics Design Award.

Film Preview of Ford Pavilion

Audio-visuals were well and widely-applied throughout Fair exhibits. In the area informing Ford dealers of the scope, activities and sales promotion value of the Ford Pavilion at the New York World's Fair, a main feature was a two-minute color and sound slidefilm of the exhibit, shown continuously on a five-foot screen.

In the Advertising exhibit, featuring a display of current advertising in all media, telephone handsets brought dealers recordings of Ford theme songs while rear-screen projection showed various car and truck commercials. Parts and Accessories' role in the Fair was dramatized by a continuous filmstrip highlighting the various accessories available to Ford dealers.

Principal feature of the Fleet and Leasing exhibit was a quiz machine set up to answer pertinent questions about fleet and leasing sales. Some 48 questions were listed on a control panel. Dealers selected the questions, punched the relevant button and received printed answers on a pocket-size card for take-home reference.

Promote Recreational Markets

The Recreation display attracted considerable attention with a tall, conical, transparent pylon in which real currency was tossed and tumbled in a continuously-moving stream of air. Above the cone, a two-sided rotating sign carried these messages: *New Profit Opportunities* and *An Exploding New Market*. At the base of this cone, a series of ten back-lighted color photos showed the five basic types of recreational vehicles available to Ford dealers — boat trailers, tent trailers, travel trailers, camper coaches and self-contained units.

Telephone sound reproduction was featured in the Sales Promotion display where a series of five phones were arranged around the perimeter of a counter. Each of the five dialing holes were labelled with the name of a different sales promotion program. When one of the numbers was dialed, the listener received a 30-second message on results and projections from proper use of these programs.

Pointing out that Service is one

of the most important factors in satisfying customers, the Ford Division devoted its exhibit on this vital topic to the more than 100 service training courses available to dealer personnel at Ford district service training schools. Wilding, Inc. played a key role in developing such training media for the Ford Division.

The idea and the exciting, thoroughly-visualized displays which helped to carry this Ford Merchandising Fair into the hearts and minds of visiting dealers (CONTINUED ON PAGE 52)

"EVERYBODY
HAS TWO JOBS"
(His Own and Public Relations)

U. S. Independent
Telephone Association

Let's say your employee is at an evening party, or a PTA meeting; bowling, or at a union meeting, or with a church group — and your company or your industry is criticized. *What will he do?* He's on his own time; so does he knuckle under and go along with the critics . . . or does he realize that, for his own welfare, he should "stand up and be counted?" And if he does stand up, is he equipped to make himself felt?

This film happens to be located in an independent telephone company, but the subject is universal. "Everybody Has Two Jobs" points up, in the course of an interesting and convincing story, the it's-for-your-own-welfare aspect; demonstrates some fundamentals of how to "stand up" in a group; and lays out patterns for replies to the most common problems . . . leading to the take-away impression that "We're company employees eight hours a day, but we're company people around the clock."

LET'S TALK BUSINESS ABOUT FILMS

Maybe a film really isn't the answer to your particular sales or public relations problem. If it isn't, we wouldn't hesitate to tell you so. We've turned down assignments in the past... but we've turned up many more result-producing films for such clients as Xerox, Westinghouse, Corning Glass, R. T. French, Graflex, Dunlop, Hooker Chemical, Bausch & Lomb, Marine Midland, and The United Appeal of Greater Cleveland, to mention a few.

If there is a film in your future, protect your investment now by working with a business-oriented motion picture production firm specializing in business films. Holland-Wegman Productions, Inc. has the experience, know-how, staff and facilities to put more telling force into your selling force. To put effective communications to work for your firm, simply contact Ed Wegman. He's as close to you and your business problems as your telephone.

Merchandising Fair:

(CONTINUED FROM PAGE 50) throughout the country merits special mention as one of the business development highlights of 1964.

Plastics Design Award Given Dramaturgy, Inc. for Pylons

The eye-catching setting of the Ford Merchandising Fair was also a national award winner in the field of industrial design. Supporting pylons (see picture) with ceiling grids won the Owens-Corning Fiberglass Reinforced Plastics Design Award for Dramaturgy, Inc., display and exhibit division of Wilding, Inc.

Rand Development of Cleveland, Ohio, fabricators of the pylons designed by Dramaturgy, were presented with the award and, in turn, presented it to C. Rankin Bingham, president of Dramaturgy. The award is given each year at the Society of Plastics Industries Reinforced Plastics Conference to the product judged most outstanding on the basis of originality of application or design, material selection, color, utility, moldability and appearance.

The supporting pylons were designed for a large exhibit in which many of these pieces would be used. Their unique design makes it possible to assemble them in

C. Rankin Bingham, Dramaturgy president, shown with Owens-Corning plastics' design award trophy.

any form or pattern. They are lightweight and can be used for exhibit backgrounds or for side structures.

Credits for the award-winning design were shared by Mr. Bingham, as creative designer and by Dramaturgy staff members, J. T. Loney, art director; Brian Plesmid, pylon design and David Baldwin, ceiling grid design.

The award focused attention on the growing diversity of modern communications' companies. Dramaturgy, acquired over a year ago by Wilding, has been pro-

ducing displays, exhibits and industrial shows for the past 25 years. Their home office is Cleveland, Ohio.

Canadian Film Awards May 8

The 16th Annual Canadian Film Awards will be presented on May 8th in Toronto. A total of 147 films, representing 41 producing companies, are competing in the 12 categories and for the Canadian "Film of the Year" honor. Wayne and Shuster will m.c.

PARTHENON PICTURES

"WITH CARE AND CONCERN"

The Upjohn Company

The new concept of "corporate image" films holds that it is not enough to just portray a company, but that the film must give the viewers a wanted value in return for their time.

So, while "With Care and Concern" projects the quality-consciousness of the Upjohn operations, it does so in the course of answering the Kefauver-inspired questions in the public mind about the drug industry — excessive competition, overly high prices, harmful side effects, and so on — answering them candidly and honestly, — and convincingly.

Although the Upjohn extensive research work and manufacturing operations are portrayed fully and with memorable identification, the absence of any overt "commercialism" lets the picture implant the corporate image while leaving the impression of an industry image.

THE EDITORIAL VIEWPOINT:

(CONTINUED FROM THE PRECEDING PAGE 46)
been true of World's Fairs is that they have successfully generated new techniques and popular acceptance of new ways of doing things.

Film to Present Themes of Exhibitors

A good proportion of the exhibitors at the Fair will make films the theme of their presentations. Among these are American Telephone and Telegraph, American Gas Association, New York State, Port of New York Authority, the Federal Government, and many more. Beyond this, it is expected that literally hundreds of small screens will be seen all about the Fair showing loop films on repeater projectors, a technique which proved so successful at the Brussels and Seattle Fairs. A dozen or so exhibits will also have small theaters for regular showings of films.

Thinking of the new Fair to come stirs memories of Chicago's Century of Progress in 1933 and the old New York World's Fair which opened just 25 years ago in 1939. Surprisingly enough, for those who persist in dating the wide use of industrial films with World War II, at the Chicago Fair there were 87 projectors of various sizes showing industrial and government films on regular schedules. In 1939 in New York, the number of projectors in regular use had increased to 129! It will be interesting to see the total at the new Fair.

"Hit" Pictures of the Fair in '39

Outstanding features at the 16 sit-down theatres and 40 other exhibits featuring film in the 1939 Fair were such memorable pictures as Coty's *Symphonies in Fragrance*, Household Finance's *Happily Ever After*, and the Petroleum Industries' novel puppet picture, *Petroleum and His Cousins*. National Biscuit Company reported in an early issue of BUSINESS SCREEN that its prize pair of Walt Disney

and Wilding films were playing 48 shows a day with a total attendance of 10,000 on week-days and up to 12,000 on Saturdays and Sundays.

Three-dimensional pictures were new at the '39 Fair. Chrysler's *In Tune with Tomorrow*, made by Arthur Loueks and Jack Norling, caused a sensation, attracting 11,865 daily visitors to its modest 339-seat theatre.

Westinghouse, while not using films in its exhibit, was proud of its "First All-Technicolor, All-Dialogue, Feature-Length Production to Be Made for General Sales Purposes" — *The Middleton Family at the New York World's Fair*, which was produced for the electric company by Audio Productions, and was designed to encourage people throughout the country to come to the Fair and see the Westinghouse exhibit. The film played hundreds of theatres across the country, and did an excellent job of bringing the Fair to the unfortunate who couldn't get there in person.

Projection Quality Will Be Excellent

One thing that is surely going to be different in this Fair as compared to 1939 is the quality of screen image and sound. Except for the Loueks and Norling 3-D feature, and some extraordinarily fine slide projection by Eastman Kodak, most Fair films in '39 were seen as either slightly poorer imitations of ordinary 35mm theatre projection, or in too many cases just the dim 16mm projectors of the day working in rooms much too big for them.

Next month, Fair-goers will not only see much better standard projection facilities — but often completely new systems of projection. Reevesound Company, one of the leaders in design and installation of specialized projection equipment, has completed special systems for no less than ten large exhibitors, while Cinerama — and other engineering firms, are doing installations for many more.

Newly published case histories now available!

HOW 4 COMPANIES USE MOVIES TO SELL PRODUCTS AND IDEAS...

If you've been thinking about using a movie to sell the products and services of your company, you'll find these four case histories worth reading.

They tell how movies are put to work by Clark Equipment Company, Chain Belt Company, U. S. Industries, Inc., and Americana Nursing Homes, Inc.

Each case history includes information such as (1) objective of the movie, (2) how objective was accomplished, (3) results, (4) total annual audience, and (5) total cost. Each case history is brief, to the point — nothing fancy or long-winded. For copies, write or telephone...

Pro Football Champions in "Deadline to Glory"

★ Two major sources are distributing the official color motion picture of the 1963 National Football League's championship game between the Chicago Bears and the New York Giants. *Deadline to Glory*, produced by Blair Motion Pictures, was premiered to happy Chicago fans last month by Del Shofner, pass-catching end for the luckless Giants, who also serves as director of the Old Gold Sports Bureau.

Del's office is now making prints available; the other sponsor is the Schick Sports Bureau, at Lancaster, Pa., and their combined efforts will go into meeting thousands of requests from groups of all kinds and ages. The current 30-minute game picture is a worthy successor to last year's film, *Pro Football's Longest Day*, when the Giants lost again, this time to the Green Bay Packers in the freezing cold of Yankee Stadium.

The game at Wrigley Field was a "freezer" too but the Bears were hot enough to come out on the long end of the 14-10 victory. Technical work on both films has been superb; sports writers really saw the battle close-up for the first time, according to their Chicago preview comments.

This was the day that brought disaster to Giant quarterback Tittle, who never quite recovered from a first-half injury. Cameras caught the defensive surge of the Bears, zoomed in on Tittle's downfall. The lens showed a clean "hit" and Tittle agrees that it was all "part of the game."

Over 2,500 clubs and service groups borrowed the previous film; in '64, potential viewing groups can address their free-loan requests for *Deadline to Glory* to: Old Gold Spin Filters Sports Bureau, P.O. Box 2501, Grand Central Station, New York, N. Y. 10017 or to the Schick Sports Bureau, Lancaster, Pa. Better book early! Be sure you have a 16mm sound projector! □

*BOON 1. A welcome benefit; blessing.

— Webster

The Lipsner-Smith ultra-sonic film cleaning machine was first introduced to the Hollywood motion picture industry by Consolidated Film Industries.

Thru close user-manufacturer collaboration and under actual working conditions, CFI technicians helped develop the original machine to today's practical** and efficient machine. Now, ultra-sonic cleaning has become standard procedure for negative cleaning in film processing laboratories throughout the world.

A famous first from CFI. One of many in its 40+ years of serving the film industry.

**STILL ANOTHER FIRST FROM CFI is the recent development of a solvent recovery system that further extends the use of ultra sonic cleaning.

Awards Honor Educational & Business Films

Chemistry Film by Reid H. Ray Wins a Bronze Medal at Padua

Worthy of special mention is the Bronze Medal awarded at the VIII International Exhibition of Scientific-Didactic Films at Padua, Italy, to an outstanding U. S. educational motion picture, *Molecular Spectroscopy*, produced for Harvey Mudd College of Claremont, California by Reid H. Ray Film Industries of St. Paul.

In the previous issue of BUSINESS SCREEN, listing the winners of Golden Eagle Awards (by CINE), we included only business-sponsored subjects. But this Golden Eagle winner of 1963 was one of the year's top educational subjects. It is a part of the *CHEM Study* film series prepared at Harvey Mudd College under the supervision of David Ridgeway.

The 21-minute color film features Dr. Bryce Crawford, Jr., Dean of the Graduate School, University of Minnesota, as he demonstrates the spreading out of white light into a spectrum, shows the presence of infra-red radiation in the spectrum and the absorption of light. It also shows the relation of this spectral absorption to molecular vibrations and relations and how the molecular structure can be studied by spectroscopy.

Molecular Spectroscopy was produced in the St. Paul studios of Ray Industries and was directed by Reid Ray; assistant director was Ellsworth Polsluss. Photography was by Howard W. Cress and animation was conceived under the direction of Gordon Ray. Recording was by Donald Anderson and editing by Robert H. Winter. All are staff members of the Reid Ray organization.

Freedoms Foundation Award to AmMed "Physicians in Politics"

A motion picture featured in these pages last year, sponsored by the American Medical Political Action Committee, has received one of the 1964 awards of the Freedoms Foundation, Valley Forge, Pa.

The film, *Physicians in Politics*, was produced by Parthenon Pictures-Hollywood, by exec producer Cap Palmer. Directed by Don Livingston; associate production chief on the film was Ron Hagerthy.

A sequel, *How the Opinion Maker Makes Opinions*, starring the featured "doctor" of the award-winning picture (Don Hag-

Bronze Medal Award given the film "*Molecular Spectroscopy*" is received by Dr. Bryce Crawford, Jr., Dean of Minnesota's Graduate School (l) and producer Reid H. Ray (right).

gerty), is scheduled for an Atlanta, Georgia premiere on March 21st. It was directed by David Bowen.

* * *

"Right Hand of Plenty" Wins a Diploma of Honor at Venice

Awarded a Diploma of Honor in the "Golden Mercury" competition held annually by the Camera di Commercio Industria e Agricoltura in connection with the Venice Film Festival was the U. S.-produced motion picture, *The Right Hand of Plenty*.

This award was not included among recent business-sponsored films listed as receiving overseas festival awards (Issue 8, Volume 24) since it was entered in the Festival directly by its producer, Marathon International Productions, Inc. The sponsor was Volkswagen of America.

The 22-minute color documentary tells of the new freedom of man due to machines, explaining that the elimination of unnecessary labor has given both scope and responsibility to the mind. The Volkswagen plant in Germany is used to illustrate this theory.

The film was produced by Konstantin Kalser and directed by Kenneth Baldwin. George Silano was director of photography and Philip C. Lewis wrote the narration. The award is considered of particular significance since it is not necessarily an annual event but only given when a film is considered of special merit.

Industrial Design Film Is Released by Chapman 5

☆ The role of the engineer and of the industrial designer in creating marketable products to meet today's sophisticated buying tastes are graphically portrayed in the first of a new series of six industrial design films created by Chapman 5 Productions, Inc. It is entitled *Industrial Design in Electronics*.

The first film was written by Channing Wallace Gilson, BA, BPA, a well-known industrial designer. This 10-minute color and sound motion picture shows 25 electronic products, acknowledged the "most outstanding" at the 1963 Western Electronic Show and Convention (WES-CON) and its attendant industrial design contest and exhibit.

Through the use of dramatic visuals, the viewer is shown these key design elements that resulted in the judges selecting each item for exhibit honors. The motion picture was created to depict the importance of design as it relates to function, appearance and marketability, notes James H. Flint, Chapman 5 president. But it also highlights the role of the engineer and the designer.

Prints of *Industrial Design in Electronics* are available at \$120 each from the producer at 1412 West Glenoaks Blvd., Glendale 1, California. Subsequent pictures will deal with specific design functions, materials and elements. Two more are planned for release in 1964, the remainder in 1965.

McGraw-Hill Will Market 8mm Science Film Series

The Technicolor Corporation and McGraw-Hill Book Company have jointly announced the availability of a series of 14 8mm Brief-Films on the general subject of *Properties of Air*, for use in elementary science courses. The films, consisting of short continuous loops of 8mm silent motion pictures mounted in individual cartridges, are designed for use in the Technicolor 8mm Instant Motion Picture Projector.

Films were produced in London by Technicolor Ltd.

BACKGROUND: Founded in 1911 (as "The YMCA
Motion Picture Bureau," a division of the Inter-
national Committee of the YMCAs), Association
Films was the first sponsored film distributor in
America. In 1949, the company was incorporated
as an independent national distribution service.

SERVICES: Promotion and Publicity: Promotes
sponsored films through catalogs, special supple-
ments (directed to teachers and program chair-
men), advertising in educational and adult jour-
nals, individual film brochures, exhibits at con-
ventions, publicity services. Print Inspection and
Maintenance: prints are electronically cleaned
and inspected after each use; repairs are made
as needed and replacement prints ordered on
sponsor's authority; scratched prints are given
Perma-New treatment, as authorized; during the
first 36 months of print life Association Films
shares in replacement costs due to damages.
Monthly Reports: sponsors receive detailed per-
formance reports (IBM) which give audience
size and composition; film-user evaluations and
comments; course of study where film was used;
bookings and showings (current, year-to-date,
and cumulative); summary of coverage by
States; and other data about performance and
audiences. Programming Services: confirmation
and advance booking notices are sent to users
and sponsors on a daily basis; bookers assist
organizations in arranging programs and special
distribution concepts (Movie-A-Week, Films for
Freedom, etc.). Library Service Plan: a profes-
sional "physical handling" service for sponsored
film libraries that provides all regular services
(except promotion, as desired) and includes
Sponsor Imprinted forms.

ASSOCIATION TELEFILMS: This division is re-
sponsible for the distribution of sponsored films
to commercial and educational TV stations. It
maintains daily contact with TV programmers,
creates sponsored-film series and special con-

cepts, prepares TV promotion kits, publicizes
sponsored films in "TV Guide" and local news-
papers and distributes newsclips and scripts to
TV news departments. Current AF-TV series in-
clude: *World in Focus*, *Films for Freedom*, *Your
Neighbor - The World*, *Theatre 30*, *Holiday
Time*, *Achievement* and *This Aerospace Age*, all
comprised of sponsored films.

ASSOCIATION-THEATRICAL FILMS: Through the
booking services and facilities of Theatrical Film
Distributors, Association Films places sponsored
films in motion picture theatres. Monthly reports,
comment cards and advance booking notices are
provided; promotion is sent to theatres and 31
exchange-city bookers; publicity stories are sent
to theatrical trade magazines.

ASSOCIATION INSTRUCTIONAL MATERIALS: This
division of Association Films handles the sales,
long-term leasing and rental of educational, train-
ing and special purpose films and filmstrips.

BACKGROUND: Founded in 1920 in Chicago. In
the past 43 years, has grown into a national
organization of 28 offices handling rental films
for schools, churches, clubs and industry. In
1948 Ideal began the distribution of industrial
films, for the first time making available a proven
paying customer list for the distribution of in-
dustrial films services.

SERVICES: Promotion, publicity; booking, ship-

BACKGROUND: The outgrowth of a pioneering program in the field of talking motion pictures by Electrical Research Products, Inc., a sub-

MODERN TALKING PICTURE SERVICE:

sidary of the Western Electric Co., formed in 1927 at the birth of the commercial sound motion picture medium, Modern Talking Picture Service first emerged as the non-theatrical department of that company. An early pioneer in the licensing and operation of portable sound projection apparatus and also providing projection service for industry, etc., Modern's present trade name was adopted by its licensees in 1935 and Frank Arlinghaus, then of ERPI, was placed in charge of this growing activity. Modern became an independent corporation on July 1, 1937, under the ownership and management of its distribution employees.

SERVICES: In 1964, in its 27th year, Modern represents over 400 organizations from industry, commerce and the professions, distributing their public relations films to schools, colleges, industrial plants, offices, and to the public and private clubs, and social groups throughout the United States and Canada. Other primary channels of distribution in which Modern is a leading specialist include: theatres showing sponsored short subjects; television stations. Modern operates a network of 32 regional libraries. For sponsors utilizing its service, the company promotes, ships, cleans, repairs, maintains and stores their films. Additionally, it counts audience attendance, records their comments and furnishes the sponsor a monthly tabulation. Extensive IBM facilities and equipment for promotional printing are maintained at New York headquarters. All regional libraries are equipped for electronic film inspection and handling. In 1960, Modern established its Modern Learning Aids division to distribute educational films for purchase, subscription (series rental) and lease-to-buy. MLA distributes the high school physics films developed by the Physical Science Study Committee.

REGIONAL EXCHANGES are located in Atlanta, Boston, Buffalo, Cedar Rapids, Charlotte, Chicago, Cincinnati, Cleveland, Dallas, Denver, Detroit, Harrisburg, Houston, Indianapolis, Kansas City, Los Angeles, Memphis, Milwaukee, Minneapolis, New Orleans, New York, Omaha, Philadelphia, Pittsburgh, St. Louis, San Francisco, Seattle, Summit (NJ), Washington D. C. as well as in Honolulu, Hawaii; Anchorage, Alaska and Toronto, Ontario.

SPECIAL ACTIVITIES & PUBLICATIONS: A physical handling service is maintained for technical professional and special films. Recent references for sponsor reading (available on letterhead request or by telephone from listed sales offices) include: "The Modern Fact Book of Sponsored Film Distribution" - "The Opportunity for Sponsored Films" - "Business Films at the Movies" - "How to Reach the Television Audience with Business Sponsored Films" - "The Teen Age Market" - and "Series Programming. PR Films Free from Modern TV."

ROTHACKER, INC.

Mayme R. Dawson, *Secretary-Treasurer*

BACKGROUND: Established in 1910 as the Rothacker Film Manufacturing Co., pioneer producer and distributor of sponsored films, the organization was subsequently reorganized as Rothacker, Inc., and is currently engaged in specialized business film distribution throughout the world.

SERVICES AND OPERATIONS: Distribution of sponsored business films through theatrical, non-

ROTHACKER, INC.:

theatrical and television outlets is handled from the New York office and the various distributors throughout the United States and Europe. Emphasis is put upon reaching exactly what audience the sponsor wishes to reach; and this individual approach is accomplished through separate promotional campaigns, audience selection, publicity and physical handling done on a separate basis for each film. A general catalogue is not published since each title receives an exclusive handling, thus assuring the sponsor of more complete identification and a closer tie-in with his film. Prints are all hand-inspected, sound-read, cleaned and repaired and a complete record maintained on condition of each print. An individual print breakdown with classification is always available and print lifetime guarantee is offered as part of a special service. Monthly exhibition reports sent with full information of each showing. Special questionnaires and personal attendance at screenings provide additional information and can be keyed to supplement companies' other public relations efforts.

FOREIGN DISTRIBUTION: In addition to full coverage throughout the United States and Canada, Rothacker, Inc., offers international distribution service for Europe and the Orient. The main basis of operation is from Germany with other distributors located in England, France, Scandinavia, the Benelux countries, Italy and Switzerland. The foreign distribution is handled in basically the same manner as the domestic with special emphasis on audience selectivity and a high standard of the circulation of each film title. As this type of activity continues to grow throughout Europe, the number of specific outlets in specialized categories continues to increase.

HUDSON PHOTOGRAPHIC INDUSTRIES, INC.
A/V Division, Dept. A Irvington-on-Hudson, N.Y.

DEPARTMENT OF DEFENSE

The Pentagon, Washington, D. C. 20301

Office of Public Affairs: Directorate for News Services — Audio-Visual Division

• This division is the central Armed Forces contact for the news media and producers in the important fields of radio, television, still pictures and motion pictures. Direct contacts on national and international release matters in these fields are:

Robert W. Harvey, *Deputy Director
News Services (Audio-Visual)*
Phone: ONford 5-9082

Norman T. Hatch, *Chief, Radio-TV
News Branch*
Phone: ONford 7-5111

Wallace C. Marley, *Chief, News
Photo Branch*
Phone: ONford 7-5331

Donald E. Baruch, *Chief, Motion Picture
Production Cooperation Branch*
Phone: ONford 7-4596

Bertram Kalisch, *Assistant to the Director*
Phone: ONford 7-4162

ACTIVITIES: The Motion Picture Production Cooperation Branch approves release of Armed Forces stock footage which cannot be procured commercially for newsfilm television programs, theatrical productions, etc. The Branch cooperates with producers of some 35 major theatrical productions and 10-12 TV series featuring or relating to the Armed Forces. There is an Armed Forces Film supplement which lists the various Service films available for public non-profit showing or cleared for public service TV programs. Information on such films can be obtained from the Motion Picture Production Cooperation Branch.

The Radio-TV News Branch releases approximately 260 (2-3 minute) subjects to the TV, newsfilm and theatrical newsfilm media annually. It maintains two small Pentagon studios for servicing the news media and radio programs, which feature interviews with top Defense officials. In addition, the Radio-TV News Branch releases taped and filmed messages by Secretaries and Service Chiefs and radio trailers for Armed Forces Day.

The News Photo Branch releases to the press and television approximately 1500 photographs per year.

PRODUCTIONS: The only film directly produced by the Office of Public Affairs for the Secretary of Defense is an annual film report on the progress and achievements of the Armed Forces. *Partners in Freedom*, presently in production, is expected to be available in 16mm color in May.

Armed Forces Institute of Pathology Medical Illustration Service

Morris M. Goldberg, *Chief Medical
Illustration Service*
Phone: 576-2866

John A. Ey, Jr., *Asst. Chief, Medical
Illustration Service*
Phone: 576-2867

William W. Nicholls, *Chief, Training Aid
Division*
Phone: 576-2865

Miss Daisy B. Howze, *Chief, Audio-Visual
Communication Center*
Phone: 576-2864

ACTIVITIES: This Institute makes or supervises films for the Armed Forces on medical subjects.

FACILITIES: In-house capability, and contracts for films through the Army Signal Corps.

DISTRIBUTION: AFIP operates a U. S. Army Signal Corps film exchange for medical films. The Institute procures and loans films for the Medical Services of the Armed Forces wherever and whenever they are needed. Unclassified films are available to members of the medical profession, with borrower paying postage both ways. For in-

formation about available films, write the Government Printing Office, Washington 25, D. C., and refer to *The Film Reference Guide — Medical and Allied Subjects*.

Directorate for Armed Forces Information and Education

Paul J. Murdock, *Chief, Motion Picture
Division*

Phone: ONford 7-2967

Dallas Halverstadt, *Assistant Chief*
Phone: ONford 7-2967

• This office produces and distributes information films for the use of the Armed Forces. Films are distributed through the film exchanges of each service, through on-base theaters, and to Armed Forces TV networks in 31 overseas locations.

DEPARTMENT OF THE AIR FORCE The Pentagon, Washington, D. C.

• The U. S. Air Force produces approximately 500-700 reels of film each year by contract with commercial producers or in-house. These films are used in management, information, education, training and operational programs.

ACTIVITIES: Headquarters, USAF, Pentagon, Washington, D. C. The single point of contact within Hq USAF for all film matters excepting "industrial films" is the Photographic and Motion Picture Section within the Directorate of Operations. Complete address is:

Hq U. S. Air Force
AFNOPH
Washington, D. C. 20330

This office is responsible for determining or validating requirements for all Air Force motion pictures and insuring that the capability exists within the Air Force to either procure them by contract or in-house. In this respect, they program and monitor the Air Photographic and Charting Service (MATS), the organization that actually accomplishes film making and contracting of films. This office is also responsible for insuring an adequate photographic documentation capability and film distribution system exists within the Air Force.

The key officers in charge of these programs are:

Lt. Colonel Donell E. Bjoring
Hq USAF, AFNOPHP
Washington, D. C. 20330

Mr. Edward A. Michalski
Hq USAF, AFNOPHP
Washington, D. C. 20330

• **Secretary of the Air Force:** Within this office is a section responsible for industrial films (formally "sponsored films"). These are information and education films covering a wide variety of subjects of mutual interest to the Air Force, to industry and to the public, privately financed and produced by industry, but with assistance from the Air Force appropriate to the subject matter.

As a rule, these motion pictures are adopted by the Air Force for training, orientation or information purposes, and distributed through the facilities of the Air Force Film Library Center.

The program is administered in keeping with the provisions for granting military assistance to producers of motion pictures for television or theatres by:

The Radio-Television Branch (SAF-OIPE)
Public Information Division
Office of Information
Office, Secretary of the Air Force

FEDERAL AUDIO-VISUAL PROGRAMS:

DEPARTMENT OF THE AIR FORCE
fornia, support Air Force-wide production requirements.

1350th Motion Picture Squadron, APCS, Wright-Patterson AFB, Ohio, is responsible for contract procurement and commercial production of Air Force films, and provides in-service engineering and film report type productions to Technical Commands. The 1350th Motion Picture Squadron also maintains the USAF Film Depository, a film archive with historical and current film footage holdings in excess of 99,000,000 feet.

APCS also maintains photographic units at Vandenberg AFB, Santa Maria, Calif.; Ent AFB, Colorado Springs, Colo.; and Andrews AFB, Camp Springs, Md. to provide documentary and instrumentation coverage of Air Force missile and other activities. APCS also maintains combat documentary teams capable of rapid deployment anywhere in the world. These teams are permanently located at March AFB, Riverside, Calif.; Offutt AFB, Omaha, Nebr.; and Westover AFB, Chicopee Falls, Mass. Photographic Detachments are also located overseas, in the Far East, Europe and certain other areas of the world, to provide historical and combat documentation film coverage of important events of national and Air Force interest.

Additional information regarding the Air Force Film Program may be obtained by contacting:

Brigadier General Robert W. Hall,
Commander, Air Photographic & Charting
Service, Orlando AFB, Florida 32813
Phone: 241-2451, ext 501

Col. James P. Warndorf, Deputy Chief of
Staff, Photography, Air Photographic &
Charting Service, Orlando, AFB, Fla. 32813
Phone: 241-2451, ext 2226

Specific information regarding the Commercial

Production of Air Force films may be obtained by contacting:

Lt. Col. Peter Boyko, Commander
1350th Motion Picture Squadron, APCS
Wright-Patterson AFB, Ohio 45433
Phone: CLearwater 3-7111, ext. 30158

DISTRIBUTION: Approved Air Force films, filmstrips and related visual aids are distributed by the Air Photographic and Charting Service through the centralized facilities of the Air Force Film Library Center, St. Louis, Mo. This facility routinely distributes 360,000 films per year to Air Force units and other agencies all over the world. The present active inventory consists of nearly one-half million prints of more than 4,000 separate film subjects. The Film Library Center also maintains overseas central Film Libraries located in France, Japan and Alaska, with a Branch Film Library in the United Kingdom. These libraries are strategically placed and stocked to service approximately 140 Base Film Libraries located throughout the world. Information regarding distribution of these films can be obtained by contacting:

Major James R. Watkins, Commander, 1356th
Film Library Squadron, 5900 South Broadway,
St. Louis, Missouri 63125
Phone: MElose 1-4500, ext. 671

DEPARTMENT OF THE ARMY Office of the Chief, Communications — Electronics Pictorial and Audio-Visual Directorate The Pentagon, Washington, D. C.

• The Chief, Communications-Electronics of the Army is responsible for policy matters on the procurement, production and distribution of all motion pictures for the Army. As a result, all film programs are authorized by the Pictorial and

Audio-Visual Directorate of the Office of the Chief, Communications-Electronics. Information pertaining to the production or the distribution of prints may be obtained from the following:

Col. Daniel C. Bird, Director, Pictorial
and Audio-Visual Directorate
Phone: OXford 7-3520
Lt. Col. Mark T. Muller, Deputy Director,
Pictorial and Audio-Visual Directorate
Phone: OXford 5-6958
Lt. Col. Andrew B. Ferguson, Chief,
Photographic Division
Phone: OXford 7-3806
James A. Moses, Chief, Audio-Visual
Distribution and Utilization Division
Phone: OXford 7-2039

ACTIVITIES: The Pictorial and Audio-Visual Directorate coordinates production of more than 300 films of all types each year, including the TV series *The Big Picture*, and some films for the Office of Armed Forces Information and Education.

THE ARMY PICTORIAL CENTER has primary responsibility for the actual production of motion pictures and requests for information concerning contracts for writing, production and processing should be directed to the Commanding Officer, Army Pictorial Center, 35-11 35th Ave., Long Island City, New York 11101. Phone ASToria 4-3100.

DISTRIBUTION: All official motion pictures, filmstrips, transparencies, language training materials and language laboratories, and related audio-visual aids are distributed throughout the Army by the U. S. Army Film Distribution & Utilization System. This system includes the Audio-Visual Distribution Division, Pictorial and Audio-Visual Directorate, OCC-E, the Distribution Branch of Army Pictorial Center, and the 258 Audio-Visual Communication Centers located at Army headquarters, major service schools and training installations throughout the ZI (Zone of Interior) Armies and Overseas Commands.

FEDERAL AUDIO-VISUAL PROGRAMS:

DEPARTMENT OF THE NAVY

Washington 25, D. C.

• The U. S. Department of the Navy produces motion pictures for such purposes as training, maintaining fleet readiness, explaining new weapons and devices, and for medical, historical, indoctrination, safety and recruiting uses, to name a few key subject areas.

• *Information and General Policy Procedures* on all aspects of the Navy film program, including application information for commercial producers interested in bidding on Navy contract films, are handled by the Chief of the Bureau of Naval Weapons, Navy Department, Washington, D. C. 20390.

Captain E. B. Johnson, USN — Code FF, *Director, Photographic Management Division*
Phone: OXford 8-3417

E. L. Randel, Code FFMP, *Head, Training Film & Motion Picture Branch, Photographic Management Division*
Phones: OXford 8-3470, OXford 8-3472

• *Procurement policies and procedures*, which involve information on technical questions regarding bids, are handled by the Officer in Charge, Navy Purchasing Office, Washington, D. C. 20390.

Captain W. M. Lohse, USN, *Officer in Charge*
Phone: OXford 6-5141

Cdr. E. C. Goodwin, USN, *Director, Purchase Division*
Phone: OXford 6-6479

FACILITIES: The U. S. Naval Photographic Center, a field activity of the Bureau of Naval Weapons, is the central photographic laboratory for the Navy Department and the Navy's largest photographic activity. The Center, composed of over 530 military and civilian personnel, provides photographic assistance and specialized services to the entire Naval Establishment, supervises the production of Navy training films and maintains the Navy's motion picture and still photographic film libraries.

The motion picture production facilities at the Center are modern and complete. There is a sound stage, film and tape recording and mixing equipment, an art and animation group and editorial branch. Here experienced script writers and artists collaborate with Navy photographers and technicians, maintaining a high standard of quality for Navy productions. The processing division has the capability to develop and print negative film and release prints in 35mm and 16mm black-and-white and negative-positive color. About 75 percent of all Navy films, however, are contracted with established commercial producers.

In addition, there is a growing requirement for films to report on the Navy's research and development activity, and to meet this need, a TV closed circuit kinescope facility has been installed. Two video tape recorders and kine-recorders together with viscomat processing make for rapid completion of urgent films.

Extensive libraries of both still and motion picture photography are maintained at the Center. Library services are provided to the Naval Establishment and other government agencies and to commercial concerns on a cash sale basis. The Still Picture Department produces all types of still photography such as press, serials, murals, and official portraits. Up-to-date continuous roll paper printing and processing units meet the Navy's large volume print demands. There are also complete negative, positive and transparency color processing facilities.

A research and development group conducts tests, experimentations, development and evaluation of photographic equipment. Here, technical photographic specifications, instructions and other publications are also prepared. Information

about NPC may be obtained from: Commanding Officer, Naval Photographic Center, U. S. Naval Station, Washington 25, D. C.

Earl Young, *Motion Picture Analyst, Motion Picture & Photographic Products Branch*

Phone: WOrth 7-2911

• The Motion Picture and Photographic Products Branch was established to serve the motion picture and the photographic and motion picture apparatus, equipment and supplies industries. It performs many functions, some of the more important being to foster, promote, and develop the foreign and domestic trade of these industries. It provides market development counsel to producers and exporters as to where and how to cultivate and expand their overseas sales, acquire distributors, facilitate the acquisition of frozen remittances, and render assistance in other problem areas. It also participates in tariff and trade negotiations, and maintains constant surveillance of foreign trade trends, and periodically issues concise basic information releases for industry guidance. Furthermore, the Branch acts as the focal point for industry with reference to advice and guidance to other agencies and use of other agency facilities.

Coast & Geodetic Survey

G. P. Meredith, *Chief, Administrative and Technical Services Division*
Phone: WOrth 7-3266

• Over the past decade, the Bureau has produced five documentary films covering both its general activities and such specific programs as tide and current measurement, wire-drag techniques, surveying and the oceanographic cruise of the Ocean Survey ship "Explorer." The Bureau is now working to replace its older documentaries. The activities film is undergoing extensive revision, and should be released in early Spring, 1964. A new film is planned to cover the Bureau's participation in this year's International Indian Ocean Expedition.

Collaborative film work at the Coast and Geodetic Survey included assistance on the National Academy of Science's *Planet Earth* series, and in the preparation of *Science for Survival*, a recent production of the Interagency Committee on Oceanography.

Film information is available through the Administrative and Technical Services Division.

National Bureau of Standards

William R. Tilley, *Office of Technical Information*, Connecticut Ave. & Van Ness St. N. W., Washington, D. C.

Phone: EMerson 2-4040, ext. 7093

• This Bureau produces scientific and technical motion pictures about the research programs of the National Bureau of Standards. Films are available from the above address.

Bureau of Public Roads

William F. Hall, *Chief, Photographic Section*
Phone: DUDley 2-3005

ACTIVITIES: This Bureau produces scientific and technical motion pictures about the research programs of the National Bureau of Standards. Films are available from the above address.

Katherine C. Skogstad, *Information and Publications Officer*
Doudell C. Cotter, *Program Management Officer*
Lucian Glen Lambert, *Chief, Motion Picture and Television Section*
Norman L. Cole, *Chief, Graphic and Photographic Arts Section*
Charles N. Farmer, Jr., *Chief, Utilization and Distribution Section*

ACTIVITIES: The Public Health Service Audiovisual Facility, a Branch of the Communicable Disease Center, is a National center for development of a nationwide audiovisual program in medicine and the allied sciences. It produces films, filmstrips, television tapes, exhibits, publications and other audiovisual forms for the medical and scientific communities.

A special program designed to promote exchange of medical audiovisual materials between the United States and other nations is now sponsored by the Facility.

FACILITIES: The Public Health Service installation has complete in-plant motion picture and

filmstrip production and laboratory equipment located in a new four-story building designed especially for audiovisual activities. In addition, the Facility acquires, utilizes and distributes medical and health-related films, operates the National Archives of Medical Motion Pictures and maintains a central reference file of medical motion pictures on an international basis.

DISTRIBUTION: Public Health Service films are available from the U. S. Public Health Service Facility, Atlanta, Georgia 30333, on loan to schools of the health professions, other educational institutions and medical-health organizations throughout the U. S. and abroad. Films are listed in a Public Health Service Film Catalog published by the Facility. Information on teaching films can be obtained by writing to the Facility.

FILMOGRAPHY: Three other film catalogs are published by the Facility: "Film Reference Guide for Medicine and Allied Sciences;" "Cancer Motion Picture Guide;" and "Film Guide to Neurological and Sensory Diseases." Other specialized reference works are in production.

PRODUCTIONS: Recent motion pictures produced by the Facility are *Study from Life* about laboratory animals and medical research; *The National Library of Medicine; Radiation Fallout Protection in Hospitals; Progressive Patient Care; Innocent Heart Murmurs in Children; Mental Status Examination; The Course and Management of Syphilis*

and *Plastic Isolators*. A number of films produced at the Facility and elsewhere have been adapted in the Spanish language for use in Latin America and other Spanish speaking countries: *Identification of Early Syphilis; Innocent Party; Dance Little Children; Neurological Examinations of the New Born and Neurological Examination of the One Year Old*.

DEPARTMENT OF INTERIOR
Washington 25, D. C.

• The Department of Interior produces films which are concerned with the management, conservation and development of natural resources in every section of the Nation. Films are available from the bureau in which they have been produced.

Office of the Secretary

Harlan Wood, *Division of Information*
Phone: REpublic 7-1820, ext. 3171

Inquiries concerning the use of Department of Interior films for television should be addressed to this office.

The Bureau of Mines

A. Nicholas Vardac, *Motion Picture Repr.*,
Bureau of Mines, Washington 25, D. C.
Phone: REpublic 7-1820, ext. 3359

Meyer Reiness, *Chief, Bureau of Mines Distribution*, 4800 Forbes Ave., Pittsburgh 13, Pa.

ACTIVITIES: The Bureau of Mines has a broad film program dating from about 1920. Motion picture subjects deal with natural resources of states and areas and with mineral commodities including metals, non-metals, coal and petroleum. Recently released films include: *The World of Phosphorus*; *A Stretch of Imagination, the Synthetic Duplication of Natural Rubber*; and *Cast Iron, the Biography of a Metal*.

FACILITIES: All films are made in cooperation with private industrial firms which pay production costs and select commercial film producers. The Bureau maintains no production facilities for these films.

DISTRIBUTION: About 5,000 prints of films are distributed to the public on a free loan basis from the central film distribution center of the Bureau of Mines, 4800 Forbes Ave., Pittsburgh 13, Pa., and from depositories in 40 states. Annual number of showings is 225,000. Most films are cleared for free TV use. Single or block bookings arranged. Catalogs available.

PRODUCTIONS: Films in current production include: *The Story of Potash*; *Helium*; *Washington and Its Natural Resources*; *Coal*. Educational TV Program Series: The following television series are available: *Down to Earth*; *States of the Union*; *Out of the Earth*.

The Bureau of Reclamation

Ottis Peterson, *Assistant to the Commissioner, Information*
Phone: 343-1662

ACTIVITIES: The Bureau of Reclamation produces one or two pictures a year on water resource development in the seventeen western states. These films are usually "low budget," sound-color films which run 14 or 28 minutes for TV use. Film catalogs are available from the Washington, D. C., office of the Bureau; the regional offices and the Film Distribution Center in Denver.

FACILITIES: Most of the film work for the Bureau of Reclamation is contracted by the appropriate regional office with commercial producers. There are seven regional offices, supervised by the Washington office.

DISTRIBUTION: Distribution of Bureau of Reclamation films is now accomplished through the Film Distribution Center, Bureau of Reclamation, Bldg. 53, Denver Federal Center, Denver, Colorado. On occasion, prints are loaned to educational institutions for short periods of time.

PRODUCTIONS: Recent productions include: *Clear Water on the Colorado*, a spectacular portrayal of the clearing of the once muddy and almost inaccessible Colorado River in the canyons of Arizona and southern Utah; *Great River*, relating the comprehensive development of America's greatest power stream (sponsored jointly with the Bonne-

FEDERAL AUDIO-VISUAL PROGRAMS

ville Power Administration); *The Story of Hoover Dam*, presenting scenes of actual construction of Hoover in the 30's and of more recent project activities; and *The Concrete Arch*, showing the construction of Flaming Gorge Dam to its halfway completion point. The Bureau also has available various technical films dealing with the work of designers and construction engineers on Reclamation projects.

The Bureau of Land Management

(Vacant), *Information Officer*
Phone: 343-3609

• Four films are available from the Bureau's Washington, D. C., office and from 11 State offices in western states.

Available for loan and for TV showings are: *Our Public Lands*, a 28-minute color film on conservation and development of the public lands, Alaska, *Land to Grow On*, 28-minute color film on public lands and resources in Alaska; *Watershed Conservation*, demonstrating water conservation on the public lands; and *Rogue River Country*, 28-minute color film about the recreational opportunities and wealth of natural resources found in the Rogue River Valley of southwestern Oregon. State BLM offices having film libraries are: Portland, Sacramento, Phoenix, Reno, Salt Lake City, Santa Fe, Denver, Cheyenne, Boise, Billings, and Anchorage.

The Geological Survey

Frank H. Forrester, *Information Officer*
Phone: 343-1100 ext. 4646

• This office has a small collection of documentary research and training films dealing with geology, water resources, topographic mapping, aerial photo interpretation, and related subjects. The films were produced in cooperation with the Pan American Institute of Geography and History and other Governmental agencies and are circulated through the Washington, D. C., office.

U. S. Fish & Wildlife Service

Elliot A. Macklow, *Chief, Audio Visual Services*, Branch of Marketing, Bureau of Commercial Fisheries, Fish & Wildlife Service.
Phone: REpublic 7-1820, ext. 2151

ACTIVITIES: Using commercial contractual motion picture facilities, this organizational unit plans, produces and distributes fishery marketing and educational motion pictures sponsored by both Government and industry. Other audio-visual materials such as fishery television spot announcements, radio spot announcement discs, slides, specialized publications, etc. are also produced and distributed by the Unit.

FACILITIES: Commercial contractual motion picture facilities.

DISTRIBUTION: Utilizing about 200 Government and private film libraries, about twenty fishery motion pictures are distributed free of charge upon request. Provision has been made so that most of the films are cleared for television, although special permission is required before telecasting. Stock footage is not available. A catalog entitled *Fishery Motion Pictures* may be obtained free of charge upon request. A central Audio-Visual Services film library is maintained. Films and information may be obtained by writing Audio Visual Services, Bureau of Commercial Fisheries, 800 E Street, Washington, D. C.

PRODUCTIONS: Recent productions include: *Sponge-Treasure From the Sea*, an Edinburgh Film Festival honor film; *Salmon-Catch to Can*; *Fishing Five Great Lakes*. A documentary motion picture, *Watermen of Chesapeake*, sponsored by the States of Maryland and Virginia, was released in 1963.

FEDERAL AVIATION AGENCY

Office of Headquarters Operations

Audio Visual Branch

800 Independence Avenue, S. W., Room 412E
Washington 25, D. C.
Phone: WOrth 2-5693

John A. Nugent, *Chief*,
Audio Visual Branch, HQ-450

Martin S. Konigsmacher, *Chief*,
Motion Picture Section, HQ-452

Arthur L. Gansh, *Chief*,
Still Photographic Section, HQ-451

Wayne C. Lovell, *Chief*,
Visuals Section, HQ-456

ACTIVITIES: The Audio Visual Branch produces motion pictures, graphics, exhibits and still photography designed to meet the needs of the Services and Offices which comprise the Federal Aviation Agency.

FACILITIES: The FAA uses both in-service capabilities and commercial contracts with industry in supplying its Audio Visual services.

FILM DISTRIBUTION: Distribution of FAA films is handled through the Aeronautical Center Film Library, AC-431, P.O. Box 1082, Oklahoma City, Oklahoma.

MOTION PICTURE PRODUCTION: Productions vary from highly technical training films to those designed for the general public.

DEPARTMENT OF THE TREASURY

Washington, D. C. 20025

Internal Revenue Service

Charles M. Lammond, *Public Information Officer*, Phone: WOrth 4-4037

John Burleson, *Audio Visual Training Officer*,
Phone: WOrth 4-3962

ACTIVITIES: The Internal Revenue Service prepares, from time to time, motion pictures for either internal or external use. Those prepared for training purposes are produced under the jurisdiction of the Internal Revenue Service Training Division and are used at district and major local offices throughout the United States to instruct new personnel or those being assigned to different tasks in the work they are to undertake. The Public Information Division supervises the production of films and television spot announcements intended to acquaint taxpayers throughout the nation with matters of presumed interest to them involved in Internal Revenue Service operations.

FACILITIES: The public information films of Internal Revenue Service are produced professionally, usually utilizing the agency's own office facilities and personnel for background scenes but hiring professional talent for action bits, narration, etc. Laboratory production facilities are contracted to complete the film after the first rough cut. Training films are sometimes produced with Internal Revenue Service personnel and sometimes with professional talent.

DISTRIBUTION: The 58 district offices, and several of the larger local offices, distribute Internal Revenue Service film productions. All clearances and releases have been obtained for general showing of all Internal Revenue Service films.

PRODUCTIONS: The Internal Revenue Service plans the early issuance of a catalogue listing for describing its films. It has recently added several new titles and has updated older productions to make note of recent developments in electronic processing and other improvements in agency operations. Films now available from District Offices of Internal Revenue Service are: *How Do*

"THE TRUTH ABOUT COMMUNISM"

Ronald Reagan, Host and Narrator

A compelling and comprehensive, chronological history of the Communist Party, showing the actual events as they were taking place from 1917 to the present, all in a one hour and eighteen minute documentary film.

"... we have no cause to relax our vigilance... Let us distinguish between our hopes and our illusions... never laboring under any illusions about Communist methods or Communist goals."

*President John F. Kennedy,
University of Maine, 10/19/63/.*

"Today, our country faces the most severe test ever to confront a free people... We are at war with Communism, in different ways on different fronts around the world."

*J. Edgar Hoover, Director, FBI,
Los Angeles Herald-Examiner, 11/29/63/.*

"Many thanks for the film which I have had an opportunity to present to the FBI... I am told that THE EXPERTS THERE CONSIDER IT REALLY ONE OF THE BEST THEY HAVE SEEN."

James W. Symington,
Administrative Assistant,
Washington, D. C.
Office of the Attorney General,

"THIS IS A VERY SPLENDID FILM AND ONE WHICH SHOULD BE SHOWN WIDELY."

Felix B. Stump,
Admiral, USN, (Ret.)
Freedoms Foundation,
Volley Forge.

"IT SHOULD BE SEEN BY EVERYONE."

Arnold Finch, Director,
In-Service Training Department
Los Angeles City Schools.

News events of the day deal more and more with International Communism. It becomes essential for the public to have a clear understanding in depth of the history of Communism, the philosophy behind Communist behavior, and its goal of world supremacy challenging the free world.

United States Coast Guard

Don Farran, Chief, Motion Picture & TV Branch, Public Information Division
Phone: WOrth 4-5303

Ch. Phot. H. E. Whitwer, USCG,
Assistant to Chief

ACTIVITIES: The U. S. Coast Guard produces information and training, as well as recruiting films. The majority are in 16mm color-sound with running time of 14 or 25 minutes. For the past three years, CG films have consistently been selected by the United States government for entry in foreign film festivals, and have won a number of awards, three films having been sent to the Edinburgh International Film Festival in 1961 and four to International Film Festivals in 1963. In 1962, a Coast Guard film, *Firefighting Aboard Tankers*, won the Bronze Plaque First Award in its category in the National Committee on Films for Safety contest.

FACILITIES: In-house capability. The CG uses its own facilities, including writing, directing, shooting, and editing to final cut of its productions.

DISTRIBUTION: Distribution of the films is made through the various Coast Guard District offices and from Headquarters to television stations, schools, colleges, various organizations providing information to their members. Usually, the films are cleared for non-theatrical and television use, and no charges are made for use. An annual Film Catalog is issued by Coast Guard Headquarters and separately by each District office.

PRODUCTIONS: Recent subject matter of the films has ranged widely across the world, including LORAN stations on Pacific isles, discovery operations in the Arctic and Antarctic, Search and Rescue, International Ice Patrol, Aids-to-Navigation, Merchant Marine Safety, small boat safety operations, including training films on navigation and rules-of-the-road, and the Law Enforcement responsibilities of the Coast Guard.

U. S. Savings Bonds Division

Jacob Mogelev, Promotion Manager, U. S. Savings Bonds.
Phone: WOrth 4-5702

• The U.S. Savings Bonds Film Program is completely dependent on the volunteer support from the non-theatrical and theatrical film industry and other industries. Over the past 20 years it has received over 1 billion dollars worth of promotional support.

CINEMAGINATION and SERVICE

300 EAST 46th STREET, NEW YORK 17, N. Y.

OXFORD 7-6655

FEDERAL AUDIO-VISUAL PROGRAMS:

AGENCY FOR INTERNATIONAL DEVELOPMENT:

provide professional technical advice and assistance to a large number of functionaries working in conjunction with approximately 90 U.S. AID Missions in various cooperating countries of the free world. They are responsible for Resources program within AID, including all communications media instruction and training, the development of the media of mass communications, and the training of personnel in the professions and skills of technical information. The responsibility includes planning, development and use of communications media ranging from hand-made indigenous devices through more complex media such as motion pictures, radio and television. Such support extends itself into all technical fields with which AID programming is involved.

FACILITIES: With respect to film productions, some missions have complete professional staffs and facilities; others vary widely in degrees of completeness. All rely on the Washington staff to a greater or lesser extent for "backstop" guidance.

DISTRIBUTION: Except for a limited number of films produced under contract in the United States, motion pictures, film strips and slides are made in cooperating countries and are designed for overseas distribution. Approximately fifty films have been selected for showings to Educational and Civic groups in this country. They are available upon request from Educational Film Libraries in 10 geographic locations. Further information is available from AID, or the Educational Film Library Association, 250 West 57th Street, New York 19, N.Y.

☆ Not an agency of the U. S. Government but an active user of films is:

ORGANIZATION FOR ECONOMIC COOPERATION & DEVELOPMENT

Donald Swartz, M P P P
Phone: DUDley 2-S193

ACTIVITIES: This branch produces and distributes educational and technical public release films on space and aeronautics.

FACILITIES: Motion picture requirements are fulfilled through in-house capability, contractors (NASA Centers and industry), and industry sponsored programs.

DISTRIBUTION: NASA films and stock footage are loaned through NASA Central Motion Picture Film Depository and Film Loan Library, 1411 S. Fern St., Arlington, Virginia, and Motion Picture Film Service Areas.

Henry Detrich, *Depository*
Carroll Eddy, *Film Loan Library*
Warren Phipps, *Chief* (and contact for release of stock)

Depository is run under contract with Byron Inc., Mrs. Glenice Johnson, in charge.

PRODUCTIONS: released in 1963 include: *Project Apollo-Manned Flight to the Moon; The Flight of Faith Seven; American in Space; Alouette - Canada's First Satellite; Ariel - The First International Satellite; The Clouds of Venus; The Highest Honor; John Glenn Speaks to Young Americans; The John Glenn Story; Space for the Benefit of Mankind;* and many others.

UNITED STATES ATOMIC ENERGY COMMISSION

Division of Public Information Audio-Visual Branch

Washington, D. C. 20545

● The Audio-Visual Branch of the Atomic Energy Commission has as its primary function responding to requests from the public media

in all the audio-visual fields for assistance in the preparation of films, stills, and other audio-visual materials on atomic energy.

Edwin L. Wilber, *Branch Chief*
Phone: 973-5365

Elton P. Lord, *Deputy Chief*
Phone: 973-5476

Stanley D. Schneider
Phone: 973-5476

ACTIVITIES: This branch plans and carries out audio-visual and still picture projects to advance specific Commission Programs, and acts as advisor to Commission and contractor personnel in Washington and nationwide on audio-visual problems and projects. This branch also places Commission- and contractor-produced motion pictures into loan and commercial sale channels, determines the content of the 10 domestic and 4 overseas film libraries, and issues popular-level and professional-level film lists.

FACILITIES: AEC has no motion picture production facility or motion picture laboratory, but uses Government and or commercial services.

DISTRIBUTION: AEC operates an 8,500 still photo library, and distributes films through 10 domestic film libraries which cover particular geographical areas. All films are for free-loan. The Commission also has four overseas libraries at its offices at the U. S. Embassies at London, Brussels, Tokyo and Buenos Aires, stocked with semi-technical and technical films, and also supplies films to the film library of the International Atomic Energy Agency in Vienna, The American Film Library, The Hague, Holland, The National Science Film Library of Canada, and to USIS-Stockholm for use throughout Scandinavia. The Brussels and Buenos Aires libraries have about 50 films each in French and Spanish respectively. Information on libraries available from Washington office.

STOCK FOOTAGE: The Commission has more than 120,000 feet of 35mm black-and-white unedited film footage on peacetime uses of atomic energy available for purchase. Information may be obtained from Washington office. Color stock footage is also available from any of the completed documentary films produced by or sponsored by the government. Films may be borrowed from libraries in geographical areas for footage counts prior to purchase of duplicating materials from the various laboratories holding the originals. Unedited stock film footage in black-and-white and color on nuclear or thermonuclear detonations sold at Lookout Mountain Air Force Station, USAF, 8935 Wonderland Avenue, Hollywood, California 90046.

ACTIVITIES: USIA acquires and distributes motion pictures in the overseas information program which it conducts. These films show American life and support the United States foreign policy.

FACILITIES: USIA contracts with private commercial companies to produce films to specifications and under supervision of the motion picture service. In addition, the agency contracts to use selected films in overseas programs.

DISTRIBUTION: In addition to theatrical distribution for many of these films, the films reach a wide non-theatrical audience through the 359

film programming locations at the U. S. Information Service offices overseas. In addition to the 359 film libraries approximately 207 mobile motion picture units are used to show the films. The address of the local U.S.I.A. can be obtained from any American embassy or consulate. In the United States, USIA films are available from Norwood Studios, 926 New Jersey Avenue, N.W., Washington 1, D. C., recently awarded the contract for distribution of U. S. Government films.

FEDERAL AUDIO-VISUAL PROGRAMS:

THE LIBRARY OF CONGRESS—CONT'D:

has acquired through the operation of the copyright law and through gifts, and it also has a large body of foreign films turned over to it as a result of wartime seizure. The Library's activities in the motion-picture field include the registration of claims to copyright, the acquisition of films, the cataloging of films and related bibliographic service on the collection.

The Library's Copyright Office has registered claims to copyright for motion pictures since 1894, when the first examples of this medium were deposited in the Library in the form of photographic paper prints; since 1912 the copyright law has provided for the registration and deposit of motion pictures as such. Generally, under the provisions of the motion-picture copyright agreement between the Library of Congress and the motion-picture proprietors, the films are returned to the copyright proprietor by the Library after registration, but the Library has the right to claim the deposits for its collections later.

The Copyright Cataloging Division of the Copyright Office prepares a semi-annual *Catalog of Copyright Entries: Motion Pictures and Filmstrips*, which lists all such materials registered for copyright in the United States and which is published by the Library and sold by the Government Printing Office. It has also prepared four cumulative catalogs entitled *Motion Pictures*, which together cover registrations of films for the years 1894-1959 and which are for sale by the Government Printing Office.

In addition, the Library's Descriptive and Subject Cataloging Divisions catalog educational films, using data submitted largely by producers

and distributors, and the Library publishes this cataloging information in two useful forms for purchase by other libraries or individuals. One form is the printed catalog card, which any film-user may purchase to establish his own card-catalog for the control of his collection and for the dissemination of film information. The other is a book-catalog reproduced photographically from the printed cards and containing a detailed subject-index, adequately cross-indexed; entitled *Library of Congress Catalog — Motion Pictures and Film Strips*, this publication is issued quarterly and in annual cumulation, and it also appears as a volume in the quinquennial cumulation of the Library's *National Union Catalog*. Both the printed catalog cards and the book-catalog may be purchased from the Card Division, Library of Congress, Washington 25, D. C.

The Library's collection of motion pictures comprises about 77,000 reels and is in the custody of the Prints and Photographs Division in the Reference Department. It is primarily an archive in nature, and reference service is limited to assisting research activities. The Library does not lend motion pictures, but some films may be copied under certain conditions; copying requires the signing of a standard agreement concerning the clearance of copyright and the copying of equivalent footage for the Library.

The National Archives

May E. Fawcett, Audio-Visual Branch,

National Archives

Phone: WOrth 2-2513

• This Branch is the depository for a growing number of retired motion pictures from the various Government agencies, and from a few priv-

ate sources. Among these last is the recently acquired Ford Motor Company Historical Film Collection with films of American life from 1914-1915. These valuable films will be made available to the public when fully cataloged and processed. The entire Archives collection of motion pictures (about 35 million feet) covers the period of 1896 to the present, with especially extended coverage of the two World Wars. Films are available for viewing by anyone. No films are reproduced without the consent of the depositing agency. No loan service is maintained.

THE COLUMBUS OHIO FILM COUNCIL:

(CONTINUED FROM THE PRECEDING PAGE 38)

Librarian, Columbus Public Library), *Secretary-Treasurer*.

Dale, Director, Bureau of Educational Research and Service, Ohio State University; Robert Wagner, Director of Motion Pictures, Department of Photography, Ohio State University; Delores Sherwood, The Augsburg Publishing Co.; Daniel F. Prugh, Franklin County Historical Society.

PURPOSE: To promote a greater interest in the production and use of films by schools and universities, public service organizations, civic groups, and business firms and industries. The use of films by these organizations in the Columbus area and the state is also stressed.

1964 ACTIVITIES: The Twelfth Annual Columbus Film Festival, an Award Banquet featuring the "Chris" Award, Friday, September 25, 1964. Film Award Screening at the Lazarus Auditorium, September 14 through 18th.

NEW SOUND BLIMPS FOR BOLEX AND ARRI

...from SONEX

Features in Each Basic Unit:

- Reflex viewing
- 110 AC sync motor
- 3-layer construction — Blimp is fabricated in aluminum, neoprene, polyurethane for silent operation
- Removable top for easy access and MOS work
- Footage counter window
- Camera floated on rubber mts.
- Portability (15½ lbs.)
- Hinged lens hood for changes
- Matte box
- Power switch on cable (10 ft.)

Basic Price, with Motor \$299.50

Optional Equipment Available:

- Remote focus & F stop control
- Vari-shutter control
- Detachable mags, self-blipped, with takeup
- Available in 200' and 400' (modified cameras only)
- Footage counter for magazine operation
- Fiberglass construction (2 lbs. lighter)
- Adaptable Camera, blimp for mags

Your **BOLEX** becomes a professional double-system sound camera, without mechanical change, when used with the new **SONEX Sound Blimp Sync Motor Combination**. Camera mounts in 90 seconds — even less time is required for reloads.

You lose none of the regular **BOLEX** capabilities: Reflex viewing, optional spring drive, frame counting, wind-back, variable speeds on spring motor, while **SONEX 110** sync motor may be used for longer **MOS** runs at 24 f.p.s. The optional 200' and 400' self-blipped demountable magazines allow for full scale professional shooting with only minor camera modification.

The blimp is guaranteed to outperform the non-reflex, self-blimp cameras in noise level, or money back.

We invite comparison.

All Sonex products are sold with a 15-day unconditional money-back guarantee, less shipping. Parts are warranted for 1 year. Terms available for California buyers. Out of state, C. O. D. only.

SONEX presents the all-new **MINI-BLIMP**, smallest, lightest professional sound blimp in the world. Available in two models, the **MINI-BLIMP** will effectively blimp the Arri 16 Model M in the 200' configuration, or the Model S in the 100' configuration. It silences the Arri to a noise level comparable to that of the regular standard blimp. Weighs under 12 lbs., has ultra-compact design and is the ultimate in portability.

Heading the list of **MINI-BLIMP** advantages is the cost factor: the **MINI-BLIMP** is priced at about 20% of selling price of larger blimps — you get the same results at one-fifth the cost.

With the **MINI-BLIMP** Model M you get 5½ minutes running on each magazine. Reloads, due to easy-access design, require less than 2 minutes (not much of a sacrifice for a \$1,500 saving!).

For those desiring an even lighter unit, the **MINI-BLIMP** is optionally available in a Fiberglass version weighing only 8½ lbs. for the 16 Model S, or 10 lbs. for the Model M.

All the features you have come to demand in a sound blimp are available: Follow focus, F stop control, footage counter window, matte box, and full reflex viewing. Blimp is usable with standard Arri motors or it may be used with the American-made **SONEX** sync motor, which sells for considerably less than the standard unit.

Available with these optional features at moderate extra cost:

- Remote F stop and follow-focus controls.
- **SONEX** sync motor for Arri
- Interior light
- Fiberglass construction

MINI-BLIMP IS THE **LIGHTEST, MOST COMPACT, MOST PORTABLE SOUND BLIMP IN THE WORLD!**

TOP-QUALITY SOUND DEADENING AT A FRACTION OF THE REGULAR COST . . .

Priced from \$199.00 for Model S — \$279.50 for Model M.

ENG. CO.

Box 1189 • CHapman 5-1942

GLENDALe, CALIFORNIA

Michael Livesey is the shock mounted cameraman. Mike's latest is our third official promotional film for the New York World's Fair, "WORLD'S FAIR REPORT with LUWELL THOMAS".

Butter-smooth shooting

A helicopter's great for movie photography in and out of tight places, running shots and zoom-ups. But it's got an inherent jiggle that can ruin every scene.

We've licked the jiggle problem.

First, the cameraman himself is shock-mounted. He's cushioned by a foam-rubber seat (there goes *that* trade secret) that soaks up vibration.

Next, the camera path in flight is smoothed by gyroscopes, in the same way that a ship's compass is stabilized. Two Kenyon gyros smooth out motion in three planes.

And finally (here's the real secret), we use a specially modified camera. It's stripped of non-essentials, and suspended

in a vibration-killing mount. It literally *floats* through the air.

Results: a simple, easily-handled rig that gives extreme smoothness, even on difficult zoom-up shots. What's more, our cameraman can reload film in 5 seconds. Saves you expensive helicopter time.

Next time you want really exceptional aerial shots, give us a call.

Rucker Place, Alexandria, Va.

Receiving first print of "A Step Ahead" is Dr. A. Webster Tenney, National Advisor, Future Farmers of America. Flanking him (at right & left) after Washington premiere are Ed Boughton and "Woody" Siegel of Telic, Inc., representing the sponsor, New Holland Machine Company.

"A Step Ahead" for Youth in Agriculture A Useful New Holland Picture Shows Career Opportunities

WHILE THE NUMBER of actual practicing farmers in this country decreases each year as agricultural productivity rises, the number of people needed for jobs in the overall agricultural community has risen tremendously. Young people are finding good careers in such industries closely connected with agriculture as food processing, farm chemistry, agricultural research, veterinary work, live stock transportation, and in the very industry which has done so much to increase agricultural productivity — the farm machinery business.

A Public Service Contribution

As a public service project this year, New Holland Machine Company, the leading manufacturer of machinery for grass land farming, is now presenting a new film, *A Step Ahead*, to audiences throughout the United States and Canada.

Featuring Chet Huntley, the well-known TV newscaster, the film points out that boys and girls with farm backgrounds are truly "a step ahead" in securing good careers for themselves in the growing agri-business field. Huntley urges them to stay in the agricultural community, to talk with their local advisors — vo-ag in-

structors and high school principals — about the many good opportunities available.

Huntley was a good choice for narrator and "star" of the film. He was a farm boy himself in Montana, and is now a practical working farmer on his own place in New Jersey.

Premiered in Washington, D. C.

A Step Ahead was introduced at a major preview in Washington at the Executive House on January 30 before an audience of government officials concerned with farm problems and the growing need for people to fill jobs in agri-business.

Webster Tenney, National Advisor of the Future Farmers of America, called the film at that time, "the finest movie on the subject of opportunities in agriculture that has been made."

Co-Production by Telic, Inc.

A Step Ahead was made by Telic, Inc., a New York firm that specializes in co-producing films with industry, and a New Holland production team consisting of H. Joseph Hull, Jr., H. K. Luttringer, John D. Walp and L. Edward Peters. For Telic, Woody Siegel (CONTINUED ON FOLLOWING PAGE)

PARTHENON PICTURES

ANNOUNCING PARTHENON — REEL/3

A jointly-owned facility which gives Parthenon its own integrated animation staff and studio — and provides Reel/3 with live-action stages and production staff to back its animation.

Dick Spies, owner of Reel/3 and executive producer of the new studio, has conceived and directed recent animation for the Army-Navy Instrumentation Program (ANIP) via Douglas Aircraft; "Biax" for Ford Aeronautronic; Skybolt, Delta and Saturn contract reports; "Pert Cost System" for Management Systems Corporation, and classified work for Honeywell, North American Aviation, Marquardt, Lockheed, and others. His work is currently showing in Parthenon's new 8mm "Driver Education" classroom package.

Cap Palmer, creative consultant and business head, had five years of cartoon story work with Walt Disney ("The Lady and the Tramp," "Story of Menstruation," "How to Catch a Cold," etc.)

Tony Gorsline is writer-director on special projects and David Bowen handles liaison with Parthenon on combined live-and-animation projects.

THE SECOND MOST IMPORTANT TIME IN THE LIFE OF RENTAL EQUIPMENT

We all know the most important time—when the word is "Action!" and your motion picture equipment must perform flawlessly. There's a "Second most important time." And that, strangely enough, is when nobody is using the equipment.

This is the time — every time — between users, that every variety of CECO rental equipment is subjected to prescribed, rigorous inspection, of a unique kind that only the world's largest repair service department is equipped to provide . . .

In Depth Service that means equipment you can rely on wherever in the world your filming takes you. One of the reasons more professionals rent from CECO than all other sources combined. Rent with confidence . . . Rent from CECO.

Select from the largest variety of equipment available anywhere in the world . . . at the lowest possible cost.

(CONTINUED FROM PAGE 82) and Ed Boughton were producer-directors.

In addition to year-around public service programming to 16mm audiences and on television, *A Step Ahead* will be widely used in New Holland's winter sales program as a feature in the company's annual Father-Son Night events in thousands of communities. Throughout the year, 2500 New Holland dealers will distribute the

12½ minute color film, taking bookings for the several hundred prints now working hard to meet the heavy initial demand for the film.

600 Prints of Third Campbell Film Help Promote N. Y. Fair

Helping promote attendance at the New York World's Fair are nearly 600 prints of a third promotional film, *World's Fair Re-*

port with Lowell Thomas, now in active nationwide circulation.

All three of the World's Fair pictures were produced by John Campbell Films, Inc., official film consultant to the Fair authority. The figure includes all versions of the picture: a half-hour subject in both color and b/w, and a quarter hour version in color. Of these 600 prints, 400 are in distribution by Association Films.

The other 200 prints are being

shown by Fair exhibitors, transportation companies, travel agents and tour promoters. Association Films reports that virtually all their prints have been solidly booked in both the U.S. and Canada up to April 1, just short of the Fair's April 22nd official opening date.

Campbell Films' first two promotion pictures for the Fair were seen by an audience of 27 million persons from coast-to-coast.

Can you still have a
GOOD business film
produced for \$1000
per finished minute?

Yes!

Last year we produced films for J. P. Stevens Co., Inc. New York; Varicom, Inc., Boulder, Colorado; General Electric Company Computer Department; El Paso Natural Gas Products Company; Cibecue Water Resources Committee; New Mexico Rural Electrification Association; Farmers Investment Company, Tucson, Arizona; Central Arizona Project Association; Arizona Humane Society; Phoenix United Fund; Maricopa County, Arizona. None of these exceeded a cost of \$1000 per minute. Each was an outstanding production; each got the results it was designed to accomplish. ■ Since 1952, Canyon

Films has produced films for customers all over the country which have won 51 national and regional awards for 23 of our clients. ■ Our crews last year traveled over 75,000 miles throughout 32 states on location assignments. Our 60' x 100' sound stage in Phoenix is one of the most modern in the U.S. and can provide almost any type of interior set. Sunny Arizona offers 360 shooting days a year. ■ Clients apparently like our honest, intelligent approach to film production. We haven't had an unsatisfied customer in our 11 years. ■ Want to see how good a \$1000-a-minute film can be? Send for a sample print.

Television commercials — Industrial films
Training films — Sales films — Film strips

THE ARTS AND TECHNOLOGY of motion picture production are still young, in terms of "museum" archivists, and television's history covers only recent decades. But the records, memorabilia and artifacts of both fields of communication already have their place in such institutions as New York's Museum of Modern Art, the famed Eastman House in Rochester and the Library of Congress in Washington.

Joining these repositories within the coming year is the Los Angeles County's fine Hollywood Museum. Ground-breaking ceremonies last October on the four and one-half acre site on Highland Avenue, opposite the Hollywood Bowl, have been followed by the building of an \$8 million dollar complex, designed by William Pereira and his associates. Film producer Sol Lesser is president of the Hollywood Museum Committee.

All Phases of the Industry

While the Museum's "glamor" appeal will come from the entertainment aspects of Hollywood, the plan is all-inclusive and represents four phases of the industry: television, radio, motion pictures and recording. The architect's planning will show each of these fields separately; their origins, their history; their development and status. But, as architect Pereira says:

"It is clear that the four industries are so inter-related that we should demonstrate where they are related, where their origins are the same and how they have benefited from and inter-acted with each other.

"We therefore took broad themes which are common to the four media and have grouped the

One of the Museum's main exhibit areas where light and sound will carry the visitor into the past, show him the present of four related industries.

Composite aerial view shows how the Los Angeles County — Hollywood Museum will look when it is completed.

Hollywood's Fabulous Museum

Past, Present and Future of Communication Arts & Technology to be Housed in a Dramatic Showcase Now Under Construction

exhibits and displays under six general headings of *discovery, sound, moving image, the interpreters*, and consolidated all into exhibitions of *today and synthesis*.

"In the 'sound' category, the principal emphasis is on radio and records. In the 'moving image' it is on television and motion pictures. For the serious student and the professional the museum will undoubtedly become a mecca."

"Live Storage" in Libraries

Associated with each of the basic areas of the Museum is a "live storage" library where a serious student can come in and spend a day or even weeks studying all aspects of the art and science of the four media.

Professional advice, as to the basic requirements of school and

college groups visiting the Museum, has been provided by the Schools and Colleges Committee, which includes recognized experts in the field of instruction and audiovisual aids.

Counsel From These Leaders

Heading the Hollywood Museum's Non-Theatrical Division is Jack Copeland, producer and consultant long active in factual films. Among well-known names on this committee are such people as Mrs. Margaret Divizia, Administrator of Instructional Education and Services, Los Angeles City School District; John Flory, Advisor, Non-Theatrical Films, Eastman Kodak Company of Rochester, N. Y.; Charles Palmer, President, Parthenon Pictures, Hollywood; Sidney Solow, Vice-President and

General Manager, Consolidated Film Industries, Hollywood; and General Willard Webb, American Science Film Association, Washington, D. C., among others.

Also active on the Committee are Professor Richard Hawkins, Head of the Motion Picture Department, UCLA; and Dr. Bernard Kantor, Cinema Department, University of Southern California.

There is drama already in the imaginative sweep of the Museum's architectural plans and its exciting "open" concepts. Within the building itself, the first area will provide a "magic world of illusion" as process photography, controlled lighting and other tools and techniques of these arts are demonstrated, with a worldwide scope.

"Discovery" reveals essential relationships of the four inter-related industries noted. A ramp gallery, about 800 feet in length, will show in chronological order the history of the development of (CONTINUED ON PAGE 202)

Main theater in the Hollywood Museum where "classics" out of all phases of film/television production will be exhibited daily for the visitors.

8mm Film "Package" Aids Driver Education

American Oil Provides Kit of Short Films, Related Materials

THE FAST GROWING program of driver education in the nation's high schools is getting a boost from a major oil company in areas where help is needed most — the financing and the development of new training aids.

Support for driver education by the American Oil Company and its dealers is based on the development of eight new films for classroom showing, plus the necessary supporting materials for their more efficient use.

Produced by Parthenon Pictures

The films, produced by Parthenon Pictures of Hollywood with the cooperation and assistance of the National Commission on Safety Education, are currently being donated to high schools with driver education courses by American Oil Company dealers in the states of Illinois, Indiana, Michigan and Wisconsin. Later in the year, the company plans to expand the program throughout the country to high schools which have recognized driver education courses.

Along with the films goes a teacher's manual, also especially developed for use in the program; copies of a booklet, "Tips from Pro Drivers," published by the company in cooperation with the National Safety Council; and, for distribution to students who pass the course, an all weather bumper decal indicating that the student has been "Schooled in Safety."

• "The decal," said L. W. Moore, American Oil president, "will serve notice that the young person at the wheel is a knowledgeable and responsible driver and citizen, and we hope it will also serve as a constant reminder that automotive safety is a never-ending consideration."

Students who take the course also will receive a personal, congratulatory letter from Mr. Moore.

In addition, the American Oil Foundation has awarded a substantial grant to the NCSE, an agency of the National Education Association, to help the commission in its vital work in promoting safety in the nation's schools.

Coping With Highway Emergencies

The eight films around which the program is built cover many points in driver education that are difficult to illustrate in the classroom or on the road. They deal with such situations as how to cope with highway emergencies, the technique of driving on freeways, and such technical points as the action of the brakes and power train and the physical forces and laws involved in car operation.

The prints are all 8mm. width and each runs about five minutes. Production costs and costs for accompanying printed materials were borne by the oil company.

In endorsing and cooperating in the program the National Com-

mission on Safety Education noted that "there is a great need and constant demand for driver education services. . . This need is based on the demand by parents, by educators, and by lay leaders to provide adequate instruction in driver education for the youth of our country at or near the time they reach legal driving age."

Long Active in Youth Programs

The American Oil Company and the American Oil Foundation have long been active in support of youth and education programs through sponsorship of and donations to the 4-H Club Tractor Program, the Future Farmers of America, the National Merit Scholarship Foundation, as well as grants to many colleges and universities.

"We have also long been a staunch supporter of the cause of automotive safety," says President Moore, "and we enthusiastically welcome the opportunity to advance that cause among more than one million young people a year who enroll in driver education classes."

"The company likewise welcomes a program that gives its dealers an opportunity to participate in a worthwhile public service and to show themselves as public spirited citizens as well as business men," Moore said.

"If the program goes as well in the four-state area as we think it will, it will not be long before we begin expanding it into other areas," Moore added.

J. Walter Thompson, MPO Videotronics Announce Agreement on Minimum Volume Basis to Stabilize TV Spot Production

The J. Walter Thompson Company, said to be the country's largest purchaser of television advertising, and MPO Videotronics, Inc., the largest producer of TV commercials, announced an agreement last month to do "substantially more" business together during the next year. The aim is to stabilize production at MPO and could result in considerable savings for JWT clients.

The agreement consists of a letter of intent that JWT will buy a minimum of \$1,000,000 worth of TV spots in one year from MPO, although it is estimated that the total dollar volume may run as high as \$4,000,000. Last year, MPO did \$900,000 in spots for JWT, representing about 15 percent of the producer's total TV commercial business.

Cost Data to be Compared

In return for this agreement, MPO will cost out all JWT work in advance and compare this with JWT's own cost analysis before a firm price is settled. Furthermore, MPO has also agreed to refund any charges where actual costs are lower than estimated costs, based on a year's experience.

Those JWT clients who agree to participate in the plan will get a volume discount of about 10 per cent under normal mark-up. (This would be cost-plus-40-per-cent instead of cost-plus-50-per-cent, if standard industry mark-up procedures are used.)

Problem of Unabsorbed Time

MPO Vice-Presidents Arnold Kaiser and Marvin Rothenberg, who explained the agreement at a New York press conference last month, said that the major problems in the TV commercial production business today are "unabsorbed time and irresponsible cut-throat competition."

Legal holidays in the agency business, and the inevitable "days

next to holidays" amount to 17-18 days now, annually.

In addition, there are an average of eight days sick leave of key men, and three to four weeks vacations are becoming common. These lost days plus the inevitable lulls in the industry have meant that one third of available working time has been waste time.

Price-Cutting Helps Nobody

When slack periods (which have plagued the industry for years) arrive, some producers have desperately sought business at cost or below, just to pay the overhead. It is felt that this sort of desperation production does no one any good — client, agency, or producer.

Kaiser and Rothenberg pointed to MPO's rigidly audited annual report figures for 1962 — showing an \$8,200,000 volume and an approximate \$100,000 profit — as indication that no one was getting rich in this business. They said that many agency and film industry people believe that there are just too many under-capitalized, unstable TV commercial producers in New York at this time.

Agreement is Not Exclusive

The JWT-MPO agreement is not exclusive on either side. JWT will continue to use many other producers, and some JWT clients may not avail themselves of the new arrangement. MPO expects to do business with even more than the 65 agencies it served last year and expects to sign an agreement for volume discounts similar to the JWT agreement with Lenzen & Newell in the near future.

While cost-plus arrangements are not unusual in the TV commercial or industrial film business, the agreement to "guarantee" a certain amount of business is unique. There are indications, however, that such arrangements may grow in the future.

Some agency buyers have said

CREATE THE RIGHT MOOD EVERY TIME with the MAJOR BACKGROUND MUSIC LIBRARY

that they do not feel any obligation to try to support every new producer who happens to hang out his shingle. They would prefer fewer but more stable producers who can make a reasonable profit and concentrate more on quality and efficiency.

"Guarantee" arrangements have been practically unknown in the industrial film field. However, one major film sponsor recently went through a process of selecting five producers with the intention of concentrating all future work with this chosen few. But there is no minimum guarantee involved and the agreements are entirely informal, it is reported.

Bob Shoemaker Heads Midwest Sales for LaBelle Industries

Expanding its midwest audio-visual sales operation, LaBelle Industries has appointed Robert L. Shoemaker as Midwest Sales Representative for its Audio-Visual Products. Mr. Shoemaker's appointment was announced by Robert Anderson, President of LaBelle.

Midwest Area offices have been opened at 161 Michigan Avenue in Chicago to handle sales in Illinois, Indiana, Michigan and Ohio. Mr. Shoemaker was formerly a division manager for Charles Beseler Company and for the DuKane Corporation.

His career in audio-visuals began 25 years ago when, as a distributor for Servel, Inc., he sold refrigerators with a sound slide-film produced by E. J. Barnes. He is a former NAVA official, one of the founders of the National Institute for Audio-Visual Selling and a member of the Executive Audio-Visual Committee of the National Council of Churches.

Five New Pictures to Join Bureau of Mines Film Library

Two new productions, *The World of Phosphorus* and *A Stretch of Imagination — the Synthetic Duplication of Natural Rubber*, were completed and added to the U. S. Bureau of Mines' film program during the past year.

A new film, *Cast Iron — the Biography of a Metal*, is expected to be available for distribution early this year. Four other motion pictures, in various stages of production, will deal with potash, helium, bituminous coal and the natural resources of the State of Washington. The latter subject is a wholly-new version of one of 1963's "top ten" films in the Bureau's film library.

AUTOCRAT??

Doesn't look much like an autocrat, does it? Looks just like the same old film you deal with everyday. Well, film it is, but it's also the beginning of all the headaches encountered in film production . . . difficult schedules . . . delicate color values . . . need of creative imagination . . . and a lot of other things. Yes, it is an autocrat indeed. It rules with unlimited authority. At Jamieson, 48 years of experience (since 1916, to be exact) have taught us to handle expertly and smoothly all facets of this fellow.

We produce pictures on this old autocrat, all

sizes of it. Prize winners! We process the pictures we produce, or we'll process the pictures you produce. Motion pictures in color or black and white . . . Television . . . Filmstrips . . . Animation . . . Everything.

With us it's easy. We make lambs out of lions, kittens out of tigers and sometimes even bring a little order out of chaos. We use the same film as everybody else, but we handle it differently.

Find out. Try Jamieson for your next job on film. We're Autocrat alterators!

DISTRICT HEIGHTS, MARYLAND

Wilmette, Illinois, Rotary Club members applaud a TWA Captain following his recent luncheon presentation of "This Is Your Captain Speaking."

TWA Program Scores With Business Groups

"This Is Your Captain Speaking" Wins Friends & Travelers

PROOF OF THE PUDDING, in audio-visuals as in desserts, is in how the "company" likes it. In this case, the "company" are the thousands of U. S. businessmen and community leaders throughout the U.S. who have been hearing the dozen Captains of Trans World Airlines as they presented that airline's visualized presentation, *This Is Your Captain Speaking*.

Described in **BUSINESS SCREEN** soon after its production by The Jam Handy Organization last year, the TWA program has now been on the road since its initial presentation last September. It is described as an "overwhelming success" by J. E. Frankum, vice-president-Transportation Division and by Thomas B. McFadden, TWA's vice-president for Marketing.

A 30-Minute Presentation

The JHO-prepared program runs approximately 30 minutes. It's a two-man operation with a member of the company's marketing staff accompanying the pilot Captain, assisting with the operation of the projectors and avail-

able to answer sales questions during the closing discussion period.

TWA reports that audience reaction has been "unanimously enthusiastic." Of particular interest are film sequences of flight crew training and the maintenance care given airplanes.

34 Meetings for One Pilot!

During the first four months of the program, a Chicago-based Captain, Ford Blaney, made 34 presentations. At one he had an audience of more than 600. A Chicago woman told Captain Jack Robertson, chief pilot at O'Hare for TWA, that before his presentation she had been afraid to fly but felt completely assured after hearing his talk and seeing the visuals.

Captain Robertson also reported that many listeners later inquired about the availability of the program for other groups with whom they were affiliated. So enthusiastic were members of the Louisville, Ky. Aero Club that they kept Captain Tom Graybill answering questions for an hour and 30 minutes after he had concluded his formal presentation.

Best Kind of Public Relations

"It's the best advertising and public relations I've seen a large corporation come up with in a long time," commented an aerospace management club official in Los Angeles. During the first month of the program, Los Angeles-based Captains Bill Wintersteen and Ken Woolsey made 17 presentations before an estimated 1,500 persons.

"Judging from audience reaction," said Captain Woolsey, "it seems that this program is creating (CONCLUDED ON PAGE 92)

Puerto Rico Nuclear Film Shows Hemisphere Program

☆ Training and research activities of the Puerto Rico Nuclear Center, where programs are specifically designed for participants throughout the hemisphere, are depicted in the latest U. S. Atomic Energy Commission's motion picture, *Atoms for the Americas*.

The Nuclear Center, with branches at Rio Piedras (San Juan) and at Mayaguez, conducts its work in both Spanish and English. Much of the research concerns problems of special interest to the tropics, taking advantage of the island's climate. It is operated for the Commission by the University of Puerto Rico.

The new 28-minute color documentary was produced for the Commission by Sam Orleans Productions, Inc., of Knoxville, Tennessee and is being made available in three versions: Spanish, Portuguese and English. Prints may be purchased from Byron, Inc., 1226 Wisconsin Avenue, N.W., Washington 7, D.C.

This summary of nuclear programs shows participants at work in many of the special laboratories, using the two nuclear reactors, a reactor stimulator, a graphite-natural uranium subcritical assembly, an 8,000-curie cobalt-60 teletherapy unit and many other highly-specialized devices.

At Mayaguez, the Nuclear Center offers programs at the masters of science level in nuclear science and technology, health physics, chemistry, agriculture and biology. At Rio Piedras, the programs include radioisotope applications, clinical applications of radioisotopes, radiotherapy and cancer training, radiobiology, chemistry, and physics.

The Center also has a new program in marine biology, using a specially-equipped ship, and an ecology program conducted in Puerto Rico's tropical rain forest.

TWA Captains Speak:

(CONTINUED FROM PAGE 90)
many new friends for TWA wherever it is shown.

Suburban presentations seem to bring out residents from surrounding communities. As an example, eight northwest suburban Chicago communities were represented in the large audience which heard Captain Blaney speak to a sportsman's club in Palatine, Ill.

The Captain making the presentation operates the slide projector but the sales representative is needed to help operate the 16-mm sound projector which is a key part of the combined presentation. Film sequences are segmented into the program at several intervals.

Parthenon Acquires Animation Facility, Combines With Reel/3

☆ Two Hollywood-based production companies, Parthenon Pictures and Reel/3, have merged their interests in a new jointly-owned, entity carrying the two names. Within the new combine, Parthenon-Reel/3, each company will maintain its own identity with Parthenon acquiring its own integrated animation facility while Reel/3 secures a "tied source of stage and documentary creative and production work."

Collaborative relationship between Richard Earle Spies, executive producer of the new company and Parthenon's Charles (Cap) Palmer, who will function as creative consultant and business head, dates back a decade and is currently showing in Parthenon's new 8mm *Driver Education* classroom film package for American Oil Company.

David Bowen, Parthenon writer-producer with substantial technical experience with animation, particularly on electronics and scientific subjects, will provide liaison between the two studios and staffs. Joint effort is presently active in the field of economics, safety and single-concept films for educational television use.

Sensorama Simulator Creates Environment for the Viewer

Sensorama, Inc., a New York research and development film company, has announced a new cinema invention, the Sensorama Simulator, which is said to create for its user the illusion of being "physically present in a different environment."

Morton L. Heilig, President of Sensorama, Inc. and inventor of

Enthusiastic guest thanks Captain Robertson, a common sight following well-received TWA programs.

the machine, said the product accomplishes this through a technique that combines peripheral vision, color, binaural sound, breezes, odors and tactile sensations with three-dimensional imagery without the need of special glasses to achieve this effect.

As further described by Mr. Heilig, the device, which is covered by two U.S. patents, is in effect a portable theatre that can be installed anywhere and can function without interrupting the normal routine of business in which it is placed.

The Sensorama Simulator is intended to be commercially employed as a coin-operated entertainment device and as an audio-visual advertising and selling aid for industry. It may further be utilized as a teaching machine.

John B. Miller, Sensorama's Executive Vice President, has advised that the company has completed a production prototype of the Sensorama Simulator and that industry and education people will be invited to private demonstrations of the system in the near future.

Address of the company is 1 Washington Square Village, New York 10012.

Which Sensorama stimulates most?

Air France Sound Slidefilm Shows Employee PR Role

Spotlighting the individual employee's contribution to his company's overall public relations program is the mission assigned to a new 17-minute "no frills" sound slidefilm just released by Air France.

Designed for use throughout the French airline's North, Central American and Caribbean Divisions, *Air France Public Relations Is You* is introduced by Henri G. Marescot, General Manager of Air France in North America. The public relations principles and practices set out in the slidefilm, although geared to the airline industry, are *basic* and applicable to all organizations concerned with building and maintaining good relations with the press, radio and television.

Approach and content strongly endorse the view that pr. is a necessary part of every employee's job. The presentation also describes how company activities and services are communicated to the public in a broad program of information.

Among specific topics covered: placement of authority and responsibility for issuing news to the press; potential audiences, or clients, and the methods used to reach them; and the preparation and delivery of news releases. The value of the news photo and of audio-visuals (including travel films) are presented.

Complete text has been reprinted in booklet form and illustrated with line drawings from the slidefilm; copies are given each Air France employee at time of viewing.

Air France is making copies of both slidefilm and script available at cost to business firms at \$10 the set. Kit, designed for use with an automatic slidefilm projector, contains the filmstrip, recording and take-home booklet. Orders with checks should be addressed to Air France, Dept. DX, 683 Fifth Avenue, New York, N.Y. 10022. □

Extra Copies of Review Annual for Reference Use

While the supply lasts, extra copies of this 218-page Annual are available at \$2; postpaid if check accompanies your order to Chicago. □

THE REVOLUTIONARY NEW COURIER

takes your sales story anywhere—with battery-powered convenience

- * Introducing the first major break-through in AV sales tools in 30 years... the LaBelle COURIER * Now you can tell your story anywhere because the COURIER requires NO PLUGS, NO CORDS, NO OUTLETS * Simply turn a button for instant showing of your synchronized sight and sound sales story
- * Battery-powered, lightweight, the COURIER is truly portable

THINK OF IT! No desks to move to reach electrical outlets, no need for long extension cords, no setting-up of screens or speakers. There is nothing to interfere with your presentation. Just make your introduction, turn a button, and the COURIER goes to work instantly. Program stops automatically and is ready to repeat. Battery-pak delivers more than 10 average showings per day. Re-charge at night or operate directly on AC current. "Snap-In/Snap-Out" loading of tape cartridge and film magazine

(35mm, single-frame) for easiest program change. And the COURIER weighs only 15 pounds! Discover for yourself how the COURIER helps make the most efficient and effective use of selling time.

NEW YORK'S WORLD FAIR awaits the opening day signal which, on April 22, will be given by President Johnson when he formally opens this billion-dollar extravaganza on Flushing Meadows. More than 500,000 visitors are expected on that occasion, the vanguard of an estimated 70 to 80 million customers who will see the "show of shows" during 1964 and the year after.

But to those who are meeting urgent deadlines for the completion of all shapes and sizes of sight sound presentation, it's an exciting prospect! Films will go wide . . . wide . . . wide and all-around! 70mm release formats include films of Eastman Kodak, Eastern Chemical Products, Billy Graham, DuPont and Cinerama-Graphic Films, Inc. The Port of New York-New Jersey will encircle viewers of its Niles-made film; Harry Coleman is bringing the wonders of New York State into hemispheric form with stereo sound . . .

More Pictures Worth Seeing

Abbott Labs will duplicate its "Chemical Man" show we told you about in a recent issue (the original is at Chicago's Museum of Science and Industry) and Les Novros (Graphic Films) will have at least three other examples of his creative talent on display. The Gas Industry is also going multi-screen with stereophonic sound telling the *Tale of Truthful George*, as created by Owen Murphy Productions, Inc.

DuPont's *The Wonderful World of Chemistry*, produced by Michael Brown Enterprises of New York, uses a 70mm color film on mobile motion picture screen panels working concurrently with and synchronized to "on-stage" live action. Film Effects of Hollywood, hard at work on the intricate effects required for this picture (and four others at the Fair), reveals some of the detail "behind the screen" so to speak:

The Best in Film Effects

"The intricate film formats are being composited by using a series of complicated optical printing techniques to obtain the required type of 70mm projection prints from the original film which was photographed on both 35mm and 65mm."

Incidentally, for both of the Eastman films previously noted (production by Saul Bass), Film Effects handled complex optical printing work which included the use of travelling mattes, multiple split screens, super-imposition of

NEW YORK WORLD'S FAIR REPORT

Showcase of Audiovisual Innovation Awaits April 22 Opening

"Top-Off" model of General Electric's Progressland pavilion shows the third floor area of the building. Audiences will arrive there following the "Carousel of Progress" presentation via moving ramp "Time Tube."

image panels, enlargements of smaller film formats and special anamorphic conversions. Nothing comes easy in *that* business, as Lin Dunn will heartily agree!

Preview of General Electric's Progressland Show at the Fair

☆ For a preview of another Fair attraction, until these pages bring you our "official" Special Report with pictures and text from on-the-scene soon after opening day, how about a look at General Electric's "Progressland" where visit-

ors will hear the story of electricity's role in the betterment of human living conditions, past, present and future?

The Progressland show is climaxed by an actual demonstration of thermo-nuclear fusion (*that* item better not get out of hand!), the first ever to be witnessed by a general public audience. GE's dome-shaped, three-story pavilion features a six-stage auditorium where audiences move from stage to stage without leaving their seats.

Within its 80-foot high, 200-

Another view of the six-stage General Electric pavilion at the Fair in which audiences move from stage to stage without leaving their seats. Auditorium will accommodate six separate audiences at a time; stages are stationary, form a core around which seated audiences revolve.

foot diameter dome, audiences will watch a projected, narrated demonstration of nature's energy forces on what is believed to be the largest projection screen ever built. Theme of Progressland will be "Peace Through Understanding—Progress Through Electric Power." In the first attraction, a "Carousel of Progress" will dramatize the contribution of electricity to better living, from the Gay Nineties to the present.

Disney's Life-Like Figures

The opening story will be uniquely told by electronically-controlled, animated figures created by Walt Disney (who conceived and designed the whole show with his WED Enterprises associates).

A Great Laboratory for Professionals in Communication Will Also Bring Exciting Adventures in Sight/Sound to the Public!

These "audio-animatronic" figures are expected to be one of the highlights of the Fair.

A Time Tube equipped with a moving ramp will take visitors from the Carousel of Progress to the third floor, where they will pass through a Corridor of Mirrors illustrating advanced work in General Electric laboratories. They will enter a huge observation area directly beneath the giant dome, 200 feet diameter.

Completely free of obstructing pillars, the dome is expected to constitute the most unusual pro-

jection facility ever devised. A lightning storm and the flames on the surface of the sun are among the awesome forces to be represented in the sights and sounds projected across the vast interior of the dome.

Spectacular visual and sound effects will demonstrate thermonuclear fusion as the climax of the pavilion's show. They will be witnessed in an 80-foot deep centerwell, as visitors descend from the third to the first floor by an open ramp which spirals down the center core of the pavilion.

A Place to See Latest and Best

→ Professionals and potential users alike of sight/sound for communications of all types can look forward to a vast laboratory of the arts and science of this "recreation" of both living and static subjects at the New York Fair-

the news in perspective

SHARING OUR OWN Silver Anniversary year are some notable companies and one widely-used "tool" of the industry. And just ahead, in April, commercial television observes its 25th anniversary!

The birthday observance which wins international honors is that of F. R. "Budge" Crawley and his lovely lady, Judy, who began the work of Canada's great production company which carries their name just 25 short years ago. The tributes paid them in a collection of 25 letters, included these words from Canada's Prime Minister, Lester Pearson:

"... I salute you and your colleagues on a quarter-century of distinguished accomplishment in the making of motion pictures. The proud place which you have won for your organization and for Canada in the world of sponsored film production is, I know, a direct consequence of the foresight, determination and high creative standards that have guided your efforts..."

And a "happy birthday" too, to our contemporary, the Arriflex-35, which began serving film producers those many years ago, thanks to the design craftsmanship of those whom we further salute in later pages.

American Medical Association Library

Reports 16.5% Increase in Film Bookings

Speaking of medicine, film bookings by the American Medical Association, serving that profession through its Chicago-based film library, have shown a gain of 16.8% for 1963. This marks the 11th consecutive year in which the association has reported increased use of its 400 titles. A total of 9,979 bookings in 1963 were made; an increase of 1,435 over the previous year.

The greatest increase was to nursing schools (up 61.7%); the second largest gain was among para-medical schools, which include pharmacy, dentistry, medical technologists, etc. Here the booking increase was 30.1%. AMA Director of Medical Motion Pictures and Television, Ralph Creer, reports that the library now contains 1,300 prints of 400 titles.

Ford Historical Film Collection, Fund for Cataloging, Given to U. S. Archives

One of the most valuable collections of documentary film footage in America was recently presented by the Ford Motor Company to the nation. Before an audience of Washington dignitaries in the simple, staid

auditorium of the National Archives, William Clay Ford handed over 340 miles of motion picture film to the United States Government. Accompanying the unique gift was a check for \$200,000 to be used for cataloging this Ford Historical Film Collection.

A special 36-minute film which depicted a broad slice of American life in the years from

Ford cameramen of a half-century ago were subjects in this scene from the Historical Film Collection.

1914 to 1946 was created for the occasion by the Ford and Archives film staffs. There was unanimous agreement that these film frames, which chronicle the "American way of life" should be seen in theaters throughout the country.

Explaining that his grandfather, the late Henry Ford, was something of a pioneer in recognizing the film for its educational purposes, Mr. Ford said, "this is essentially his gift to the people of the United States."

Accepting the Collection for the Archives were U. S. Archivist, Dr. Wayne C. Grover,

and Bernard L. Boutin, Administrator of General Services.

Governor, State Leaders Attend a Trenton Premiere of "The Land Called New Jersey"

And, rounding the "cycle" of history, a timely new motion picture is helping to celebrate the State of New Jersey's Tercentenary Year in 1964. Viewing the first print of a truly historical view of that region, told in *The Land Called New Jersey* by producer John Bransby and sponsor, the Humble Oil & Refining Company, state dignitaries gathered at the Trenton Country Club on January 8th for a premiere.

Guests at the showing were Governor Richard J. Hughes, members of his cabinet and of the State Senate and Assembly as well as members of the New Jersey Tercentenary Commission. Frank Arlinghaus, President of Modern Talking Picture Service, Inc., the film's distributing company, was another guest. Sponsor luminaries included Robert O. Goodykoontz, Vice-President of Humble; and Dr. Charles F. Jones, President of Esso Research and Engineering Company. The story of the Humble film library and its wide audience will be featured in our next issue.

Names in the News at Presstime

Script writer Oveste Granducci is on a well-varied film diet: pictures in work (or recently-completed) cover such subjects as the New York World's Fair, athletic recruiting and nutrition. Those Virgin Islands' palm trees under which he pounds his typewriter were really waving in the breeze!

Charles Lipow has joined Birns & Sawyer Cine Equipment Company (of Hollywood) as assistant to president Jack Birns.

✻

Helping observe that state's Tercentenary Year is a new Humble Oil motion picture, "The Land Called New Jersey." Pictured at the recent premiere in Trenton were (left to right): Governor Richard J. Hughes; Robert O. Goodykoontz, Vice-President, Humble Oil & Refining Company, and Frank Arlinghaus, President, Modern Talking Picture Service, the film's national distributors.

"I weep for Adonais — he is dead.
 Oh weep for Adonais! though our tears
 Thaw not the frost which binds so dear a head!
 And thou, sad hour, selected from all years
 To mourn our loss rouse thy obscure compeers,
 And teach them thine own sorrow! Say with me
 Died Adonais; till the future dares
 Forget the past, his fate and fame shall be
 An echo and a light unto eternity."

Shelly, on the Death of Keats

Sketch by Jack Gregory of Philadelphia.

IN MEMORIAM

John Fitzgerald Kennedy

by Lee R. Bobker

IN 1960, THE AMERICAN PEOPLE tentatively — and with notable lack of any ground swell — elected to the Office of President an energetic, intelligent young man from New England and he, in turn, accepted the burden of our times.

From the moment of his assumption of office, something very significant happened to this land of ours. Standing in the raw January cold, at his Inaugural Address, his words invoked that "mystic chord of memory that stretched from every patriot grave to every heart and hearthstone." Whatever the individual assessment was of this man at that moment, it is a matter of fact that the country stirred from nostalgia and apathy and began to think.

If his commitments seemed more intellectual than emotional, it is also true that somehow or other they reached us — all of us — from New York to Peoria — from San Francisco to Atlanta. The past was put away and the future didn't seem quite so frightening. If he was young — he made each of us feel younger. If, as Lyndon Johnson says, politics is the art of the possible, John F. Kennedy made everything seem possible. If solutions still seemed difficult, there was an undercurrent of confidence that problems could be solved — and his impact on this country, indeed on the entire world, was significant.

A threatening recession, predicted by all the major economists, was met and passed. Our relations with foreign countries changed in mood and atmosphere — and suddenly the prospect of peace seemed just a little nearer.

There are those who state, with some justification, that at times his words out-performed his actions. And there are those who feel that "it is pointless to eulogize on the basis of only three years of office, when the hard materials of achievement seem somewhat nebulous when analysed on a piece of paper." With acceptance that argument can be made in this direction, it still seems to me that this approach to John F. Kennedy is specious and misses the essential point of what he was in historical perspective for this nation.

For America, in the seventh decade of the

Twentieth Century, John F. Kennedy pointed a way and by the fact of his being and his bearing, he supplied the drive for all of us to "begin again."

If there is one quality above all else that separates this nation from other great land of history and many other notable experiment in government, it lies in the fact that we believe in the possibility of a good world and a good life for everyone. Jefferson believed it. Lincoln — and both Roosevelts did — and so did John F. Kennedy. And everything he did and said, in everything he was committed to, he reminded us again of the possibilities that lie ahead for the nation and its people.

He is dead — "*nor all our piety nor wit, can lure it back to cancel half a line — nor all our tears wash out a word of it.*"

In our desire to continue — in our emphasis on the necessity of a nation to go on — in all the words which have been written to exhort us to look to the future, let us remember him — because he was, in his being, a living tribute to the nation that produced him. His mind, his vision, his deep intuitive understanding of the vitality of the American dream, his commitment to the ultimate and meaningful quality of all people everywhere, and his belief in the possibility of a world at peace — made John F. Kennedy unique in our time and places him, significantly, among the greater assets of the great experiment which began in 1776.

It has been said in many languages and in many ways that the times demand greatness. For a very brief period of time, John F. Kennedy provided this country with great leadership. In life, he excited us and spurred us forward. For those of us who work in the creative arts, in which great works became more possible, our memory of the living John F. Kennedy must make each of us want to be just a little more than we are. What we hold in our minds of this man, however, must make us work a little harder to transform this time, this place, into what he knew it could be.

Lee Bobker, who wrote this eulogy to the late President, heads the distinguished group of filmmakers at Vision Associates, Inc.

The Production Review "Man of the Year"

Mervin W. LaRue, Sr., a Pioneer in Medical Film Production

With HONOR, as our "man of the year" in this Annual Production Review, one of audiovisual communications' most dedicated servants of the medical profession and of medical teaching. Mervin W. LaRue, Sr., merits this distinction as a highly-specialized producer in this chosen field for the past 27 years. A Pioneer, so honored by the Society of Motion Picture and Television Engineers when he completed 30 years of service in 1954, he served (for two terms) as President of the Biological Photographic Association.

In 1956, that group bestowed on him its highest honor: the Louis Schmidt Award and he carries their highest professional distinction as a Fellow of the BPA. But the honor greater than these and far less publicized is the debt of gratitude owed this man by thousands of medical students, technicians and doctors for the ceaseless development of new medical photographic techniques on which he has labored in his studio and shop.

Newsreel to Operating Room

In his 70's, "Merv" LaRue can look back upon a career which dates back to those early days in Manhattan when he joined Underwood & Underwood as an assistant, later becoming a still photographer in 1912-1915. He became a motion picture cameraman for Pathe News, covering roving assignments in the U. S. and Canada in 1916-1917. During World War I, he instructed in aerial photography at one of the Army's flight training centers, returning to Pathe for such assignments as the Prince of Wales' visit to Canada.

His first interest in medical films began when Doctors Banting and Best were perfecting their discovery of insulin. After lensing animals used in their laboratory studies (and newsreel coverage when the success of the experiments was announced), he was invited to film surgery at Toronto General Hospital.

That experience stayed with him. An interlude of some years with Bell & Howell (setting up processing equipment in laboratories across the country) allowed him to work on several films, including the first medical sound film of its day (the story of insulin and its use, sponsored by Eli Lilly). Later, at Burton Holmes

Films in Chicago, he continued his work in medicine.

The realization that 16mm had now opened new horizons for this specialized field, plus the rapid development of early color films of significance in medicine and surgery, led him to the formation of his own company in 1936.

An Innovator of New Tools

Today, Mervin W. LaRue, Inc., is the "always available" consult-

Honored as "Man of the Year"

ant to the medical profession, an innovator of new tools for better medical film production, a source of this specialized equipment for institutions and medical film people and the creator of complete, often-honored, medical motion pictures. 16 of the films he has produced (three were written by him also) have received a total of 26 awards. Among these: *Fire & Explosion Hazards from Flammable Anesthetics*, which was honored by the American College of Surgeons (citation); shown at the Venice and Padua Film Festivals and cited by the Biological Photographic Association.

A Heritage and a Credo

This constant innovator in a field of vital importance to all mankind is in his later years. The tools he has created and his library of medical footage offer an opportunity to one of this country's great medical institutions or to another, younger innovator-to-come like himself. Let us hope that wherever this heritage goes, it will carry with it, "Merv" LaRue's philosophy:

"If I give prompt advice and service, wherever there is a need for it, the business will take care of itself." He is an example to all of us — this man-of-the-year. □

we pause to honor

— some noteworthy individuals and film programs for their contributions to the progress of the field in 1963:

These Individuals, for Industry Leadership

William J. Connelly, President, Industrial Audio-Visual Association

Ralph Creer, Director of Medical Motion Pictures and Television for the American Medical Association.

John Flory, Past-President and Willis Pratt, President The Council on International Nontheatrical Events

Jack R. Goetz, President, Industry Film Producers Association.

Jamison Handy, for his pioneering efforts in so many phases of communications for education and industry.

Saul Jeffee, President, Association of Cinema Laboratories

Peter J. Mooney, Past-President, Film Producers Association of N. Y.

Reid H. Ray, President of the Society of Motion Picture and Television Engineers

Byron Roudabush, and his Committee, for their contribution of a "Handbook of Recommended Standards and Procedures for Motion Picture Laboratory Services" for the ACL.

* * *

These Film Programs and Audio-Visual Facilities for the Advancement of Communication

The American & National Leagues of Professional Baseball, on behalf of millions who share those annual "World's Series" films.

The Bell System: for the Business Communication Seminar, as initiated in Chicago, a pace-setting example of integrated use of audio and visual tools and techniques for idea communication.

The Ford Motor Company: for the contribution to the U. S. National Archives of the unparalleled Ford Historical Film Collection.

The National Committee on Films for Safety: for its example of constructive leadership in film selection, set through the years in the well-organized National Safety Film Awards program.

Pan-American Airways: for the high standards of its films in both internal training programs and for travel promotion to the public.

The Peace Corps: for showing America the meaning of hard-won goodwill through unselfish sharing of the minds and hands of its Volunteers and for the "film of the year" as reported to the American people in the motion picture — "Mission of Discovery."

The Science Film Program of the Bell System for bringing the youth of America an inspiring view of the horizons of science.

MISSION OF DISCOVERY

A Documentary Film Report to the American People
Shows Peace Corps Volunteers at Work in the Field

THE PEACE CORPS had some 6,668 of its 7,300 Volunteers in service abroad in the early months of 1964. These men and women from all sections of the United States have earned the commendation of the Congress and of the heads of state in nearly every African, Asian and Latin-American country where they are sharing their minds and hands, "investing a part of their lives" in a mission of discovery. Hundreds of these Volunteers are now returning home after completing their two years of service.

The 26½-minute black and white sound motion picture which shares some of the experiences and problems of the Corps and the world in which it is working carries that appropriate title: *A Mission of Discovery*. It is an utterly factual film, as free of illusion and fanfare as are the labors of the Corpsmen and women. Primarily, it is a documentary of devotion to the premise that the "passion of men and nations for freedom and justice . . . for an end to poverty and a share of the good life, shall be realized."

Scenes From Many Countries

Lloyd Wright of the Peace Corps wrote the tight script which binds the multitude of stills and the motion picture footage brought together from Peru and Togo, Nepal and West Pakistan, Turkey, Tunisia and Tanganyika and the

myriad of other faraway places where the Corps has gone. There are no suspenseful scenes, no "romance" and no glamor; but the challenging words of Oliver Wendell Holmes shine through:

"In order that I respect a man, I require that in some way he have participated in the passions of his times."

Wilding, Inc. was privileged to assemble these scenes into the memorable documentary film that has emerged under the skillful hands of director Gus Eisenman. Early prints were in so great demand that additional hundreds had to be acquired to satisfy requests from nationwide audiences to Modern Talking Picture Service, Inc. and to Peace Corps' headquarters in Washington.

"The Thin Edge of Survival"

In their *Mission of Discovery*, Volunteers are finding "a world rich in culture . . . diverse in problems, customs, traditions and values. And a world living on the thin edge of survival where 85% of its peoples earn less than \$450 a year."

As they serve in teaching, medicine, community development and farm improvement assignments, the Volunteers are living with the people, working alongside them, eating the same food, doing the same jobs . . . experiencing their frustrations. "They know," the film track reports, "they will

Barbara Wylie is an English teacher in Katmandu, Nepal. She has started a special school for underprivileged children in her neighborhood.

not change the world drastically. But they also know they will not leave it the same."

A Medical Team in Togo . . .

• The scenes which illustrate this review of *A Mission of Discovery* relate a small part of a worldwide story. The Peace Corps' medical team at a clinic in Sokode, Togo, West Africa includes among its registered nurses, licensed practical nurses and medical technologists, doctors like Nick Cunningham. Age, 35, Hometown, Springfield Centre, New York. The team daily confronts diseases long conquered in the U. S. Malaria, bilharzia, hookworm and leprosy,

diseases vaguely remembered in America, take their toll of human life and human energy.

Results for teachers, the film shows, are far less obvious than building a bridge or a road. But the rewards are great, too. Wrote one Volunteer: "our reward comes from the satisfaction of seeing a child's face light up when he has learned something new."

Food for a Hungry World

With half the world going to bed hungry every night, the work of Peace Corps Volunteers with experience in agriculture and home economics is of vital importance. They are helping teach better

farming methods . . . developing irrigation systems and working with women in food preservation and nutrition programs. Some of these Volunteers are graduates of

agricultural colleges. Others have little or no college experience . . . but grew up on American farms and through practical experience (CONTINUED ON PAGE 195)

On the job in Tanganyika, this Peace Corps Volunteer is one of many with experience in agriculture, helping teach better farming methods.

In some African villages, 55 out of 100 children do not survive their first year of life. Diseases vaguely remembered in America take many.

"This is Man the Manager. He administrates the future . . . forecasting . . . predicting . . . drawing pictures of things that haven't happened; confident that he can make them come to pass." Production was by Henry Strauss & Co.

"Man the Manager" Reflects on His Role

Pan Am Internal Film Uses "Magic Mirror" to Give Perspective

IN TIMES OF RAPID CHANGE it often becomes necessary to stop for a moment the treadmill of daily affairs . . . look back at achievements consolidated . . . and listen to the calm voice of analytical reason. For men holding important managerial responsibilities, this pause in the day's occupations becomes even more essential when (as is the case with a great international airline) both technology and concepts of operation are in a state of rapidly accelerating development.

Man The Manager . . . a new

motion picture produced for Pan American by Henry Strauss & Co., Inc. in collaboration with the Airline's System Sales and Service Training Department . . . is, in effect, a sort of "magic mirror" wherein Managers can see both the profession and its problems in perspective.

Since it deals with basic principles of management: as both art and science, the film makes use of animated rather than live techniques. This provides two key advantages.

First of all, it permits the ex-

"Early in the game he developed the habit of thinking big. This was perhaps the first strategy meeting in history. The leader defined the objective . . . indicated an approach."

"To his battles he brought his knowledge of organization, delegation of command . . . a plan of action with a predetermined objective."

"Plans clearly defined . . . organization set up to carry them out. Only minor difficulties remained . . ."
MAN #1: "I say these rocks ain't big enough."
MAN #2: "I say they are . . ."

"Out of present facts, a picture of future possibilities. He estimates, predicts, translates, directs and sets in motion all the forces which he commands."

position of serious concepts in a way that eliminates ponderousness while retaining (and even sharpening) the clarity needed for defining complex ideas.

Secondly, by removing problems of management from the pressure of day-to-day preoccupations, it stimulates the audience

to fresh, thoughtful and unhurried consideration. How *Man the Manager* actually accomplishes this is suggested by the accompanying illustrations and narrative excerpts from the film on this page.

The film was produced for *internal use only*. It is *not* available outside the Pan Am organization.

A Fresh, New Look at the "Woman's Day"

New Visual Concepts and Adaptability of Its Presentation
Win Buyer Plaudits for Fawcett Publishing Company's Show

A SPACE SALES presentation which recently made the rounds of advertising buyers across the country has aroused considerable enthusiasm for its startling new visual concepts and its adaptability to all sorts of presentation room conditions.

WOMAN'S DAY, explaining its credo "Where Service Is An Exciting Theme," put on the presentation daily in New York and Chicago — for ten weeks at the Waldorf Astoria Hotel, and for three weeks in the Consulate Room of the Continental Hotel in Chicago — while another unit was traveled from city to city for one night stands over a one-month period.

Produced by Visualscope, Inc.

The presentation was designed and produced by Visualscope, Inc. Its physical components included a portable screen, 4½-feet high and 12-feet wide, set in wings, a big Powerhouse crawl projector, tape recorder, and Mobilcolor lighting equipment. The unusual and unique part of the performance was an image of a recent Woman's Day cover which appeared on the screen at the end of the show, and which seemed to be so extraordinarily lifelike that audiences gasped in astonishment. This was achieved with a three-foot by four and one-half-foot transparency, bound in Plexiglas, which was hoisted into position just back of the center of the screen and focused on it by a clear light from a projector, while Mobilcolor lights were played on the screen in synchronism with music on the tape recorder.

Geared to Each of the Salesmen

The WOMAN'S DAY presentation was planned by Fawcett Publishing Company's Advertising Director, Mortimer Berkowitz, with the idea of *not* having a completely "canned" show, but one which would supply an ideal supporting background to the individual presentations of each of the magazine's 23 space salesmen. Each salesman

gave his own pitch on his own day to his own individual client groups, and, working with a push button on the lecturn, timed the show — slides, crawl sequences, taped-sound interludes, etc. — to his own pace. The speakers knew that they controlled the whole show and need not worry about backstage activities.

The presentation story, written by Sales Promotion Manager Doris Henry, and by Manager of Promotion Robert Ralske, shows that circulation is way up (138 per cent) and is entirely in single copy sales, not "bought" subscription circulation, as in some other ladies' magazines. But more than numerical strength, Woman's Day has the power of a service magazine attuned to today's average woman. For instance, it says to the advertising space buyer, "are these fashions related to the life *your wife leads?*" — while it pictures some bizarre, way-out fashions culled from the pages of McCall's or LADIES HOME JOURNAL. WOMAN'S DAY, on the other hand, features fashions "a woman can not only admire, but *buy and wear.*" — stuff that is tasteful, stylish, and realistic, as well.

Compares Features and Figures

The presentation shows some wild hair-do's from LHM, some dramatic off-beat food planning pages from McC, and contrasts them with beauty and food stories in WD. Very impressive comparisons — all taken from one month's issues of all the leading women's service magazines.

And there are statistics to look at, too — Roper readership studies, successful case histories of advertising response, comparisons between the values of 50¢ magazines you can subscribe to for 12½¢ including postage, and those which sell, full-price, unforced, ungimmicked, 100 per cent single copy sales.

The magazine has found that by bringing its own sales staff strongly into the presentation —

attuning the show to each man and thus making it personally his own — it could relate much stronger to the audience. Salesmen are speaking to the people they know well, people they call on regularly.

Preparation for Showmanship

Throughout the weeks of presentation, each salesman was given a script in advance, for practice, and given two full dress rehearsal-

sals before going on. They have not only universally enjoyed giving the performance, but have been remarkably effective as well.

Backstage, the foolproof setup, designed and constructed by Visualexcope technicians, could be put together in a new town (for the traveling unit) in a strange room in a little over two hours and looks as if it were custom-made for the room. ☐

Key to Film Results

A Buyer's Guide to the Producer Listing Pages

IN THE 67 PAGES which provide facts-in-depth on specializing film (and tape) production facilities throughout the United States, Canada and abroad, the Editors of BUSINESS SCREEN again provide the most authoritative and comprehensive buyer's reference guide available anywhere. The reader can look *beyond* the definitive lines which disclose key personnel, into details on the nature of services and physical equipment available. *Most important of all* are the *references* which provide data on clients and the types of work performed by these listed companies.

The listings include 377 companies in the U.S.; 14 in Canada and an additional 68 producers on other continents. Within these U. S. companies we name 2,015 key people on permanent staffs of listed studios. Data on 110 branches is made available for your convenience. And there are, in this 14th Annual Production Review, specific titles and sponsors of some 1,921 motion pictures and 633 slidefilms to which you may refer.

Look for these primary guidelines when considering a producer: *financial stability* (the ability to complete a given assignment on original terms); *permanence of staff and physical facilities*; and *experience* (familiarity with the specific medium involved as well as ability to undertake the subject matter). References set forth here are *representative*; see these and other relevant films submitted by the producer.

Those who specialize in the television commercial are listed with appropriate credits; only new companies, not previously listed or organized in 1963, are accepted without the *prerequisite of five or more films*. The exceptions to this rule are notable. An individual or company of known repute handling a single subject requiring time may be accepted by editorial board ruling — and only a few were.

Inevitable "gremlins" or type errors will be promptly corrected and listings too late for publication in this Review will appear in our first Production Review Supplement at mid-year.

Signal is "GO" on Roads to the Fair

New York's Long-Range Traffic Plans in "Roads to the Future"

WITH WORLD'S FAIR crowds numbering into the millions about to descend on the metropolitan New York area, enroute to Fairgrounds on Flushing Meadows, a comprehensive picture of highway developments which have taken place in that area is of keen interest. The recent 28½-minute color motion picture, *Roads to the Future*, produced for the Triborough Bridge and Tunnel Authority, headed by Robert Moses, by John Campbell Films, is a most instructive and illuminating view of that subject.

Roads to the Future actually starts in the past — with scenes of New York traffic dating back to 1900. It enlarges to the vista of the twenties and thirties, when the "population explosion" in automobiles was matched by the development of New York's bridges,

tunnels and the first expressways.

The superhighways of the sixties are the highlights of the picture. They were lensed from speeding planes, from hovering helicopters (with unusual smoothness) and from a weird camera vehicle which startled New York area drivers for months—a convertible equipped with a revolving executive armchair in place of the normal back seat, carrying a strapped-in cameraman instead of the usual passenger.

The cameraman was Michael Livesey; the chair belonged to director John Campbell. *Roads to the Future* was superbly edited by Ray Sandiford and its music supplied by Bob Velazco. Animation was by Visualexcope, Inc. The film is being released by Association Films and will encourage travelers who plan auto trips to the Fair. ☐

Superbly-animated scenes give viewers of "Roads to the Future" a panoramic look at New York's bridges and highways of today — and those to come.

Your Key to Producer Listings

☆ The detail in depth of these listings of business and television film companies provides the sponsor, advertising agency and government film buyer with a complete picture of his prospective producer.

In addition to names of principal officers and data on services and physical studio facilities, the facts on "Recent Productions and Sponsors" show the nature of recent studio experience, of films produced in the past year. Preview current pictures as a prerequisite to purchase; bidders should also provide factual data on experience, staff, facilities and financial stability.

There was no charge or obligation whatsoever to these listed companies; every known source was contacted with three separate first-class mailings. Only those who furnished evidence of recent production were accepted for unqualified listing.

Sound Advice for Film Sponsors

☆ A careful study of the prospective producer's listing text is a prerequisite to film buying. See the pictures listed by the company; note the nature of client references. And if the prospective producer isn't listed in these pages visit his facilities: meet permanent staff personnel and view current pictures identified as his own productions.

MERIT PRODUCTIONS:

SERVICES: Motion pictures and filmstrips; script services; sports coverage with multiple camera setups; overnight production of sports events. Release through major theatrical distributor. **FACILITIES:** Editing, cameras and sound equipment.

RECENT PRODUCTIONS AND SPONSORS

MOTION PICTURES: *Working for Better Health* (Federal Service Campaign); *Tradition of Travel* (Engazy Travel Bureau); *Patterson-Liston Fight* (release through Allied Artists); *Clay-Liston Fight* (release through 20th-Fox). **TV PROGRAM:** *Portrait of a Player*, syndication (SportsVision Inc.). **FILMSTRIPS:** *Kennedy - Boyhood to President* (no sponsor indicated).

METROVISION, INC.
